I would like to voice my opinion about Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

I cannot believe that raw milk is not allowed to be sold. I grew up in a large village where 100s of children (and adults) lived on the diet that included lots of raw milk. I am still in contact with a lot of those people living in the village and all of them are much healthier than people living in the city and drinking pasturized milk.

I cannot comprehend that there is no problem in selling alcohol freely where there is absolutely no positive health benefits there, but for raw milk we have to fight!

Please let us choose for ourselves how we would like to drink our milk. If we have a choice, people that want to buy pasturized milk can still get it, and for those of us that drinking our milk in a way nature intended is important, we can also have a choice.

At the moment we have no choice and that is not fair. In our household we now drink soy milk instead of cow's milk because we do not want to drink pasturized and homogenized milk. If milk was raw we would certainly buy it and drink it.

Sincerely  
Bozena Warzecha (household CEO)
