I am writing to voice my concerns about the unavailability of raw milk

I would happily purchase and consume raw milk because of its substantial health benefits, but cannot . I do not drink pasturized milk.

The Pottingers Cats experiment was enough for me....Two lots of cats ,one on raw milk the other on pasturised.

The group on raw milk thrived and the other had major health disadvantages...the worst part of the experiment was the next generation of cats!!!

Yours in Health
