Dear Madam or Sir,

I do not want to eat GM organisms or foods. There is no reason for them (apart from corporate profits. And I don't think corporates should control any larger part of our food supply.)

GM organisms and food (If introduced - for which there is no good reason) should be subject to the same testing and supervision as drugs. I do not want to be used as a test animal by corporates. (Without testing and monitoring adversarial consequences will be hard to determine.)

Any GM food or organism should be clearly labelled as such. (What justification can there be for consumers not having an informed choice?)

I oppose any loosening of regulation on GM food and organisms.

Yours sincerely,

[REDACTED]
