### Submission Rec 34: Review required labelling of irradiated foods

I submit that irradiated foods should be labelled to show that they have been irradiated. My reasons are:

1. The purpose of irradiation is to kill organisms in the food. It therefore causes changes to the food e.g. dead larvae in the food, dead beneficial organisms, or chemical changes. Harmful changes may await future discovery.
2. As a buyer I have a right to know what the food I buy contains. This should include irradiation treatment as it leaves by products in the food.
3. I should be treated with respect and not denied the chance to avoid irradiated foods.
