

Attachment A – Approved draft variations to the *Australia New Zealand Food Standards Code*

Australia New Zealand Food Standards Code

Food Standards Australia New Zealand Act 1991

This Code consists of standards made under the *Food Standards Australia New Zealand Act 1991*.

As in effect on 1 March 2016.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—1

Name

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

1.1.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.1.1 — Structure of the Code and general provisions*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.1.1—2 Structure of the Code

- (1) All the standards of the Code are read together as a single instrument.
- (2) The standards of the Code are arranged into Chapters, Parts and a set of Schedules as shown below:

Note The Chapters cover the following material

- (a) Chapter 1:
 - (i) preliminary material; and
 - (ii) provisions that apply to all foods;
- (b) Chapter 2—provisions that apply only to particular foods;
- (c) Chapter 3—food hygiene (applies in Australia only);
- (d) Chapter 4—the primary production and processing of food (applies in Australia only);
- (e) Chapter 5—revocation of previous versions of standards 1.1.1 to 2.10.3 and transitional matters.

Schedules 1 to 30 follow Chapter 5.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—2

Structure of the Code

Chapter 1 Introduction and standards that apply to all foods

Part 1.1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Standard 1.1.2 Definitions used throughout the Code

Part 1.2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Standard 1.2.2 Information requirements—food identification

Standard 1.2.3 Information requirements—warning statements, advisory statements and declarations

Standard 1.2.4 Information requirements—statement of ingredients

Standard 1.2.5 Information requirements—date marking of food for sale

Standard 1.2.6 Directions for use and storage

Standard 1.2.7 Nutrition, health and related claims

Standard 1.2.8 Nutrition information requirements

Note There is no Standard 1.2.9

Standard 1.2.10 Characterising ingredients and components of food

Standard 1.2.11 Country of origin labelling requirements

Note Applies in Australia only

Part 1.3 Substances added to or present in food

Standard 1.3.1 Food additives

Standard 1.3.2 Vitamins and minerals

Standard 1.3.3 Processing aids

Part 1.4 Contaminants and residues

Standard 1.4.1 Contaminants and natural toxicants

Standard 1.4.2 Agvet chemicals

Note Applies in Australia only

Note There is no Standard 1.4.3

Standard 1.4.4 Prohibited and restricted plants and fungi

Part 1.5 Foods requiring pre-market clearance

Standard 1.5.1 Novel foods

Standard 1.5.2 Food produced using gene technology

Standard 1.5.3 Irradiation of food

Part 1.6 Microbiological limits and processing requirements

Standard 1.6.1 Microbiological limits for food

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—2

Structure of the Code

Standard 1.6.2 Processing requirements for meat

Note Applies in Australia only

Chapter 2 Food standards

Part 2.1 Cereals

Standard 2.1.1 Cereals and cereal products

Part 2.2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Standard 2.2.2 Eggs and egg products

Standard 2.2.3 Fish and fish products

Part 2.3 Fruit and vegetables

Standard 2.3.1 Fruit and vegetables

Standard 2.3.2 Jam

Part 2.4 Edible oils

Standard 2.4.1 Edible oils

Standard 2.4.2 Edible oil spreads

Part 2.5 Dairy products

Standard 2.5.1 Milk

Standard 2.5.2 Cream

Standard 2.5.3 Fermented milk products

Standard 2.5.4 Cheese

Standard 2.5.5 Butter

Standard 2.5.6 Ice cream

Standard 2.5.7 Dried milk, evaporated milk and condensed milk

Part 2.6 Non-alcoholic beverages

Standard 2.6.1 Fruit juice and vegetable juice

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Standard 2.6.3 Kava

Standard 2.6.4 Formulated caffeinated beverages

Part 2.7 Alcoholic beverages

Standard 2.7.1 Labelling of alcoholic beverages and food containing alcohol

Standard 2.7.2 Beer

Standard 2.7.3 Fruit wine, vegetable wine and mead

Standard 2.7.4 Wine and wine product

Standard 2.7.5 Spirits

Part 2.8 Sugars and honey

Standard 2.8.1 Sugars

Standard 2.8.2 Honey

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—2

Structure of the Code

Part 2.9 Special purpose foods

Standard 2.9.1	Infant formula products
Standard 2.9.2	Food for infants
Standard 2.9.3	Formulated meal replacements and formulated supplementary foods
Standard 2.9.4	Formulated supplementary sports foods
Standard 2.9.5	Food for special medical purposes
Standard 2.9.6	Transitional standard for special purpose foods (including amino acid modified foods)

Note Applies in New Zealand only

Part 2.10 Standards for other foods

Standard 2.10.1	Vinegar and related products
Standard 2.10.2	Salt and salt products
Standard 2.10.3	Chewing gum
Standard 2.10.4	Miscellaneous standards for other foods

Chapter 3 Food safety standards

Note Applies in Australia only

Standard 3.1.1	Interpretation and Application
Standard 3.2.1	Food Safety Programs
Standard 3.2.2	Food Safety Practices and General Requirements
Standard 3.2.3	Food Premises and Equipment
Standard 3.3.1	Food Safety Programs for Food Service to Vulnerable Persons.

Chapter 4 Primary production standards

Note Applies in Australia only

Standard 4.1.1	Primary Production and Processing Standards – Preliminary Provisions
Standard 4.2.1	Primary Production and Processing Standard for Seafood
Standard 4.2.2	Primary Production and Processing Standard for Poultry Meat
Standard 4.2.3	Primary Production and Processing Standard for Meat
Standard 4.2.4	Primary Production and Processing Standard for Dairy Products
Standard 4.2.4A	Primary Production and Processing Standard for Specific Cheeses
Standard 4.2.5	Primary Production and Processing Standard for Eggs and Egg Product

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—2

Structure of the Code

	Standard 4.2.6	Production and Processing Standard for Seed Sprouts
	Standard 4.5.1	Wine Production Requirements
Chapter 5	Revocation, transitionals etc	
	Standard 5.1.1	Revocation and transitional provisions—2014 Revision
Schedules		
	Schedule 1	RDI and ESADDIs
	Schedule 2	Units of measurement
	Schedule 3	Identity and purity
	Schedule 4	Nutrition, health and related claims
	Schedule 5	Nutrient profiling scoring method
	Schedule 6	Required elements of a systematic review
	Schedule 7	Food additive class names (for statement of ingredients)
	Schedule 8	Food additive names and code numbers (for statement of ingredients)
	Schedule 9	Mandatory advisory statements
	Schedule 10	Generic names of ingredients and conditions for their use
	Schedule 11	Calculation of values for nutrition information panel
	Schedule 12	Nutrition information panels
	Schedule 13	Nutrition information required for food in small packages
	Schedule 14	Technological purposes performed by food additives
	Schedule 15	Substances that may be used as food additives
	Schedule 16	Definitions for certain types of substances that may be used as food additives
	Schedule 17	Vitamins and minerals
	Schedule 18	Processing aids
	Schedule 19	Maximum levels of contaminants and natural toxicants
	Schedule 20	Maximum residue limits
	<i>Note</i>	Applies in Australia only
	Schedule 21	Extraneous residue limits
	<i>Note</i>	Applies in Australia only

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—3

Application of Code

Schedule 22	Foods and classes of foods
<i>Note</i>	Applies in Australia only
Schedule 23	Prohibited plants and fungi
Schedule 24	Restricted plants and fungi
Schedule 25	Permitted novel foods
Schedule 26	Food produced using gene technology
Schedule 27	Microbiological limits for foods
Schedule 28	Composition of packaged water
Schedule 29	Special purpose foods

Division 2 Application and interpretation

Note Definitions that are used throughout the Code are contained in Standard 1.1.2.

1.1.1—3 Application of Code

(1) Unless this Code provides otherwise, this Code applies to food that is:

- (a) sold, processed or handled for sale in Australia or New Zealand; or
- (b) imported into Australia or New Zealand.

Note 1 The following provisions have not been incorporated by reference into a food standard under the *Food Act 2014* (NZ):

- (i) sections 1.2.1—7 and 1.2.1—14, and Standard 1.2.11 (country of origin labelling requirements);
- (ii) Standard 1.4.2 (Agvet chemicals);
- (iii) Standard 1.6.2 (processing requirements for meat);
- (iv) section 2.1.1—5 (requirement for folic acid and thiamin in bread);
- (v) section 2.2.1—12 (bovine must be free from bovine spongiform encephalopathy);
- (vi) Standard 2.2.2 (eggs);
- (vii) subsection 2.4.2—3(2) and subsection 2.4.2—3(4) (requirement for food sold as table edible oil spreads and table margarine);
- (viii) Chapter 3 (food safety standards) and Chapter 4 (primary production and processing standards).

Note 2 Standard 2.9.6 (Transitional standard for special purpose foods (including amino acid modified foods)) does not apply in Australia.

(2) Subsection (1) does not apply to wine that:

- (a) has a shelf life of more than 12 months; and
- (b) was bottled before 20 December 2002; and
- (c) complies with all food standards in the case of Australia and all food standards in the case of New Zealand, that would have applied on the date of bottling; and
- (d) is labelled with a 2002 vintage date or earlier.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—4

Application of interpretation legislation

1.1.1—4 Application of interpretation legislation

This Code is to be interpreted in accordance with the rules of interpretation:

- (a) in Australia—the *Acts Interpretation Act 1901* (Cth); and
- (b) in New Zealand—the *Interpretation Act 1999* (NZ).

1.1.1—5 References to other instruments

(1) In this Code:

- (a) a reference to an Act, including an Act of a State or Territory or of New Zealand, includes any instruments made under that Act; and
- (b) a reference to the Code of Federal Regulations, or CFR, is a reference to the 2014 compilation of the United States Code of Federal Regulations.

Note In this Code, the Code of Federal Regulations is cited in the following format:

[title number] CFR § [section number]

(2) Guidelines developed by FSANZ in accordance with paragraph 13(1)(c) of the FSANZ Act are to assist in the interpretation of this Code and are not legally binding.

1.1.1—6 How average quantity is to be calculated

(1) This section applies where this Code requires an *average quantity* of a substance to be declared in the labelling of a food for sale, whether as a percentage or as the amount of the substance in a serving or other amount of the food.

Note The term *average quantity* is defined in section 1.1.2—2.

Example The Code requires the ‘average quantity’ of a variety of substances to be listed in the nutrition information about a food for sale, for example protein, carbohydrate and sugars.

(2) The average quantity is to be calculated by the manufacturer or producer using whichever of the methods in subsection (3) the manufacturer or producer considers to best represent the average quantity, taking into account any factors that would cause the actual amount of the substance in the food to vary from lot to lot, including seasonal variability.

(3) The methods are:

- (a) the amount that the manufacturer or producer of the food determines, based on an analysis, to be the average amount of the substance in a serving or other amount of the food; or
- (b) the calculation of the actual amount of the substance, or the calculation of the average amount of the substance, in the ingredients used for the food; or
- (c) the calculation from generally accepted data relevant to that food.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—7

Units of measurement

1.1.1—7 Units of measurement

- (1) A symbol of measurement used in this Code has the meaning assigned to it by the table in Schedule 2
- (2) If a symbol is not assigned a meaning by the table, it has the meaning assigned to it:
 - (a) in Australia—by the *National Measurement Act 1960* (Cth); or
 - (b) in New Zealand—by the *Weights and Measures Act 1987* (NZ).
- (3) If a symbol is not assigned a meaning by the table or subsection (2), it has the meaning assigned to the symbol by the Systeme Internationale d'Unites.
- (4) Where a unit of measurement is referred to in the heading of a table in this Code, the amounts specified in the table are to be measured according to those units unless a different unit of measurement is specified in relation to a particular item in the table.

1.1.1—8 Compliance with requirements for mandatory statements or words

- (1) If a provision of this Code requires a warning statement or specific words to be used, the warning statement or words must be expressed in the words set out in this Code without modification.
- (2) If a provision of this Code requires a statement other than a warning statement to be used:
 - (a) that statement may be modified; and
 - (b) any modification must not contradict or detract from the effect of the statement.

Division 3 Effect of variations to Code

1.1.1—9 Effect of variations to Code

- (1) Unless this Code, or an instrument varying this Code, provides otherwise, if:
 - (a) this Code is varied; and
 - (b) a food was compliant for a kind of sale immediately before the variation commenced;the food is taken to be compliant for that kind of sale for a period of 12 months beginning on the date of the variation.
- (2) In this section, a food is **compliant** for a kind of sale if:
 - (a) when a labelling requirement of this Code applies to the kind of sale—the labelling of the food complies with the requirement ; and
 - (b) when a packaging requirement of this Code applies to the kind of sale—the packaging of the food complies with the requirement; and

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—9

Effect of variations to Code

- (c) the food complies with any provisions of this Code relating to the composition of food of that kind.

Division 4 Basic requirements

Note 1 In Australia, the Code is enforced under application Acts in each State and Territory, and under Commonwealth legislation dealing with imported food. In outline, this scheme operates as follows:

- (1) The application Acts comprise a uniform legislative scheme based on Model Food Provisions that are annexed to the *Food Regulation Agreement*, an agreement between the Commonwealth, States and Territories. Under those Acts, a person:
 - (a) must comply with any requirement imposed on the person by a provision of this Code in relation to:
 - (i) the conduct of a food business; or
 - (ii) food intended for sale; or
 - (iii) food for sale; and
 - (b) must not sell any food that does not comply with any requirement of this Code that relates to the food; and
 - (c) must not sell or advertise any food that is packaged or labelled in a manner that contravenes a provision of this Code; and
 - (d) must not sell or advertise for sale any food in a manner that contravenes a provision of this Code; and
 - (e) must not, for the purpose of effecting or promoting the sale of any food in the course of carrying on a food business, cause the food to be advertised, packaged or labelled in a way that falsely describes the food.
- (2) For paragraph (1)(e), food is falsely described if:
 - (a) it is represented as being of a particular nature or substance; and
 - (b) the Code provides a prescribed standard for such food; and
 - (c) the food does not comply with the prescribed standard.
- (3) The relevant Acts are:
 - (a) *Food Act 2003* (New South Wales)
 - (b) *Food Act 1984* (Victoria)
 - (c) *Food Act 2006* (Queensland)
 - (d) *Food Act 2008* (Western Australia)
 - (e) *Food Act 2001* (South Australia)
 - (f) *Food Act 2003* (Tasmania)
 - (g) *Food Act 2001* (Australian Capital Territory)
 - (h) *Food Act 2004* (Northern Territory).
- (4) Under the *Imported Food Control Act 1992* (Commonwealth), a person is prohibited from:
 - (a) importing into Australia food that does not meet applicable standards of this Code, other than those relating to information on labels of packaged food; and
 - (b) dealing with imported food that does not meet applicable standards relating to information on labels of packaged food.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—10 Requirements relating to food for sale

Note 2 In New Zealand, under the *Food Act 2014* (NZ) a person commits an offence if the person breaches or fails to comply with –

- (a) a requirement in an adopted joint food standard or a domestic food standard;
- ...

1.1.1—10 Requirements relating to food for sale

- (1) This section applies in relation to food for sale.

Compositional requirements

- (2) Subject to this section, food for sale may consist of, or have as an ingredient, any food.
- (3) Food for sale must comply with any provisions of this Code relating to the composition of food of that kind (including provisions relating to the presence of other substances in food of that kind).
- (4) Where a compositional requirement permits the use of ‘other foods’ or ‘other ingredients’ as ingredients, the permission does not extend to the addition of a food or a substance that is otherwise not permitted to be added to food, or to the specified food, under this Code.
- (5) Unless expressly permitted by this Code, food for sale must not be any of the following:
 - (a) a *prohibited plant or fungus, a *restricted plant or fungus, or coca bush;
 - (b) if the food is for retail sale—a *novel food;
 - (c) a *food produced using gene technology;
 - (d) a food that has been irradiated;
 - (e) kava or any substance derived from kava.
- (6) Unless expressly permitted by this Code, food for sale must not have as an ingredient or a component, any of the following:
 - (a) a substance that was *used as a food additive;
 - (b) a substance that was *used as a nutritive substance;
 - (c) a substance that was *used as a processing aid;
 - (d) in Australia—a detectable amount of:
 - (i) an *agvet chemical; or
 - (ii) a metabolite or degradation product of an agvet chemical;
 - (e) a *prohibited plant or fungus, a *restricted plant or fungus, or coca bush;
 - (f) if the food is for retail sale—a *novel food;
 - (g) a *food produced using gene technology;
 - (h) a food that has been irradiated;
 - (i) kava or any substance derived from kava.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—11 Microbiological requirements for lot of a food

Note 1 Relevant permissions for subsections (3) and (4) are contained in various standards. See in particular:

- food additives—Standard 1.3.1;
- nutritive substances—Standard 1.3.2, Standard 2.6.2, Standard 2.9.1, Standard 2.9.2, Standard 2.9.3, Standard 2.9.4, and Standard 2.9.5;
- processing aids—Standard 1.3.3;
- agvet chemical residues—Standard 1.4.2;
- prohibited plants and fungi—Standard 1.4.4;
- novel foods—Standard 1.5.1;
- food produced using gene technology—Standard 1.5.2;
- irradiated food—Standard 1.5.3;
- kava—Standard 2.6.3.

Note 2 There is an overlap between some of these categories. For example, some substances may be used as a food additive or as a nutritive substance. For such substances, there will be different provisions permitting use of the substance for different purposes.

Note 3 In some cases, a provision refers to the total amount of a substance added to a food. In these cases, the total amount applies irrespective of whether the substance was used as a food additive, used as a processing aid or used as a nutritive substance.

(7) Subsection (6) does not apply to a substance that is in a food for sale, or in an ingredient of a food for sale, by natural occurrence.

Labelling requirements

(8) If a labelling requirement of this Code applies to the sale of food, the labelling must comply with the requirement.

Information requirements

(9) If an information requirement of this Code applies to the sale of food, the information must be provided as required.

Packaging requirements

(10) If a packaging requirement of this Code applies to the sale of food, the packaging must comply with the requirement.

(11) Any packaging, and any article or material in the packaging or in contact with the food, must not, if taken into the mouth:

- (a) be capable of being swallowed or obstructing any alimentary or respiratory passage; or
- (b) be otherwise likely to cause bodily harm, distress or discomfort.

Example Articles or materials include any materials in contact with food, including packaging materials that contain other items such as moisture absorbers, mould inhibitors, oxygen absorbers, promotional materials, writing or other graphics.

1.1.1—11 Microbiological requirements for lot of a food

A lot of a food must not have an unacceptable level of microorganisms as determined in accordance with Standard 1.6.1.

Note For the meaning of *lot*, see section 1.1.2—2.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—12

Applicable standards for importation of food

1.1.1—12 Applicable standards for importation of food

- (1) The provisions of this Code relating to labelling are applicable to food that is imported with the labelling with which it is intended to be sold.
- (2) The provisions of this Code relating to packaging are applicable to food that is imported in the packaging in which it is intended to be sold.
- (3) The provisions of this Code, other than those relating to packaging and labelling, are applicable to food that is imported.

Note This provision is relevant to the *Imported Food Control Act 1992* (Commonwealth), and the provisions of the *Food Act 2014* (NZ) that relate to importation of food.

1.1.1—13 Food sold with a specified name or representation

- (1) This section applies where a provision of this Code that provides that a food that is sold as a named food, whether or not the name is in quotation marks, must satisfy certain requirements (usually that the food being sold must satisfy the definition of the food in this Code).

Example The provisions in Chapter 2 headed ‘Requirement for food sold as ...’, eg

2.1.1—3 Requirement for food sold as bread
A food that is sold as bread must be bread.

In this example bread is the food and is not in quotation marks.

- (2) If the provision specifies the name of the food in quotation marks, any requirement that must be satisfied applies only if that name is used in connection with the sale.

Note 1 The foods to which a requirement that must be satisfied applies only if the name of the food is used include: butter, chocolate, cider, cocoa, coffee, cream, decaffeinated coffee, decaffeinated instant coffee, decaffeinated instant tea, decaffeinated soluble tea, decaffeinated soluble tea, decaffeinated tea, gelatine, ice cream, imitation vinegar, instant tea, iodised reduced sodium salt mixture, iodised salt, margarine, mead, milk, peanut butter, perry, processed cheese, salt, skim milk, soluble coffee, soluble tea, table margarine, tea, vinegar, white sugar, wholegrain, wholemeal and yoghurt. These are foods that are identified in quotation marks in provisions to which subsection (1) applies.

Example A cocoa based confectionery that is not sold as a chocolate confectionery; or a water-based beverage that contains fruit but is not sold as fruit juice, need not satisfy a requirement about chocolate or fruit juice.

- (3) If the provision specifies the name of the food without quotation marks, any requirement that must be satisfied applies to any sale in which a purchaser is likely to assume that the food being sold was the food.

Note A requirement that must be satisfied applies to any sale in which a purchaser is likely to assume that the food being sold is, for example: ale, beer, brandy, bread, cheese, condensed skim milk, condensed whole milk, dried skim milk, dried whole milk, edible oil spread, electrolyte drink, electrolyte drink mix, evaporated skim milk, evaporated whole milk, fermented milk, fruit drink, fruit juice, fruit wine, fruit wine product, jam, lager, liqueur, meat pie, pilsener, porter, sausage, spirit, stout, table edible oil spread, vegetable juice, vegetable wine, vegetable wine product, wine and wine product. These are foods that are not identified in quotation marks in provisions to which subsection

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—14 Other requirements relating to food

(1) applies. Use of the name could be an element of a representation about the identity of the food.

Example Bread sold as sourdough; a cheese or processed cheese sold as cheddar or processed cheddar; or a sausage sold as bratwurst. Jam may be sold as conserve.

Example 2 Steak pie or lamb pie must contain no less than 250 g/kg of meat flesh.

(4) If a food name is used in connection with the sale of a food (for example in the labelling), the sale is taken to be a sale of the food as the named food unless the context makes it clear that this is not the intention.

Examples Section 2.7.2—3, relating to beer, does not prevent the use of ‘ginger beer’ in relation to the soft drink. Such a product is not beer for the purposes of the Code.

Section 2.1.1—3, relating to ‘bread’, does not prevent the use of ‘shortbread’ or ‘crispbread’ in relation to those foods, or ‘unleavened bread’ to describe the food made without the yeast that would be required for it to be sold as ‘bread’. Those products are not bread for the purposes of the Code.

The context within which foods such as soy milk or soy ice cream are sold is indicated by use of the name soy; indicating that the product is not a dairy product to which a dairy standard applies.

1.1.1—14 Other requirements relating to food

Requirements for handling of food

(1) If this Code sets requirements for the handling of food, the food must be handled in accordance with those requirements.

Note This subsection relates to requirements in Chapter 3 and has application in Australia only.

Requirements for record-keeping

(2) If this Code sets requirements for record-keeping in relation to food, those requirements must be complied with.

1.1.1—15 Identity and purity

(1) This section applies to the following substances when added to food in accordance with this Code, or sold for use in food:

- (a) a substance that is *used as a food additive;
- (b) a substance that is *used as a processing aid;
- (c) a substance that is *used as a nutritive substance;
- (d) a *novel food.

(2) The substance must comply with any relevant specification set out in Schedule 3.

1.1.1—16 Use of asterisks to identify terms defined in subsection 1.1.2—2(3)

(1) Many of the terms in this Code are defined in subsection 1.1.2—2(3).

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.1 Structure of the Code and general provisions

Section 1.1.1—16

Use of asterisks to identify terms defined in subsection 1.1.2—2(3)

- (2) Most of the terms that are defined in subsection 1.1.2—2(3) are identified by an asterisk appearing at the start of the term: as in “*carbohydrate”.
- (3) An asterisk usually identifies the first occurrence of a term in a section (if not divided into subsections), subsection or definition. Later occurrences of the term in the same provision are not usually asterisked.
- (4) Terms are not asterisked in headings, notes, examples, explanatory tables, guides, outline provisions or diagrams.
- (5) If a term is not identified by an asterisk, disregard that fact in deciding whether or not to apply to that term a definition or other interpretation provision.
- (6) The following basic terms used throughout the Code are not identified with an asterisk:

Terms defined in subsection 1.1.2—2(3) that are not identified with asterisks

<i>Item</i>	<i>Term</i>
1	claim
2	Code
3	fat
4	food
5	food additive
6	fruit
7	infant
8	label
9	labelling
10	nutrition content claim
11	package
12	serving
13	statement of ingredients
14	sugars

Section 1.1.2—1

Name

Standard 1.1.2 Definitions used throughout the Code

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.1.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.1.2 — Definitions used throughout the Code*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.1.2—2 Definitions—general

Note Definitions for foods are provided in section 1.1.2—3.

- (1) Subject to subsection (2), a term used in this Code that is also used in the *FSANZ Act has the same meaning as in the FSANZ Act, unless the contrary intention appears.
- (2) In applying this Code under an application Act, a term used in this Code that is also used in the *application Act has the same meaning as in the application Act, unless the contrary intention appears.

Example A contrary intention is apparent in the definition of *label* in subsection 1.1.2—2(3).

- (3) In this Code, unless the contrary intention appears, the following definitions apply:

additive permitted at GMP—see section 1.1.2—11

agvet chemical means an agricultural chemical product or a veterinary chemical product, within the meaning of the Agvet Code.

Note The Agvet Code is the Agricultural and Veterinary Chemicals Code set out in the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994* (Cth). See subsection 4(1) of the FSANZ Act.

amino acid modified food—see section 2.9.6—2.

AS/NZS means a joint Australia New Zealand Standard published by Standards Australia.

application Act means an Act or Ordinance of a *jurisdiction under which the requirements of this Code are applied in the jurisdiction.

AS means an Australian Standard published by Standards Australia.

assisted service display cabinet means an enclosed or semi-enclosed display cabinet which requires a person to serve the food as requested by the purchaser.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

authorised officer, in relation to a jurisdiction, means a person authorised or appointed under an application Act or other legislation of the relevant *jurisdiction for the purposes of enforcement of a provision of the relevant application Act, or for purposes that include that purpose.

available carbohydrate means available carbohydrate calculated in accordance with section S11—3.

available carbohydrate by difference means available carbohydrate by difference calculated in accordance with section S11—3.

average energy content means the average energy content calculated in accordance with section S11—2.

average quantity, of a substance in a food, means the average, for such foods from that producer or manufacturer, of:

- (a) where a serving or reference amount is specified—the amount of the substance that such a serving or reference amount contains; or
- (b) otherwise—the proportion of that substance in the food, expressed as a percentage.

Note See also section 1.1.1—6.

baked-for date, in relation to bread, means:

- (a) if the time at which the bread was baked is before midday—the baked-on date;
- (b) if the time at which the bread was baked is on or after midday—the day after the baked-on date.

baked-on date, in relation to bread, means the date on which the bread was baked.

bear a label: a food for sale is taken to **bear a label** of a specified kind or with specified content if either of the following is part of or attached to the packaging of the food:

- (a) a label of that kind or with that content;
- (b) labels that together are of that kind or have that content.

best-before date, for a food for sale, means the date up to which the food will remain fully marketable and will retain any specific qualities for which express or implied claims have been made, if the food:

- (a) remains in an intact package during its storage; and
- (b) is stored in accordance with any storage conditions applicable under Standard 1.2.6.

biologically active substance means a substance, other than a nutrient, with which health effects are associated.

biomarker means a measurable biological parameter that is predictive of the risk of a *serious disease when present at an abnormal level in the human body.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

bulk cargo container:

- (a) means an article of transport equipment, being a lift van, movable tank, shipping container, aircraft cargo container or other similar structure:
 - (i) of a permanent character and accordingly strong enough to be suitable for repeated use; and
 - (ii) specifically designed to facilitate the carriage of goods by one or more modes of transport, without immediate repacking; and
 - (iii) fitted with devices permitting its ready handling and its transfer from one mode of transport to another; and
 - (iv) so designed as to be easy to fill and empty; and
 - (v) having an internal volume of one cubic metre or more; and
- (b) includes the normal accessories and equipment of the container, when imported with the container and used exclusively with it; and
- (c) does not include any vehicle, or any ordinary packing case, crate, box, or other similar article used for packing.

business address means the street address, or a description of the location, of the premises from which a business is being operated.

carbohydrate, other than in the definition of ***beer*** (section 1.1.2—3), means *available carbohydrate or *available carbohydrate by difference.

caterer means a person, establishment or institution (for example, a catering establishment, a restaurant, a canteen, a school, or a hospital) which handles or offers food for immediate consumption.

characterising component—see section 1.1.2—4.

characterising ingredient—see section 1.1.2—4.

claim means an express or implied statement, representation, design or information in relation to a food or a property of food which is not mandatory in this Code.

claim requiring nutrition information:

- (a) means:
 - (i) a nutrition content claim; or
 - (ii) a health claim; and
- (b) does not include:
 - (i) a declaration that is required by an application Act; or
 - (ii) an endorsement.

Code, or ***this Code***, means the Australia New Zealand Food Standards Code.

code number, used in relation to a substance *used as a food additive, means either:

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

- (a) the number set out in the table to Schedule 8 in relation to that substance; or
- (b) that number preceded by the letter 'E'.

colouring permitted at GMP—see section 1.1.2—11

colouring permitted to a maximum level—see section 1.1.2—11

comminuted means chopped, diced or minced.

component, of a food, means a substance that is present as a constituent part of the food (as distinct from an ingredient).

Example If sodium bicarbonate is used as an ingredient to produce a food, it will be changed by the cooking into carbon dioxide and salts; the salts are identifiable as components of the food.

compound ingredient: an ingredient of a food is a **compound ingredient** if it is itself made from two or more ingredients.

dietary fibre means that fraction of the edible part of plants or their extracts, or synthetic analogues that:

- (a) is resistant to digestion and absorption in the small intestine, usually with complete or partial fermentation in the large intestine; and
- (b) promotes one or more of the following beneficial physiological effects:
 - (i) laxation;
 - (ii) reduction in blood cholesterol;
 - (iii) modulation of blood glucose;

and includes:

- (c) polysaccharides or oligosaccharides that have a degree of polymerisation greater than 2; and
- (d) lignins.

endorsement means a nutrition content claim or a health claim that is made with the permission of an endorsing body.

endorsing body means a not-for-profit entity that:

- (a) has a nutrition- or health-related purpose or function; and
- (b) permits a *supplier to make an endorsement.

ESADDI means Estimated Safe and Adequate Daily Dietary Intake—see section 1.1.2—10.

extraneous residue limit or **ERL**, for an *agvet chemical in a food, means the amount identified in Schedule 21 for that agvet chemical in that food.

fat, in Standards 1.2.7 and 1.2.8 and Schedules 4 and 11, means total fat.

flavouring substance means a substance that is used as a food additive to perform the technological purpose of a flavouring in accordance with this Code.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

food—see subsection (2) (the term has the same meaning as in the relevant application Act).

Note Each of the various application Acts has a definition of **food**. These all have a similar effect and make the concept very broad, effectively covering anything that is intended or offered for human consumption

Food Act means the *Food Act 2014* (NZ).

food additive—see *used as a food additive*, section 1.1.2—11.

food group means any of the following groups:

- (a) bread (both leavened and unleavened), grains, rice, pasta and noodles;
- (b) fruit, vegetables, herbs, spices and fungi;
- (c) milk, skim milk, cream, fermented milk, yoghurt, cheese, processed cheese, butter, ice cream, condensed milk, dried milk, evaporated milk, and dairy analogues derived from legumes and cereals listed in section S17—4;
- (d) meat, fish, eggs, nuts, seeds and dried legumes;
- (e) fats including butter, edible oils and edible oil spreads.

food produced using gene technology means a food which has been derived or developed from an organism which has been modified by gene technology.

Note This definition does not include food derived from an animal or other organism which has been fed food produced using gene technology, unless the animal or other organism is itself a product of gene technology.

FSANZ means Food Standards Australia New Zealand.

FSANZ Act means the *Food Standards Australia New Zealand Act 1991* (Cth).

fund raising event means an event that raises funds solely for a community or charitable cause and not for personal financial gain.

galacto-oligosaccharides means a mixture of the substances produced from lactose by enzymatic action, comprised of between two and eight saccharide units, with one of these units being a terminal glucose and the remaining saccharide units being galactose, and disaccharides comprised of two units of galactose.

gene technology means recombinant DNA techniques that alter the heritable genetic material of living cells or organisms.

general level health claim means a health claim that is not a high level health claim.

general level health claims table means the table to section S4—5.

geographical indication—see section 2.7.5—4.

gluten means the main protein in wheat, rye, oats, barley, triticale and spelt relevant to the medical conditions coeliac disease and dermatitis herpetiformis.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

glycaemic index (GI) means a measure of the blood glucose raising ability of the digestible carbohydrates in a given food as determined by a recognised scientific method.

GMP or **Good Manufacturing Practice**, with respect to the addition of substances used as food additives and substances used as processing aids to food, means the practice of:

- (a) limiting the amount of substance that is added to food to the lowest possible level necessary to accomplish its desired effect; and
- (b) to the extent reasonably possible, reducing the amount of the substance or its derivatives that:
 - (i) remains as a *component of the food as a result of its use in the manufacture, processing or packaging; and
 - (ii) is not intended to accomplish any physical or other technical effect in the food itself;
- (c) preparing and handling the substance in the same way as a food ingredient.

hamper means a decorative basket, box or receptacle that:

- (a) contains one or more separately identifiable foods; and
- (b) may contain other items, such as decorative cloths, glasses and dishes.

health claim means a claim which states, suggests or implies that a food or a property of food has, or may have, a health effect.

Note See also subsection 2.10.2—8(3).

health effect means an effect on the human body, including an effect on one or more of the following:

- (a) a biochemical process or outcome;
- (b) a physiological process or outcome;
- (c) a functional process or outcome;
- (d) growth and development;
- (e) physical performance;
- (f) mental performance;
- (g) a disease, disorder or condition.

high level health claim means a *health claim that refers to a *serious disease or a *biomarker of a serious disease.

high level health claims table means the table to section S4—4.

import includes:

- (a) in Australia—import from New Zealand; and
- (b) in New Zealand—import from Australia.

individual portion pack—see subsection 1.2.1—6(4).

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

infant means a person under the age of 12 months.

inner package, in relation to a food for special medical purposes, means an individual package of the food that:

- (a) is contained and sold within another package that is labelled in accordance with section 2.9.5—9; and
- (b) is not designed for individual sale, other than a sale by a *responsible institution to a patient or resident of the responsible institution.

Example An example of an inner package is an individual sachet (or sachets) of a powdered food contained within a box that is fully labelled, being a box available for retail sale.

intra-company transfer—see section 1.2.1—18.

inulin-type fructans means mixtures of saccharide chains that have β -D-(2→1) fructosyl-fructose linkages with or without a terminal α -D-(1→2) glucosyl-fructose linked glucose unit.

irradiation, in relation to food, means subjecting the food to ionising radiation, other than ionising radiation imparted to food by measuring or inspection instruments, and **irradiate** and **irradiated** have corresponding meanings.

jurisdiction means a State or Territory of Australia, the Commonwealth of Australia, or New Zealand.

label, in relation to a food for sale, means any tag, brand, mark or statement in writing or any representation or design or descriptive matter that:

- (a) is attached to the food or is a part of or attached to its packaging; or
- (b) accompanies and is provided to the purchaser with the food; or
- (c) is displayed in connection with the food when it is sold.

labelling:

- (a) in relation to a food for sale, **labelling** means all of the labels for the food together; and
- (b) a requirement for the labelling of a food to include specified content is a requirement for at least one of the labels to have that content.

listericidal process means a process that reduces *Listeria monocytogenes* microorganisms in the food to a safe level.

lot means an amount of a food that the manufacturer or producer identifies as having been prepared, or from which foods have been packaged or otherwise separated for sale, under essentially the same conditions, for example:

- (a) from a particular preparation or packing unit; and
- (b) during a particular time ordinarily not exceeding 24 hours.

lot identification, for a food for sale, means a number or other information that identifies:

- (a) the premises where the food was prepared or packed; and
-

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

(b) the *lot of which the food is a part.

maximum residue limit or **MRL**, for an *agvet chemical in a food, means the amount identified in Schedule 20 for that agvet chemical in that food.

medical institution—see section 1.1.2—7.

medium chain triglycerides means triacylglycerols that contain predominantly the saturated fatty acids designated by 8:0 and 10:0.

meet the NPSC means that the *nutrient profiling score of a food described in column 1 of the table to section S4—6 is less than the number specified for that food in column 2 of that table.

monounsaturated fatty acids means the total of cis-monounsaturated fatty acids.

non-traditional food—see section 1.1.2—8.

novel food—see section 1.1.2—8.

NPSC means the nutrient profiling scoring criterion (see section S4—6).

nutrition content claim—see section 1.1.2—9.

Note See also subsection 2.10.2—8(3).

nutrition information panel means a nutrition information panel that is required to be included on a label on a package of food in accordance with Standard 1.2.8.

nutrient profiling score means the final score calculated pursuant to the method referred to in section 1.2.7—26.

nutritive substance—see *used as a nutritive substance*, section 1.1.2—12.

NZS means a New Zealand Standard published by Standards New Zealand.

one-day quantity, in relation to a formulated supplementary sports food, means the amount of that food which is to be consumed in one day in accordance with directions specified in the label.

Note For the meaning of **one-day quantity** in relation to a formulated caffeinated beverage, see subsection 2.6.4—5(5).

package:

- (a) means any container or wrapper in or by which food for sale is wholly or partly encased, covered, enclosed, contained or packaged; and
- (b) if food is carried or sold or intended to be carried and sold in more than one package—includes each package; and
- (c) does not include:
 - (i) a *bulk cargo container; or
 - (ii) a pallet overwrap; or
 - (iii) a crate and packages which do not obscure labels on the food; or
 - (iv) a transportation vehicle; or
 - (v) a vending machine; or

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

- (vi) a hamper; or
- (vii) a container or wrapper (including a covered plate, cup, tray or other food container) in which food is served in a prison, hospital or *medical institution; or
- (viii) for Standard 2.9.5—a covered plate, cup, tray or other food container in which food for special medical purposes is served by a *responsible institution to a patient or resident.

permitted flavouring substance means any of the following:

- (a) a substance that is listed in at least one of the following publications:
 - (i) Generally Recognised as Safe (GRAS) lists of flavouring substances published by the Flavour and Extract Manufacturers' Association of the United States from 1960 to 2013 (edition 26);
 - (ii) Chemically-defined flavouring substances, Council of Europe, November 2000;
 - (iii) Annex I of Council Regulation (EU) No 872/2012 of 1 October 2012 adopting the list of flavouring substances [2012] OJ L267/1;
 - (iv) 21 CFR § 172.515;
- (b) a *flavouring substance obtained by physical, microbiological, enzymatic or chemical processes from material of vegetable or animal origin either in its raw state or after processing by traditional preparation process including drying, roasting and fermentation;
- (c) a flavouring substance that is obtained by synthetic means and which is identical to one of the substances described in paragraph (b).

phytosterols, phytostanols and their esters: a reference to ***phytosterols, phytostanols and their esters*** is a reference to a substance which meets a specification for phytosterols, phytostanols and their esters in section S3—24.

polyunsaturated fatty acids means the total of polyunsaturated fatty acids with cis-cis-methylene interrupted double bonds.

prescribed name, of a particular food, means a name declared by a provision of this Code to be the prescribed name of the food.

Note Under the labelling provisions in Standard 1.2.1 and section 1.2.2—2, if a food has a prescribed name, it must be used in the labelling of the food.

processing aid—see ***used as a processing aid***, section 1.1.2—13.

property of food means a *component, ingredient, constituent or other feature of food.

protein substitute means:

- (a) L-amino acids; or
- (b) the hydrolysate of one or more of the proteins on which infant formula product is normally based; or

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

- (c) a combination of L-amino acids and the hydrolysate of one or more of the proteins on which infant formula product is normally based.

RDI means Recommended Dietary Intake—see section 1.1.2—10.

ready-to-eat food means a food that –

- (a) is ordinarily consumed in the same state as that in which it is sold; and
- (b) will not be subject to a *listericidal process before consumption; and
- (c) is not one of the following –
- (i) shelf stable foods;
 - (ii) whole raw fruits;
 - (iii) whole raw vegetables
 - (iv) nuts in the shell;
 - (v) live bivalve molluscs.

reference food, in relation to a claim, means a food that is:

- (a) of the same type as the food for which the claim is made and that has not been further processed, formulated, reformulated or modified to increase or decrease the energy value or the amount of the nutrient for which the claim is made; or
- (b) a dietary substitute for the food in the same *food group as the food for which the claim is made.

reference quantity means:

- (a) for a food listed in the table to section S17—4, either:
- (i) the amount specified in the table for that food; or
 - (ii) for a food that requires dilution or reconstitution according to directions—the amount of the food that, when diluted or reconstituted, produces the quantity referred to in subparagraph (i); or
- (b) for all other foods:
- (i) a normal serving; or
 - (ii) for a food that requires dilution, reconstitution, draining or preparation according to directions—the amount of the food that, when diluted, reconstituted, drained or prepared produces a normal serving.

releasable calcium, Ca_R , means the amount of calcium, in mg/g of chewing gum, released into the mouth during 20 minutes of chewing that is calculated using the following equation:

$$Ca_R = \frac{(Ca_o \times W_o) - (Ca_c \times W_c)}{W_o}$$

where:

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

Ca_O is the original calcium concentration in the chewing gum in mg/g of chewing gum.

W_O is the weight of the original chewing gum in g.

Ca_C is the residual calcium in the gum after it has been chewed for 20 minutes in mg/g of chewing gum.

W_C is the weight of the chewed gum in g.

relevant authority means an authority responsible for the enforcement of the relevant application Act.

responsible institution means a hospital, hospice, aged care facility, disability facility, prison, boarding school or similar institution that is responsible for the welfare of its patients or residents and provides food to them.

saturated fatty acids means the total of fatty acids containing no double bonds.

sell—see subsection (2) (the term has the same meaning as in the relevant application Act).

Note Each of the various application Acts has a definition of **sell**. These all have a similar effect and make the concept very broad; they include offering or displaying for sale, and other contexts that go beyond the ordinary meaning of the word.

serious disease means a disease, disorder or condition which is generally diagnosed, treated or managed in consultation with or with supervision by a health care professional.

servings means an amount of the food which constitutes one normal serving when prepared according to manufacturer's directions or when the food requires no further preparation before consumption, and in the case of a formulated meal replacement is equivalent to one meal.

size of type means the measurement from the base to the top of a letter or numeral.

small package means a package with a surface area of less than 100 cm².

SPC:

- (a) means a standard plate count at 30°C with an incubation time of 72 hours; and
- (b) in relation to powdered infant formula with added lactic acid producing organisms—means that standard plate count prior to the addition of the microorganisms to the food.

standard drink, for a beverage containing alcohol, means the amount that contains 10 grams of ethanol when measured at 20°C.

standardised alcoholic beverage means beer, brandy, cider, fruit wine, fruit wine product, liqueur, mead, perry, spirit, vegetable wine, vegetable wine product, wine or wine product.

statement of ingredients—see section 1.2.4—2.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—2

Definitions—general

sugars:

(a) in Standard 1.2.7, Standard 1.2.8 and Schedule 4 (except where it appears with an asterisk as ‘sugars*’)—means monosaccharides and disaccharides; and

(b) otherwise—means any of the following products, derived from any source:

- (i) hexose monosaccharides and disaccharides, including dextrose, fructose, sucrose and lactose;
- (ii) starch hydrolysate;
- (iii) glucose syrups, maltodextrin and similar products;
- (iv) products derived at a sugar refinery, including brown sugar and molasses;
- (v) icing sugar;
- (vi) invert sugar;
- (vii) fruit sugar syrup;

but does not include:

- (i) malt or malt extracts; or
- (ii) sorbitol, mannitol, glycerol, xylitol, polydextrose, isomalt, maltitol, maltitol syrup, erythritol or lactitol.

Note **Sugar** is defined differently—see section 1.1.2—3.

supplier, in relation to food, includes the packer, manufacturer, vendor or importer of the food.

total plant sterol equivalents content means the total amount of:

- (a) phytosterols; and
- (b) phytostanols; and
- (c) phytosterols and phytostanols following hydrolysis of any phytosterol esters and phytostanol esters.

trans fatty acids means the total of unsaturated fatty acids where one or more of the double bonds are in the trans configuration.

transportation outer means a container or wrapper which:

- (a) encases packaged or unpackaged foods for the purpose of transportation and distribution; and
- (b) is removed before the food is used or offered for retail sale or which is not taken away by a purchaser of the food.

unit quantity means:

- (a) for a food that is a solid or semi-solid food—100 grams; or
- (b) for a food that is a beverage or other liquid food—100 millilitres.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

use-by date, for a food for sale, means the date after which it is estimated that the food should not be consumed because of health or safety reasons, if the food:

- (a) remains in an intact package during its storage; and
- (b) is stored in accordance with any storage conditions applicable under section Standard 1.2.6.

used as a food additive—see section 1.1.2—11.

used as a nutritive substance—see section 1.1.2—12.

used as a processing aid—see section 1.1.2—13.

warning statement, for a food for sale, means a statement about a particular aspect of the food that is required to be expressed in the words set out in the following provisions:

- (a) section 1.2.3—3 (warning statement relating to royal jelly);
- (b) section 2.6.3—4 (warning statement relating to kava);
- (c) subsection 2.9.1—19(1) or section 2.9.1—13 (warning statements for infant formula product);
- (d) paragraph 2.9.2—7(3)(c) or 2.9.2—8(1)(b) (warning statements for food for infants);
- (e) subparagraph 2.9.4—4(1)(a)(iii) or 2.9.4—4(1)(a)(iv) (warning statements for formulated supplementary sports food).

1.1.2—3 Definitions—particular foods

Note Definitions for non-food terms are provided in section 1.1.2—2.

- (1) Where this Code permits the use of a substance (including a vitamin or a mineral) as a food additive, as a processing aid or as a nutritive substance in a particular food defined in this section, the definition is to be read as including a food in which the substance was so used.
- (2) In this Code, unless the contrary intention appears, the following definitions apply:

adjusted milk, in relation to condensed milk, dried milk or evaporated milk, means milk:

- (a) that is to be used to make the product concerned; and
- (b) to which milk components have been added, or from which they have been withdrawn, in order for the product to comply with requirements of Standard 2.5.7; and
- (c) that has the same whey protein to casein ratio as the original milk

beer means:

- (a) the product, characterised by the presence of hops or preparations of hops, prepared by the yeast fermentation of an aqueous extract of malted or unmalted cereals, or both; or

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (b) such a product with any of the following added during production:
 - (i) cereal products or other sources of carbohydrate;
 - (ii) sugar;
 - (iii) salt;
 - (iv) herbs and spices.

brandy means:

- (a) a spirit obtained from the distillation of wine, or fermented preparations of grapes or grape product; or
- (b) such a spirit with any of the following added during production:
 - (i) water;
 - (ii) sugars;
 - (iii) honey;
 - (iv) spices;
 - (v) grape juice;
 - (vi) grape juice concentrates;
 - (vii) wine;
 - (viii) prune juice.

Note The term *brandy* has a different definition in Standard 4.5.1.

bread means:

- (a) a food that is made by baking a yeast-leavened dough prepared from one or more cereal flours or meals and water; or
- (b) such a food with other foods added.

brewed soft drink means a food that:

- (a) is the product prepared by a fermentation process from water with sugar and one or more of:
 - (i) fruit extractives or infusions; or
 - (ii) vegetable extractives or infusions; and
- (b) contains no more than 1.15% alcohol /volume.

butter means:

- (a) a food that is derived exclusively from milk and products obtained from milk, principally in the form of an emulsion of the type water-in-oil; or
- (b) such a food with any of the following added:
 - (i) water;
 - (ii) salt;
 - (iii) lactic acid producing microorganisms;

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (iv) flavour producing microorganisms.

cereal-based beverage means a beverage that is based on cereal.

cereal-based food for infants means a food for infants, not including a beverage, that is based on cereal.

cheese means:

- (a) the ripened or unripened solid or semi-solid milk product, whether coated or not, that is obtained by one or both of the following processes:
 - (i) wholly or partly coagulating milk, or materials obtained from milk, or both, through the action of rennet or other suitable coagulating agents, and partially draining the whey which results from such coagulation;
 - (ii) processing techniques involving concentration or coagulation of milk, or materials obtained from milk, or both, which give an end-product with similar physical, chemical and organoleptic characteristics as the product described in subparagraph (a)(i); or
- (b) such a product with any of the following ingredients added during production:
 - (i) water;
 - (ii) lactic acid producing microorganisms;
 - (iii) flavour producing microorganisms;
 - (iv) gelatine;
 - (v) starch;
 - (vi) vinegar;
 - (vii) salt;
 - (viii) tall oil phytosterol esters added in accordance with Standard 2.5.4.

chocolate means a confectionery product that is characterised by:

- (a) the presence of
 - (i) cocoa bean derivatives; and
 - (ii) no more than 50 g/kg of edible oils, other than cocoa butter or dairy fats; and
- (b) preparation from a minimum of 200 g/kg of cocoa bean derivatives.

cider means the fruit wine prepared from the juice or must of apples or pears and with no more than 25% of the juice or must of pears.

coca bush means:

- (a) *Eurythroxylum coca*; or
- (b) a substance derived from *Eurythroxylum coca*.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

cocoa means the powdered product prepared from cocoa beans from which a portion of the fat may have been removed, with or without salt or spices added.

coffee means the product prepared by roasting, grinding, or both roasting and grinding, coffee beans.

condensed milk means:

- (a) a food obtained by the partial removal of water from milk or adjusted milk, with the addition of sugars, and the possible addition of salt or water; or
- (b) a food of the same composition obtained by any other process.

cream means a milk product comparatively rich in fat, in the form of an emulsion of fat-in-skim milk that is obtained by:

- (a) separation from milk; or
- (b) separation from milk, and the addition of milk or products obtained from milk.

cured and/or dried meat flesh in whole cuts or pieces includes any attached bone.

decaffeinated coffee means coffee from which most of the caffeine has been removed.

decaffeinated tea means tea from which most of the caffeine has been removed.

dried meat means meat that has been dried but does not include slow cured dried meat.

dried milk means a powdered food obtained by the partial removal of water from milk or adjusted milk.

edible oil means the triglycerides, diglycerides, or both the triglycerides and diglycerides of fatty acids of plant or animal origin, including aquatic plants and aquatic animals, with incidental amounts of free fatty acids, unsaponifiable constituents and other lipids including naturally occurring gums, waxes and phosphatides.

edible oil spread means:

- (a) a spreadable food composed of edible oils and water in the form of an emulsion of the type water-in-oil; or
- (b) such a food with any of the following added:
 - (i) water;
 - (ii) edible proteins;
 - (iii) salt;
 - (iv) lactic acid producing microorganisms;
 - (v) flavour producing microorganisms;
 - (vi) milk products;

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

(vii) no more than 82 g/kg of total plant sterol equivalents content.

egg product means the contents of an egg in any form including egg pulp, dried egg, liquid egg white and liquid egg yolk.

electrolyte drink means a drink formulated and represented as suitable for the rapid replacement of fluid, carbohydrates, electrolytes and minerals.

electrolyte drink base means a solid or liquid which, when made up, makes an electrolyte drink.

evaporated milk means:

(a) a food obtained by the partial removal of water by heat from milk, with the possible addition of one or more of the following:

- (i) salt;
- (ii) water. or

(b) a food of the same composition obtained by any other process.

fermented milk means a food obtained by fermentation of milk or products derived from milk, where the fermentation involves the action of microorganisms and results in coagulation and a reduction in pH.

fish means a cold-blooded aquatic vertebrate or aquatic invertebrate including shellfish, but not including amphibians or reptiles.

flour products means the cooked or uncooked products, other than bread, of one or more flours, meals or cereals.

flours or **meals** means the products of grinding or milling of cereals, legumes or other seeds.

follow-on formula means an infant formula product that:

- (a) is represented as either a breast-milk substitute or replacement for infant formula; and
- (b) is suitable to constitute the principal liquid source of nourishment in a progressively diversified diet for infants from the age of 6 months.

food for infants:

- (a) means a food that is intended or represented for use as a source of nourishment for infants; and
- (b) does not include:
 - (i) infant formula products; or
 - (ii) formulated meal replacements; or
 - (iii) formulated supplementary foods; or
 - (iv) unprocessed fruit and vegetables.

food for special medical purposes—see section 1.1.2—5.

formulated beverage means a non-carbonated, ready-to-drink, flavoured beverage that:

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (a) is water-based; and
- (b) contains added vitamins or minerals or both vitamins and minerals; and
- (c) contains no more than 240 mL/L of fruit from one or more of the following sources:
 - (i) fruit juice;
 - (ii) fruit purée;
 - (iii) concentrated fruit juice;
 - (iv) concentrated fruit purée;
 - (v) *comminuted fruit;
 - (vi) orange peel extract; and
- (d) contains no more than 75 g/L of sugars; and
- (e) does not contain:
 - (i) carbon dioxide; or
 - (ii) caffeine; and
- (f) is not mixed with any other beverage.

formulated caffeinated beverage—see section 1.1.2—6.

formulated meal replacement means a food, or a prepackaged selection of foods, that:

- (a) has been specifically formulated as a replacement for one or more meals of the day, but not as a total diet replacement; and
- (b) is represented as a formulated meal replacement.

formulated supplementary food means a food specifically formulated as, and sold on the basis that it is, a supplement to a normal diet to address situations where intakes of energy and nutrients may not be adequate to meet an individual's requirements.

formulated supplementary food for young children means a formulated supplementary food for children aged 1 to 3 years.

formulated supplementary sports food means a product that is specifically formulated to assist sports people in achieving specific nutritional or performance goals.

fruit and vegetables means any of fruit, vegetables, nuts, spices, herbs, fungi, legumes and seeds.

Note In Standards 1.2.7 and 1.2.8 the separate terms fruit and vegetable have different definitions and do not include nuts, spices, herbs, fungi, legumes and seeds.

fruit-based food means food that is based on fruit.

fruit drink means a product that is prepared from:

- (a) one or more of the following:

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (i) fruit juice;
- (ii) fruit purée;
- (iii) concentrated fruit juice;
- (iv) concentrated fruit puree;
- (v) *comminuted fruit;
- (vi) orange peel extract; and
- (b) one or more of the following:
 - (i) water;
 - (ii) mineralised water;
 - (iii) sugars.

fruit juice means juice made from a fruit.

fruit wine or ***vegetable wine*** means:

- (a) a food that:
 - (i) is the product of the complete or partial fermentation of fruit, vegetable, grains, cereals or any combination or preparation of those foods; and
 - (ii) is not wine or a wine product; or
- (b) such a food with any of the following added during production:
 - (i) fruit juice and fruit juice products;
 - (ii) vegetable juice and vegetable juice products;
 - (iii) sugars;
 - (iv) honey;
 - (v) spices;
 - (vi) alcohol;
 - (vii) water.

fruit wine product or ***vegetable wine product*** means a food containing no less than 700 mL/L of fruit wine, or vegetable wine, or both fruit and vegetable wine, which has been formulated, processed, modified or mixed with other foods such that it is not a fruit wine or vegetable wine.

gelatine means a protein product prepared from animal skin, bone or other collagenous material, or any combination of those things.

honey means the natural sweet substance produced by honey bees from the nectar of blossoms or from secretions of living parts of plants or excretions of plant sucking insects on the living parts of plants, which honey bees collect, transform and combine with specific substances of their own, store and leave in the honey comb to ripen and mature.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

ice cream means a sweet frozen food that is made from cream or milk products or both, and other foods, and is generally aerated.

icing means a mixture of sugar and other foods for use as a coating and includes frosting, plastic icing and icing gel.

imitation vinegar means a food that is prepared by mixing water and acetic acid.

infant formula means an infant formula product that:

- (a) is represented as a breast-milk substitute for infants; and
- (b) satisfies by itself the nutritional requirements of infants under the age of 4 to 6 months.

infant formula product means a product based on milk or other edible food constituents of animal or plant origin which is nutritionally adequate to serve as the sole or principal liquid source of nourishment for infants, depending on the age of the infant.

instant coffee means the dried soluble solids prepared from the water extraction of coffee.

instant tea means dried soluble solids prepared from the water extraction of tea.

iodised salt or **iodised reduced sodium salt mixture**, means a food that is salt, or a reduced sodium salt mixture, as appropriate, or such a food containing any of the following:

- (a) potassium iodide;
- (b) potassium iodate;
- (c) sodium iodide;
- (d) sodium iodate;

added in an amount that is equivalent to:

- (e) no less than 25 mg/kg of iodine; and
- (f) no more than 65 mg/kg of iodine.

jam:

- (a) means:
 - (i) a product prepared by processing one or more of the following:
 - (A) fruit;
 - (B) concentrated fruit juice;
 - (C) fruit juice;
 - (D) water extracts of fruit; or
 - (ii) such a product processed with sugars or honey; and
- (b) includes conserve; and
- (c) does not include marmalade.

juice:

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (a) means the liquid portion, with or without pulp, obtained from:
 - (i) a fruit or a vegetable; or
 - (ii) in the case of citrus fruit, other than lime—the endocarp only of the fruit; and
- (b) includes a product that results from concentrating juice and then reconstituting it with water.

juice blend means the food made from a blend of more than one juice (including a blend of one or more fruit juices and one or more vegetable juices).

kava means plants of the species *Piper methysticum*.

kava root means the peeled root or peeled rootstock of kava.

liqueur means an alcoholic beverage that is a spirit, flavoured by or mixed with other foods, which contains more than 15% alcohol by volume, measured at 20°C.

manufactured meat means processed meat containing no less than 660 g/kg of meat.

margarine means an edible oil spread containing no less than 800g/kg of edible oils.

mead means:

- (a) a food that is the product prepared from the complete or partial fermentation of honey; or
- (b) such a food with any of the following added during production:
 - (i) fruit juice and fruit juice products;
 - (ii) vegetable juice and vegetable juice products;
 - (iii) sugars;
 - (iv) honey;
 - (v) spices;
 - (vi) alcohol;
 - (vii) water.

meat:

- (a) means the whole or part of the carcass of any of the following animals, if slaughtered other than in a wild state:
 - (i) buffalo, camel, cattle, deer, goat, hare, pig, poultry, rabbit or sheep;
 - (ii) any other animal permitted for human consumption under a law of a State, Territory or New Zealand; and
- (b) does not include:
 - (i) fish; or

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (ii) avian eggs; or
- (iii) foetuses or part of foetuses.

meat flesh means meat that consists of skeletal muscle and any attached:

- (a) animal rind; or
- (b) fat; or
- (c) connective tissue; or
- (d) nerve; or
- (e) blood; or
- (f) blood vessels; or
- (g) skin, in the case of poultry.

meat pie means a pie containing no less than 250 g/kg of meat flesh.

milk means:

- (a) the mammary secretion of milking animals, obtained from one or more milkings for consumption as liquid milk or for further processing, but excluding colostrums; or
- (b) such a product with *phytosterols, phytosterols and their esters added.

mineral water or ***spring water*** means ground water obtained from subterranean water-bearing strata that, in its natural state, contains soluble matter.

non-alcoholic beverage:

- (a) means:
 - (i) packaged water; or
 - (ii) a water-based beverage, or a water-based beverage that contains other foods (other than alcoholic beverages); or
 - (iii) an electrolyte drink; and
- (b) does not include a brewed soft drink.

offal:

- (a) includes blood, brain, heart, kidney, liver, pancreas, spleen, thymus, tongue and tripe; and
- (b) excludes meat flesh, bone and bone marrow.

peanut butter means a peanut based spread.

perry means the fruit wine prepared from the juice or must of pears or pears and apples and with no more than 25% of the juice or must of apples.

pre-term formula means an infant formula product specifically formulated to satisfy particular needs of infants born prematurely or of low birthweight.

processed cheese means a product manufactured from cheese and products obtained from milk, which is heated and melted, with or without added emulsifying salts, to form a homogeneous mass.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

processed meat means a food that has, either singly or in combination with other foods, undergone a method of processing other than boning, slicing, dicing, mincing or freezing.

prohibited plant or fungus means:

- (a) a plant or fungus listed in Schedule 23; or
- (b) a part or a derivative of such a plant or fungus; or
- (c) a substance derived from a plant, fungus, part or derivative referred to in paragraph (a) or (b).

reduced sodium salt mixture means a food that:

- (a) is prepared from a mixture of sodium chloride and potassium chloride; and
- (b) contains no more than 200 g/kg sodium; and
- (c) contains no more than 400 g/kg potassium.

restricted plant or fungus means:

- (a) a plant or fungus listed in Schedule 24; or
- (b) a part or a derivative of such a plant or fungus; or
- (c) a substance derived from a plant, fungus, part or derivative referred to in paragraph (a) or (b).

salt means a food that is the crystalline product consisting predominantly of sodium chloride, that is obtained from the sea, underground rock salt deposits or from natural brine.

salt substitute means a food that:

- (a) is made as a substitute for salt; and
- (b) consists of substances that may be used as food additives in relation to salt substitute in accordance with item 12 of the table to Schedule 15; and
- (c) contains no more than 1.2 g/kg of sodium.

sausage means a food that:

- (a) consists of meat that has been minced, meat that has been comminuted, or a mixture of both, whether or not mixed with other foods, and which has been encased or formed into discrete units; and
- (b) does not include meat formed or joined into the semblance of cuts of meat.

skim milk means milk from which milkfat has been removed.

soy-based formula means an infant formula product in which soy protein isolate is the sole source of protein.

special purpose food:

- (a) in Standard 2.9.6—see section 2.9.6—2; and
-

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—3

Definitions—particular foods

- (b) otherwise—means any of the following:
- (i) an infant formula product;
 - (ii) food for infants;
 - (iii) a formulated meal replacement;
 - (iv) a formulated supplementary food;
 - (v) a formulated supplementary sports food;
 - (vi) food for special medical purposes.

spirit means an alcoholic beverage consisting of:

- (a) a potable alcoholic distillate, including whisky, brandy, rum, gin, vodka and tequila, produced by distillation of fermented liquor derived from food sources, so as to have the taste, aroma and other characteristics generally attributable to that particular spirit; or
- (b) such a distillate with any of the following added during production:
 - (i) water;
 - (ii) sugars;
 - (iii) honey;
 - (iv) spices.

spring water—see definition of mineral water.

sugar means, unless otherwise expressly stated, any of the following:

- (a) white sugar;
- (b) caster sugar;
- (c) icing sugar;
- (d) loaf sugar;
- (e) coffee sugar;
- (f) raw sugar.

sweet cassava means those varieties of cassava roots grown from *Manihot esculenta* Crantz of the *Euphorbiaceae* family that contain less than 50 mg/kg of hydrogen cyanide (fresh weight basis).

Note Sweet cassava may also be known by other common names including manioc, mandioca, tapioca, aipim and yucca.

tea means the product made from the leaves and leaf buds of one or more of varieties and cultivars of *Camelia sinensis* (L.) O. Kuntz.

vegetable juice means juice made from a vegetable.

vegetable wine—see definition of fruit wine.

vegetable wine product—see definition of fruit wine product.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—4

Definition of characterising component and characterising ingredient

vinegar means a food that is the sour liquid prepared by acetous fermentation, with or without alcoholic fermentation, of any suitable food, and including blends and mixtures of such liquids.

wholegrain means the intact grain or the dehulled, ground, milled, cracked or flaked grain where the constituents—endosperm, germ and bran—are present in such proportions that represent the typical ratio of those fractions occurring in the whole cereal, and includes wholemeal.

wholemeal means the product containing all the milled constituents of the grain in such proportions that it represents the typical ratio of those fractions occurring in the whole cereal.

wine means:

- (a) a food that is the product of the complete or partial fermentation of fresh grapes, or a mixture of that product and products derived solely from grapes; or
- (b) such a food with any of the following added during production:
 - (i) grape juice and grape juice products;
 - (ii) sugars;
 - (iii) brandy or other spirit;
 - (iv) water that is necessary to incorporate any substance permitted for use as a food additive or a processing aid.

wine product means a food containing no less than 700 mL/L of wine, which has been formulated, processed, modified or mixed with other foods such that it is not wine.

white sugar means purified crystallised sucrose.

yoghurt means a fermented milk where the fermentation has been carried out with lactic acid producing microorganisms.

1.1.2—4 Definition of **characterising component** and **characterising ingredient**

- (1) In this Code, in relation to a food for sale:

characterising component means a *component of the food that:

- (a) is mentioned in the name of the food; or
- (b) is usually associated with the name of the food by a consumer; or
- (c) is emphasised on the label of the food in words, pictures or graphics.

characterising ingredient means an ingredient or a category of ingredients of the food that:

- (a) is mentioned in the name of the food; or
 - (b) is usually associated with the name of the food by a consumer; or
 - (c) is emphasised on the label of the food in words, pictures or graphics.
-

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—5

Definition of food for special medical purposes

- (2) Despite subsection (1), any of the following is not a *characterising ingredient*:
- (a) an ingredient or category of ingredients that is used in small amounts to flavour the food;
 - (b) an ingredient or category of ingredients that comprises the whole of the food;
 - (c) an ingredient or category of ingredients that is mentioned in the name of the food but which is not such as to govern the choice of the consumer, because the variation in the amount is not essential to characterise the food, or does not distinguish the food from similar foods.
- (3) Compliance with labelling requirements elsewhere in this Code does not of itself constitute emphasis for the purposes of this section.

1.1.2—5 Definition of *food for special medical purposes*

- (1) In this Code:

food for special medical purposes means a food that is:

- (a) specially formulated for the dietary management of individuals:
 - (i) by way of exclusive or partial feeding, who have special medically determined nutrient requirements or whose capacity is limited or impaired to take, digest, absorb, metabolise or excrete ordinary food or certain nutrients in ordinary food; and
 - (ii) whose dietary management cannot be completely achieved without the use of the food; and
 - (b) intended to be used under medical supervision; and
 - (c) represented as being:
 - (i) a food for special medical purposes; or
 - (ii) for the dietary management of a disease, disorder or medical condition.
- (2) Despite subsection (1), a food is not *food for special medical purposes* if it is:
- (a) formulated and represented as being for the dietary management of obesity or overweight; or
 - (b) an infant formula product.

1.1.2—6 Definition of *formulated caffeinated beverage*

- (1) In this Code:

formulated caffeinated beverage means a flavoured, non-alcoholic beverage, or a flavoured, non-alcoholic beverage to which other substances (for example, carbohydrates, amino acids, vitamins) have been added, that:

- (a) contains caffeine; and
 - (b) has the purpose of enhancing mental performance.
-

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—7

Definition of medical institution

- (2) To avoid doubt, a formulated caffeinated beverage is a water based flavoured drink for the purposes of item 14.1.3 of section S15—5 and of section S18—10.

1.1.2—7 Definition of *medical institution*

- (1) In this Code:

medical institution means any of the following:

- (a) an acute care hospital;
- (b) a hospice;
- (c) a low-care aged care establishment;
- (d) a nursing home for the aged;
- (e) a psychiatric hospital;
- (f) a respite care establishment for the aged;
- (g) a same-day aged care establishment;
- (h) a same-day establishment for chemotherapy and renal dialysis services.

- (2) In this section:

acute care hospital:

- (a) means an establishment that provides:
 - (i) at least minimal medical, surgical or obstetric services for inpatient treatment or care; and
 - (ii) round-the-clock comprehensive qualified nursing services as well as other necessary professional services;to patients most of whom have acute conditions or temporary ailments, and have a relatively short average stay; and
- (b) includes:
 - (i) a hospital specialising in dental, ophthalmic aids and other specialised medical or surgical care; and
 - (ii) a public acute care hospital; and
 - (iii) a private acute care hospital.

hospice means a freestanding establishment (whether public or private) that provides palliative care to terminally ill patients.

low-care aged care establishment means an establishment where aged persons live independently but on-call assistance, including the provision of meals, is provided when needed.

nursing home for the aged means an establishment (whether private charitable, private for-profit, or government) that provides long-term care involving regular basic nursing care to aged persons.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—8

Definition of novel food

psychiatric hospital means an establishment (whether public or private) devoted primarily to the treatment and care of inpatients with psychiatric, mental or behavioural disorders.

respite care establishment for the aged means an establishment that provides short-term care, including personal care and regular basic nursing care, to aged persons.

same-day aged care establishment means an establishment where aged persons attend for day or part-day rehabilitative or therapeutic treatment.

same-day establishment for chemotherapy and renal dialysis services means:

- (a) a day centre or hospital, being an establishment (whether public or private) that provides a course of acute treatment, in the form of chemotherapy or renal dialysis services, on a full-day or part-day non-residential attendance basis at specified intervals over a period of time; or
- (b) a free-standing day surgery centre, being a hospital facility (whether public or private) that provides investigation and treatment, in the form of chemotherapy or renal dialysis services, for acute conditions on a day-only basis.

1.1.2—8 Definition of *novel food*

(1) In this Code:

novel food means a *non-traditional food that requires an assessment of the public health and safety considerations having regard to:

- (a) the potential for adverse effects in humans; or
- (b) the composition or structure of the food; or
- (c) the process by which the food has been prepared; or
- (d) the source from which it is derived; or
- (e) patterns and levels of consumption of the food; or
- (f) any other relevant matters.

non-traditional food means:

- (a) a food that does not have a history of human consumption in Australia or New Zealand; or
- (b) a substance derived from a food, where that substance does not have a history of human consumption in Australia or New Zealand other than as a *component of that food; or
- (c) any other substance, where that substance, or the source from which it is derived, does not have a history of human consumption as a food in Australia or New Zealand.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—9

Definition of nutrition content claim

(2) Either of the following:

- (a) the presence of a food in a food for special medical purposes;
- (b) the use of a food as a food for special medical purposes;

does not constitute a history of human consumption in Australia or New Zealand in relation to that food for the purposes of this section.

1.1.2—9 Definition of *nutrition content claim*

(1) In this Code:

nutrition content claim means a claim that:

- (a) is about:
 - (i) the presence or absence of any of the following:
 - (A) a biologically active substance;
 - (B) dietary fibre;
 - (C) energy;
 - (D) minerals;
 - (E) potassium;
 - (F) protein;
 - (G) carbohydrate;
 - (H) fat;
 - (I) the components of any one of protein, *carbohydrate or fat;
 - (J) salt;
 - (K) sodium;
 - (L) vitamins; or
 - (ii) *glycaemic index or glycaemic load; and
- (b) does not refer to the presence or absence of alcohol; and
- (c) is not a health claim.

Note See also subsections 2.6.2—5(4) and 2.10.2—8(3).

Inclusion of mandatory information in nutrition information panel does not constitute a nutrition content claim

(2) To avoid doubt, if this Code requires particular information to be included in a nutrition information panel, the inclusion of that information does not constitute a *nutrition content claim*.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—10

RDI and ESADDIs

Inclusion of voluntary information in nutrition information panel might constitute a nutrition content claim

- (3) If this Code permits, but does not require, particular information to be included in a nutrition information panel, the inclusion of that information constitutes a **nutrition content claim** unless:
 - (a) this Code provides otherwise; or
 - (b) the information is a declaration of:
 - (i) if the food contains less than 2 g of *dietary fibre per serving—dietary fibre; or
 - (ii) trans fatty acid content; or
 - (iii) lactose content.
- (4) For a food that contains more than 1.15% alcohol by volume, the inclusion in a nutrition information panel of the information referred to in paragraphs 1.2.8—6(1)(a), (b) and (c), and subparagraphs 1.2.8—6(1)(d)(i), (ii) and (iii) does not constitute a **nutrition content claim**.

1.1.2—10 RDI and ESADDIs

Note ‘RDI’ is an abbreviation of recommended dietary intake. ‘ESADDI’ is an abbreviation of estimated safe and adequate daily dietary intake.

- (1) In relation to a food for infants the *RDI or *ESADDI for a vitamin or mineral listed in column 1 of the table to section S1—2 or S1—3 is shown in column 5.
- (2) In relation to a food intended or represented as suitable for use by children aged 1 to 3 years (including a formulated supplementary food for young children) the *RDI or *ESADDI for a vitamin or mineral listed in column 1 of the table to section S1—2 or S1—3 is shown in column 4.
- (3) In relation to any other food the *RDI or *ESADDI for a vitamin or mineral listed in column 1 of the table to section S1—2 or S1—3 is shown in column 3.

1.1.2—11 Definition of *used as a food additive*, etc

- (1) In this Code, a substance is **used as a food additive** in relation to a food if it is added to the food:
 - (a) to perform 1 or more of the technological purposes listed in Schedule 14; and
 - (b) it is a substance identified in subsection (2).
- (2) For subsection (1), the substances are:
 - (a) any of the following:
 - (i) a substance that is identified in Schedule 15 as a substance that may be used as a food additive;
 - (ii) an *additive permitted at GMP;
 - (iii) a *colouring permitted at GMP;

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—12

Definition of used as a nutritive substance

(iv) a *colouring permitted to a maximum level; and

Note Schedule 15 lists a number of substances that are not listed in Schedule 16 as additives permitted at GMP foods, colourings permitted at GMP or colourings permitted to a maximum level.

(b) any substance that is:

(i) a *non-traditional food and

(ii) has been concentrated, refined, or synthesised, to perform 1 or more of the technological purposes listed in Schedule 14.

Other definitions

(3) In this Code:

additive permitted at GMP means a substance that is listed in section S16—2.

colouring permitted at GMP means a substance that is listed in section S16—3.

colouring permitted to a maximum level means a substance that is listed in section S16—4.

Colours and their aluminium and calcium lakes

(4) A reference to a colour listed in Schedule 15, a *colouring permitted at GMP or a *colouring permitted to a maximum level includes a reference to the aluminium and calcium lakes prepared from that colour.

1.1.2—12 Definition of used as a nutritive substance

(1) In this Code, a substance is **used as a nutritive substance** in relation to a food if it is added to the food:

(a) to achieve a nutritional purpose; and

(b) it is a substance identified in subsection (2).

(2) For subsection (1), the substances are:

(a) any substance that is identified in this Code as one that may be *used as a nutritive substance; and

(b) a vitamin or a mineral; and

(c) any substance (other than an inulin-type fructan, a galacto-oligosaccharide or a substance normally consumed as a food) that has been concentrated, refined or synthesised, to achieve a nutritional purpose when added to a food.

Note Provisions that control use of substances as nutritive substance are in Standard 1.3.2 (Vitamins and minerals), Standard 2.9.1 (Infant formula products), Standard 2.9.2 (Food for infants), Standard 2.9.3 (Formulated meal replacements), Standard 2.9.4 (Formulated supplementary sports foods) and Standard 2.9.5 (Food for special medical purposes). Substances referred to in paragraph (2)(a) include, for example, those that are identified in the tables to sections S17—2 and S17—3 (vitamins and minerals) and the tables to sections S28—2, 0, S29—18 and S29—19 (other substances).

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—13

Definition of used as a processing aid

1.1.2—13 Definition of *used as a processing aid*

- (1) In this Code, a reference to a substance that is *used as a processing aid* in relation to a food is a reference to a substance that is used during the course of processing:
- (a) to perform a technological purpose in the course of processing; and
 - (b) does not perform a technological purpose in a food for sale; and
 - (c) is identified in subsection (3).

References to foods that are used as a processing aid

- (2) In this Code, a reference to a food that is *used as a processing aid* in relation to another food:
- (a) is a reference to a food that:
 - (i) is not a substance identified in subsection (3); and
 - (ii) is used or added to the other food during the course of processing to perform a technological purpose in the course of processing; and
 - (iii) does not perform a technological purpose in the food for sale; and
 - (b) is a reference to so much of the food as is necessary to perform the technological purpose.

Note 1 This Code does not prohibit the use of foods as processing aids (other than foods that are substances referred to in subsection (3)). There are special labelling requirements that apply in relation to foods and substances that are used as processing aids—see paragraphs 1.2.4—3(2)(d) and 1.2.4—3(2)(e) and subparagraph 1.2.8—5(a)(vii).

Note 2 If a food is used as a processing aid in relation to another food, and the amount of the food used is greater than the amount that is necessary to perform the technological purpose, the excess amount of the food is not taken to be used as a processing aid in the other food and is not exempted from a requirement to declare ingredients—see section 1.2.4—3(2)(e).

- (3) For subsections (1) and (2), the substances are the following:
- (a) a substance that is listed in Schedule 18;
 - (b) an *additive permitted at GMP.

Note ‘additive permitted at GMP’ is a defined term—see section 1.1.2—11.

1.1.2—14 Calculation and expression of amount of vitamin or mineral

- (1) RDIs and ESADDIs for vitamins shall be the sum of the forms of the vitamin occurring naturally in the food and any permitted forms of the vitamin that have been added to the food calculated and expressed in the form specified in columns 3, 4 or 5 of the table to section S1—2.
- (2) RDIs and ESADDIs for minerals shall be the sum of the forms of the mineral occurring naturally in the food and any permitted forms of the mineral that have been added to the food calculated and expressed in the form specified in column 1 of the table to section S1—3.

Chapter 1 Introduction and standards that apply to all foods

Part 1 Preliminary

Standard 1.1.2 Definitions used throughout the Code

Section 1.1.2—14

Calculation and expression of amount of vitamin or mineral

- (3) When calculating an amount:
- (a) for vitamin A:
 - (i) calculate the amount in terms of retinol equivalents; and
 - (ii) for provitamin A forms of vitamin A, calculate retinol equivalents using the conversion factors in section S1—4; and
 - (b) for niacin, exclude the niacin provided from the conversion of the amino acid tryptophan; and
 - (c) for vitamin E, calculate the amount in terms of alpha-tocopherol equivalents using the conversion factors in section S1—5.
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—1

Name

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

1.2.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.1 — Requirements to have labels or otherwise provide information*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.1—2 Outline of Standard

- (1) This Standard sets out when a food for sale is required to *bear a label or have other information provided with it, and sets out the information that is to be provided.
- (2) Division 2 sets out the labelling and information requirements for a food that is for retail sale.
- (3) Division 3 sets out the labelling and information requirements for food that is sold to caterers.
- (4) Division 4 sets out the labelling and information requirements for all other sales of food.
- (5) Division 5 sets out general prohibitions relating to labels.
- (6) Division 6 sets out legibility requirements.

1.2.1—3 Definitions

Note In this Code (see section 1.1.2—2):

bear a label: a food for sale is taken to **bear a label** of a specified kind or with specified content if either of the following are part of or attached to the packaging of the food:

- (a) a label of that kind or with that content; or
- (b) labels that together are of that kind or have that content.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—4

When this Division applies

caterer means a person, establishment or institution (for example, a catering establishment, a restaurant, a canteen, a school, or a hospital) which handles or offers food for immediate consumption.

label, in relation to a food being sold, means any tag, brand, mark or statement in writing or any representation or design or descriptive matter that:

- (a) is attached to the food or is a part of or attached to its packaging; or
- (b) accompanies and is provided to the purchaser with the food; or
- (c) is displayed in connection with the food when it is sold.

labelling:

- (a) in relation to a food being sold, *labelling* means all of the labels for the food together; and
- (b) a requirement for the labelling of a food for sale to include specified content is a requirement for at least one of the labels to have that content.

bear a label: a food for sale is taken to *bear a label* of a specified kind or with specified content if either of the following are part of or attached to the packaging of the food:

- (a) a label of that kind or with that content; or
- (b) labels that together are of that kind or have that content.

caterer means a person, establishment or institution (for example, a catering establishment, a restaurant, a canteen, a school, or a hospital) which prepares or offers food for immediate consumption.

Division 2 Retail sales

1.2.1—4 When this Division applies

This Division applies to:

- (a) a retail sale of a food; and
- (b) a sale of a food that is not a retail sale, if the food is sold as suitable for retail sale without any further processing, packaging or labelling.

1.2.1—5 Outline of Division

This Division sets out:

- (a) the circumstances in which food for sale is required to *bear a label—see section 1.2.1—6;
- (b) the country of origin labelling (Australia only) requirement—see section 1.2.1—7;
- (c) the other information the label must state—see section 1.2.1—8;
- (d) the information requirements for a food for sale that is not required to bear a label—see section 1.2.1—9.

1.2.1—6 When the food for sale must bear a label

- (1) If the food for sale is in a package, it is required to *bear a label with the information referred to in subsection 1.2.1—8(1) unless it:
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—7 Australia only—country of origin labelling requirement

- (a) is made and packaged on the premises from which it is sold; or
- (b) is packaged in the presence of the purchaser; or
- (c) is whole or cut fresh fruit and vegetables (other than seed sprouts or similar products) in a package that does not obscure the nature or quality of the food; or
- (d) is delivered packaged, and ready for consumption, at the express order of the purchaser (other than when the food is sold from a vending machine); or
- (e) is sold at a *fund raising event; or
- (f) is displayed in an *assisted service display cabinet.

Note 1 Even if a food for sale is not required to bear a label under this section, in Australia it still might be required to bear a label under section 1.2.1—7 (Australia only—country of origin labelling requirement).

Note 2 See section 1.2.1—9 for information requirements for food for sale that does not need to bear a label.

- (2) If the food for sale has more than 1 layer of packaging and subsection (1) requires it to bear a label, only 1 label is required in relation to the food for sale.

Note See also section 1.2.1—24.

- (3) If the food for sale is sold in packaging that includes individual packages for servings that are intended to be used separately (*individual portion packs*), but which:

- (a) are not designed for individual sale; and
- (b) have a surface area of 30 cm² or greater;

then the *individual portion pack is also required to *bear a label, with the information referred to in subsection 1.2.1—8(3).

- (4) If the food for sale is not in a package, it is not required to *bear a label.

Note See section 1.2.1—9 for information requirements for food for retail sale that does not need to bear a label.

1.2.1—7 Australia only—country of origin labelling requirement

- (1) In Australia, the following apply:
- (a) subject to paragraph (b), if the food for sale is in a package and is required to *bear a label because of section 1.2.1—6, the label must state the country of origin information referred to in section 1.2.11—4;
 - (b) if the food for sale is unprocessed fruit and vegetables in a package to which section 1.2.11—3 applies, it is required to bear a label, or have labelling that accompanies it or is displayed in connection with its sale, that states the country of origin information referred to in that section;

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—8

Information required on food that is required to bear a label

- (c) if the food for sale is not in a package, it is required to bear a label, or have labelling that accompanies it or is displayed in connection with its sale, that states the country of origin information referred to in section 1.2.11—2.

Note A food for sale in Australia may be required to bear a label under this section, even if it is not required under section 1.2.1—6.

- (2) This section does not apply to a food that:
- (a) is sold to the public by any of the following:
 - (i) a restaurant;
 - (ii) a canteen;
 - (iii) a school;
 - (iv) a caterer;
 - (v) a self-catering institution;
 - (vi) a prison;
 - (vii) a hospital;
 - (viii) a *medical institution; and
 - (b) is offered for immediate consumption.

1.2.1—8 Information required on food that is required to bear a label

General and additional requirements—retail sales

- (1) For subsection 1.2.1—6(1), the information is the following information in accordance with the provisions indicated:

General requirements

- (a) name of the food (see section 1.2.2—2);
- (b) lot identification (see section 1.2.2—3);
- (c) name and address of the *supplier (see section 1.2.2—4);
- (d) advisory statements, warning statements and declarations (see sections 1.2.3—2, 1.2.3—3 and 1.2.3—4);
- (e) a statement of ingredients (see section 1.2.4—2);
- (f) date marking information (see section 1.2.5—3);
- (g) storage conditions and directions for use (see section 1.2.6—2);
- (h) information relating to nutrition, health and related claims (see subsection 1.2.7—26(4));
- (i) nutrition information (see Standard 1.2.8);
- (j) information about *characterising ingredients and *characterising components (see section 1.2.10—3);

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—8

Information required on food that is required to bear a label

- (k) information relating to foods produced using gene technology (see section 1.5.2—4);
- (l) information relating to irradiated food (see section 1.5.3—9);

Additional requirements

- (m) for minced meat—the maximum proportion of fat in the minced meat (see section 2.2.1—7);
- (n) for raw meat joined or formed into the semblance of a cut of meat—the required information relating to that meat (see section 2.2.1—8);
- (o) for fermented comminuted processed or manufactured meat—the required information relating to how the meat has been processed (see sections 2.2.1—9 and 2.2.1—10);
- (p) for formed or joined fish—the information relating to that fish (see section 2.2.3—3);
- (q) the process declaration for edible oils (see section 2.4.1—4);
- (r) for juice blend—the name and percentage by volume of each juice in the blend (see section 2.6.1—4);
- (s) information related to the composition of packaged water (see section 2.6.2—5);
- (t) for an electrolyte drink or electrolyte drink base:
 - (i) a declaration of the required compositional information (see section 2.6.2—11); and
 - (ii) if a claim is made that the drink is isotonic, hypertonic or hypotonic—a declaration of the osmolality of the drink (see section 2.6.2—12);
- (u) the required statements relating to kava (see section 2.6.3—4);
- (v) for formulated caffeinated beverages:
 - (i) declarations of average quantities (see section 2.6.4—5); and
 - (ii) any advisory statements (see section 2.6.4—5);
- (w) for a food that contains alcohol—if required:
 - (i) a statement of the alcohol content (see section 2.7.1—3); and
 - (ii) a statement of the number of *standard drinks in the package (see section 2.7.1—4);
- (x) for special purpose foods or *amino acid modified foods to which sections 2.9.6—5 and 2.9.6—6 apply—the required information for such foods;
- (y) the required statements and other information for:
 - (i) infant formula product (see Standard 2.9.1); and
 - (ii) food for infants (see Standard 2.9.2); and

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—9

Information requirements for food for sale that is not required to bear a label

- (iii) formulated meal replacements and formulated supplementary foods (see Standard 2.9.3); and
- (iv) formulated supplementary sports foods (see Standard 2.9.4); and
- (v) foods for special medical purposes (see Standard 2.9.5);
- (z) the required information for reduced sodium salt mixtures and salt substitutes (see section 2.10.2—8).

Specific requirement—retail sales of food in hampers

- (2) For food sold in a *hamper:
 - (a) each package must *bear a label stating the information mentioned in subsection (1); and
 - (b) each item of food not in a package must be accompanied by labelling stating the information mentioned in subsection (1); and
 - (c) the hamper must bear a label stating the name and address of the *supplier of the hamper (see section 1.2.2—4).

Specific requirement—retail sales of food in individual portion packs

- (3) For subsection 1.2.1—6(3), the information is warning statements and declarations in accordance with sections 1.2.3—3 and 1.2.3—4.

Additional requirement—food sold from vending machines

- (4) For food sold from a vending machine, it is an additional requirement that labels clearly and prominently displayed in or on the vending machine state the name and *business address of the *supplier of the vending machine.

Note Specific exemptions for some types of package or food are in other standards, for example, elsewhere in Part 1.2.

1.2.1—9 Information requirements for food for sale that is not required to bear a label

- (1) This section applies to a food for sale that is not required to *bear a label because of section 1.2.1—6.

Information that must accompany or be displayed with the food

- (2) The information specified in subsection (3) must, in accordance with the provisions indicated, be stated in labelling that:
 - (a) accompanies the food; or
 - (b) is displayed in connection with the display of the food.
- (3) For subsection (2), the information is:
 - (a) any *warning statement required by section 1.2.3—3; and
 - (b) if the food for sale is not in a package—information relating to foods produced using gene technology (see section 1.5.2—4);
 - (c) information relating to irradiated food (see section 1.5.3—9); and

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—9

Information requirements for food for sale that is not required to bear a label

- (d) for food sold from a vending machine—any advisory statement required by section 1.2.3—2 and any declaration required by section 1.2.3—4;
- (e) if the food for sale is not in a package—for fermented comminuted processed or manufactured meat—the *prescribed name (see sections 2.2.1—9 and 2.2.1—10);
- (f) if the food for sale is not in a package—for a food for sale that consists of kava root:
 - (i) any statements relating to kava (see section 2.6.3—4); and
 - (ii) the name and address of the *supplier (see section 1.2.2—4).

Information that must accompany food for sale

- (4) The following information must be stated in labelling that accompanies the food for sale, in accordance with the provisions indicated:
 - (a) if the food for sale is not in a package—the directions relating to use and storage required by paragraph 1.2.6—2(b); and
 - (b) in any case—the information related to use required by paragraph 1.2.6—2(c).

Information that must be declared or provided to the purchaser

- (5) The following information must be declared or provided to the purchaser, in accordance with the provisions indicated:
 - (a) any required statement indicating the presence of offal must be declared (see section 2.2.1—6);
 - (b) for raw meat joined or formed into the semblance of a cut of meat—any required information relating to that meat must be provided (see section 2.2.1—8);
 - (c) for formed or joined fish—any required information relating to that fish must be provided (see section 2.2.3—3).

Information that may either accompany or be displayed with the food or which must be provided to the purchaser on request

- (6) The information specified in subsection (7) must, in accordance with the provisions indicated, be stated in labelling that is:
 - (a) displayed in connection with the display of the food; or
 - (b) provided to the purchaser on request.
- (7) For subsection (6), the information is:
 - (a) name of food (see section 1.2.2—2);
 - (b) any advisory statements and declarations (see sections 1.2.3—2 and 1.2.3—4);
 - (c) information relating to nutrition, health and related claims (see subsection 1.2.7—27(4));

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—10

When this Division applies

- (d) if a *claim requiring nutrition information is made—the information required for a nutrition information panel (see subsections 1.2.7—27(2) and 1.2.7—27(3), and Standard 1.2.8);
- (e) if the food is not required to *bear a label because of subsection 1.2.1—6(4) or paragraph 1.2.1—6(1)(a)—information about *characterising ingredients and *characterising components (section 1.2.10—3);
- (f) for minced meat—if required, the maximum proportion of fat in the minced meat (see section 2.2.1—7);
- (g) for formulated caffeinated beverages—any advisory statements (section 2.6.4—5).

Division 3

Sales of food to caterers

1.2.1—10 When this Division applies

This Division applies to a sale of food to a caterer, other than a sale to which Division 2 applies.

1.2.1—11 Outline of Division

This Division sets out the following:

- (a) the circumstances in which the food for sale to a *caterer is required to *bear a label—see section 1.2.1—12;
- (b) when information must be provided with the food—see section 1.2.1—13; and
- (c) the country of origin labelling requirement—see section 1.2.1—14;
- (d) the other information the label must state—see section 1.2.1—15;
- (e) the information requirements for a food that is not required to bear a label—see sections 1.2.1—16 and 1.2.1—17.

1.2.1—12 When food sold to a caterer must bear a label

- (1) If the food sold to a *caterer is in a package, it is required to *bear a label with the information required by section 1.2.1—15.
- (2) If:
 - (a) the food for sale is required to *bear a label; and
 - (b) the food for sale has more than one layer of packaging; and
 - (c) the information required by sections 1.2.2—2 and 1.2.2—3 is in a label on the outer package; and
 - (d) the information required by section 1.2.2—4 is:
 - (i) in a label on the outer package; or
 - (ii) in documentation that accompanies the food for sale;

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—13 When information must be provided with food sold to a caterer

the label referred to in subsection (1) need not be on the outer package.

- (3) A food for sale is not required to *bear a label if:
- (a) the food is not in a package; or
 - (b) the food is whole or cut fresh fruit and vegetables (other than seed sprout or similar products) in a package that does not obscure the nature or quality of the food.

1.2.1—13 When information must be provided with food sold to a caterer

If food sold to a *caterer is not required by section 1.2.1—12 to *bear a label, labelling containing the information required by section 1.2.1—15 must be provided to the caterer with the food.

1.2.1—14 Australia only—country of origin labelling requirement

In Australia, if the food sold to a *caterer is in a package, it is required to *bear a label with the country of origin information in accordance with section 1.2.11—4.

1.2.1—15 Information required to be on labelling for food sold to a caterer

Subject to this section, labelling that is required for food sold to a *caterer under section 1.2.1—12 must state the following information in accordance with the provisions indicated:

- (a) name of food (see section 1.2.2—2);
- (b) lot identification (see section 1.2.2—3);
- (c) advisory statements, warning statements and declarations (see sections 1.2.3—2, 1.2.3—3 and 1.2.3—4);
- (d) date marking information (see section 1.2.5—3);
- (e) any storage conditions and directions for use (see section 1.2.6—2);
- (f) information relating to foods produced using gene technology (see section 1.5.2—4);
- (g) information relating to irradiated food (see section 1.5.3—9).

1.2.1—16 Other information that must be provided with food sold to a caterer

- (1) The information referred to in subsection 1.2.1—8(1) (General and additional requirements—retail sales) must be:
- (a) set out in the label (if any); or
 - (b) provided in documentation.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—17 Information that can be requested in relation to food sold to a caterer

- (2) In the case of the information referred to in paragraph 1.2.1—8(1)(c) (name and address of the supplier), if the information is provided in documentation, the documentation must accompany the food for sale.
- (3) Subsection (1) does not apply to:
 - (a) the information that is referred to in subsection 1.2.1—15 (Information required to be on labelling for food sold to a caterer); or
 - (b) the information referred to in paragraph 1.2.1—8(1)(k) (information about characterising ingredients and components).

1.2.1—17 Information that can be requested in relation to food sold to a caterer

The *caterer must be provided with any information:

- (a) requested by the caterer; or
- (b) required by the *relevant authority to be provided;

that is necessary to enable the *caterer to comply with any compositional, labelling or declaration requirement of this Code in a sale of the food or of another food using it as an ingredient.

Division 4 Other sales

1.2.1—18 When this Division applies

- (1) This Division applies to sales of food other than:
 - (a) sales to which Division 2 or Division 3 apply; or
 - (b) intra-company transfers.
- (2) In this section:

intra-company transfer means a transfer of a food between elements of a single company, between subsidiaries of a parent company or between subsidiaries of a parent company and the parent company.

1.2.1—19 Outline of Division

This Division sets out the following:

- (a) the circumstances in which the food for sale is required to *bear a label—see section 1.2.1—20;
- (b) the information requirements for a food for sale that is not required to bear a label—see section 1.2.1—21.

1.2.1—20 Labelling requirements

- (1) If the food for sale is not in a package, it is not required to *bear a label.
 - (2) If the food for sale is in a package, it is required to *bear a label that states the following information in accordance with the provisions indicated:
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—21 When information can be requested

- (a) name of food (see section 1.2.2—2);
 - (b) lot identification (see section 1.2.2—3);
 - (c) unless provided in documentation accompanying the food for sale—the name and address of the *supplier (see section 1.2.2—4).
- (3) The label may be:
- (a) on the package; or
 - (b) if there is more than 1 layer of packaging—on the outer layer; or
 - (c) if the food for sale is in a transportation outer—clearly discernible through the transportation outer.

1.2.1—21 When information can be requested

- (1) The purchaser must be provided with any information:
- (a) requested by the purchaser; or
 - (b) required by the *relevant authority to be provided;
- that is necessary to enable the purchaser to comply with any compositional, labelling or declaration requirement of this Code in a sale of the food or of another food using it as an ingredient.
- (2) If requested by the purchaser or required by the relevant authority, the information must be provided in writing.

Division 5 General prohibitions relating to labels

1.2.1—22 Prohibition on altering labels

- (1) A person who sells a food for sale that is packaged, or deals with a packaged food for sale before its sale, must not deface the label on the package unless:
- (a) the *relevant authority has given its permission; and
 - (b) if the relevant authority has imposed any conditions on its permission—those conditions have been complied with.
- (2) Despite subsection (1), a person who sells a food that is packaged, or deals with a packaged food before its sale, may re-label the food if the label contains incorrect information, by placing a new label over the incorrect one in such a way that:
- (a) the new label is not able to be removed; and
 - (b) the incorrect information is not visible.
- (3) In this section:
- deface* includes alter, remove, erase, obliterate and obscure.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.1 Requirements to have labels or otherwise provide information

Section 1.2.1—23

Application of labelling provisions to advertising

1.2.1—23 Application of labelling provisions to advertising

If this Code prohibits a label on or relating to food from including a statement, information, a design or a representation, an advertisement for that food must not include that statement, information, design or representation.

Division 6 Legibility requirements

1.2.1—24 General legibility requirements

- (1) If this Code requires a word, statement, expression or design to be contained, written or set out on a label—any words must be in English and any word, statement, expression or design must, wherever occurring:
 - (a) be legible; and
 - (b) be prominent so as to contrast distinctly with the background of the label.
- (2) If a language other than English is also used on a label, the information in that language must not negate or contradict the information in English.

1.2.1—25 Legibility requirements for warning statements

A *warning statement on a label must be written:

- (a) for a small package—in a *size of type of at least 1.5 mm;
 - (b) otherwise—in a size of type of at least 3 mm.
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.2 Information requirements—food identification

Section 1.2.2—1

Name

Standard 1.2.2 Information requirements—food identification

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.2 — Information requirements—food identification*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.2—2 Name of food

(1) For the labelling provisions, the name of a food is:

- (a) if the food has a *prescribed name—the prescribed name; and
- (b) otherwise—a name or description:
 - (i) sufficient to indicate the true nature of the food; and
 - (ii) that includes any additional words this Code requires to be included in the name of food.

Note 1 The labelling provisions are set out in Standard 1.2.1.

Note 2 In this Code, the following foods have these names as prescribed names:

- (i) ‘fermented processed meat – not heat treated’ (Standard 2.2.1);
- (ii) ‘fermented processed meat – heat treated’ (Standard 2.2.1);
- (iii) ‘fermented processed meat – cooked’ (Standard 2.2.1);
- (iv) ‘fermented manufactured meat – not heat treated’ (Standard 2.2.1);
- (v) ‘fermented manufactured meat – heat treated’ (Standard 2.2.1);
- (vi) ‘fermented manufactured meat – cooked’ (Standard 2.2.1);
- (vii) ‘follow-on formula’ (Standard 2.9.1);
- (viii) ‘formulated meal replacement’ (Standard 2.9.3);
- (ix) ‘formulated supplementary food’ (Standard 2.9.3);
- (x) ‘formulated supplementary food for young children’ (Standard 2.9.3);
- (xi) ‘formulated supplementary sports food’ (Standard 2.9.4);
- (xii) ‘honey’ (Standard 2.8.2);
- (xiii) ‘infant formula’ (Standard 2.9.1).

(2) If this Code includes a definition of a particular food, that fact alone does not establish that the defined term is the name of the food for this section.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.2 Information requirements—food identification

Section 1.2.2—3

Lot identification

1.2.2—3 Lot identification

For the labelling provisions, a requirement to state the *lot identification does not apply to:

- (a) an individual portion of ice cream or ice confection; or
- (b) a food for sale that is in a small package, if:
 - (i) the *small package is stored or displayed for sale in a bulk package or a bulk container; and
 - (ii) the labelling of the bulk package or bulk container includes the lot identification.

Note The labelling provisions are set out in Standard 1.2.1.

1.2.2—4 Name and address of supplier

For the labelling provisions, a reference to the name and address of the *supplier of a food or food for sale is a reference to the name and *business address in either Australia or New Zealand of a person who is a supplier.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.3 Information requirements—warning statements, advisory statements and declarations

Section 1.2.3—1

Name

Standard 1.2.3 Information requirements—warning statements, advisory statements and declarations

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.3 — Information requirements—warning statements, advisory statements and declarations*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.3—2 Mandatory advisory statements

- (1) For the labelling provisions, if a food is listed in column 1 of the table in Section S9—2, the corresponding advisory statement in column 2 of that table is required.
- (2) For the labelling provisions, an advisory statement to the effect that excess consumption may have a laxative effect is required for a food that contains:
 - (a) one or more of the following substances, either alone or in combination, at a level of or in excess of 10 g/100 g:
 - (i) lactitol;
 - (ii) maltitol;
 - (iii) maltitol syrup;
 - (iv) mannitol;
 - (v) xylitol; or
 - (b) one or more of the following substances, either alone or in combination, at a level of or in excess of 25 g/100 g:
 - (i) erythritol;
 - (ii) isomalt;
 - (iii) polydextrose;
 - (iv) sorbitol; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.3 Information requirements—warning statements, advisory statements and declarations

Section 1.2.3—3 Mandatory warning statement—royal jelly

- (c) one or more of the substances listed in paragraph (a), in combination with one or more of the substances listed in paragraph (b), at a level of or in excess of 10 g/100 g.

Note The labelling provisions are set out in Standard 1.2.1.

1.2.3—3 Mandatory warning statement—royal jelly

For the labelling provisions, if a food is or includes as an ingredient royal jelly, the following *warning statement is required: ‘This product contains royal jelly which has been reported to cause severe allergic reactions and in rare cases, fatalities, especially in asthma and allergy sufferers’.

Note The labelling provisions are set out in Standard 1.2.1.

1.2.3—4 Mandatory declaration of certain foods or substances in food

- (1) For the labelling provisions, if any of the following foods or substances is present in a food for sale in a manner listed in subsection (2), a declaration that the food or substance is present is required:
- (a) added sulphites in concentrations of 10 mg/kg or more;
 - (b) any of the following foods, or products of those foods:
 - (i) cereals containing *gluten, namely, wheat, rye, barley, oats and spelt and their hybridised strains other than where these substances are present in beer and spirits;
 - (ii) crustacea;
 - (iii) egg;
 - (iv) fish, except for isinglass derived from swim bladders and used as a clarifying agent in beer or wine;
 - (v) milk;
 - (vi) peanuts;
 - (vii) soybeans;
 - (viii) sesame seeds;
 - (ix) tree nuts, other than coconut from the fruit of the palm *Cocos nucifera*.
- (2) For subsection (1), the food or substance may be present as:
- (a) an ingredient or as an ingredient of a *compound ingredient; or
 - (b) a substance *used as a food additive, or an ingredient or component of such a substance; or
 - (c) a substance or food *used as a processing aid, or an ingredient or component of such a substance or food.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.4 Information requirements—statement of ingredients

Section 1.2.4—1

Name

Standard 1.2.4 Information requirements—statement of ingredients

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.4 — Information requirements—statement of ingredients*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.4—2 Requirement for statement of ingredients

- (1) In this Code, a **statement of ingredients** for a food for sale is a statement of ingredients that complies with this Code.
- (2) To avoid doubt, if:
 - (a) the label lists the name of the food in accordance with paragraph 1.2.1—8(1)(a); and
 - (b) a statement of ingredients that complies with this Standard would list only the name of the food in accordance with paragraph 1.2.1—8(1)(a);the label is taken to contain a statement of ingredients.
- (3) For the labelling provisions, a requirement for a statement of ingredients does not apply to:
 - (a) water that is packaged and labelled in accordance with Standard 2.6.2; or
 - (b) a *standardised alcoholic beverage; or
 - (c) a food for sale that is contained in a *small package.

Note 1 The labelling provisions are set out in Standard 1.2.1.

Note 2 Despite subsection (3), the presence of some ingredients must be declared—see Standard 1.2.3.

1.2.4—3 Requirement to list all ingredients

- (1) Subject to subsection (2), a statement of ingredients must list each ingredient in the food for sale.
- (2) A statement of ingredients need not list:
 - (a) an ingredient of a *flavouring substance; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.4 Information requirements—statement of ingredients

Section 1.2.4—4

Ingredients to be listed by common, descriptive or generic name

Note Despite paragraph (a), subsection 1.2.4—7(5) and 1.2.4—7(6) require some ingredients of flavouring substances to be specifically declared or listed in the statement of ingredients.

- (b) a volatile ingredient which is completely removed during processing; or
- (c) added water that:
 - (i) is added to reconstitute dehydrated or concentrated ingredients; or
 - (ii) forms part of broth, brine or syrup that is declared in the statement of ingredients or is part of the name of the food; or
 - (iii) constitutes less than 5% of the food; or
- (d) a substance that is *used as a processing aid in accordance with Standard 1.3.3; or
- (e) a food that is used as a processing aid.

1.2.4—4 Ingredients to be listed by common, descriptive or generic name

A statement of ingredients must identify each ingredient:

- (a) in the case of offal—in accordance with section 2.2.1—6; or
- (b) in any other case, using any of:
 - (i) a name by which the ingredient is commonly known; or
 - (ii) a name that describes the true nature of the ingredient; or
 - (iii) a generic name for the ingredient that is specified in Schedule 10, in accordance with any conditions specified in that Schedule.

1.2.4—5 Ingredients to be listed in descending order of ingoing weight

- (1) A statement of ingredients must list each ingredient in descending order of ingoing weight.
- (2) The ingoing weight of an ingredient may be determined in accordance with its weight before dehydration or concentration, if the ingredient:
 - (a) is a dehydrated or concentrated ingredient; and
 - (b) is reconstituted during preparation, manufacture or handling of the food.
- (3) Despite subsection (1), if a food is represented as one that is to be reconstituted in accordance with directions:
 - (a) the ingredients may be listed in descending order of their weight in the reconstituted food; and
 - (b) if the ingredients are listed on this basis, this must be made clear on the label.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.4 Information requirements—statement of ingredients

Section 1.2.4—6

Declaration of alternative ingredients

- (4) For subsection (1), the ingoing weight of water, or of a volatile ingredient, *IW*, must be calculated in accordance with the following equation:

$$IW = X - Y$$

where:

X is the weight of the water or volatile ingredient that is added to the food.

Y is the sum of:

- (a) the weight of any water or volatile ingredient that is removed; and
- (b) the weight of any water or volatile ingredient that is used for reconstitution of dehydrated or concentrated ingredients;

during preparation, manufacture or handling of the food.

- (5) A *compound ingredient must be listed in a statement of ingredients by listing, in accordance with subsection (1):
- (a) the compound ingredient by name as an ingredient of the food for sale, in accordance with subsection (6); or
 - (b) each ingredient of the compound ingredient individually as an ingredient of the food for sale.
- (6) If a *compound ingredient is listed in accordance with paragraph (5)(a), it must be followed by a list, in brackets, of:
- (a) if the compound ingredient comprises 5% or more of the food for sale— all ingredients that make up the compound ingredient; or
 - (b) if the compound ingredient comprises less than 5% of the food for sale— the following ingredients:
 - (i) any ingredient of the compound ingredient that is required to be listed in accordance with section 1.2.3—4; and
 - (ii) any substance *used as a food additive in the compound ingredient which performs a technological purpose in the food for sale.
- (7) Paragraph (5)(a) does not apply to food for infants.

Note See Standard 2.9.2.

- (8) Despite subsection (6), the ingredients of a *standardised alcoholic beverage do not need to be listed in a statement of ingredients if the alcoholic beverage has been listed as an ingredient of the food for sale.

1.2.4—6 Declaration of alternative ingredients

If the composition of a food for sale is subject to minor variations by the substitution of an ingredient which performs a similar function, the statement of ingredients may list both ingredients in a way which makes it clear that alternative or substitute ingredients are being declared.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.4 Information requirements—statement of ingredients

Section 1.2.4—7

Declaration of substances used as food additives

1.2.4—7 Declaration of substances used as food additives

- (1) A substance (including a vitamin or mineral) *used as a food additive must be listed in a statement of ingredients by specifying:
 - (a) if the substance can be classified into a class of additives listed in Schedule 7 (whether prescribed or optional)—that class name, followed in brackets by the name or *code number of the substance as indicated in Schedule 8; or
 - (b) otherwise—the name of the substance as indicated in Schedule 8.
- (2) For the purposes of paragraph (1)(a), if the substance can be classified into more than 1 class, the most appropriate class name must be used.
- (3) Despite paragraph (1)(a), if the substance is an enzyme:
 - (a) it may be listed as ‘enzyme’; and
 - (b) the specific name of the enzyme need not be listed.
- (4) If a *flavouring substance is an ingredient, it must be listed in the statement of ingredients by using:
 - (a) the word ‘flavouring’ or ‘flavour’; or
 - (b) a more specific name or description of the flavouring substance.
- (5) If any of the following substances are added to a food for sale as a *flavouring substance or as an ingredient of a flavouring substance, the name of the substance must be specifically declared in accordance with subsection (1):
 - (a) L-glutamic acid;
 - (b) monosodium glutamate;
 - (c) monopotassium L-glutamate;
 - (d) calcium di-L-glutamate;
 - (e) monoammonium L-glutamate;
 - (f) magnesium di-L-glutamate;
 - (g) disodium guanylate;
 - (h) disodium inosinate;
 - (i) disodium-5'-ribonucleotides.
- (6) If caffeine is added to a food for sale (whether as a *flavouring substance or otherwise), it must be listed in the statement of ingredients as caffeine.

1.2.4—8 Declaration of vitamins and minerals

Where a vitamin or mineral is added to a food, the vitamin or mineral may be declared in accordance with section 1.2.4—7 using the class name ‘vitamin’ or ‘mineral’.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.5 Information requirements—date marking of food for sale

Section 1.2.5—1

Name

Standard 1.2.5 Information requirements—date marking of food for sale

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.5—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.5 — Information requirements—date marking of food for sale*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.5—2 Definitions

Note In this Code (see section 1.1.2—2):

baked-for date, in relation to bread, means:

- (a) if the time at which the bread was baked is before midday—the baked-on date;
- (b) if the time at which the bread was baked is after midday—the day after the baked-on date.

Note For example, bread that is baked after midday on one day may have a ‘baked-for date’ of the following day.

baked-on date, in relation to bread, means the date on which the bread was baked.

best-before date, for a food for sale, means the date up to which the food for sale will remain fully marketable and will retain any specific qualities for which express or implied claims have been made, if the food for sale:

- (a) remains in an intact package during its storage; and
- (b) is stored in accordance with any storage conditions applicable under Standard 1.2.6.

use-by date, for a food for sale, means the date after which it is estimated that the food for sale should not be consumed because of health or safety reasons, if the food for sale:

- (a) remains in an intact package during its storage; and
- (b) is stored in accordance with any storage conditions applicable under Standard 1.2.6.

1.2.5—3 Food for sale must be date marked on labels

- (1) For the labelling provisions, the date marking information is:
 - (a) if there is a *use-by date for the food—that date; or
 - (b) otherwise—any of:
 - (i) the best-before date of the food; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.5 Information requirements—date marking of food for sale

Section 1.2.5—4

Prohibition on sale of food after its use-by date

- (ii) for bread that has a shelf life of less than 7 days:
 - (A) the *best-before date; or
 - (B) the *baked-for date; or
 - (C) the *baked-on date.
- (2) The date marking information is not required if:
 - (a) the *best-before date of the food is 2 years or more after the date it is determined; or
 - (b) the food is an individual portion of ice cream or ice confection.
- (3) Despite subsection (1), if the food is in a small package, the only date-marking information required is the *use-by date (if any).

Note The labelling provisions are set out in Standard 1.2.1.

1.2.5—4 Prohibition on sale of food after its use-by date

A food must not be sold after its *use-by date.

1.2.5—5 Required wording and form for dates for labels

- (1) The date marking information may only be expressed in accordance with this section.
- (2) A *best-before date, a *use-by date, a *baked-for date and a *baked-on date must:
 - (a) be expressed using the following wording:
 - (i) for a best-before date—the words ‘Best Before’;
 - (ii) for a use-by date—the words ‘Use By’;
 - (iii) for a baked-for date—the words ‘Baked For’ or ‘Bkd For’;
 - (iv) for a baked-on date—the words ‘Baked On’ or ‘Bkd On’; and
 - (b) be accompanied by:
 - (i) the relevant date; or
 - (ii) a reference to where the date is located on the label.
- (3) In a *best-before date or a *use-by date:
 - (a) the day must be expressed in numerical form; and
 - (b) the month may be expressed in:
 - (i) numerical form; or
 - (ii) upper or lower case letters; and
 - (c) the year must be expressed in numerical form and may be expressed using the full year or only the last 2 digits of the year.
- (4) A *best-before date and a *use-by date must at least consist of:

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.5 Information requirements—date marking of food for sale

Section 1.2.5—6

Packed-on dates and manufacturer's or packer's codes

- (a) if the best-before date or use-by date is not more than 3 months from the date it is applied:
 - (i) the day and month, in that order; or
 - (ii) if the month is expressed in letters—the day and the month, in any order; or
- (b) if the best-before date or a use-by date is more than 3 months from the date it is applied—the month and the year, in that order.

Example For subparagraph (a)(i)—‘23 Dec’ or ‘23 12’ or ‘23 12 2015’ or ‘23 Dec 2015’.

For subparagraph (a)(ii)— ‘23 Dec’ or ‘Dec 23’ or ‘23 Dec 2015’ or ‘Dec 23 2015’.

For paragraph (b)—‘Dec 2015’ or ‘12 2015’ or ‘23 12 2015’ or ‘23 Dec 2015’.

- (5) The day, month and year must be expressed so that it is apparent which number is the day, the month or the year.

1.2.5—6 Packed-on dates and manufacturer's or packer's codes

To avoid doubt, section 1.2.5—5 does not prevent the addition of a packed-on date or a manufacturer's or a packer's code on the label on a package of food.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.6 Information requirements—directions for use and storage

Section 1.2.6—1

Name

Standard 1.2.6 Information requirements—directions for use and storage

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.6—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.6 — Information requirements—directions for use and storage*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.6—2 Directions for use, and statement of storage conditions

For the labelling provisions, storage conditions and directions for use of a food are:

- (a) if specific storage conditions are required to ensure that the food will keep until the *use-by date or the *best-before date—a statement of those conditions; and
- (b) if the food must be used or stored in accordance with certain directions for health or safety reasons—those directions; and
- (c) if the food is or contains:
 - (i) raw bamboo shoots—a statement indicating that bamboo shoots should be fully cooked before being consumed; or
 - (ii) raw sweet cassava—a statement indicating that sweet cassava should be peeled and fully cooked before being consumed.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—1

Name

Standard 1.2.7 Nutrition, health and related claims

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

1.2.7—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.7 — Nutrition, health and related claims*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.7—2 Definitions

In Standard 1.2.7 and Standard 1.2.8:

fruit means the edible portion of a plant or constituents of the edible portion that are present in the typical proportion of the whole fruit (with or without the peel or water); and does not include nuts, spices, herbs, fungi, legumes and seeds.

vegetable means the edible portion of a plant or constituents of the edible portion that are present in the typical proportion of the whole vegetable (with or without the peel or water) and does not include nuts, spices, herbs, fungi, dried legumes (including dried legumes that have been cooked or rehydrated) and seeds.

Note 1 In this Code (see section 1.1.2—2):

biomarker means a measurable biological parameter that is predictive of the risk of a serious disease when present at an abnormal level in the human body.

carbohydrate, other than in the definition of **beer** (section 1.1.2—3), means available carbohydrate or available carbohydrate by difference.

claim means an express or implied statement, representation, design or information in relation to a food or a property of food which is not mandatory in this Code.

endorsement means a nutrition content claim or a health claim that is made with the permission of an endorsing body.

endorsing body means a not-for-profit entity that:

- (a) has a nutrition- or health-related purpose or function; and
- (b) permits a supplier to make an endorsement.

fat, in Standards 1.2.7 and 1.2.8 and Schedules 4 and 11, means total fat.

food group means any of the following groups:

- (a) bread (both leavened and unleavened), grains, rice, pasta and noodles;
- (b) fruit, vegetables, herbs, spices and fungi;

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—2

Definitions

- (c) milk, skim milk, cream, fermented milk, yoghurt, cheese, processed cheese, butter, ice cream, condensed milk, dried milk, evaporated milk, and dairy analogues derived from legumes and cereals listed in section S17—4;
- (d) meat, fish, eggs, nuts, seeds and dried legumes;
- (e) fats including butter, edible oils and edible oil spreads.

general level health claim means a health claim that is not a high level health claim.

general level health claims table means the table to section S4—5.

health claim means a claim which states, suggests or implies that a food or a property of food has, or may have, a health effect.

Note See also subsection 2.10.2—8(3).

health effect means an effect on the human body, including an effect on one or more of the following:

- (a) a biochemical process or outcome;
- (b) a physiological process or outcome;
- (c) a functional process or outcome;
- (d) growth and development;
- (e) physical performance;
- (f) mental performance;
- (g) a disease, disorder or condition.

high level health claim means a health claim that refers to a serious disease or a biomarker of a serious disease.

high level health claims table means the table to section S4—4.

meet the NPSC means that the nutrient profiling score of a food described in column 1 of the table to section S4—6 is less than the number specified for that food in column 2 of that table.

NPSC means the nutrient profiling scoring criterion (see section S4—6).

property of food means a component, ingredient, constituent or other feature of food.

nutrient profiling score means the final score calculated pursuant to the method referred to in section 1.2.7—26.

reference food, in relation to a claim, means a food that is:

- (a) of the same type as the food for which the claim is made and that has not been further processed, formulated, reformulated or modified to increase or decrease the energy value or the amount of the nutrient for which the claim is made; or
- (b) a dietary substitute for the food in the same food group as the food for which the claim is made.

serious disease means a disease, disorder or condition which is generally diagnosed, treated or managed in consultation with or with supervision by a health care professional.

sugars, in Standard 1.2.7, Standard 1.2.8 and Schedule 4 (except where it appears with an asterisk as 'sugars*')—means monosaccharides and disaccharides. (Elsewhere in the Code it has a different definition).

Note 2 Section 1.1.2—9 (Definition of **nutrition content claim**) provides as follows:

- (1) In this Code:

nutrition content claim means a claim that:

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—3

Outline

- (a) is about:
- (i) the presence or absence of any of the following:
 - (A) a biologically active substance;
 - (B) dietary fibre;
 - (C) energy;
 - (D) minerals;
 - (E) potassium;
 - (F) protein;
 - (G) carbohydrate;
 - (H) fat;
 - (I) the components of any one of protein, carbohydrate or fat;
 - (J) salt;
 - (K) sodium;
 - (L) vitamins; or
 - (ii) glycaemic index or glycaemic load; and
- (b) does not refer to the presence or absence of alcohol; and
- (c) is not a health claim.

Note See also subsections 2.6.2 - 5(4) and 2.10.2 - 8(3).

Inclusion of mandatory information in nutrition information panel does not constitute a nutrition content claim

- (2) To avoid doubt, if this Code requires particular information to be included in a nutrition information panel, the inclusion of that information does not constitute a **nutrition content claim**.

Inclusion of voluntary information in nutrition information panel might constitute a nutrition content claim

- (3) If this Code permits, but does not require, particular information to be included in a nutrition information panel, the inclusion of that information constitutes a **nutrition content claim** unless:

- (a) this Code provides otherwise; or
- (b) the information is a declaration of:
 - (i) if the food contains less than 2 g of dietary fibre per serving—dietary fibre; or
 - (ii) trans fatty acid content; or
 - (iii) lactose content.

- (4) For a food that contains more than 1.15% alcohol by volume, the inclusion in a nutrition information panel of the information referred to in paragraphs 1.2.8 - 6(1)(a), (b) and (c), and subparagraphs 1.2.8 - 6(1)(d)(i), (ii) and (iii) does not constitute a **nutrition content claim**.

Note 3 In this Standard, the following terms are also defined: fvnI, information period, nutrition content claim table and required records.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—3

Outline

Division 2

Outline of Standard

1.2.7—3 Outline

This Standard:

- (a) sets out:
 - (i) the claims that may be made on labels or in advertisements about the nutritional content of food (described as ‘nutrition content claims’); and
 - (ii) the claims that may be made on labels or in advertisements about the relationship between a food or a property of a food, and a *health effect (described as ‘health claims’); and
- (b) describes the conditions under which such claims may be made; and
- (c) describes the circumstances in which endorsements may be provided on labels or in advertisements.

Division 3

Claims framework and general principles

1.2.7—4 Nutrition content claims or health claims not to be made about certain foods

- (1) A *nutrition content claim or *health claim must not be made about:
 - (a) kava; or
 - (b) an infant formula product.
- (2) A *nutrition content claim (other than a claim about energy content or carbohydrate content) or a *health claim must not be made about a food that contains more than 1.15% alcohol by volume.

1.2.7—5 Standard does not apply to certain foods

This Standard does not apply to:

- (a) food that is intended for further processing, packaging or labelling prior to retail sale; or
- (b) food that is delivered to a vulnerable person by a delivered meal organisation; or
- (c) food, other than food in a package, that is provided to a patient in a hospital or a *medical institution.

1.2.7—6 Standard does not apply to certain claims or declarations

This Standard does not apply to:

- (a) a claim that is expressly permitted by this Code; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—7

Form of food to which provisions of this Standard apply

- (b) a claim about the risks or dangers of alcohol consumption or about moderating alcohol intake; or
- (c) a declaration that is required by an application Act.

1.2.7—7 Form of food to which provisions of this Standard apply

If this Standard imposes a prerequisite, condition, qualification or any other requirement on the making of a claim, that prerequisite, condition, qualification or requirement applies to whichever of the following forms of the food is applicable:

- (a) if the food can be either prepared with other food or consumed as sold—the food as sold;
- (b) if the food is required to be prepared and consumed according to directions—the food as prepared;
- (c) if the food requires reconstituting with water—the food after it is reconstituted with water and ready for consumption;
- (d) if the food requires draining before consuming—the food after it is drained and ready for consumption.

1.2.7—8 Claims not to be therapeutic in nature

A claim must not:

- (a) refer to the prevention, diagnosis, cure or alleviation of a disease, disorder or condition; or
- (b) compare a food with a good that is:
 - (i) represented in any way to be for therapeutic use; or
 - (ii) likely to be taken to be for therapeutic use, whether because of the way in which the good is presented or for any other reason.

1.2.7—9 Claims not to compare vitamin or mineral content

A claim that directly or indirectly compares the vitamin or mineral content of a food with that of another food must not be made unless the claim is permitted by this Code.

1.2.7—10 Standard does not prescribe words

Nothing in this Standard is to be taken to prescribe the words that must be used when making a claim.

Note see also section 1.1.1—8.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—11

Presentation of nutrition content claims

Division 4

Requirements for nutrition content claims

1.2.7—11 Presentation of nutrition content claims

A nutrition content claim must be stated together with a statement about the form of the food to which the claim relates, unless the form of the food to which the claim relates is the food as sold.

1.2.7—12 Nutrition content claims about properties of food in section S4—3

- (1) If a *property of food is mentioned in column 1 of the nutrition content claims table (section S4—3), a nutrition content claim may only be made about that property of food in accordance with this section.
- (2) If a *claim is made in relation to a food about a *property of food mentioned in column 1 of the nutrition content claims table, the food must meet the corresponding general claim conditions, if any, in column 2 of the table.
- (3) If a *claim made in relation to a food about a *property of food mentioned in column 1 of the nutrition content claims table uses a descriptor mentioned in column 3 of the table, or a synonym of that descriptor, the food must meet:
 - (a) the general claim conditions for the relevant property of food in column 2 of the table; and
 - (b) the specific claim conditions in column 4 of the table for the relevant descriptor.
- (4) If, in relation to a claim mentioned in subsection (3), there is an inconsistency between a general claim condition in column 2 of the table and a specific claim condition in column 4 of the table, the specific claim condition prevails.
- (5) A descriptor must not be used in a *nutrition content claim about lactose or *trans fatty acids unless the descriptor:
 - (a) is mentioned in column 3 of the nutrition content claims table and corresponds with that property of food; or
 - (b) is a synonym of the descriptor referred to in paragraph (a).
- (6) A descriptor must not be used in a *nutrition content claim about glycaemic load unless that descriptor is expressed as a number or in numeric form.
- (7) A *nutrition content claim in relation to *gluten may only:
 - (a) use a descriptor that is mentioned in column 3 of the nutrition content claims table in conjunction with gluten, or a synonym of such a descriptor; or
 - (b) state that a food contains gluten or is high in gluten.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—13 Nutrition content claims about properties of food not in section S4—3

- (8) Subject to this section and section 1.2.7—15 (Nutrition content claims must not imply slimming effects), any descriptor that is not mentioned in column 3 of the nutrition content claims table, including a descriptor expressed as a number or in numeric form, may be used in conjunction with a *property of food that is mentioned in column 1 of the table.
- (9) In this Division:
nutrition content claims table means the table to section S4—3.

1.2.7—13 Nutrition content claims about properties of food not in section S4—3

- (1) A *nutrition content claim about a *property of food that is not mentioned in the table to section S4—3 may state only:
- (a) that the food contains or does not contain the property of food; or
 - (b) that the food contains a specified amount of the property of food in a specified amount of that food; or
 - (c) a combination of paragraph (a) and (b).
- (2) A statement made for the purposes of paragraph (1)(a) must not use a descriptor listed in column 3 of the nutrition content claims table, or any other descriptor, except a descriptor that indicates that the food does not contain the property of food.

1.2.7—14 Nutrition content claims about choline, fluoride or folic acid

- (1) A *nutrition content claim about choline, fluoride or folic acid may state only:
- (a) that the food contains choline, fluoride or folic acid; or
 - (b) that the food contains a specified amount of choline, fluoride or folic acid in a specified amount of that food; or
 - (c) a combination of paragraph (a) and (b).
- (2) A statement made for the purposes of paragraph (1)(a) must not use a descriptor listed in column 3 of the nutrition content claims table, or any other descriptor.
- (3) A nutrition content claim about choline, fluoride or folic acid may be made only if a *health claim about that substance is made in relation to the same food.

1.2.7—15 Nutrition content claims must not imply slimming effects

A *nutrition content claim that meets the conditions to use the descriptor diet must not use another descriptor that directly or indirectly refers to slimming or a synonym for slimming.

1.2.7—16 Comparative claims

A comparative claim about a food (*claimed food*) must include together with the claim:

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—17 Application or proposal to vary S4—5 taken to be a high level health claims variation

- (a) the identity of the *reference food; and
 - (b) the difference between the amount of the *property of food in the claimed food and the *reference food.
- (2) In this section, a nutrition content claim is a *comparative claim* if:
- (a) it:
 - (i) directly or indirectly compares the nutrition content of one food or brand of food with another; and
 - (ii) includes claims using any of the following descriptors:
 - (A) light or lite;
 - (B) increased;
 - (C) reduced;
 - (D) words of similar import; or
 - (b) it:
 - (i) uses the descriptor diet; and
 - (ii) meets the conditions for making that claim by having at least 40% less energy than the same amount of *reference food.

Division 5 Requirements for health claims

1.2.7—17 Application or proposal to vary S4—5 taken to be a high level health claims variation

An application or a proposal to add a *general level health claim to the table to section S4—5 is taken to be an application or proposal for a *high level health claims variation*.

Note The term *high level health claims variation* is defined in section 4 of the FSANZ Act. The effect of this provision is that an application or a proposal to add a general level health claim to the table to S4—5 will be assessed under the provisions in Subdivision G of each of Divisions 1 and 2 of Part 3 of the FSANZ Act, as appropriate.

1.2.7—18 Conditions for making health claims

- (1) A *health claim must not be made unless:
 - (a) the food to which the health claim relates meets the NPSC; and
 - (b) the health claim complies with the requirements in:
 - (i) if the health claim is a high level health claim—subsection (2); or
 - (ii) if the health claim is a general level health claim—subsection (3).
- (2) For subparagraph (1)(b)(i), the requirements are:
 - (a) the food or the *property of food is mentioned in column 1 of the high level health claims table; and

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—19 Requirement when making a general level health claim under paragraph 1.2.7—18(3)(b)

- (b) the *health effect claimed for that food or property of food is mentioned in the corresponding row in column 2 of the table; and
 - (c) the food complies with the relevant conditions in column 5 of the table.
- (3) For subparagraph (1)(b)(ii), the requirements are:
- (a) each of the following:
 - (i) the food or the *property of food is mentioned in column 1 of the general level health claims table;
 - (ii) the *health effect claimed for that food or property of food is mentioned in the corresponding row in column 2 of the table; and
 - (iii) the food complies with the relevant conditions in column 5 of the table; or
 - (b) the person who is responsible for making the *health claim has notified the Chief Executive Officer of the Authority (FSANZ) of the details of a relationship between a food or *property of food and a *health effect that has been established by a process of systematic review that is described in Schedule 6.
- (4) Despite paragraph (1)(a), a special purpose food does not need to meet the NPSC.

Note see Part 9 of Chapter 2.

1.2.7—19 Requirement when making a general level health claim under paragraph 1.2.7—18(3)(b)

- (1) A person who gives the notice mentioned in paragraph 1.2.7—18(3)(b) is required to:
- (a) provide the name of the person that is giving the notice and the address in Australia or New Zealand of that person; and
 - (b) consent to the publication by the Authority of the information given for the purposes of paragraph 1.2.7—18(3)(b) and paragraph (1)(a); and
 - (c) certify that the notified relationship between a food or *property of food and a *health effect has been established by a process of systematic review that is described in Schedule 6; and
 - (d) if requested by a relevant authority, provide records to the *relevant authority that demonstrate that:
 - (i) the systematic review was conducted in accordance with the process of systematic review described in Schedule 6; and
 - (ii) the notified relationship is a reasonable conclusion of the systematic review.
- (2) A certificate provided for a body corporate must be signed by a senior officer of the body corporate.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—20

How health claims are to be made

1.2.7—20 How health claims are to be made

- (1) If a *health claim is a *high level health claim based on a relationship described in the *high level health claims table or a *general level health claim based on a relationship described in the *general level health claims table, the health claim must:
 - (a) state:
 - (i) the food or the *property of food mentioned in column 1 of the relevant table; and
 - (ii) the specific *health effect mentioned in column 2 of the relevant table that is claimed for the food or the property of food; and
 - (b) if column 3 of the relevant table refers to a relevant population group to which the specific health effect relates—include a statement of that population group in conjunction with the health claim; and
 - (c) include, together with the health claim, the information referred to in subsection (3).
- (2) If a *health claim is a *general level health claim based on a relationship that has been notified under paragraph 1.2.7—18(3)(b), the health claim must:
 - (a) state the food or the *property of food and the specific health effect; and
 - (b) include together with the health claim a statement about the relevant population group, if any, that is a reasonable conclusion of the systematic review mentioned in paragraph 1.2.7—18(3)(b); and
 - (c) include, together with the health claim, the information referred to in subsection (3).
- (3) For paragraphs (1)(c) and (2)(c), the information is:
 - (a) a dietary context statement that complies with subsection (4); and
 - (b) a statement of the form of the food to which the *health claim relates.
- (4) Despite paragraph (3)(a), a dietary context statement need not be included on a label on a food for sale that is contained in a small package.
- (5) Despite paragraph (3)(b), if the form of the food to which the claim relates is the food as sold, the form of the food to which the claim relates need not be stated.
- (6) A dietary context statement must:
 - (a) state that the *health effect must be considered in the context of a healthy diet involving the consumption of a variety of foods; and
 - (b) be appropriate to the type of food or the *property of food that is the subject of the claim and the health effect claimed; and
 - (c) either:

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—21

Split health claims

- (i) if the *health claim is a *high level health claim based on a relationship described in the *high level health claims table or a *general level health claim based on a relationship described in the general level health claims table—include words to the effect of the relevant dietary context statement in the corresponding row of column 4 of the relevant table, if any; or
- (ii) if the health claim is a general level health claim based on a relationship that has been notified under paragraph 1.2.7—18(3)(b)—include words to the effect of a relevant dietary context statement that is a reasonable conclusion of the systematic review.

1.2.7—21 Split health claims

The matters referred to in paragraph 1.2.7—20(1)(a) or paragraph 1.2.7—20(2)(a) may also appear in another statement on the label or in an advertisement if:

- (a) the information required by subsection 1.2.7—20(1) or subsection 1.2.7—20(2) appears on a label or in an advertisement; and
- (b) the other statement indicates where on the label or advertisement the information required by subsection 1.2.7—20(1) or subsection 1.2.7—20(2) is located.

1.2.7—22 Statements for claims about phytosterols, phytostanols and their esters

A dietary context statement for a claim about *phytosterols, phytostanols and their esters need not include a statement required by paragraph 1.2.7—20(6)(a) if the claim appears together with the mandatory advisory statement required by subsection 1.2.3—2(1).

Division 6 Endorsements

1.2.7—23 Endorsing bodies

- (1) An *endorsing body must:
 - (a) not be related to; and
 - (b) be independent of; and
 - (c) be free from influence by;the *supplier of food in relation to which an *endorsement is made.
 - (2) In this section, an *endorsing body is *related to* a *supplier if the supplier:
 - (a) has a financial interest in the endorsing body; or
 - (b) established, either by itself or with others, the endorsing body; or
 - (c) exercises direct or indirect control over the endorsing body.
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—24

Criteria for endorsements

1.2.7—24 Criteria for endorsements

- (1) A *supplier of food may make or include an *endorsement on a label or in an advertisement for the food, or otherwise use the endorsement, if:
 - (a) the supplier keeps the required records for the information period; and
 - (b) the supplier upon request by the relevant authority, makes the required records available for inspection within the time specified by the relevant authority; and
 - (c) the endorsement complies with section 1.2.7—8; and
 - (d) the *endorsing body complies with section 1.2.7—23.
- (2) If a label on, or an advertisement for, imported food makes or includes an endorsement, the importer of the food must:
 - (a) keep the required records for the information period as if the importer of the food were the *supplier of the food; and
 - (b) upon request by the relevant authority, make the required records available for inspection within the time specified by the relevant authority.
- (3) An *endorsement must not refer to a *serious disease except in a reference to the *endorsing body if the serious disease is part of the name of the endorsing body.
- (4) This Standard, other than section 1.2.7—8, does not apply in relation to a claim in an endorsement.
- (5) In this section:

information period, in relation to food, means the period:

- (a) during which the food is available for sale or advertised for sale; and
- (b) the period of 2 years after the food was last sold, or advertised or available for sale, whichever is the latest.

required records means a document or documents that demonstrate that:

- (a) a *supplier using an *endorsement has obtained the permission of the *endorsing body to use the endorsement; and
- (b) the endorsing body has a nutrition- or health-related function or purpose; and
- (c) the endorsing body is a not-for-profit entity; and
- (d) the endorsing body is not related to the supplier using the endorsement.

Division 7 Additional labelling of food required to meet the NPSC

1.2.7—25 Method for calculating a nutrient profiling score

The method for calculating a *nutrient profiling score is described in Schedule 5.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.7 Nutrition, health and related claims

Section 1.2.7—26

Labelling of food required to meet the NPSC

1.2.7—26 Labelling of food required to meet the NPSC

- (1) This section applies if a food must *meet the NPSC in order to make a claim.

Note See paragraph 1.2.7—18(1)(a) and subsection 1.2.7—18(4) for when a food must meet the NPSC in order to make a claim.

- (2) The particulars of a *property of food must be declared in the nutrition information panel if:
- (a) the property of food, other than *fvnl*, is relied on to meet the NPSC; and
 - (b) those particulars are not otherwise required to be included in the nutrition information panel.
- (3) The calcium content of a food must be declared in the nutrition information panel if the food:
- (a) is classified in Category 3 of section S4—6 for the purposes of determining the food's nutrient profiling score; and
 - (b) is a cheese or processed cheese.
- (4) For the labelling provisions, if:
- (a) a food scores V points under section S5—4; and
 - (b) the claim is not a *health claim about fruits and vegetables;
- the information relating to nutrition, health and related claims is the percentage of each element of *fvnl* that is relied on to meet the NPSC.

Note The labelling provisions are set out in Standard 1.2.1.

- (5) In this section:

fvnl is as defined in section S5—4 for the purpose of calculating V points.

1.2.7—27 Labelling exemptions for certain foods

Subsections 1.2.7—26(2), (3) and (4) do not apply to food in a small package.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—1

Name

Standard 1.2.8 Nutrition information requirements

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

1.2.8—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.8 — Nutrition information requirements*.

Note: Commencement

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.8—2 Purpose

This Standard sets out nutrition information requirements in relation to foods for sale that are required to be labelled under this Code, and for foods for sale that are exempt from these labelling requirements. This Standard sets out when nutrition information must be provided, and the manner in which such information must be provided.

Note Standard 1.2.7 also sets out additional nutrition information requirements in relation to nutrition content claims and health claims. Information provided voluntarily in a nutrition information panel is a nutrition content claim.

Note 2 This Standard does not apply to infant formula products. Standard 2.9.1 sets out specific nutrition labelling requirements for infant formula products.

1.2.8—3 Application of Standard

This Standard does not apply to infant formula products.

Note see Standard 2.9.1.

1.2.8—4 Definitions

Note In this Code (see section 1.1.2—2):

average energy content means the average energy content calculated in accordance with section S11—2.

available carbohydrate means available carbohydrate calculated in accordance with section S11—3.

available carbohydrate by difference means available carbohydrate by difference calculated in accordance with section S11—3.

biologically active substance means a substance, other than a nutrient, with which health effects are associated.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—4

Definitions

claim means an express or implied statement, representation, design or information in relation to a food or a property of food which is not mandatory in this Code.

claim requiring nutrition information:

- (a) means:
 - (i) a nutrition content claim; or
 - (ii) a health claim; and
- (b) does not include:
 - (i) a declaration that is required by an application Act; or
 - (ii) an endorsement.

dietary fibre means that fraction of the edible part of plants or their extracts, or synthetic analogues that:

- (a) are resistant to digestion and absorption in the small intestine, usually with complete or partial fermentation in the large intestine; and
 - (b) promote one or more of the following beneficial physiological effects:
 - (i) laxation;
 - (ii) reduction in blood cholesterol;
 - (iii) modulation of blood glucose;
- and includes:
- (c) polysaccharides or oligosaccharides that have a degree of polymerisation greater than 2; and
 - (d) lignins.

fat, in Standards 1.2.7 and 1.2.8 and Schedules 4 and 11, means total fat.

monounsaturated fatty acids means the total of cis-monounsaturated fatty acids.

polyunsaturated fatty acids means the total of polyunsaturated fatty acids with cis-cis-methylene interrupted double bonds.

saturated fatty acids means the total of fatty acids containing no double bonds.

sugars, in Standard 1.2.7, Standard 1.2.8 and Schedule 4 (except where it appears with an asterisk as 'sugars*')—means monosaccharides and disaccharides. (Elsewhere in the Code it has a different definition).

trans fatty acids means the total of unsaturated fatty acids where one or more of the double bonds are in the trans configuration.

unit quantity means:

- (a) for a food consisting of a solid or semi-solid food—100 grams; or
- (b) for a food consisting of a beverage or other liquid food—100 millilitres.

Note 2 In Standard 1.2.7 and Standard 1.2.8:

fruit means the edible portion of a plant or constituents of the edible portion that are present in the typical proportion of the whole fruit (with or without the peel or water); and does not include nuts, spices, herbs, fungi, legumes and seeds.

vegetable means the edible portion of a plant or constituents of the edible portion that are present in the typical proportion of the whole vegetable (with or without the peel or water) and does not include nuts, spices, herbs, fungi, dried legumes (including dried legumes that have been cooked or rehydrated) and seeds.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—5

When nutrition information panel is required

Division 2

Nutrition information panels

1.2.8—5 When nutrition information panel is required

- (1) For the labelling provisions, the required information on packaged food is a nutrition information panel.
- (2) A nutrition information panel is not required for:
 - (a) the following foods, unless a *claim requiring nutrition information is made in relation to the food:
 - (i) a *standardised alcoholic beverage;
 - (ii) a herb, a spice or a herbal infusion;
 - (iii) vinegar or imitation vinegar;
 - (iv) iodised salt, reduced sodium salt mixture, salt or salt substitute;
 - (v) tea or coffee, or instant tea or instant coffee;
 - (vi) a substance that is approved for use as a food additive;
 - (vii) a substance that is approved for use as a processing aid;
 - (viii) a food that is sold to be *used as a processing aid;
 - (ix) fruit, vegetables, meat, poultry, and fish that comprise a single ingredient or category of ingredients;
 - (x) gelatine;
 - (xi) water (including mineral water or spring water) or ice;
 - (xii) prepared filled rolls, sandwiches, bagels and similar products;
 - (xiii) jam setting compound;
 - (xiv) a kit which is intended to be used to produce a standardised alcoholic beverage;
 - (xv) a beverage containing no less than 0.5% alcohol by volume that is not a standardised alcoholic beverage;
 - (xvi) kava; or
 - (b) a food in a small package, other than food for infants.

Note 1 See section 1.2.8—14 for the requirement for a food in a small package.

Note 2 The labelling provisions are set out in Standard 1.2.1.

1.2.8—6 What must be on nutrition information panel

- (1) A nutrition information panel must contain the following information:
 - (a) the number of servings in the package, expressed as either:
 - (i) the number of servings of the food; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—6

What must be on nutrition information panel

- (ii) if the weight or the volume of the food as packaged is variable—the number of servings of the food per kilogram, or other unit as appropriate;
 - (b) the *average quantity of the food in a serving expressed in:
 - (i) for a solid or semi-solid food—grams; or
 - (ii) for a beverage or other liquid food—millilitres;
 - (c) the *unit quantity of the food;
 - (d) for a serving of the food and a unit quantity of the food:
 - (i) the *average energy content expressed in kilojoules or both in kilojoules and in calories or kilocalories; and
 - (ii) the average quantity of
 - (A) protein, carbohydrate, sugars, fat and,
 - (B) subject to subsection (4), saturated fatty acids, expressed in grams; and
 - (iii) the average quantity of sodium, expressed in milligrams or both milligrams and millimoles; and
 - (iv) the name and the average quantity of any other nutrient or *biologically active substance in respect of which a *claim requiring nutrition information is made, expressed in grams, milligrams, micrograms or other units as appropriate;
 - (e) any other matter this Code requires to be included.
- (2) A nutrition information panel must be set out in the format in section S12—2, unless this Code provides otherwise.

Declaration of fatty acids required for certain claims

- (3) If a *claim requiring nutrition information is made in respect of:
- (a) cholesterol; or
 - (b) *saturated,* trans, *polyunsaturated or *monounsaturated fatty acids; or
 - (c) omega-3, omega-6 or omega-9 fatty acids;

a nutrition information panel must include declarations of the trans, polyunsaturated and monounsaturated fatty acids in accordance with section S12—3.

Voluntary declaration of fatty acids in edible oils and edible oil spreads

- (4) If a *claim requiring nutrition information is made in relation to the *polyunsaturated fatty acid content or *monounsaturated fatty acid content of an edible oil or an edible oil spread, the nutrition information panel may list the minimum or maximum amount of the following in a serving and a *unit quantity of the food:
- (a) *saturated fatty acids;

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—6

What must be on nutrition information panel

- (b) polyunsaturated fatty acids;
- (c) monounsaturated fatty acids;
- (d) *trans fatty acids.

Note See section 1.2.7—12 for when claims may be made in relation to the polyunsaturated or monounsaturated fatty acid content of foods.

Claims in respect of dietary fibre, sugars or carbohydrate

(5) If a *claim requiring nutrition information is made in respect of:

- (a) fibre or any specifically named fibre; or
- (b) *sugars or any other type of *carbohydrate;

a nutrition information panel must include a declaration of the presence or absence of *dietary fibre in accordance with section S12—3.

(6) The absence of *dietary fibre under subsection (5) must be indicated by using the symbol ‘0’.

Declarations about carbohydrates

(7) If *unavailable carbohydrate has been subtracted in the calculation of *available carbohydrate by difference, a *nutrition information panel must include a declaration of unavailable carbohydrate.

(8) The reference to ‘unavailable carbohydrate’ in subsection (7) does not include dietary fibre.

Declarations about certain substances

(9) If:

- (a) one or more *components (other than organic acids) listed in subsection S11—2(3) is present in the food, singly or in combination, in an amount of no less than 5 g/100 g; and
- (b) either of the following is satisfied:
 - (i) if *available carbohydrate by difference is used—any of those substances have been subtracted in the calculation;
 - (ii) if *available carbohydrate is used—any of those substances have been quantified or added to the food;

the nutrition information panel must include individual declarations of those substances.

Claims about phytosterols, phytosteranols or their esters

(10) If a *claim requiring nutrition information is made in relation to phytosterols, phytosteranols or their esters, the nutrition information panel must include declarations of:

- (a) the substances, using the same name for the substance as used in the advisory statement required by subsection 1.2.3—2(1); and
 - (b) the amount of the substances, calculated as *total plant sterol equivalents content.
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—7

How to express particular matters in nutrition information panel

1.2.8—7 How to express particular matters in nutrition information panel

- (1) The nutrition information panel must clearly indicate that:
 - (a) any average quantities set out in the panel are average quantities; and
 - (b) any minimum or maximum quantities set out in the panel are minimum or maximum quantities.
 - (2) On a nutrition information panel:
 - (a) serving' may be replaced by:
 - (i) 'slice', 'pack' or 'package'; or
 - (ii) 'metric cup' or 'metric tablespoon' or other appropriate word or words expressing a unit or common measure; and
 - (b) 'Carbohydrate' may be replaced by 'Carbohydrate, total'.
 - (3) The following must be expressed in a nutrition information panel to not more than 3 significant figures:
 - (a) the average energy content;
 - (b) the average, minimum or maximum quantities of nutrients and biologically active substances.
 - (4) If the *average energy content of a serving or a *unit quantity of the food is less than 40 kJ, that average energy content may be expressed in the panel as 'LESS THAN 40 kJ'.
 - (5) If the *average quantity of any of the following in a serving or a *unit quantity of the food is less than 1 gram, that average quantity may be expressed in the nutrition information panel as 'LESS THAN 1 g':
 - (a) protein;
 - (b) fat;
 - (c) classes of fatty acids;
 - (d) carbohydrate;
 - (e) sugars;
 - (f) dietary fibre.
 - (6) If the *average quantity of sodium or potassium in a serving or a *unit quantity of the food is less than 5 milligrams, that average quantity may be expressed in the nutrition information panel as 'LESS THAN 5 mg'.
 - (7) The declaration of *dietary fibre in a nutrition information panel must be a declaration of dietary fibre determined in accordance with section S11—4.
 - (8) In a nutrition information panel:
 - (a) *monounsaturated fatty acids must be declared as monounsaturated fat; and
 - (b) *polyunsaturated fatty acids must be declared as polyunsaturated fat; and
 - (c) *saturated fatty acids must be declared as saturated fat; and
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—8 Percentage daily intake information

- (d) *trans fatty acids must be declared as trans fat.

1.2.8—8 Percentage daily intake information

- (1) A nutrition information panel may include information relating to the percentage daily intake of nutrients set out in the panel.
- (2) If information relating to percentage daily intake is included, the panel may include the percentage daily intake of *dietary fibre per serving.
- (3) If information relating to percentage daily intake is included, the panel must include:
 - (a) the percentage daily intake per serving, calculated using the associated reference value listed below, of the following items:

Reference values for percent daily intake information

<i>Item</i>	<i>Reference value</i>
energy	8 700 kJ
protein	50 g
fat	70 g
saturated fatty acids	24 g
carbohydrate	310 g
sodium	2 300 mg
sugars	90 g
dietary fibre (if declared)	30 g

- (b) either of the following statements:
 - (i) ‘based on an average adult diet of 8 700 kJ’;
 - (ii) ‘Percentage daily intakes are based on an average adult diet of 8 700 kJ’.

Note For an example nutrition information panel illustrating percentage daily intake information, see section S12—4.

1.2.8—9 Percentage recommended dietary intake information

- (1) This section applies if:
 - (a) a *claim requiring nutrition information is made about or based on a vitamin or mineral (the *relevant vitamin or mineral*); and
 - (b) the relevant vitamin or mineral has an *RDI (see sections S1—2 and S1—3); and
 - (c) the food to which the claim relates is not a food for infants.
- (2) Subject to section 1.2.8—10, the percentage of the *RDI for the relevant vitamin or mineral contributed by one serving of the food must be set out in the nutrition information panel.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—10

Information referred to in sections 1.2.8—8 and 1.2.8—9 may be presented outside nutrition information panel

- (3) The percentage *RDI under subsection (2) must be calculated using the nutrient values set out in the nutrition information panel.
- (4) Despite paragraph (1)(c), percentage recommended dietary intake information may be included in the *nutrition information panel for a *food for infants.

1.2.8—10 Information referred to in sections 1.2.8—8 and 1.2.8—9 may be presented outside nutrition information panel

- (1) The information that is permitted to be included in a nutrition information panel by section 1.2.8—8 or that is required to be included by subsection 1.2.8—9(2) may also be presented outside the nutrition information panel if:
 - (a) the serving size is presented together with the information; and
 - (b) the food does not contain more than 1.15% alcohol by volume.
- (2) If more than 1 piece of such information is presented outside the nutrition information panel, those pieces of information must be presented together.
- (3) Information presented in accordance with this section does not constitute a nutrition content claim.

1.2.8—11 Requirement for dehydrated or concentrated food

If the label on a package of a food for sale indicates that the food should be reconstituted with water before consumption, the nutrition information panel must express the information required by this Standard as a proportion of the reconstituted food.

1.2.8—12 Food intended to be drained before consumption

If the labelling for a food for sale contains directions indicating that the food should be drained before consumption, the nutrition information panel must:

- (a) express the information required by this Standard as a proportion of the drained food; and
- (b) clearly indicate that the information relates to the drained food.

1.2.8—13 Food intended to be prepared or consumed with other food

- (1) This section applies to a food for sale if the labelling indicates that it is intended to be prepared or consumed with at least one other food.
 - (2) The nutrition information panel may comply with the requirement in subsection (4).
 - (3) If a *claim requiring nutrition information is made about the food, the nutrition information panel must comply with the requirements in subsections (4) and (5).
 - (4) The requirement is that the nutrition information panel includes an additional column at the right hand side of the panel, specifying, in the same manner as set out in the panel:
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—14 Requirement for food for sale in small packages

- (a) a description of the additional food; and
 - (b) the amount of the additional food; and
 - (c) the *average energy content of the combined foods; and
 - (d) the average quantities of nutrients contained in the combined foods; and
 - (e) the average quantities of biologically active substances contained in the combined foods.
- (5) The requirement is that the nutrition information panel specifies the weight or volume of the serving size of the food as prepared.

1.2.8—14 Requirement for food for sale in small packages

- (1) For the labelling provisions, for a food for sale in a small package, the following nutrition information is required if a *claim requiring nutrition information is made:
- (a) the *average quantity of the food in a serving, expressed:
 - (i) for a solid or semi-solid food—in grams; and
 - (ii) for a beverage or other liquid food—in millilitres; and
 - (b) if a claim is about a matter in column 1 of the table to section S13—2, the particulars specified in column 2, expressed:
 - (i) as minimum, maximum or average quantities, unless otherwise specified; and
 - (ii) with a clear indication of whether the particulars are minimum, maximum or average quantities.
 - (c) if the claim is about carbohydrate, dietary fibre, sugars or any other carbohydrate:
 - (i) if unavailable carbohydrate has been subtracted in the calculation of *available carbohydrate by difference—a declaration of unavailable carbohydrate (not including dietary fibre); and
 - (ii) the presence in the food of any substance other than organic acids that is listed in the table to subsection S11—2(3), if those substances are present in the food, either singly or in combination, in an amount of no less than 5 g/100 g.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) Where appropriate, the word ‘serving’ may be replaced by:
- (a) the word ‘slice’, ‘pack’ or ‘package’; and
 - (b) the words ‘metric cup’, ‘metric tablespoon’ or other appropriate words expressing a unit or common measure.
- (3) To avoid doubt, the information required by this section need not be set out in the form of a nutrition information panel.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.8 Nutrition information requirements

Section 1.2.8—14

Requirement for food for sale in small packages

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.10 Information requirements—characterising ingredients and components of food

Section 1.2.10—1

Name

Standard 1.2.10 Information requirements—characterising ingredients and components of food

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

1.2.10—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.10 — Information requirements—characterising ingredients and components of food*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.10—2 Definitions

Note Section 1.1.2—4 (Definition of *characterising component* and *characterising ingredient*) provides as follows:

(1) In this Code, in relation to a food for sale:

characterising component means a component of the food that:

- (a) is mentioned in the name of the food; or
- (b) is usually associated with the name of the food by a consumer; or
- (c) is emphasised on the label of the food in words, pictures or graphics.

characterising ingredient means an ingredient or a category of ingredients of the food that:

- (a) is mentioned in the name of the food; or
- (b) is usually associated with the name of the food by a consumer; or
- (c) is emphasised on the label of the food in words, pictures or graphics.

(2) Despite subsection (1), any of the following is not a **characterising ingredient**:

- (a) an ingredient or category of ingredients that is used in small amounts to flavour the food; or
- (b) an ingredient or category of ingredients that comprises the whole of the food; or
- (c) an ingredient or category of ingredients that is mentioned in the name of the food but which is not such as to govern the choice of the consumer, because the variation in the amount is not essential to characterise the food, or does not distinguish the food from similar foods.

(3) Compliance with labelling requirements elsewhere in this Code does not of itself constitute emphasis for the purposes of this section.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.10 Information requirements—characterising ingredients and components of food

Section 1.2.10—3

Requirement to declare characterising ingredients and components

1.2.10—3 Requirement to declare characterising ingredients and components

- (1) For the labelling provisions, information about *characterising ingredients and *characterising components is a declaration of the proportion of each characterising ingredient and characterising component of the food:
 - (a) calculated in accordance with sections 1.2.10—4 to 1.2.10—7; and
 - (b) expressed in accordance with section 1.2.10—8.
- (2) If:
 - (a) the proportion of a *characterising component of a food is declared in accordance with this Standard; and
 - (b) an ingredient or category of ingredients contains that characterising component;the proportion of a characterising ingredient containing that characterising component does not need to be declared.
- (3) For the labelling provisions, information about *characterising ingredients and *characterising components is not required for the following:
 - (a) prepared filled rolls, sandwiches, bagels or similar products;
 - (b) a food for sale that is sold at a *fund-raising event;
 - (c) a food for sale that is in a small package;
 - (d) infant formula product;
 - (e) cured and/or dried meat flesh in whole cuts or pieces;
 - (f) a standardised alcoholic beverage;
 - (g) a beverage containing no less than 0.5% alcohol by volume, other than one referred to in paragraph (f).

Note The labelling provisions are set out in Standard 1.2.1.

1.2.10—4 Method of calculating proportion of characterising ingredients

- (1) Subject to sections 1.2.10—5 and 1.2.10—6, the proportion, P_{CI} , of a *characterising ingredient must be calculated using the following equation:

$$P_{CI} = \frac{IW}{TW} \times 100$$

where:

IW is:

- (a) if the proportion of the characterising ingredient is declared in accordance with paragraph 1.2.10—8(4)(b)—the minimum ingoing weight of that ingredient; or
- (b) otherwise—the ingoing weight of the characterising ingredient.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.10 Information requirements—characterising ingredients and components of food

Section 1.2.10—5 Calculating proportion of characterising ingredients where moisture loss occurs

TW is the total weight of all ingoing ingredients.

- (2) The weight of added water or volatile ingredients removed during the course of manufacture of the food must not be included in the weight of the ingoing ingredients when calculating P_{CI} .
- (3) If a concentrated or dehydrated ingredient or category of ingredients is reconstituted during manufacture of the food, the weight of the reconstituted ingredient or category of ingredients may be used when calculating P_{CI} .
- (4) If a food requires reconstitution prior to consumption, P_{CI} may be calculated as a proportion of the food as reconstituted.

1.2.10—5 Calculating proportion of characterising ingredients where moisture loss occurs

If moisture loss occurs in the processing of a food, the proportion of a characterising ingredient in the food may be calculated taking into account any such moisture loss, on the basis of the weight of the characterising ingredient in the food.

1.2.10—6 Calculating proportion of characterising ingredient or characterising component where proportion is declared in nutrition information panel

Unless otherwise specified, where the proportion of a *characterising ingredient is declared in a nutrition information panel, the amount declared must be the *average quantity of the characterising ingredient present in the food.

1.2.10—7 Method of calculating proportion of characterising components

- (1) The proportion of a *characterising component, P_{CC} , in a food must be calculated using the following equation:

$$P_{cc} = \frac{W}{TW} \times 100$$

where:

TW is the total weight of the food.

W is:

- (a) the weight of the characterising component of the food; or
 - (b) if the proportion of the characterising component is declared in accordance with paragraph 1.2.10—8(4)(b)—the minimum weight of that component.
- (2) If a food requires reconstitution prior to consumption, P_{CC} may be calculated as a proportion of the food as reconstituted.

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.10 Information requirements—characterising ingredients and components of food

Section 1.2.10—8

Declaration of characterising ingredients and components

1.2.10—8 Declaration of characterising ingredients and components

- (1) The proportion of a *characterising ingredient or *characterising component must:
 - (a) be declared as a percentage; or
 - (b) unless otherwise specified, be declared as the *average quantity per serving and per unit quantity, when declared in a nutrition information panel.
 - (2) If the proportion of a *characterising ingredient is declared in accordance with paragraph (1)(a) in a statement of ingredients, the percentage must immediately follow the common, descriptive or generic name of the ingredient.
 - (3) The percentage may be rounded to:
 - (a) the nearest whole number; or
 - (b) if the percentage is below 5%—the nearest 0.5 decimal place.
 - (4) The proportion of a *characterising ingredient or *characterising component must be declared as:
 - (a) the actual percentage; or
 - (b) if the minimum weight of a characterising ingredient or characterising component was used when performing the calculation in section 1.2.10—4 or 1.2.10—7 as appropriate—a minimum percentage; or
 - (c) unless otherwise specified—the *average quantity when declared in a nutrition information panel.
 - (5) If a minimum percentage is declared, that fact must be clearly indicated.
 - (6) The proportion of a *characterising ingredient or *characterising component of a food that requires reconstitution prior to consumption may be declared as a percentage of the food as reconstituted if:
 - (a) in the case of a characterising ingredient—the proportion of the characterising ingredient was calculated in accordance with subsection 1.2.10—4(4); and
 - (b) in any case—the fact that the ingredient or component is a proportion of the food as reconstituted is clearly indicated.
-

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.11 Information requirements—country of origin labelling

Section 1.2.11—1

Name

Standard 1.2.11 Information requirements—country of origin labelling

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 This Standard applies in Australia only.

1.2.11—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.2.11 — Information requirements—country of origin labelling*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.2.11—2 Labelling requirements—unpackaged food

- (1) This section applies to a food for sale that:
 - (a) is any of the following:
 - (i) fish, including fish that has been mixed or coated with 1 or more other foods;
 - (ii) pork;
 - (iii) fruit and vegetables;
 - (iv) beef;
 - (v) veal;
 - (vi) lamb;
 - (vii) hogget;
 - (viii) mutton;
 - (ix) chicken;
 - (x) a mix of any of the above foods; and
 - (b) is displayed for retail sale other than in a package.
- (2) A reference to a food listed in paragraph (1)(a) includes a reference to a food that has been:
 - (a) cut, filleted, sliced, minced or diced; or
 - (b) pickled, cured, dried, smoked, frozen or preserved by other means; or
 - (c) marinated; or
 - (d) cooked.
- (3) For the labelling provisions, the country of origin information is a statement that:
 - (a) identifies the country or countries of origin of the food; or
 - (b) indicates that the food is a mix of local and imported foods; or

Chapter 1 Introduction and standards that apply to all foods

Part 2 Labelling and other information requirements

Standard 1.2.11 Information requirements—country of origin labelling

Section 1.2.11—3 Labelling requirements—packaged fresh fruit and vegetables

(c) indicates that the food is a mix of imported foods.

Note The labelling provisions are set out in Standard 1.2.1.

(4) If the country of origin information is displayed in connection with the food when it is sold, the *size of type must be:

(a) if the food is in a refrigerated assisted service display cabinet—at least 5 mm; or

(b) otherwise—at least 9 mm.

Note See also section 1.2.1—24.

1.2.11—3 Labelling requirements—packaged fresh fruit and vegetables

(1) This section applies to a food for sale that:

(a) is unprocessed *fruit and vegetables, whether whole or cut; and

(b) is displayed for retail sale in a package that does not obscure the nature or quality of the fruit and vegetables.

(2) For the labelling provisions, the country of origin information is a statement that:

(a) identifies the country or countries of origin of the fruit and vegetables; or

(b) indicates that the fruit or vegetables are a mix of local and imported fruit and vegetables; or

(c) indicates that the fruit and vegetables are a mix of imported foods.

Note The labelling provisions are set out in Standard 1.2.1.

1.2.11—4 Labelling requirements—packaged food other than fresh fruit and vegetables

(1) This section applies to a packaged food for sale other than one to which section 1.2.11—3 applies.

(2) For the labelling provisions, the country of origin information is:

(a) a statement on the package that identifies the country where the food was made, produced or grown; or

(b) a statement on the package:

(i) that identifies the country where the food was manufactured or packaged; and

(ii) to the effect that the food is constituted from ingredients imported into that country or from local and imported ingredients.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.1 Food additives

Section 1.3.1—1

Name

Part 3 Substances added to food

Standard 1.3.1 Food additives

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraph 1.1.1—10(4)(a) provides that a food for sale must not have, as an ingredient or a component, a substance that is used as a food additive, unless expressly permitted by this Code. This Standard contains the relevant permissions.

1.3.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.3.1 — Food Additives*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.3.1—2 Definitions

Note Section 1.1.2—11 (Definition of *used as a food additive*) provides as follows:

- (1) A substance is *used as a food additive* in relation to a food if it is added to the food and:
 - (a) performs 1 or more of the technological purposes listed in Schedule 14; and
 - (b) . is a substance identified in subsection 1.1.2—11(2).
- (2) For subsection 1.1.2—11(1), the substances are:
 - (a) any of the following:
 - (i) a substance that is identified in Schedule 15;
 - (ii) an additive permitted at GMP;
 - (iii) a colouring permitted at GMP;
 - (iv) a colouring permitted to a maximum level; and

Note Schedule 15 lists a number of substances that are not additives permitted at GMP, colourings permitted at GMP or colourings permitted to a maximum level.

- (b) any substance that that is:
 - (i) a *non-traditional food and
 - (ii) has been concentrated or refined, or synthesised, to perform 1 or more of the technological purposes listed in Schedule 14.

Other definitions

- (3) In this Code:

additive permitted at GMP means a substance that is listed in section S16—2.

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.1 Food additives

Section 1.3.1—3 When food additives may be used as ingredients in foods

colouring permitted at GMP means a substance that is listed in section S16—3.

colouring permitted to a maximum level means a substance that is listed in section S16—4.

Colours and their aluminium and calcium lakes

- (4) A reference to a colour listed in Schedule 15, a colouring permitted at GMP or a colouring permitted to a maximum level includes a reference to the aluminium and calcium lakes prepared from that colour.

1.3.1—3 When food additives may be used as ingredients in foods

Listed food additives may be ingredients of a food

- (1) A substance may be *used as a food additive in relation to food if:
- the substance is permitted to be used as a food additive for that food by Schedule 15; and
 - any restrictions on the use of that substance as a food additive set out in this Standard or in Schedule 15 are complied with; and
 - if the table to section S15—5 indicates that the maximum permitted level is ‘GMP’—the proportion of the substance is no more than required under GMP.

Carry-over of food additive

- (2) A substance that is permitted for use as a food additive may be present in any food as a result of carry-over from a raw material or an ingredient if the level of the substance in the food is no greater than would be introduced by the use of the raw material or ingredient under proper technological conditions and GMP.

1.3.1—4 Maximum permitted levels of food additives in foods

- (1) An *additive permitted at GMP or a *colouring permitted at GMP that is permitted to be *used as a food additive by Schedule 15 may be present in a food for sale as a result of use in accordance with GMP.
- (2) If a substance is *used as a food additive in a food for sale, the level of the substance as a *component of the food must comply with any limitation in Schedule 15 for a food of that kind.
- (3) For a *colouring permitted to a maximum level that is permitted to be *used as a food additive by Schedule 15, the level of all such colours together in a food for sale must be no more than:
- in a beverage—70 mg/L; and
 - in another food—290 mg/kg.
- (4) Unless the contrary intention appears, if a food for sale is not intended to be consumed except after preparation in accordance with directions on the label, a limitation in Schedule 15 on the level of a substance that is *used as a food additive in the food applies to the level of the substance in the food when prepared for consumption according to the directions.

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.1 Food additives

Section 1.3.1—4

Maximum permitted levels of food additives in foods

(5) A substance permitted to be *used as a food additive in a food may be added to an ingredient intended for use in the preparation of a food for sale at a higher level than would otherwise be allowed in the ingredient, provided that the level in the food for sale complies with the maximum permitted level in subsection (3) or Schedule 15.

(6) In this Standard:

- (a) annatto and annatto extracts include norbixin and bixin, calculated as bixin;
- (b) benzoic acid and its salts are calculated as benzoic acid;
- (c) cyclamate and its salts are calculated as cyclohexyl-sulphamic acid;
- (d) ethyl lauroyl arginate is calculated as ethyl-N^α-lauroyl-L-arginate.HCl;
- (e) unless the contrary intention appears, nitrates or nitrites refers to the total of nitrates and nitrites, calculated as sodium nitrite;

Note Nitrites have code numbers 249 and 250. Nitrates have code numbers 251 and 252.

Example A contrary intention for the purpose of paragraph (e) appears in item 1.6 of the table to section S15—5 for cheese and cheese products.

- (f) propionic acid and its salts are calculated as propionic acid;
 - (g) saccharin and its calcium and sodium salts are calculated as saccharin;
 - (h) sorbic acid and its salts are calculated as sorbic acid;
 - (i) steviol glycosides are calculated as steviol equivalents in accordance with subsection (7);
 - (j) sulphur dioxide and sulphites, including hydrosulphites, bisulphites and metabisulphites, are calculated as sulphur dioxide.
- (7) To calculate the steviol equivalent levels for a steviol glycoside, the following equation is used:

$$[SE] = \sum [SG] \times CF$$

where:

[SE] is the concentration as steviol equivalents.

[SG] is the concentration of individual steviol glycoside.

CF is the conversion factor, as follows:

- (a) dulcoside A—0.40;
- (b) rebaudioside A—0.33;
- (c) rebaudioside B—0.40;
- (d) rebaudioside C—0.33;
- (e) rebaudioside D—0.28;
- (f) rebaudioside F—0.34;
- (g) rubusoside—0.50;

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.1 Food additives

Section 1.3.1—5 Limitation on use of intense sweeteners

- (h) steviol—1.00;
- (i) steviolbioside—0.50;
- (j) stevioside—0.40.

1.3.1—5 Limitation on use of intense sweeteners

Unless Schedule 15 expressly provides otherwise, a substance that may be *used as a food additive to perform the technological purpose of an intense sweetener may be added to a food only:

- (a) as a flavour enhancer; or
- (b) in an amount necessary to replace, either wholly or partially, the sweetness normally provided by sugars.

1.3.1—6 Food additives performing the same purpose

- (1) If a food contains a mixture of substances that are *used as food additives to perform the same technological purpose, the sum of the proportions of these substances in the food must not be more than 1.
- (2) In this section:

sum of the proportions is calculated in accordance with the following equation:

$$\text{sum of the proportions} = \sum_{i=1}^N \frac{\text{Conc}_i}{\text{MPL}_i}$$

where:

N is the number of substances used as food additives in the food that perform the same technological purpose.

Conc_i is the concentration of the *i*th food additive in the food.

MPL_i is the maximum permitted level of the *i*th food additive in the food.

- (3) When calculating the sum of the proportions, exclude any substances that may be present in a food in accordance with GMP.

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.2 Vitamins and minerals

Section 1.3.2—1

Name

Standard 1.3.2 Vitamins and minerals

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraph 1.1.1—10(4)(b) provides that a food for sale must not have as an ingredient or a component, a substance used as a nutritive substance unless expressly permitted by this Code. This Standard deals with vitamins and minerals used as nutritive substances.

Note 4 This Standard limits the claims that can be made about the vitamin and mineral content of foods. Standard 1.2.7 relates to the claims that can be made about nutrition content, including the presence of vitamins and minerals in food. There are also provisions in other standards that affect claims about specific foods. See for example:

- Standard 2.1.1 (bread and bread products);
- Standard 2.4.2 (edible oil spreads);
- Standard 2.9.1 (infant formula products);
- Standard 2.9.2 (food for infants);
- Standard 2.9.3 (formulated meal replacements and formulated supplementary foods);
- Standard 2.9.4 (formulated supplementary sports foods);
- Standard 2.9.5 (food for special medical purposes);
- Standard 2.9.6 (transitional standard for special purpose foods (including amino acid modified foods)).

1.3.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.3.2 — Vitamins and minerals*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.3.2—2 Definitions and interpretation

Note In this Code (see section 1.1.2—2):

reference quantity means:

- (a) for a food listed in the table to section S17—4, either:
 - (i) the amount specified in the table for that food; or
 - (ii) for a food that requires dilution or reconstitution according to directions—the amount of the food that, when diluted or reconstituted, produces the quantity referred to in subparagraph (i); or
- (b) for all other foods:
 - (i) a normal serving; or

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.2 Vitamins and minerals

Section 1.3.2—3

Listed vitamins and minerals may be used as nutritive substance in foods

- (ii) for a food that requires dilution, reconstitution, draining or preparation according to directions—the amount of the food that, when diluted, reconstituted, drained or prepared produces a normal serving.

RDI—see section 1.1.2—10.

used as a nutritive substance—see section 1.1.2—12.

1.3.2—3 Listed vitamins and minerals may be used as nutritive substance in foods

Unless this Code provides otherwise, a vitamin or mineral may be *used as a nutritive substance in a food if:

- (a) the vitamin or mineral is in a permitted form specified in section S17—2 or section S17—3; and
- (b) the vitamin or mineral is listed in relation to that type of food in section S17—4; and
- (c) the total amount of the naturally occurring and added vitamin or mineral present in a *reference quantity of the food is no more than the amount (if any) specified in relation to that vitamin or mineral in section S17—4.

1.3.2—4 Restrictions on claims in relation to vitamins and minerals added to foods

- (1) This section applies if a vitamin or mineral has been *used as a nutritive substance in a food listed in section S17—4.
- (2) A claim must not be made that the percentage *RDI of the vitamin or mineral (including the amount added and the amount naturally present) in a *reference quantity of the food is greater than the percentage that is specified as the maximum percentage RDI claim for that vitamin or mineral in the table to section S17—4.

1.3.2—5 Calculation of maximum amount of a vitamin or mineral which may be claimed in a reference quantity of food

- (1) If:
 - (a) a food for sale contains more than one ingredient; and
 - (b) at least one ingredient contains a vitamin or mineral that has been *used as a nutritive substance in accordance with this Standard;

the maximum claim permitted in relation to that vitamin or mineral in a *reference quantity of the food is calculated in accordance with this section.

- (2) First, the maximum amount permitted to be claimed in a *reference quantity of the food, M_{rq} , is calculated using the following equation:

$$M_{rq} = Q_1 + Q_2 + \dots + Q_i$$

where:

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.2 Vitamins and minerals

Section 1.3.2—5

Calculation of maximum amount of a vitamin or mineral which may be claimed in a reference quantity of food

Q_i , for a particular ingredient that contains that vitamin or mineral, is:

- (a) for an unfortified ingredient—the *average quantity of the vitamin or mineral present in the amount of the ingredient in a *reference quantity of the food; and
 - (b) for a fortified ingredient—the maximum amount that may be claimed for that vitamin or mineral in the reference quantity of the ingredient adjusted to the amount of the ingredient in a reference quantity of the food.
- (3) Then, M_{rq} is rounded to the nearest 2 significant figures.
-

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.3 Processing aids

Section 1.3.3—1

Name

Standard 1.3.3 Processing aids

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraph 1.1.1—10(4)(c) provides that a food for sale must not have, as an ingredient or a component, a substance that is used as a processing aid, unless expressly permitted by this Code. Section 1.1.2—13 defines the expression ‘used as a processing aid’. This Standard contains the relevant permissions.

Division 1 Preliminary

1.3.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.3.3 — Processing aids*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.3.3—2 Definitions

Note Section 1.1.2—13 (Definition of *used as a processing aid*) provides as follows:

References to substances that are used as a processing aid

- (1) In this Code, a reference to a substance that is *used as a processing aid* in relation to a food is a reference to a substance that is used during the course of processing:
- to perform a technological purpose in the course of processing; and
 - does not perform a technological purpose in the food for sale; and
 - is identified in subsection (3).

References to foods that are used as a processing aid

- (2) In this Code, a reference to a food that is *used as a processing aid* in relation to another food:
- is a reference to a food that:
 - is not a substance identified in subsection (3); and
 - is used or added to the other food during the course of processing to perform a technological purpose in the course of processing; and
 - does not perform a technological purpose in the food for sale; and
 - is a reference to so much of the food as is necessary to perform the technological purpose.

Note 1 This Code does not prohibit the use of foods as processing aids (other than foods that are substances referred to in subsection (3)). There are special labelling requirements that apply in relation to foods and substances that are used as processing aids—see paragraphs 1.2.4—3(2)(d), 1.2.4—3(2)(e) and subparagraph 1.2.8—5(a)(vii).

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.3 Processing aids

Section 1.3.3—3 Permission to use substance as processing aid

Note 2 If a food is used as a processing aid in relation to another food, and the amount of the food used is greater than the amount that is necessary to perform the technological purpose, the excess amount of the food is not taken to be used as a processing aid in the other food and is not exempted from a requirement to declare ingredients—see section 1.2.4—3(2)(e).

- (3) For subsections (1) and (2), the substances are the following:
- (a) a substance that is listed in Schedule 18;
 - (b) an additive permitted at GMP.

Note ‘additive permitted at GMP’ is a defined term—see section 1.1.2—11.

1.3.3—3 Permission to use substance as processing aid

A substance may be used as a processing aid in relation to food if:

- (a) the substance is permitted to be used as processing aid for that food by this Standard; and
- (b) the proportion of the substance that is used is no more than the maximum level necessary to achieve the technological purpose under conditions of GMP.

Note No permission is required to use a food (other than a substance referred to in paragraph (2)(a) of the definition of *used as a food additive*) as a processing aid.

Division 2 Processing aids that may be used with any food

1.3.3—4 Generally permitted processing aids for all foods

- (1) A substance listed in subsection (2) may be *used as a processing aid in any food if it is used at a level necessary to achieve a technological purpose in the processing of that food.
- (2) For subsection (1), the substances are:
- (a) an *additive permitted at GMP; or
 - (b) any substance listed in section S18—2.

Restriction on the use of carbon monoxide in the processing of fish

- (3) Despite subsection (1), carbon monoxide (other than carbon monoxide that is naturally present or occurring in smoke used in the processing of fish) must not be used in the processing of fish if its use results in a change to or fixes the colour of the flesh of the fish.

1.3.3—5 Processing aids for certain purposes for all foods

A substance listed in section S18—3 may be *used as a processing aid in any food, if the substance is:

- (a) used to perform a technological purpose listed in relation to that substance; and

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.3 Processing aids

Section 1.3.3—6

Enzymes

- (b) not present in the food at a level greater than the maximum permitted level indicated in the corresponding row of the table.

Note The purposes listed in section S18—3 are the following:

- anti-foaming;
- catalysis;
- decolouring, clarifying, filtering or adsorbing;
- desiccating;
- ion exchange;
- lubricating, releasing or anti-stick;
- a carrier, solvent or diluent.

1.3.3—6 Enzymes

An enzyme listed in section S18—4 may be *used as a processing aid to perform any technological purpose if the enzyme is derived from the corresponding source specified in the table.

Note 1 Section S18—4 lists enzymes of animal origin, enzymes of plant origin and enzymes of microbial origin.

Note 2 Some enzymes identified in section S18—4 are protein engineered. If such an enzyme is used as a processing aid, the resulting food may have as an ingredient a food produced using gene technology, and the labelling and other requirements relating to foods produced using gene technology will apply—see Standard 1.2.1 and Standard 1.5.2, in particular section 1.5.2—3(b).

1.3.3—7 Microbial nutrients and microbial nutrient adjuncts

A substance listed in section S18—5 may be *used as a processing aid to perform the technological purpose of a microbial nutrient or a microbial nutrient adjunct in the course of manufacture of any food.

Division 3 Processing aids that can be used with specified foods

1.3.3—8 Processing aids for water

A substance listed in section S18—6 may be *used as a processing aid in the course of manufacture of:

- (a) packaged water; or
(b) water that is used as an ingredient;

if the substance is not present in the water at a level greater than the maximum permitted indicated in the corresponding row of the table.

Note This section contains the permissions for fluoride to be used in water that is used as an ingredient in other foods, but not in water presented in packaged form. Standard 2.6.2 contains a permission to add fluoride to water presented in packaged form.

Chapter 1 Introduction and standards that apply to all foods

Part 3 Substances added to food

Standard 1.3.3 Processing aids

Section 1.3.3—9

Bleaching, washing and peeling agents—various foods

1.3.3—9 Bleaching, washing and peeling agents—various foods

A substance listed in section S18—7 may be *used as a processing aid to perform the technological purpose of:

- (a) a bleaching agent; or
- (b) a washing agent; or
- (c) a peeling agent;

for a food if the substance:

- (d) is used in relation to a food listed in the corresponding row of the table; and
- (e) is not present in the food at a level greater than the maximum permitted indicated in the corresponding row of the table.

1.3.3—10 Extraction solvents—various foods

A substance listed in section S18—8 may be *used as a processing aid to perform the technological purpose of an extraction solvent if the substance:

- (a) is used in relation to a food listed in the corresponding row of the table; and
- (b) is not present in the food at a level greater than the maximum permitted indicated in the corresponding row of the table.

1.3.3—11 Processing aids that perform various technological purposes

A substance specified in a row in the table to section S18—9 may be *used as a processing aid:

- (a) in relation to:
 - (i) if a food is specified in that row—that food; or
 - (ii) if no food is specified in that row—any food; and
- (b) for the corresponding technological purpose specified in that row; and
- (c) if the substance is not present in the food at a level greater than the maximum permitted level indicated in that row.

1.3.3—12 Microbial control agent—dimethyl dicarbonate

- (1) Dimethyl dicarbonate may be *used as a processing aid to perform the technological purpose of a microbial control agent during the manufacture of a food for sale listed in section S18—10 at a concentration no greater than the corresponding maximum permitted addition level indicated in the table.
- (2) Dimethyl dicarbonate must not be present in a food for sale.

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.1 Contaminants and natural toxicants

Section 1.4.1—1

Name

Part 4 Contaminants and residues

Standard 1.4.1 Contaminants and natural toxicants

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Subsection 1.1.1—10(6) provides that a food for sale must comply with any provisions of this Code relating to the composition of, or the presence of specified substances in, food of that kind. This Standard contains provisions relating to the presence of other substances in food.

Note 4 Limits have been set under this Standard when it has been determined that there is a potential risk to public health and safety if the prescribed limits are exceeded, that should be managed by a standard. This Standard is to be read in the context of the requirements imposed in the application Acts that food must be safe and suitable for human consumption. For example, the concentration of contaminants and natural toxicants should be kept as low as reasonably achievable.

1.4.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.4.1 — Contaminants and natural toxicants*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.4.1—2 Interpretation

- (1) The limits prescribed by this Standard apply to the portion of foods that is ordinarily consumed.
- (2) In this Standard and Schedule 19, a reference to a particular food is to the food as described in Schedule 22.

1.4.1—3 Levels of contaminants and natural toxicants in food

- (1) The level of a contaminant or natural toxicant listed in section S19—4, S19—5 or S19—6 in a food listed in relation to that contaminant or toxicant must not be greater than the corresponding amount listed in that Schedule.

Note Schedule 19 sets out maximum levels of:

- metal contaminants; and
- non-metal contaminants;
- natural toxicants; and
- average and maximum levels of mercury in fish.

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.1 Contaminants and natural toxicants

Section 1.4.1—3

Levels of contaminants and natural toxicants in food

- (2) The level of mercury in fish and fish products, calculated in accordance with section S19—7, must comply with the requirements of subsection S19—7(1) or S19—7(2), as appropriate.
- (3) For a food for sale with 2 or more ingredients, 1 or more of which is listed in Schedule 19, the level of a contaminant or toxicant listed in Schedule 19 in the food for sale must not be greater than the amount, **ML**, given by the following equation:

$$ML = \frac{\sum_{j=1}^N (ML_j \times Total_j) + CF \times (Total - \sum_{j=1}^N Total_j)}{Total}$$

where:

N is the number of ingredients of the food for sale for which a maximum level of a contaminant or toxicant is specified in Schedule 19.

ML_j is:

- in the case of mercury—the mean level of mercury that is permitted under section S19—7; or
- otherwise—the maximum level of the contaminant or toxicant that is permitted, in accordance with subsection (1);

in a particular ingredient (the *jth ingredient*) of the food for sale.

Total_j is the total weight of the *jth* ingredient of the food for sale (in g).

CF is:

- in the case of lead—0.01 mg/kg; and
- in the case of cadmium—0.005 mg/kg; and
- for other substances—0 mg/kg.

Note **CF** is the background calculation factor, and allows for a representative contaminant level for those foods for which a maximum level is not specified in Schedule 19. The contaminants occur at low levels in such foods.

Total is the total weight of the food for sale (in g).

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.2 Agvet chemicals

Section 1.4.2—1

Name

Standard 1.4.2 Agvet chemicals

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 This Standard is the Maximum Residue Limits Standard for the purposes of the FSANZ Act.

Note 3 This Standard applies in Australia only. In New Zealand, maximum residue limits for agricultural compounds are set out in a Maximum Residue Limits Standard issued under the *Food Act 2014*

Note 4 The application Acts provide that food is unsuitable if the food contains, among other things, a chemical agent that is foreign to the nature of the food. Food is not unsuitable if, when it is sold, it does not contain an agvet chemical in an amount that contravenes the Code.

Paragraph 1.1.1—10(4)(d) provides that a food for sale must not have, as an ingredient or a component, a detectable amount of an agvet chemical or a metabolite or a degradation product of the agvet chemical; unless expressly permitted by this Code.

Sections 1.4.2—4 and 1.4.2—5 and associated Schedules set out the relevant permissions. Permitted residues are identified in section S20—3.

1.4.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.4.2 — Agvet chemicals*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.4.2—2 Purpose of Standard

The purpose of this Standard and Schedule 20, Schedule 21 and Schedule 22 is to set out the maximum residue limits and extraneous residue limits for agricultural or veterinary chemicals that are permitted in foods for sale.

Note Maximum residue limits have been determined:

- (a) by the amount of residues of such chemicals that could be present in food when they are used at the minimum effective level and using Good Agricultural Practice (GAP); and
- (b) after an assessment of the potential risk to public health and safety at that level.

1.4.2—3 Definitions and interpretation

Note In this Code (see section 1.1.2—2):

agvet chemical means an agricultural chemical product or a veterinary chemical product, within the meaning of the Agvet Code.

Note The Agvet Code is the Code set out in the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994* (Cth). See subsection 4(1) of the FSANZ Act.

extraneous residue limit or **ERL**, for an agvet chemical in a food, means the amount identified in Schedule 21 for the permitted residue of that agvet chemical in that food.

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.2 Agvet chemicals

Section 1.4.2—4

Maximum residue limit of agvet chemicals in foods

maximum residue limit or *MRL*, for an agvet chemical in a food, means the amount identified in Schedule 20 for the permitted residue of that agvet chemical in that food.

(1) In this Standard:

permitted residue, of an *agvet chemical, means a chemical that is identified in Schedule 20 or Schedule 21 as being a permitted residue in relation to the agvet chemical.

(2) When calculating the amount of a permitted residue in a food:

- (a) only calculate the amount that is in the portion of the commodity that is specified in Schedule 22; and
- (b) if the permitted residue consists of more than 1 chemical, calculate the amount of all such chemicals that are present in the food.

(3) Unless a maximum amount of a permitted residue of an *agvet chemical is specified for a processed food, the same maximum amount applies to both the processed and the unprocessed food.

(4) In this Standard, and in Schedule 20 and Schedule 21, a reference to a particular food is to the food as described in Schedule 22.

1.4.2—4 Maximum residue limit of agvet chemicals in foods

(1) A food for sale may contain a permitted residue of an *agvet chemical if:

- (a) the agvet chemical is listed in Schedule 20; and
- (b) the food consists of, or has as an ingredient, a food that is listed in relation to that agvet chemical in Schedule 20; and
- (c) the amount of the permitted residue of the agvet chemical in the food complies with subsection (2) or subsection (3), as appropriate.

(2) For a food for sale that consists of a food that is listed in relation to that *agvet chemical in Schedule 20, the amount of the permitted residue of the agvet chemical in the food complies with this subsection if the amount is not greater than the amount identified in relation to that food for that agvet chemical in Schedule 20.

(3) For a food for sale that has 2 or more ingredients, 1 or more of which is a food that is listed in relation to the *agvet chemical in Schedule 20, the amount of the permitted residue of the agvet chemical in the food complies with this subsection if the amount is not greater than the amount *MRL* calculated in accordance with the following equation:

$$MRL = \sum_{j=1}^N \frac{Weight(j)}{Weight} \times MRL(j)$$

where:

N is the number of ingredients of the food that are listed in Schedule 20 in relation to that agvet chemical.

Weight(j) is the weight of the *j*th such ingredient.

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.2 Agvet chemicals

Section 1.4.2—5

Extraneous residue limit of agvet chemicals in foods

Weight is the total weight of the food.

MRL(j) is the amount identified in relation to the j^{th} ingredient for a permitted residue of that agvet chemical in Schedule 20.

1.4.2—5 Extraneous residue limit of agvet chemicals in foods

- (1) A food for sale may contain a permitted residue of an *agvet chemical if:
 - (a) the agvet chemical is listed in Schedule 21; and
 - (b) the food consists of, or has as an ingredient, a food that is listed in relation to that agvet chemical in Schedule 21 and
 - (c) the amount of the permitted residue of the agvet chemical in the food complies with subsection 1.4.2—4(2) or subsection 1.4.2—4(3), as appropriate; and
 - (d) the presence of the permitted residue of the agvet chemical in the food arose from environmental sources, and not from direct or indirect use of an agvet chemical on food.
- (2) For a food for sale that consists of a food that is listed in relation to that *agvet chemical in Schedule 21, the amount of the permitted residue of the agvet chemical in the food complies with this subsection if the amount is not greater than the amount identified in relation to that food for that agvet chemical in Schedule 21.
- (3) For a food for sale that has 2 or more ingredients, 1 or more of which is a food that is listed in relation to the *agvet chemical in or Schedule 21, the amount of the agvet chemical in the food complies with this subsection if the amount is not greater than the amount *MRL* calculated in accordance with the following equation:

$$MRL = \sum_{j=1}^N \frac{Weight(j)}{Weight} \times MRL(j)$$

where:

N is the number of ingredients of the food that are listed in Schedule 21 in relation to that agvet chemical.

Weight(j) is the weight of the j^{th} such ingredient.

Weight is the total weight of the food.

MRL(j) is the amount identified in relation to the j^{th} ingredient for that agvet chemical in Schedule 21.

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.4 Prohibited and restricted plants and fungi

Section 1.4.4—1

Name

Standard 1.4.4 Prohibited and restricted plants and fungi

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraphs 1.1.1—10(3)(a) and (4)(e) provide that a food for sale must not consist of, or have as an ingredient or a component, a prohibited or restricted plant or fungus, or coca bush, unless expressly permitted by this Code. This Standard contains the relevant permissions.

1.4.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.4.4 — Prohibited and restricted plants and fungi*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.4.4—2 Definitions

Note In this Code (see section 1.1.2—3):

coca bush means:

- (a) *Eurythroxylum coca*; or
- (b) a substance derived from *Eurythroxylum coca*.

prohibited plant or fungus means:

- (a) a plant or fungus listed in Schedule 23; or
- (b) a part or a derivative of such a plant or fungus; or
- (c) a substance derived from a plant, fungus, part or derivative referred to in paragraph (a) or (b).

restricted plant or fungus means:

- (a) a plant or fungus listed in Schedule 24; or
- (b) a part or a derivative of such a plant or fungus; or
- (c) a substance derived from a plant, fungus, part or derivative referred to in paragraph (a) or (b).

1.4.4—3 Exception to prohibition relating to restricted plants and fungi

A restricted plant or fungus may be used as an ingredient in a food only if it complies with the requirements for natural toxicants in section 1.4.1—3 and subsection S19—6(1).

Chapter 1 Introduction and standards that apply to all foods

Part 4 Contaminants and residues

Standard 1.4.4 Prohibited and restricted plants and fungi

Section 1.4.4—4 Exception relating to coca bush

1.4.4—4 Exception relating to coca bush

Coca bush may be used as an ingredient in a food if the cocaine has been removed.

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.1 Novel foods

Section 1.5.1—1

Name

Part 5 Foods requiring pre-market clearance

Standard 1.5.1 Novel foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraphs 1.1.1—10(3)(b) and (4)(f) provide that a food for sale must not consist of, or have as an ingredient or a component, a novel food, if the food is offered for retail sale, unless expressly permitted by this Code. This Standard contains the relevant permissions.

1.5.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.5.1 — Novel foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.5.1—2 Definitions

Note Section 1.1.2—8 (Definition of *novel food*) provides as follows:

(1) In this Code:

novel food means a non-traditional food that requires an assessment of the public health and safety considerations having regard to:

- (a) the potential for adverse effects in humans; or
- (b) the composition or structure of the food; or
- (c) the process by which the food has been prepared; or
- (d) the source from which it is derived; or
- (e) patterns and levels of consumption of the food; or
- (f) any other relevant matters.

Note Possible categories of novel foods are described in guidelines issued by FSANZ. Categories of novel foods may include, but are not limited to, the following:

- plants or animals and their components;
- plant or animal extracts;
- herbs, including extracts;
- dietary macro-components;
- single chemical entities;
- microorganisms, including probiotics;

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.1 Novel foods

Section 1.5.1—3

Sale of novel foods

- foods produced from new sources, or by a process not previously applied to food.

non-traditional food means:

- (a) a food that does not have a history of human consumption in Australia or New Zealand; or
 - (b) a substance derived from a food, where that substance does not have a history of human consumption in Australia or New Zealand other than as a component of that food; or
 - (c) any other substance, where that substance, or the source from which it is derived, does not have a history of human consumption as a food in Australia or New Zealand.
- (2) The presence of a food in a food for special medical purposes or the use of a food as a food for special medical purposes does not constitute a history of human consumption in Australia or New Zealand in relation to that food for the purposes of this section.

1.5.1—3 Sale of novel foods

Despite paragraphs 1.1.1—10(3)(b) and (4)(f), a food offered for retail sale may consist of, or have as an ingredient, a *novel food if:

- (a) the novel food is listed in the table to section S25—2; and
- (b) any conditions of use specified in the corresponding row of that table are complied with.

Note Novel foods are added to the table to section S25—2 by variations to the Code. When added for the first time, the conditions may include some that apply to the novel food only during the first 15 months after gazettal of the variation. Conditions may also deal with matters such as the following:

- the need for preparation or cooking instructions, warning statements or other advice;
 - the need to meet specific requirements of composition or purity;
 - the class of food within which the food must be sold;
 - during the first 15 months after gazettal, the brand under which the food may be sold.
-

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.2 Food produced using gene technology

Section 1.5.2—1

Name

Standard 1.5.2 Food produced using gene technology

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraphs 1.1.1—10(3)(c) and (4)(g) provide that a food for sale must not consist of, or have as an ingredient or a component, a food produced using gene technology, unless expressly permitted by this Code. This Standard contains the relevant permissions. Schedule 26 provides definitions of the terms ‘conventional breeding’, ‘line’ and ‘transformation event’, and lists approved foods produced using gene technology and any conditions for use of the food.

1.5.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.5.2 — Food produced using gene technology*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.5.2—2 Definitions

Note In this Code (see section 1.1.2—2):

food produced using gene technology means a food which has been derived or developed from an organism which has been modified by gene technology.

Note This definition does not include food derived from an animal or other organism which has been fed food produced using gene technology, unless the animal or other organism is itself a product of gene technology.

gene technology means recombinant DNA techniques that alter the heritable genetic material of living cells or organisms.

Note 2 Definitions for genetically modified food, novel DNA and novel protein are in section 1.5.2—4

Note 3 Definitions for conventional breeding, line and transformation event are in Schedule 26.

1.5.2—3 When food produced using gene technology is permitted for sale

A food for sale may consist of, or have as an ingredient, a *food produced using gene technology if the food produced using gene technology:

- (a) is listed in Schedule 26 and complies with any corresponding conditions listed in that Schedule; or
- (b) is a substance that is permitted for use as a food additive by Standard 1.3.1 or as a processing aid by Standard 1.3.3.

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.2 Food produced using gene technology

Section 1.5.2—4

Requirement to label food as 'genetically modified'

1.5.2—4 Requirement to label food as 'genetically modified'

- (1) This section applies to a food for sale that consists of, or has as an ingredient, food that is a genetically modified food, unless:
 - (a) the genetically modified food:
 - (i) has been highly refined where the effect of the refining process is to remove novel DNA or novel protein; and
 - (ii) is not listed in subsections S26—3(2) and (3) as subject to the condition that its labelling must comply with this section; or
 - (b) both of the following are satisfied:
 - (i) the genetically modified food is a substance *used as a processing aid or *used as a food additive in the food in accordance with this Code;
 - (ii) no novel DNA or novel protein from the substance remains present in the food; or
 - (c) the genetically modified food is a *flavouring substance that is present in the food in a concentration of no more than 1 g of flavouring/kg of food; or
 - (d) the genetically modified food is:
 - (i) unintentionally present in the food; and
 - (ii) present in an amount of no more than 10 g in a kilogram of each ingredient; or
 - (e) the food is:
 - (i) intended for immediate consumption; and
 - (ii) prepared and sold from food premises and vending vehicles, including restaurants, take away outlets, caterers, or self-catering institutions.
- (2) For the labelling provisions, the information relating to *foods produced using gene technology includes the statement 'genetically modified' in conjunction with the name of the genetically modified food.

Note The labelling provisions are set out in Standard 1.2.1. Labelling provisions apply to both packaged and unpackaged foods produced using gene technology.
- (3) If the genetically modified food is an ingredient, *used as a food additive or *used as a processing aid the information may be included in the statement of ingredients.

Example Ingredients: Soy Protein Isolate (genetically modified).
- (4) To avoid doubt, this Code does not require any statement about the genetic status of a food or one of its ingredients other than as required by this section or by a condition in Schedule 26.

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.2 Food produced using gene technology

Section 1.5.2—4

Requirement to label food as 'genetically modified'

(5) In this section:

novel DNA and *novel protein* mean DNA or protein which, as a result of the use of gene technology, is different in chemical sequence or structure from DNA or protein present in counterpart food that has not been produced using gene technology, other than protein that:

- (a) is *used as a processing aid or *used as a food additive; and
- (b) has an amino acid sequence that is found in nature.

genetically modified food means a *food produced using gene technology that

- (a) contains novel DNA or novel protein; or
 - (b) is listed in Section S26—3 as subject to the condition that its labelling must comply with this section.
-

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.3 Irradiation of food

Section 1.5.3—1

Name

Standard 1.5.3 Irradiation of food

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the Food Act 2014 (NZ). See also section 1.1.1—3.

Note 3 Paragraphs 1.1.1—10(3)(d) and (4)(h) provide that a food for sale must not consist of, or have as an ingredient or a component, a food that has been irradiated, unless expressly permitted by this Code. Division 2 of this Standard contains the relevant permissions.

Subsection 1.1.1—14(2) provides that, if this Code sets requirements for record-keeping in relation to food, those requirements must be complied with. Division 3 contains such requirements.

Division 1 Preliminary

1.5.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.5.3 — Irradiation of food*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.5.3—2 Definitions

Note In this Code (see section 1.1.2—2):

irradiation, in relation to food, means subjecting the food to ionising radiation, other than ionising radiation imparted to food by measuring or inspection instruments, and **irradiate** and **irradiated** have corresponding meanings.

Division 2 Irradiation of food

1.5.3—3 Irradiation of fruit and vegetables

(1) Fruit and vegetables listed in subsection (2) may be irradiated for the purpose of pest disinfestation for a phytosanitary objective, if the absorbed dose is:

- (a) no lower than 150 Gy; and
- (b) no higher than 1 kGy.

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.3 Irradiation of food

Section 1.5.3—4 Irradiation of herbs and spices

(2) For subsection (1), the fruit and vegetables are:

Fruit and vegetables—table to subsection (2)

bread fruit
capsicum
carambola
custard apple
litchi
longan
mango
mangosteen
papaya (paw paw)
persimmon
rambutan
tomato

1.5.3—4 Irradiation of herbs and spices

- (1) Herbs and spices may be irradiated for the purpose of controlling sprouting and pest disinfestation, including the control of weeds, if the absorbed dose is no higher than 6 kGy.
- (2) Herbs and spices may be irradiated for the purpose of bacterial decontamination, if the absorbed dose is:
 - (a) no lower than 2 kGy; and
 - (b) no higher than 30 kGy.
- (3) In this section:

herbs and spices means the herbs and spices described in Schedule 22.

1.5.3—5 Irradiation of plant material for a herbal infusion

- (1) Plant material for a herbal infusion may be irradiated for the purpose of controlling sprouting and pest disinfestation, including the control of weeds, if the absorbed dose is no higher than 6 kGy.
- (2) Plant material for a herbal infusion may be irradiated for the purpose of bacterial decontamination, if the absorbed dose is:
 - (a) no lower than 2 kGy; and
 - (b) no higher than 10 kGy.
- (3) In this section:

plant material for a herbal infusion means fresh, dried or fermented leaves, flowers and other parts of plants used to make beverages, but does not include tea.

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.3 Irradiation of food

Section 1.5.3—6

Re-irradiation of food

1.5.3—6 Re-irradiation of food

Food that has been irradiated may be re-irradiated if any of the following conditions is met:

- (a) the food is prepared from food, including ingredients, that have been irradiated at levels that do not exceed 1 kGy;
- (b) the food contains less than 50 g/kg of irradiated ingredients;
- (c) the required full dose of ionising radiation was applied to the food in divided doses for a specific technological reason.

1.5.3—7 Sources of radiation that may be used

Food may be irradiated in accordance with this Division using any of the following forms of ionising radiation:

- (a) gamma rays from the radionuclide cobalt 60;
- (b) X-rays generated by or from machine sources operated at an energy level not exceeding 5 megaelectronvolts;
- (c) electrons generated by or from machine sources operated at an energy level not exceeding 10 megaelectronvolts.

Division 3 Record-keeping for and labelling of irradiated food

1.5.3—8 Record-keeping

- (1) A person who irradiates food must keep records in relation to:
 - (a) the nature and quality of the food treated; and
 - (b) the *lot identification; and
 - (c) the minimum durable life of the food treated; and
 - (d) the process used; and
 - (e) compliance with the process used; and
 - (f) the minimum and maximum dose absorbed by the food; and
 - (g) an indication whether or not the product has been irradiated previously and if so, details of such treatment; and
 - (h) the date of *irradiation.
- (2) The records must be kept at the facility where the food was irradiated.
- (3) The records must be kept for a period of time that exceeds the minimum durable life of the irradiated food by 1 year.

1.5.3—9 Labelling and other information—retail and catering

For the labelling provisions, the information relating to irradiated foods is:

Chapter 1 Introduction and standards that apply to all foods

Part 5 Foods requiring pre-market clearance

Standard 1.5.3 Irradiation of food

Section 1.5.3—9

Labelling and other information—retail and catering

- (a) if the food has been irradiated—a statement to the effect that the food has been treated with ionising radiation; and
- (b) if the food has as an ingredient or *component a food that has been irradiated—a statement to the effect that the ingredient or component has been treated with ionising radiation.

Note 1 The labelling provisions are set out in Standard 1.2.1. Labelling provisions apply to both packaged and unpackaged irradiated foods.

Note 2 For paragraph (b), the statement may be on the statement of ingredients or elsewhere on the label.

Chapter 1 Introduction and standards that apply to all foods

Part 6 Microbiological limits and processing requirements

Standard 1.6.1 Microbiological limits in food

Section 1.6.1—1

Name

Part 6 Microbiological limits and processing requirements

Standard 1.6.1 Microbiological limits in food

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Section 1.1.1—11 provides that a food for sale must not have an unacceptable level of microorganisms, as determined in accordance with this standard. This standard sets out how to determine whether a lot of food has an unacceptable level of microorganisms.

1.6.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.6.1 — Microbiological limits for food*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.6.1—2 Unacceptable microbiological levels

A *lot of a food has an unacceptable level of microorganisms if:

- (a) the food is listed in the table to section S27—3; and
- (b) the lot is tested in accordance with section 1.6.1—3; and
- (c) the test indicates that:
 - (i) the number of sample units having a level of a microorganism greater than that listed in the corresponding row of column 4 (*m*) is greater than the number listed in the corresponding row of column 3 (*c*); or
 - (ii) the level of the microorganism in any of the sample units is greater than the number (if any) listed in the corresponding row of column 5 (*M*).

Note For the meaning of *lot*, see section 1.1.2—2.

1.6.1—3 Assessment of microbiological levels

- (1) Microbiological levels in food must be assessed in accordance with this section.
- (2) For a particular *lot of a food listed in column 1 of the table section S27—3, the number of sample units taken must be the number of sample units set out in the corresponding row of column 2 (*n*).

Chapter 1 Introduction and standards that apply to all foods

Part 6 Microbiological limits and processing requirements

Standard 1.6.1 Microbiological limits in food

Section 1.6.1—4

Food in which growth of *Listeria monocytogenes* will not occur

- (3) Despite subsection (2), if the food is the subject of a consumer complaint or a suspected food poisoning incident, an *authorised officer may take or otherwise obtain fewer sample units than the number referred to in that subsection or take smaller samples.
- (4) An *authorised officer who takes or otherwise obtains a sample of food for the purpose of submitting it for microbiological analysis:
 - (a) must not divide that sample into separate parts; and
 - (b) where the sample consists of one or more sealed packages of a kind ordinarily sold by retail—must submit for such analysis that sample in that package or those packages in an unopened and intact condition.
- (5) The following reference methods must be used to determine whether a food has exceeded the maximum permissible levels of microorganisms specified in the Schedule in relation to that food –
 - (a) for a food other than packaged water, packaged ice or mineral water
 - (i) the relevant method prescribed by Australian Standard AS5013; or
 - (ii) the relevant method referenced by Australian Standard AS5013 and prescribed by the International Organization for Standardization; or
 - (iii) any equivalent method as determined by –
 - (A) Australian New Zealand Standard *AS/NZS 4659; or
 - (B) ISO 16140:2003; and
 - (b) for packaged water, packaged ice or mineral water—the relevant method prescribed by Australian New Zealand Standard AS/NZS 4276.
- (6) A reference to a Standard in subsection (5) is a reference to that Standard as in force at the commencement of this provision.

1.6.1—4 Food in which growth of *Listeria monocytogenes* will not occur

- (1) For the purposes of the Schedule, growth of *Listeria monocytogenes* will not occur in a *ready-to-eat food if –
 - (a) the food has a pH less than 4.4 regardless of water activity; or
 - (b) the food has a water activity less than 0.92 regardless of pH; or
 - (c) the food has a pH less than 5.0 in combination with a water activity of less than 0.94; or
 - (d) the food has a refrigerated shelf life no greater than 5 days; or
 - (e) the food is frozen (including foods consumed frozen and those intended to be thawed immediately before consumption); or
 - (f) it can be validated that the level of *Listeria monocytogenes* will not increase by greater than 0.5 log cfu/g over the food's stated shelf life.
-

Chapter 1 Introduction and standards that apply to all foods

Part 6 Microbiological limits and processing requirements

Standard 1.6.1 Microbiological limits in food

Section 1.6.1—4

Food in which growth of *Listeria monocytogenes* will not occur

- (2) For the purposes of the Schedule, a *ready-to-eat food that does not receive a *listericidal process during manufacture is taken to be a food in which growth of *Listeria monocytogenes* will not occur if the level of *Listeria monocytogenes* will not exceed 100 cfu/g within the food's expected shelf life.
- (3) For the purposes of subclause (2), a *ready-to-eat food that does not receive a *listericidal process during manufacture is taken to include –
- (a) ready-to-eat processed finfish; and
 - (b) fresh cut and packaged horticultural produce.
-

Chapter 1 Introduction and standards that apply to all foods

Part 6 Microbiological limits and processing requirements

Standard 1.6.2 Processing requirements for meat

Section 1.6.2—1

Name

Standard 1.6.2 Processing requirements for meat

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 This Standard applies in Australia only. For New Zealand purposes, processing requirements for meat products are regulated under the *Animal Products Act 1999* (NZ) and the *Food Act 2014* (NZ).

1.6.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 1.6.2 — Processing requirements for meat*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

1.6.2—2 Game meat

- (1) Game meat, except game birds, must be obtained:
 - (a) from a game carcass that has been subjected to a post mortem inspection that is conducted in accordance with relevant State or Territory law; or
 - (b) in accordance with a quality assurance program that:
 - (i) is conducted in accordance with relevant State or Territory law; and
 - (ii) is designed to ensure that the game meat is fit for human consumption.
- (2) A food for sale must not consist of, or have as an ingredient, game offal, other than bone or cartilage attached to game meat flesh.
- (3) In this section:

game meat means the whole or part of the carcass of any bird, buffalo, camel, deer, donkey, goat, hare, horse, kangaroo, rabbit, pig, possum or wallaby that has been slaughtered in the wild state, but does not include avian eggs, foetuses, parts of foetuses or pouch young.

game meat flesh means skeletal game meat muscle, including any attached fat, connective tissue, nerve, blood, blood vessels and, in the case of birds, skin.

game offal means game meat other than game meat flesh.

1.6.2—3 Fermented meat products

- (1) Fermented comminuted processed meat is heat treated if it has had its core temperature maintained at 55°C for a period of at least 20 minutes, or an equivalent combination of time and higher temperature.

Chapter 1 Introduction and standards that apply to all foods

Part 6 Microbiological limits and processing requirements

Standard 1.6.2 Processing requirements for meat

Section 1.6.2—3 Fermented meat products

Note Standard 1.2.1 and Standard 2.2.1 provide for the labelling of heat treated fermented comminuted processed meat.

- (2) Fermented comminuted processed meat is cooked if it has had its core temperature maintained at 65°C for a period of at least 10 minutes, or an equivalent combination of time and higher temperature.

Note Standard 1.2.1 and Standard 2.2.1 provide for the labelling of cooked fermented comminuted processed meat.

- (3) A fermented meat product must not contain mechanically separated meat or rendered trimmings unless it has been cooked so that its core temperature is maintained at 65°C for a period of at least 10 minutes, or an equivalent combination of time and higher temperature.

- (4) In this section:

mechanically separated meat means meat that has been separated from bone by a mechanical process that results in *comminuted meat.

rendered trimmings means the cooked meat fractions derived from the rendering of meat trimmings, excluding ligamentum nuchae.

Chapter 2 Food standards for specific foods

Part 1 Cereals

Standard 2.1.1 Cereal and cereal products

Section 2.1.1—1

Name

Chapter 2 Food standards for specific foods

Part 1 Cereals

Standard 2.1.1 Cereal and cereal products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.1.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.1.1 — Cereal and cereal products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

Division 2 Bread and bread products

2.1.1—2 Definitions

Note In this Code (see section 1.1.2—3):

bread means:

- (a) a food that is made by baking a yeast-leavened dough prepared from one or more cereal flours or meals and water; or
- (b) such a food with other foods added.

wheat flour includes wholemeal wheat flour.

wholegrain means the intact grain or the dehulled, ground, milled, cracked or flaked grain where the constituents—endosperm, germ and bran—are present in such proportions that represent the typical ratio of those fractions occurring in the whole cereal, and includes wholemeal.

wholemeal means the product containing all the milled constituents of the grain in such proportions that it represents the typical ratio of those fractions occurring in the whole cereal.

2.1.1—3 Requirement for food sold as bread

A food that is sold as bread must be bread.

Chapter 2 Food standards for specific foods

Part 1 Cereals

Standard 2.1.1 Cereal and cereal products

Section 2.1.1—4

Application of sections 2.1.1—5 and 2.1.1—6

2.1.1—4 Application of sections 2.1.1—5 and 2.1.1—6

Sections 2.1.1—5 and 2.1.1—6 do not apply to:

- (a) the following foods, or to wheat flour used to make those products:
 - (i) pizza bases;
 - (ii) breadcrumbs;
 - (iii) pastries;
 - (iv) cakes, including brioche, panettone and stollen;
 - (v) biscuits;
 - (vi) crackers; or
- (b) bread that is represented as organic.

2.1.1—5 Requirement for folic acid and thiamin in bread flour

Note This section applies in Australia only.

Wheat flour that is sold as suitable for making bread to which this section applies must contain:

- (a) no less than 2 mg/kg, and no more than 3 mg/kg, of folic acid; and
- (b) no less than 6.4 mg/kg thiamin.

2.1.1—6 Requirement for iodised salt in bread

- (1) Iodised salt must be used for making bread to which this section applies where salt would ordinarily be used.
- (2) This section does not prevent:
 - (a) the addition of salt other than iodised salt to the surface of bread; or
Example the addition of rock salt
 - (b) the addition of other food containing salt other than iodised salt during the making of bread.

Division 3 Wholegrain cereals and cereal products

2.1.1—7 Requirement for food sold as wholemeal or wholegrain product

A food that is sold as, or as being made from:

- (a) ‘wholemeal’; or
- (b) ‘wholegrain’;

must consist of , or have as an ingredient, wholemeal or wholegrain as appropriate.

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Section 2.2.1—1

Name as an ingredient or a component

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.2.1—1 Name as an ingredient or a component

This Standard is *Australia New Zealand Food Standards Code — Standard 2.2.1 — Meat and meat products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.2.1—2 Definitions

Note In this Code (see section 1.1.2—3):

cured and/or dried meat flesh in whole cuts or pieces includes any attached bone.

dried meat means meat that has been dried but does not include slow cured dried meat.

manufactured meat means processed meat containing no less than 660 g/kg of meat.

meat:

- (a) means the whole or part of the carcass of any of the following animals, if slaughtered other than in a wild state:
 - (i) buffalo, camel, cattle, deer, goat, hare, pig, poultry, rabbit or sheep;
 - (ii) any other animal permitted for human consumption under a law of a State, Territory or New Zealand; and
- (b) does not include:
 - (i) fish; or
 - (ii) avian eggs; or
 - (iii) foetuses or part of foetuses.

meat flesh means meat that consists of skeletal muscle and any attached:

- (a) animal rind; or
 - (b) fat; or
 - (c) connective tissue; or
 - (d) nerve; or
 - (e) blood; or
 - (f) blood vessels; or
-

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Section 2.2.1—3

Requirement for food sold as sausage

(g) skin, in the case of poultry.

meat pie means a pie containing no less than 250 g/kg of meat flesh.

offal includes blood, brain, heart, kidney, liver, pancreas, spleen, thymus, tongue and tripe, and excludes meat flesh, bone and bone marrow.

processed meat means a food which has, either singly or in combination with other foods, undergone a method of processing other than boning, slicing, dicing, mincing or freezing.

sausage means a food that:

- (a) consists of meat that has been minced, meat that has been comminuted, or a mixture of both, whether or not mixed with other foods, and which has been encased or formed into discrete units; and
- (b) does not include meat formed or joined into the semblance of cuts of meat.

Division 2 Requirements for sale

2.2.1—3 Requirement for food sold as sausage

A food that is sold as sausage must be sausage and:

- (a) contain no less than 500 g/kg of fat free meat flesh; and
- (b) have a proportion of fat that is no more than 500 g/kg of the fat free meat flesh content.

2.2.1—4 Requirement for food sold as meat pie

A food that is sold as a meat pie must be a meat pie.

2.2.1—5 Requirements for food sold as dried meat or cured and/or dried meat flesh in whole cuts or pieces, manufactured meat or processed meat

- (1) A food that is sold as a dried meat must be dried to a water activity of no more than 0.85.
- (2) A food that is sold as cured and/or dried meat flesh in whole cuts or pieces must contain not less than 160 g/kg of meat protein on a fat free basis.
- (3) A food that is sold as manufactured meat must contain not less than 660 g/kg of meat.
- (4) A food that is sold as processed meat must contain not less than 300 g/kg of meat.

Division 3 Information requirements

2.2.1—6 Statement indicating the presence of offal

For the labelling provisions:

- (a) brain, heart, kidney, liver, tongue or tripe must be identified as:
 - (i) offal; or
-

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Section 2.2.1—7

Proportion of fat in minced meat

- (ii) by the specific name of the type of offal; and
- (b) any other type of offal must be identified by the specific name of the type of offal.

Note The labelling provisions are set out in Standard 1.2.1.

2.2.1—7 Proportion of fat in minced meat

For the labelling provisions, a statement of the maximum proportion of fat in minced meat, in g/100 g, is required if a claim is made in relation to the fat content of minced meat.

Note The labelling provisions are set out in Standard 1.2.1.

2.2.1—8 Information about raw meat joined or formed into the semblance of a cut of meat

For the labelling provisions, for a food that consists of raw meat that has been formed or joined in the semblance of a cut of meat, whether coated or not, using a binding system without the application of heat, the following information is required:

- (a) a declaration that the food consists of meat that is formed or joined; and
- (b) in conjunction with that information, cooking instructions that would result in microbiological safety of the food being achieved.

Note The labelling provisions are set out in Standard 1.2.1.

2.2.1—9 Labelling of fermented comminuted processed meat

- (1) The *prescribed name for fermented comminuted processed meat is:
 - (a) if the meat has not been heat treated or cooked—‘fermented processed meat – not heat treated’; and
 - (b) if the meat has been heat treated—‘fermented processed meat – heat treated’; and
 - (c) if the meat has been cooked—‘fermented processed meat – cooked’.
- (2) For the labelling provisions, if the label on a package containing fermented comminuted processed meat contains a trade name, the following words are required to be included on the label in association with the trade name:
 - (a) if the meat has not been heat treated or cooked—‘fermented’;
 - (b) if the meat has been heat treated—‘fermented heat treated’;
 - (c) if the meat has been cooked—‘fermented cooked’.

Note The labelling provisions are set out in Standard 1.2.1.

- (3) The labelling may refer to a heating process only if:
 - (a) the reference is included for compliance with this section; or
 - (b) the heating process is a cooking instruction for the consumer.

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Section 2.2.1—10

Labelling of fermented comminuted manufactured meat

2.2.1—10 Labelling of fermented comminuted manufactured meat

- (1) The *prescribed name for fermented comminuted manufactured meat is:
 - (a) if the meat is not heat treated or cooked—‘fermented manufactured meat – not heat treated’; and
 - (b) if the meat has been heat treated—‘fermented manufactured meat – heat treated’; and
 - (c) if the meat has been cooked—‘fermented manufactured meat – cooked’.
- (2) For the labelling provisions, if the label on a package containing fermented comminuted manufactured meat contains a trade name, the following words are required to be included in association with the trade name:
 - (a) if the meat has not been heat treated or cooked—‘fermented’;
 - (b) if the meat has been heat treated—‘fermented heat treated’;
 - (c) if the meat has been cooked—‘fermented cooked’.

Note The labelling provisions are set out in Standard 1.2.1.
- (3) The labelling may refer to a heating process only if:
 - (a) the reference is included for compliance with this section; or
 - (b) the heating process is a cooking instruction for the consumer.

2.2.1—11 Fermented comminuted meat—unpackaged

- (1) This section applies to fermented comminuted meat that is not required to *bear a label because it is not in a package.

Note See subsections 1.2.1—6(4) and 1.2.1—9(4).
- (2) For the labelling provisions, despite paragraphs 2.2.1—9(1)(a) and 2.2.1—10(1)(a), the words ‘not heat treated’ need not be displayed.

Note The labelling provisions are set out in Standard 1.2.1.

Division 4 Sourcing requirements

2.2.1—12 Bovine must be free from bovine spongiform encephalopathy

Note This section applies in Australia only.

- (1) Bovine meat, and ingredients derived from bovines, must be derived from animals free from bovine spongiform encephalopathy.
- (2) Subsection (1) does not apply to:
 - (a) collagen from bovine skins and hides (including sausage casings produced from this type of collagen); or
 - (b) bovine fat or bovine tallow that:
 - (i) is an ingredient of a food; and
 - (ii) comprises no more than 300 g/kg of the food; or
 - (c) gelatine sourced from bovine skins or hides; or

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.1 Meat and meat products

Section 2.2.1—12

Bovine must be free from bovine spongiform encephalopathy

- (d) dairy products sourced from bovines.
-

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.2 Eggs and egg products

Section 2.2.2—1

Name

Standard 2.2.2 Eggs and egg products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 This Standard applies in Australia only.

2.2.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.2.2 — Eggs and egg products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.2.2—2 Definitions

Note In section 2.2.2—3 and Standard 4.2.5:

unacceptable egg means –

- (a) a cracked egg or a dirty egg; or
- (b) egg product which has not been processed in accordance with clause 21; or
- (c) egg product which contains a pathogenic micro-organism, whether or not the egg product has been processed in accordance with clause 21.

In this definition, ‘clause 21’ is a reference to clause 21 of Standard 4.2.5, which relates to ‘Processing egg product’, and applies in Australia only.

2.2.2—3 Sale or supply of unacceptable eggs

- (1) Unacceptable eggs must not be sold in a retail sale or to a caterer.
- (2) In this section:

unacceptable egg has the same meaning as it has in Standard 4.2.5.

2.2.2—4 Traceability

Eggs for retail sale or for sale to a *caterer must be individually marked with the producer’s or processor’s unique identification.

Chapter 2 Food standards for specific foods

Part 2 Meat, eggs and fish

Standard 2.2.3 Fish and fish products

Section 2.2.3—1

Name

Standard 2.2.3 Fish and fish products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 This Code does not define specific names for fish. An Australian Fish Names Standard (AS SSA 5300) has been published which provides guidance on standard fish names to be used in Australia.

1. Hard copies of the Australian Fish Names Standard (AS 5300) are available from FRDC's Online Shop at <http://www.seafood.net.au/shop>.
2. A searchable database of Australian Standard Fish Names is available at <http://www.fishnames.com.au>.
3. New Zealand common, Maori, and scientific names for fish species are available at <http://www.foodsafety.govt.nz/industry/sectors/seafood/fish-names/index.htm>.

2.2.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.2.3 — Fish and fish products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.2.3—2 Definitions

Note In this Code (see section 1.1.2—3):

fish means a cold-blooded aquatic vertebrate or aquatic invertebrate including shellfish, but not including amphibians or reptiles.

2.2.3—3 Labelling of formed or joined fish

For the labelling provisions, for a food that consists of raw fish that has been formed or joined in the semblance of a cut or fillet of fish using a binding system without the application of heat, whether coated or not, the following information is required:

- (a) a declaration that the food is either formed or joined;
- (b) in conjunction with that declaration, cooking instructions that would result in microbiological safety of the food being achieved.

Note 1 The labelling provisions are set out in Standard 1.2.1.

Note 2 Section 1.4.1—3 and section S19—6 prescribe the maximum level of histamine permitted in fish and fish products.

Chapter 2 Food standards for specific foods

Part 3 Fruit and vegetables

Standard 2.3.1 Fruit and vegetables

Section 2.3.1—1

Name

Part 3 Fruit and vegetables

Standard 2.3.1 Fruit and vegetables

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.3.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.3.1 — Fruit and vegetables*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.3.1—2 Definitions

Note In this Code (see section 1.1.2—3):

fruit and vegetables means any of fruit, vegetables, nuts, spices, herbs, fungi, legumes and seeds.

Note In Standards 1.2.7 and 1.2.8 the separate terms fruit and vegetable have different definitions and do not include nuts, spices, herbs, fungi, legumes and seeds.

2.3.1—3 Requirement for food sold as fruit and vegetables in brine, etc

- (1) A food that is fruit and vegetables in brine, oil, vinegar or water must not have a pH greater than 4.6.
 - (2) Subsection (1) does not apply to commercially canned fruit and vegetables.
-

Chapter 2 Food standards for specific foods

Part 3 Fruit and vegetables

Standard 2.3.2 Jam

Section 2.3.2—1

Name

Standard 2.3.2 Jam

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.3.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.3.2 — Jam*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.3.2—2 Definitions

Note In this Code (see section 1.1.2—3):

jam:

- (a) means:
 - (i) a product prepared by processing one or more of the following:
 - (A) fruit;
 - (B) concentrated fruit juice;
 - (C) fruit juice;
 - (D) water extracts of fruit; or
 - (ii) such a product processed with sugars or honey; and
- (b) includes conserve; and
- (c) does not include marmalade.

2.3.2—3 Requirement for food sold as jam

- (1) A food that is sold as jam must:
 - (a) be jam; and
 - (b) contain no less than 650 g/kg of water-soluble solids.
- (2) A food that is sold as jam with the name of one or more fruits appearing in the labelling must be made from no less than 400 g/kg of those fruits.

Chapter 2 Food standards for specific foods

Part 4 Edible oils

Standard 2.4.1 Edible oils

Section 2.4.1—1

Name

Part 4 Edible oils

Standard 2.4.1 Edible oils

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.4.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.4.1— Edible oils*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.4.1—2 Definitions

Note In this Code (see section 1.1.2—3):

edible oil means the triglycerides, diglycerides, or both the triglycerides and diglycerides of fatty acids of plant or animal origin, including aquatic plants and aquatic animals, with incidental amounts of free fatty acids, unsaponifiable constituents and other lipids including naturally occurring gums, waxes and phosphatides.

2.4.1—3 Requirement for food sold as edible oil

- (1) A food that is sold as an edible oil must be edible oil.
- (2) A representation that a food is a particular kind of edible oil is taken to be a representation that it is an edible oil.

2.4.1—4 Process declaration for edible oils

For the labelling provisions, if:

- (a) a food is, or has as an ingredient, an edible oil; and
- (b) the label lists the specific source name of the oil; and
- (c) the oil has undergone a process that has altered its fatty acid composition;

the required process declaration is a statement that describes the nature of that process.

Note 1 An example of a process that alters the fatty acid composition of fatty acids in edible oil is the process of hydrogenation.

Note 2 The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 4 Edible oils

Standard 2.4.2 Edible oil spreads

Section 2.4.2—1

Name

Standard 2.4.2 Edible oil spreads

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.4.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.4.2— Edible oil spreads*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.4.2—2 Definitions

Note In this Code (see section 1.1.2—3):

edible oil means the triglycerides, diglycerides, or both the triglycerides and diglycerides of fatty acids of plant or animal origin, including aquatic plants and aquatic animals, with incidental amounts of free fatty acids, unsaponifiable constituents and other lipids including naturally occurring gums, waxes and phosphatides.

edible oil spread means:

- (a) a spreadable food composed of edible oils and water in the form of an emulsion of the type water-in-oil; or
- (b) such a food with any of the following added:
 - (i) water;
 - (ii) edible proteins;
 - (iii) salt;
 - (iv) lactic acid producing microorganisms;
 - (v) flavour producing microorganisms;
 - (vi) milk products;
 - (vii) no more than 82 g/kg of total plant sterol equivalents content.

margarine means an edible oil spread containing no less than 800g/kg of edible oils.

2.4.2—3 Requirements for sale as edible oil spread or margarine

Application of section to New Zealand

- (1) Subsections (3) and (5) do not apply to edible oil spread or margarine produced in, or imported into, New Zealand.

Requirement for food sold as edible oil spread

- (2) A food that is sold as an edible oil spread must be edible oil spread.

Chapter 2 Food standards for specific foods

Part 4 Edible oils

Standard 2.4.2 Edible oil spreads

Section 2.4.2—3

Requirements for sale as edible oil spread or margarine

Requirement for food sold as table edible oil spread

- (4) A food that is sold as a 'table' edible oil spread must be edible oil spread containing no less than 55 µg/kg of vitamin D.

Requirement for food sold as margarine

- (4) A food that is sold as 'margarine' must be margarine.

Requirement for food sold as table margarine

- (5) A food that is sold as 'table margarine' must be margarine containing no less than 55 µg/kg of vitamin D.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.1 Milk

Section 2.5.1—1

Name

Part 5 Dairy products

Standard 2.5.1 Milk

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.1 — Milk*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.1—2 Definitions

Note In this Code (see section 1.1.2—3):

milk means:

- (a) the mammary secretion of milking animals, obtained from one or more milkings for consumption as liquid milk or for further processing, but excluding colostrums; or
- (b) such a product with phytosterols, phytostanols and their esters added.

skim milk means milk from which milkfat has been removed.

2.5.1—3 Requirement for food sold as milk

A food that is sold as ‘milk’ must be milk.

2.5.1—4 Requirement for retail sale as cow’s milk

- (1) This section applies to retail sales.
- (2) A food that is sold as cow’s milk must:
 - (a) be:
 - (i) milk from cows; or
 - (ii) milk from cows:
 - (A) to which milk components have been added, or from which they have been withdrawn in order for the product to comply with requirements of this section; and
 - (B) that has the same whey protein to casein ratio as the original milk; and

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.1 Milk

Section 2.5.1—5

Requirement for food sold as skim milk

- (b) contain no less than 32 g/kg of milkfat; and
- (c) contain no less than 30g/kg of protein (measured as crude protein).

2.5.1—5 Requirement for food sold as skim milk

A food that is sold as 'skim milk' must:

- (a) be skim milk; and
- (b) contain no more than 1.5 g/kg of milkfat; and
- (c) for skim milk derived from cow's milk—contain no less than 30g/kg of protein (measured as crude protein).

2.5.1—6 Compositional requirement for phytosterols, phytostanols and their esters in milk

*Phytosterols, phytostanols and their esters may be added to milk only if:

- (a) the milk contains no more than 1.5 g total fat/100 g; and
 - (b) the *total plant sterol equivalents content is no less than 3 g/L of milk and no more than 4 g/L of milk.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.2 Cream

Section 2.5.2—1

Name

Standard 2.5.2 Cream

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.2 — Cream*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.2—2 Definitions

Note In this Code (see section 1.1.2—3):

cream means a milk product comparatively rich in fat, in the form of an emulsion of fat-in-skim milk that is obtained by:

- (a) separation from milk; or
- (b) separation from milk and the addition of milk or milk products obtained from milk.

2.5.2—3 Requirement for food sold as cream

A food that is sold as ‘cream’ must:

- (a) be cream; and
 - (b) contain no less than 350 g/kg of milkfat.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.3 Fermented milk products

Section 2.5.3—1

Name

Standard 2.5.3 Fermented milk products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.3 — Fermented milk products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.3—2 Definitions

Note In this Code (see section 1.1.2—3):

fermented milk means a food obtained by fermentation of milk or products derived from milk, where the fermentation involves the action of microorganisms and results in coagulation and a reduction in pH.

yoghurt means a fermented milk where the fermentation has been carried out with lactic acid producing microorganisms.

2.5.3—3 Requirement for food sold as fermented milk or yoghurt

A food that is sold as fermented milk or ‘yoghurt’ must:

- (a) be fermented milk or yoghurt as appropriate, or of fermented milk or yoghurt with other foods added; and
- (b) have a pH of no more than 4.5; and
- (c) have no less than 10^6 cfu/g microorganisms used in the fermentation; and
- (d) if the food is derived from cow’s milk—contain no less than 30 g/kg protein (measured as crude protein).

2.5.3—4 Compositional requirement for fermented milk or yoghurt used as an ingredient

If a food contains fermented milk or yoghurt as an ingredient, that ingredient must comply with paragraphs 2.5.3—3(a) to (d).

2.5.3—5 Compositional requirement for phytosterols, phytosterols and their esters in yoghurt

*Phytosterols, phytosterols and their esters may be added to yoghurt only if:

- (a) the yogurt contains no more than 1.5 g total fat/100 g; and

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.3 Fermented milk products

Section 2.5.3—5

Compositional requirement for phytosterols, phytostanols and their esters in yoghurt

- (b) the yoghurt is supplied in a package, the capacity of which is no more than 200 g; and
 - (c) the *total plant sterol equivalents content added is no less than 0.8 g and no more than 1.0 g/package.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.4 Cheese

Section 2.5.4—1

Name

Standard 2.5.4 Cheese

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.4 — Cheese*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.4—2 Definitions

Note In this Code (see section 1.1.2—3):

cheese means:

- (a) the ripened or unripened solid or semi-solid milk product, whether coated or not, that is obtained by one or both of the following processes:
 - (i) wholly or partly coagulating milk, or materials obtained from milk, or both, through the action of rennet or other suitable coagulating agents, and partially draining the whey which results from such coagulation;
 - (ii) processing techniques involving concentration or coagulation of milk, or materials obtained from milk, or both, which give an end-product with similar physical, chemical and organoleptic characteristics as the product described in subparagraph (a)(i); or
- (b) such a product with any of the following additional ingredients added during production:
 - (i) water;
 - (ii) lactic acid producing microorganisms;
 - (iii) flavour producing microorganisms;
 - (iv) gelatine;
 - (v) starch;
 - (vi) vinegar;
 - (vii) salt;
 - (viii) tall oil phytosterol esters added in accordance with this Standard.

processed cheese means a product manufactured from cheese and products obtained from milk, which is heated and melted, with or without added emulsifying salts, to form a homogeneous mass.

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.4 Cheese

Section 2.5.4—3

Requirement for food sold as cheese

2.5.4—3 Requirement for food sold as cheese

A food that is sold as cheese or processed cheese must be cheese or processed cheese as appropriate.

2.5.4—4 Compositional requirement for tall oil phytosterol esters in cheese

Tall oil phytosterol esters may only be added to cheese or to processed cheese if:

- (a) the cheese or processed cheese contains no more than 12 g total fat/100 g; and
 - (b) the tall oil phytosterol ester is added at no less than 70 g/kg and no more than 90 g/kg.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.5 Butter

Section 2.5.5—1

Name

Standard 2.5.5 Butter

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.5—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.5 — Butter*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.5—2 Definitions

Note In this Code (see section 1.1.2—3):

butter means:

- (a) a food that is derived exclusively from milk and products obtained from milk, principally in the form of an emulsion of the type water-in-oil; or
- (b) such a food with any of the following added:
 - (i) water;
 - (ii) salt;
 - (iii) lactic acid producing microorganisms;
 - (iv) flavour producing microorganisms.

2.5.5—3 Requirement for food sold as butter

A food that is sold as ‘butter’ must:

- (a) be butter; and
- (b) contain no less than 80.0% m/m milkfat.

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.6 Ice cream

Section 2.5.6—1

Name

Standard 2.5.6 Ice cream

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.6—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.6 — Ice cream*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.6—2 Definitions

Note In this Code (see section 1.1.2—3):

ice cream means a sweet frozen food that is made from cream or milk products or both, and other foods, and is generally aerated.

2.5.6—3 Requirement for food sold as ice cream

A food that is sold as ‘ice cream’ must:

- (a) be ice cream; and
 - (b) contain no less than:
 - (i) 100 g/kg of milk fat; and
 - (ii) 168 g/L of food solids.
-

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.7 Dried milk, evaporated milk and condensed milk

Section 2.5.7—1

Name

Standard 2.5.7 Dried milk, evaporated milk and condensed milk

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 In Australia, dairy products must be processed in accordance with Standard 4.2.4.

2.5.7—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.5.7 — Dried milk, evaporated milk and condensed milk*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.5.7—2 Definitions

Note In this Code (see section 1.1.2—3):

adjusted milk, in relation to condensed milk, dried milk or evaporated milk, means milk:

- (a) that is to be used to make the product concerned; and
- (b) to which milk components have been added, or from which they have been withdrawn, in order for the product to comply with requirements of Standard 2.5.7; and
- (c) that has the same whey protein to casein ratio as the original milk

condensed milk means:

- (a) a food obtained by the partial removal of water from milk or adjusted milk, with the addition of sugars, and the possible addition of salt or water; or
- (b) a food of the same composition obtained by any other process.

dried milk means a powdered food obtained by the partial removal of water from milk or adjusted milk.

evaporated milk means:

- (a) a food obtained by the partial removal of water by heat from milk or adjusted milk, with the possible addition of one or more of the following:
 - (i) salt;
 - (ii) water. or
- (b) a food of the same composition obtained by any other process.

2.5.7—3 Requirement for food sold as condensed milk

(1) A food that is sold as condensed milk must:

- (a) be condensed milk; and

Chapter 2 Food standards for specific foods

Part 5 Dairy products

Standard 2.5.7 Dried milk, evaporated milk and condensed milk

Section 2.5.7—4

Requirement for food sold as dried milk

- (b) contain no less than 34% m/m milk protein in milk solids non-fat.
- (2) A food that is sold as condensed whole milk and derived from cow's milk must contain:
 - (a) no less than 8% m/m milkfat; and
 - (b) no less than 28% m/m milk solids.
- (3) A food that is sold as condensed skim milk and derived from cow's milk must contain
 - (a) no more than 1% m/m milkfat; and
 - (b) no less than 24% m/m milk solids.

2.5.7—4 Requirement for food sold as dried milk

- (1) A food that is sold as dried milk must:
 - (a) be dried milk; and
 - (b) contain no less than 34% m/m milk protein in milk solids non-fat.
- (2) A food that is sold as dried whole milk and derived from cow's milk must contain:
 - (a) no less than 26% m/m milkfat; and
 - (b) no more than 5% m/m water;
- (3) A food that is sold as dried skim milk and derived from cow's milk must contain
 - (a) no more than 1.5% m/m milkfat; and
 - (b) no more than 5% m/m water.

2.5.7—5 Requirement for food sold as evaporated milk

- (1) A food that is sold as evaporated milk:
 - (a) be evaporated milk; and
 - (b) contain no less than 34% m/m milk protein in milk solids non-fat.
 - (2) A food that is sold as evaporated whole milk and derived from cow's milk must contain
 - (a) no less than 7.5% m/m milkfat; and
 - (b) no less than 25% m/m milk solids; and
 - (3) A food that is sold as evaporated skim milk and derived from cow's milk must contain
 - (a) no more than 1% m/m milkfat; and
 - (b) no less than 20% m/m milk solids.
-

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.1 Fruit juice and vegetable juice

Section 2.6.1—1

Name

Part 6 Non-alcoholic beverages

Standard 2.6.1 Fruit juice and vegetable juice

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.6.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.6.1 — Fruit juice and vegetable juice*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.6.1—2 Definitions

Note In this Code (see section 1.1.2—3):

fruit juice means juice made from a fruit.

juice:

- (a) means the liquid portion, with or without pulp, obtained from:
 - (i) a fruit or a vegetable; or
 - (ii) in the case of citrus fruit, other than lime—the endocarp only of the fruit; and
- (b) includes a product that results from concentrating juice and then reconstituting it with water.

juice blend means a blend of more than one juice (including a blend of one or more fruit juices and one or more vegetable juices).

vegetable juice means juice made from a vegetable.

2.6.1—3 Requirement for food sold as fruit juice or vegetable juice

- (1) A food that is sold as fruit juice or as the juice of a specified fruit or fruits must be fruit juice or a blend of fruit juices, and may contain any of the following additional ingredients:
 - (a) no more than 40 g/kg of sugars;
 - (b) salt;
 - (c) herbs and spices.
- (2) A food that is sold as vegetable juice or as the juice of a specified vegetable or vegetables must be vegetable juice, or a blend of vegetable juices, and may contain any of the following additional ingredients:
 - (a) sugars;

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.1 Fruit juice and vegetable juice

Section 2.6.1—4

Name and percentage by volume of juices in juice blend

- (b) salt;
- (c) herbs and spices.

2.6.1—4 Name and percentage by volume of juices in juice blend

For the labelling provisions, the name and percentage of each juice in juice blend is not required for orange juice which contains no more than 10% in total of:

- (a) mandarin juice; or
- (b) tangelo juice; or
- (c) mandarin juice and tangelo juice.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Section 2.6.2—1

Name

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.6.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.6.2 — Non-alcoholic beverages and brewed soft drinks*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.6.2—2 Definitions

Note In this Code (see section 1.1.2—3):

brewed soft drink means a food that:

- (a) is the product prepared by a fermentation process from water with sugar and one or more of:
 - (i) fruit extractives or infusions; or
 - (ii) vegetable extractives or infusions; and
- (b) contains no more than 1.15% alcohol by volume.

electrolyte drink means a drink formulated and represented as suitable for the rapid replacement of fluid, carbohydrates, electrolytes and minerals.

electrolyte drink base means a solid or liquid which, when made up, makes an electrolyte drink.

formulated beverage means a non-carbonated, ready-to-drink, flavoured beverage that:

- (a) is water-based; and
- (b) contains added vitamins or minerals or both vitamins and minerals; and
- (c) contains no more than 240 mL/L of fruit from one or more of the following sources:
 - (i) fruit juice;
 - (ii) fruit purée;
 - (iii) concentrated fruit juice;
 - (iv) concentrated fruit purée;
 - (v) comminuted fruit;
 - (vi) orange peel extract; and
- (d) contains no more than 75 g/L of sugars; and
- (e) does not contain:
 - (i) carbon dioxide; or
 - (ii) caffeine; and

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Section 2.6.2—3

Composition requirement for packaged water

(f) is not mixed with any other beverage.

fruit drink means a product that is prepared from:

- (a) one or more of the following:
 - (i) fruit juice;
 - (ii) fruit purée;
 - (iii) concentrated fruit juice;
 - (iv) concentrated fruit puree;
 - (v) comminuted fruit;
 - (vi) orange peel extract; and
- (b) one or more of the following:
 - (i) water;
 - (ii) mineralised water; and
 - (iii) sugars.

mineral water or *spring water* means ground water obtained from subterranean water-bearing strata that, in its natural state, contains soluble matter.

non-alcoholic beverage:

- (a) means:
 - (i) packaged water; or
 - (ii) a water-based beverage, or a water-based beverage that contains other foods (other than alcoholic beverages); or
 - (iii) an electrolyte drink; and
- (b) does not include a brewed soft drink.

2.6.2—3 Composition requirement for packaged water

- (1) This section applies to a food for sale that consists of water presented in packaged form.
- (2) The food for sale may contain carbon dioxide, whether added or naturally occurring.
- (3) The food for sale must not contain:
 - (a) a chemical (other than fluoride) listed in Table A3.3 *Guideline values for chemicals that are of health significance in drinking-water* of Annex 3 Chemical summary tables in the *Guidelines for drinking-water quality, 4th edition, 2011, World Health Organization, Geneva*, at a level greater than the guideline value for the chemical specified in that Table; or
 - (b) fluoride that is naturally-occurring in the water at a level greater than 1.0 mg/L.

Note Subsection (3) and subsection (4), and Schedule 28, will be repealed on 21 February 2015, and subsection (5) will be renumbered as subsection (3). See section 5.1.1—4.

2.6.2—4 Addition of fluoride to packaged water

A food for sale consisting of water presented in packaged form may contain added fluoride only if:

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Section 2.6.2—5

Labelling—composition of packaged water

- (a) the water does not contain sugars, sweeteners, flavouring substances or other food; and
- (b) the water is not carbonated; and
- (c) the total amount of the naturally occurring and any added fluoride is no less than 0.6 mg/L and no more than 1.0 mg/L; and
- (d) the form of fluoride added is:
 - (i) hydrofluorosilicic acid (fluorosilicic acid); or
 - (ii) sodium fluoride; or
 - (iii) sodium fluorosilicate (sodium silicofluoride).

2.6.2—5 Labelling—composition of packaged water

- (1) For the labelling provisions, for water presented in packaged form that contains added fluoride, a statement to the effect that the water contains added fluoride is required.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) For the labelling provisions, a typical analysis that lists the total concentration of any naturally occurring compound expressed in either mg/L or parts per million may be included.

Note The labelling provisions are set out in Standard 1.2.1.

- (3) The typical analysis may also include added fluoride provided that only the total amount of the naturally occurring and added fluoride is specified.
- (4) A typical analysis that complies with subsections (2) and (3) is not a nutrition content claim for the purposes of section 1.1.2—9.

2.6.2—6 Requirement for food sold as brewed soft drink

A food that is sold as a brewed soft drink must be a brewed soft drink.

2.6.2—7 Requirement for food sold as fruit drink

A food that is sold as fruit drink must:

- (a) be fruit drink, and;
- (b) contain no less than:
 - (i) in the case of passionfruit juice drink—35 mL/L of passionfruit; and
 - (ii) otherwise—50 mL/L of fruit.

2.6.2—8 Non-alcoholic beverages not to be labelled or presented as alcoholic beverages

A non-alcoholic beverage or brewed soft drink must not be labelled or otherwise presented for sale in a form which expressly or by implication suggests that the product is an alcoholic beverage.

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Section 2.6.2—9

Requirements for food sold as electrolyte drink or electrolyte drink base

2.6.2—9 Requirements for food sold as electrolyte drink or electrolyte drink base

- (1) A food that is sold as an electrolyte drink or an electrolyte drink base must:
 - (a) be an electrolyte drink or an electrolyte drink base, as appropriate; and
 - (b) contain:
 - (i) no less than 10 mmol/L of sodium; and
 - (ii) no less than 50 g/L and no more than 100 g/L in total of the following:
 - (A) dextrose;
 - (B) fructose;
 - (C) glucose syrup;
 - (D) maltodextrin;
 - (E) sucrose; and
 - (iii) no more than 50 g/L fructose.
- (2) For an electrolyte drink base, the amounts in paragraph (1)(b) apply to the electrolyte drink base as ready to drink.

2.6.2—10 Permission to add minerals to electrolyte drink and electrolyte drink base

The following may be added to an electrolyte drink or an electrolyte drink base:

- (a) calcium phosphates;
- (b) potassium phosphates;
- (c) calcium citrates;
- (d) potassium citrates;
- (e) sodium citrates;
- (f) potassium carbonates, including potassium bicarbonate;
- (g) potassium chloride;
- (h) calcium chloride;
- (i) sodium chloride;
- (j) calcium lactate;
- (k) magnesium lactate;
- (l) magnesium sulphate.

2.6.2—11 Labelling of electrolyte drinks and electrolyte drink bases

- (1) For the labelling provisions, the following information is required for an electrolyte drink or an electrolyte drink base:
 - (a) the average per 100 mL, of:

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.2 Non-alcoholic beverages and brewed soft drinks

Section 2.6.2—12

Claims in relation to the tonicity of electrolyte drinks

- (i) the average energy content; and
 - (ii) the *carbohydrate present, including each type of monosaccharide and disaccharide; and
 - (iii) added minerals and electrolytes, expressed as milligrams and millimoles;
- (b) the recommended volume and frequency of use.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) For an electrolyte drink base, the declaration must be based on the electrolyte drink as ready to drink.

2.6.2—12 Claims in relation to the tonicity of electrolyte drinks

- (1) A claim that an electrolyte drink is isotonic may only be made if the electrolyte drink has an average osmolality of 250-340 mOsm/L.
- (2) For the labelling provisions, the osmolality of the electrolyte drink must be declared as measured in mOsm /L.

Note The labelling provisions are set out in Standard 1.2.1.

- (3) The label on a package of isotonic electrolyte drink may include words to the effect that the product is designed to promote the availability of energy and to prevent or treat mild dehydration that may occur as a result of sustained strenuous exercise.

2.6.2—13 Requirement for food sold as a formulated beverage

A food sold as a formulated beverage must be a formulated beverage.

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.3 Kava

Section 2.6.3—1

Name

Standard 2.6.3 Kava

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 Paragraphs 1.1.1—10(3)(e) and (4)(i) provide that a food for sale must not consist of, or have as an ingredient or a component, kava or any substance derived from kava, unless expressly permitted by this Code. This Standard contains the relevant permissions.

Note 4 In Australia, this Standard should be considered in conjunction with the *Customs (Prohibited Imports) Regulations 1956* (Cth) and certain State and Territory restrictions on the supply of kava which seek to minimise the detrimental effects associated with kava abuse. Where kava is permitted for supply, the requirements in this Standard complement those restrictions.

2.6.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.6.3 — Kava*

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.6.3—2 Definitions

Note In this Code (see section 1.1.2—3):

kava means plants of the species *Piper methysticum*.

kava root means the peeled root or peeled rootstock of kava.

2.6.3—3 Exception to prohibition

The prohibition relating to the use of kava and substances derived from kava in paragraphs 1.1.1—10(3)(e) do not apply to a food that is:

- (a) a beverage obtained by the aqueous suspension of kava root using cold water only, and not using any organic solvent; or
- (b) dried or raw kava root.

2.6.3—4 Labelling of foods containing kava

For the labelling provisions, the following *warning statements are required for a food referred to in paragraph 2.6.3—3(a) or 2.6.3—3(b):

- (a) ‘Use in moderation’; and
- (b) ‘May cause drowsiness’.

Note The labelling provisions are set out in Standard 1.2.1. For the labelling requirement for unpackaged kava, see paragraph 1.2.1—9(4)(c).

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.4 Formulated caffeinated beverages

Section 2.6.4—1

Name

Standard 2.6.4 Formulated caffeinated beverages

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.6.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.6.4 — Formulated caffeinated beverages*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.6.4—2 Definitions

Note In this Code (see sections 1.1.2—3 and 1.1.2—6:

non-alcoholic beverage:

- (a) means:
 - (i) packaged water; or
 - (ii) a water-based beverage, or a water-based beverage that contains other foods (other than alcoholic beverages); or
 - (iii) an electrolyte drink; and
- (b) does not include a brewed soft drink.

formulated caffeinated beverage means a flavoured, non-alcoholic beverage, or a flavoured, non-alcoholic beverage to which other substances (for example, carbohydrates, amino acids, vitamins) have been added, that:

- (a) contains caffeine; and
- (b) has the purpose of enhancing mental performance.

To avoid doubt, a formulated caffeinated beverage is a water based flavoured drink for the purposes of item 14.1.3 of section S15—5, and section S18—10.

In this Standard:

listed substance means a substance listed in column 1 of the table in section S28—2.

2.6.4—3 Composition—formulated caffeinated beverages

A formulated caffeinated beverage:

- (a) must contain no less than 145 mg/L and no more than 320 mg/L of caffeine in total, from any source; and
- (b) may contain a listed substance.

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.4 Formulated caffeinated beverages

Section 2.6.4—4

Prohibition on mixing formulated caffeinated beverages

2.6.4—4 Prohibition on mixing formulated caffeinated beverages

A food for sale (other than a formulated caffeinated beverage) must not be a mixture of a non-alcoholic beverage and a formulated caffeinated beverage.

2.6.4—5 Labelling requirements—formulated caffeinated beverage

Required declarations

- (1) For the labelling provisions, the required declarations of average quantities are a declaration of the *average quantity, per serving size and per 100 mL, of:
 - (a) caffeine, expressed in milligrams; and
 - (b) each listed substance (if any) that the beverage contains, expressed in the units in column 2 of the table to section S28—2.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) The declarations under subsection (1):
 - (a) may be adjacent to or follow a nutrition information panel on the label; and
 - (b) may be set out in the format in section S12—5; and
 - (c) may not be set out in the nutrition information panel.

Required advisory statements

- (3) For the labelling provisions, the required advisory statements are statements to the effect that:
 - (a) the food contains caffeine; and
 - (b) the food is not recommended for:
 - (i) children; or
 - (ii) pregnant or lactating women; or
 - (iii) individuals sensitive to caffeine; and
 - (c) if the food contains a listed substance—no more than a one-day quantity should be consumed per day.

Note 1 The labelling provisions are set out in Standard 1.2.1.

Note 2 Subsection 1.2.1—9(7) and paragraph 1.2.1—9(8)(g) each contain a labelling requirement for formulated caffeinated beverages that are not required to bear a label.

Note 3 For a formulated caffeinated beverage, the *one-day quantity* is the maximum amount that should be consumed in a day. For each listed substance that the beverage contains, a one-day quantity will not contain more than the amount in the corresponding row of the table to section S28—2.

- (4) For the advisory statement required by paragraph (3)(c), the one-day quantity may be expressed as mL, or as cans or bottles, as appropriate.
- (5) For paragraph (3)(c), to determine the *one-day quantity*:
 - (a) for each listed substance that the food contains, calculate the equivalent amount in accordance with the equation in subsection (6); and

Chapter 2 Food standards for specific foods

Part 6 Non-alcoholic beverages

Standard 2.6.4 Formulated caffeinated beverages

Section 2.6.4—5

Labelling requirements—formulated caffeinated beverage

(b) select, as the *one-day quantity*, the lowest of the equivalent amounts as so calculated.

(6) For subsection (5), the equation is:

$$\text{equivalent amount} = \frac{\text{permitted amount}}{\text{concentration}} \times 1000$$

where:

permitted amount is, for a listed substance, the permitted amount identified in the table to section S28—2.

concentration is the concentration of the substance in the beverage, in mg/L.

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.1 Labelling of alcoholic beverages and food containing alcohol

Section 2.7.1—1

Name

Part 7 Alcoholic beverages

Standard 2.7.1 Labelling of alcoholic beverages and food containing alcohol

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.7.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.7.1 — Alcoholic beverages*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.7.1—2 Definitions

Note In this Code (see section 1.1.2—2):

standard drink, for a beverage containing alcohol, means the amount which contains 10 grams of ethanol when measured at 20°C.

2.7.1—3 Statement of alcohol content

- (1) For the labelling provisions, a statement of the alcohol content is required for:
- a food (including an alcoholic beverage) that contains more than 1.15% alcohol by volume; or
 - an alcoholic beverage that contains 1.15% or less alcohol by volume; or
 - a beverage that contains not less than 0.5% but not more than 1.15% alcohol by volume.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) For paragraph (1)(a), the alcohol content must be expressed in mL/100 g, mL/100 mL or as the percentage of alcohol by volume.
- (3) For paragraph (1)(b) or (c), the alcohol content must be expressed in words to the effect ‘CONTAINS NOT MORE THAN X% ALCOHOL BY VOLUME’.
- (4) The statement must be accurate to within:
- for beer, cider or perry—0.3% alcohol by volume;
 - for spirits, liqueurs, fortified wine, fortified fruit or vegetable wine, and all other alcoholic beverages containing more than 1.15% alcohol by volume—0.5% alcohol by volume;

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.1 Labelling of alcoholic beverages and food containing alcohol

Section 2.7.1—4

Statement of the number of standard drinks

- (c) for wine and fruit wine (including sparkling forms), and wine products and fruit or vegetable wine products containing more than 6.5% alcohol by volume—1.5% alcohol by volume.

2.7.1—4 Statement of the number of standard drinks

- (1) For the labelling provisions, a statement of the approximate number of *standard drinks in the food for sale is required for a food that:
 - (a) is capable of being consumed as a beverage; and
 - (b) contains more than 0.5% alcohol by volume, measured at 20°C.

Note The labelling provisions are set out in Standard 1.2.1.
- (2) The statement must be accurate to:
 - (a) for a food for sale containing 10 or less *standard drinks—the first decimal place; or
 - (b) for a food for sale containing more than 10 standard drinks—the nearest whole number of standard drinks.
- (3) A statement is not required for beverages packaged prior to 20 December 2002.

2.7.1—5 Restriction on representations of low alcohol

An alcoholic beverage which contains more than 1.15% alcohol by volume must not be represented as a low alcohol beverage.

2.7.1—6 Restriction on representation of 'non-intoxicating'

The label on a package of a beverage containing more than 0.5% alcohol by volume must not include the words 'non intoxicating' or words of similar meaning.

2.7.1—7 Restriction on representation as non-alcoholic

A food containing alcohol must not be represented in a form which expressly or by implication suggests that the product is a non-alcoholic confection or non-alcoholic beverage.

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.2 Beer

Section 2.7.2—1

Name

Standard 2.7.2 Beer

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.7.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.7.2 — Beer*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.7.2—2 Definitions

Note In this Code (see section 1.1.2—3):

beer means:

- (a) the product, characterised by the presence of hops or preparations of hops, prepared by the yeast fermentation of an aqueous extract of malted or unmalted cereals, or both; or
- (b) such a product with any of the following added during production:
 - (i) cereal products or other sources of carbohydrate;
 - (ii) sugar;
 - (iii) salt;
 - (iv) herbs and spices.

Note A reference to beer includes a reference to ale, lager, pilsener, porter or stout.

2.7.2—3 Requirement for food sold as beer

A food that is sold as beer must be beer.

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.3 Fruit wine, vegetable wine and mead

Section 2.7.3—1

Name

Standard 2.7.3 Fruit wine, vegetable wine and mead

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.7.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.7.3 — Fruit wine, vegetable wine and mead*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.7.3—2 Definitions

Note In this Code (see section 1.1.2—3):

cider means the fruit wine prepared from the juice or must of apples or apples and pears and with no more than 25% of the juice or must of pears.

fruit wine or vegetable wine means:

- (a) a food that:
 - (i) is prepared from the complete or partial fermentation of fruit, vegetable, grains, cereals or any combination or preparation of those foods; and
 - (ii) is not a wine or a wine product; or
- (b) such a food with any of the following added during production:
 - (i) fruit juice and fruit juice products;
 - (ii) vegetable juice and vegetable juice products;
 - (iii) sugars;
 - (iv) honey;
 - (v) spices;
 - (vi) alcohol;
 - (vii) water.

fruit wine product or vegetable wine product means a food containing no less than 700 mL/L of fruit wine, or vegetable wine, or both fruit and vegetable wine, which has been formulated, processed, modified or mixed with other foods such that it is not a fruit wine or vegetable wine.

mead means:

- (a) a food that is prepared from the complete or partial fermentation of honey; or
- (b) such a food with any of the following added during production:
 - (i) fruit juice and fruit juice products;
 - (ii) vegetable juice and vegetable juice products;
 - (iii) sugars;

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.3 Fruit wine, vegetable wine and mead

Section 2.7.3—3

Requirement for food sold as cider, mead, perry, fruit wine and vegetable wine

- (iv) honey;
- (v) spices;
- (vi) alcohol;
- (vii) water.

perry means the fruit wine prepared from the juice or must of pears or pears and apples and with no more than 25% of the juice or must of apples.

2.7.3—3 Requirement for food sold as cider, mead, perry, fruit wine and vegetable wine

- (1) Perry may be named pear cider.
 - (2) A food that is sold as a ‘cider’, ‘mead’, ‘perry’, a fruit wine or a vegetable wine must be cider, mead, perry, a fruit wine or a vegetable wine, as appropriate.
-

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.4 Wine and wine product

Section 2.7.4—1

Name

Standard 2.7.4 Wine and wine product

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 For Australia, the *Wine Australia Corporation Act 1980* (Cth) is also relevant to the regulation of wine and geographical indications in relation to wine.

For New Zealand, the *Wine Act 2003* (NZ) is also relevant to the regulation of wine, and the *Geographical Indications (Wines and Spirits) Registration Act 2006* (NZ) is relevant to geographical indications in relation to wine.

2.7.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.7.4 — Wine and wine product*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.7.4—2 Definitions

Note In this Code (see section 1.1.2—3):

wine means:

- (a) a food that is the product of the complete or partial fermentation of fresh grapes, or a mixture of that product and products derived solely from grapes; or
- (b) such a food with any of the following added during production:
 - (i) grape juice and grape juice products;
 - (ii) sugars;
 - (iii) brandy or other spirit;
 - (iv) water that is necessary to incorporate any substance permitted for use as a food additive or a processing aid.

wine product means a food containing no less than 700 mL/L of wine, which has been formulated, processed, modified or mixed with other foods such that it is not wine.

2.7.4—3 Requirement for food sold as wine

A food that is sold as wine must be wine.

2.7.4—4 Requirement for food sold as wine product

A food that is sold as wine product must be wine product.

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.5 Spirits

Section 2.7.5—1

Name

Standard 2.7.5 Spirits

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.7.5—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.7.5 — Spirits*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.7.5—2 Definitions

Note In this Code (see section 1.1.2—3):

brandy means:

- (a) a spirit obtained from the distillation of wine, or fermented preparations of grapes or grape product; or
- (b) such a spirit with any of the following added during production:
 - (i) water;
 - (ii) sugars;
 - (iii) honey;
 - (iv) spices;
 - (v) grape juice;
 - (vi) grape juice concentrates;
 - (vii) wine;
 - (viii) prune juice.

liqueur means an alcoholic beverage that is a spirit, flavoured by or mixed with other foods, which contains more than 15% alcohol by volume, measured at 20°C.

spirit means an alcoholic beverage consisting of:

- (a) a potable alcoholic distillate, including whisky, brandy, rum, gin, vodka and tequila, produced by distillation of fermented liquor derived from food sources, so as to have the taste, aroma and other characteristics generally attributable to that particular spirit; or
- (b) such a distillate with any of the following added during production:
 - (i) water;
 - (ii) sugars;
 - (iii) honey;
 - (iv) spices.

Chapter 2 Food standards for specific foods

Part 7 Alcoholic beverages

Standard 2.7.5 Spirits

Section 2.7.5—3

Requirement for food sold as brandy, liqueur or spirit

2.7.5—3 Requirement for food sold as brandy, liqueur or spirit

- (1) A food that is sold as brandy must be brandy.
- (2) A food that is sold as a liqueur must be a liqueur.
- (3) A food that is sold as a spirit must be a spirit and contain at least 37% alcohol by volume.

2.7.5—4 Restriction on use of geographical indications

- (1) A *geographical indication must not be used in relation to a spirit, even where the true origin of the spirit is indicated or the geographical indication is used in translation or accompanied by expressions such as ‘kind’, ‘type’, ‘style’, ‘imitation’ or the like, unless the spirit has been produced in the country, locality or region indicated.
- (2) A spirit lawfully exported under a geographical indication, but bottled other than in the territory, locality or region indicated by the geographical indication must not be sold under that geographical indication:
 - (a) unless the concentration of alcohol by volume in the spirit is at a level permitted under the laws for that geographical indication of the territory, locality or region indicated by that geographical indication; or
 - (b) if any other distinctive quality or characteristic of the spirit is such as to mislead or deceive the public as to the nature of the product identified by the geographical indication.
- (3) In this section:

geographical indication means an indication, whether express or implied:

- (a) which identifies a spirit as originating in a particular country, locality or region; and
 - (b) where a given quality, reputation or other characteristic of the spirit is essentially attributable to its origin in that particular country, locality or region.
-

Chapter 2 Food standards for specific foods

Part 8 Sugar and honey

Standard 2.8.1 Sugar and sugar products

Section 2.8.1—1

Name

Part 8 Sugar and honey

Standard 2.8.1 Sugar and sugar products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 The term ‘sugars’ is used, with different meaning, throughout the Code.

2.8.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.8.1 — Sugars and honey*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.8.1—2 Definitions

Note In this Code (see sections 1.1.2—2 and 1.1.2—3):

icing means a mixture of sugar and other foods for use as a coating and includes frosting, plastic icing and icing gel.

sugar means, unless otherwise expressly stated, any of the following:

- (a) white sugar;
- (b) caster sugar;
- (c) icing sugar;
- (d) loaf sugar;
- (e) coffee sugar;
- (f) raw sugar.

white sugar means purified crystallised sucrose.

2.8.1—3 Requirement for food sold as white sugar

A food that is sold as ‘white sugar’ must:

- (a) be white sugar; and
- (b) have no less than 99.7% sucrose content, calculated on a dry basis.

2.8.1—4 Requirement for food sold as icing

A food that is sold as ‘icing’ must be icing.

Chapter 2 Food standards for specific foods

Part 8 Sugar and honey

Standard 2.8.2 Honey

Section 2.8.2—1

Name

Standard 2.8.2 Honey

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.8.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.8.2 — Honey*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.8.2—2 Definitions

Note In this Code (see section 1.1.2—3):

honey means the natural sweet substance produced by honey bees from the nectar of blossoms or from secretions of living parts of plants or excretions of plant sucking insects on the living parts of plants, which honey bees collect, transform and combine with specific substances of their own, store and leave in the honey comb to ripen and mature.

2.8.2—3 Requirement for food sold as honey

A food that is sold as ‘honey’ must:

- (a) be honey; and
- (b) contain:
 - (i) no less than 60% reducing sugars; and
 - (ii) no more than 21% moisture.

2.8.2—4 Prescribed name

‘Honey’ is a *prescribed name.

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.9.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.1—Infant formula products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.9.1—2 Outline of Standard

- (1) This Standard regulates various types of infant formula products.
- (2) Division 1 deals with preliminary matters.
- (3) Division 2 sets out general compositional requirements for infant formula products.
- (4) Division 3 sets out compositional requirements for infant formula and follow-on formula.
- (5) Division 4 sets out compositional requirements for infant formula products for special dietary use.
- (6) Division 5 sets out labelling and packaging requirements for infant formula products.
- (7) Division 6 sets out guidelines for infant formula products. The guidelines are not legally binding.

2.9.1—3 Definitions

Note In this Code (see sections 1.1.2—2 and 1.1.2—3):

follow-on formula means an infant formula product that:

- (a) is represented as either a breast-milk substitute or replacement for infant formula; and
- (b) is suitable to constitute the principal liquid source of nourishment in a progressively diversified diet for infants from the age of 6 months.

infant formula means an infant formula product that:

- (a) is represented as a breast-milk substitute for infants; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—4

Interpretation

- (b) satisfies by itself the nutritional requirements of infants under the age of 4 to 6 months.

infant formula product means a product based on milk or other edible food constituents of animal or plant origin which is nutritionally adequate to serve by itself either as the sole or principal liquid source of nourishment for infants, depending on the age of the infant.

medium chain triglycerides means triacylglycerols that contain predominantly the saturated fatty acids designated by 8:0 and 10:0.

pre-term formula means an infant formula product specifically formulated to satisfy particular needs of infants born prematurely or of low birthweight.

protein substitute means:

- (a) L-amino acids; or
- (b) the hydrolysate of one or more of the proteins on which infant formula product is normally based; or
- (c) a combination of L-amino acids and the hydrolysate of one or more of the proteins on which infant formula product is normally based.

soy-based formula means an infant formula product in which soy protein isolate is the sole source of protein.

2.9.1—4 Interpretation

Interpretation of compositional requirements

(1) Compositional requirements in this Standard apply to:

- (a) a powdered or concentrated form of infant formula product that has been reconstituted with water according to directions; or
- (b) an infant formula product in 'ready to drink' form.

Calculation of energy, protein and potential renal solute load

(2) In this Standard:

- (a) energy must be calculated in accordance with section S29—2; and
- (b) protein content must be calculated in accordance with the equation set out in section S29—3; and
- (c) potential renal solute load must be calculated in accordance with section S29—4.

Division 2 General compositional requirements for infant formula products

2.9.1—5 Use of substances as nutritive substances

Use of nutritive substances

(1) A substance listed in column 1 of the table to section S29—5 may be *used as a nutritive substance in an infant formula product only if:

- (a) it is in a permitted form listed in column 2 of the table; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—6

Addition of lactic acid producing microorganisms

- (b) the amount of the substance in the product (including any naturally-occurring amount) is no more than the corresponding amount listed in column 4 of the table.

Labelling of nutritive substances

- (2) For the labelling provisions, a label may include words or other indications to the effect that the product contains a substance that is listed in Column 1 or column 2 of the table to section S29—5 only if the amount of the substance in the product (including any naturally-occurring amount) is at least the corresponding amount listed in column 3 of that table.

Note The labelling provisions are set out in Standard 1.2.1.

2.9.1—6 Addition of lactic acid producing microorganisms

L(+) lactic acid producing microorganisms may be added to infant formula product.

2.9.1—7 Permitted quantities of added inulin-type fructans and galacto-oligosaccharides

If an inulin-type fructan or a galacto-oligosaccharide is added to an infant formula product, the product must contain (taking into account both the naturally-occurring and added substances) no more than:

- (a) if only *inulin-type fructans are added—110 mg/100 kJ of inulin-type fructans; or
- (b) if only *galacto-oligosaccharides are added—290 mg/100 kJ of galacto-oligosaccharides; or
- (c) if both inulin-type fructans and galacto-oligosaccharides are added:
 - (i) no more than 110 mg/100 kJ of inulin-type fructans; and
 - (ii) no more than 290 mg/100 kJ of combined inulin-type fructans and galacto-oligosaccharides.

2.9.1—8 Restriction on levels of other substances in infant formula product

Infant formula product must not contain:

- (a) detectable gluten; or
- (b) more than 3.8 mg/100 kJ of nucleotide-5'-monophosphates; or
- (c) more than the following amounts of aluminium:
 - (i) for a pre-term formula—0.02 mg/100 mL;
 - (ii) for a soy-based formula—0.1 mg/100 mL;
 - (iii) otherwise—0.05 mg/100 mL.

Note Standard 1.4.1 contains the maximum level (ML) of lead contaminant in infant formula products.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—9

Infant formula and follow-on formula—composition

Division 3

Infant formula and follow-on formula

2.9.1—9 Infant formula and follow-on formula—composition

(1) Infant formula must have:

- (a) an energy content of no less than 2500 kJ/L and no more than 3150 kJ/L; and
- (b) a protein content of no less than 0.45 g/100 kJ and no more than 0.7 g/100 kJ; and
- (c) a fat content of no less than 1.05 g/100 kJ and no more than 1.5 g/100 kJ.

(2) Follow-on formula must have:

- (a) an energy content of no less than 2500 kJ/L and no more than 3550 kJ/L; and
- (b) a protein content of no less than 0.45 g/100 kJ and no more than 1.3 g/100 kJ; and
- (c) a fat content of no less than 1.05 g/100 kJ and no more than 1.5 g/100 kJ; and
- (d) a potential renal solute load value of no more than 8 mOsm/100 kJ.

2.9.1—10 Infant formula and follow-on formula—protein—further requirements

- (1) The L-amino acids listed in the table to section S29—6 must be present in infant formula and follow-on formula at a level no less than the corresponding minimum level specified in the table.
- (2) Despite subsection (1), L-amino acids listed in the table to section S29—6 may be added to infant formula or follow-on formula only in an amount necessary to improve protein quality.

2.9.1—11 Infant formula and follow-on formula—fat—further requirements

(1) The fats in infant formula and follow-on formula:

- (a) may contain *medium chain triglycerides only if the medium chain triglyceride is present as the result of its being:
 - (i) a natural constituent of a milk-based ingredient of that formula; or
 - (ii) for a fat soluble vitamin that is specified in the table to section S29—8—a substance that was *used as a processing aid in the preparation of that permitted fat soluble vitamin for use in the formula; and
- (b) must have a ratio of linoleic acid to α -linolenic acid of no less than 5 to 1 and no more than 15 to 1; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—12

Infant formula and follow-on formula—vitamins, minerals and electrolytes—further requirements

- (c) must have a ratio of total long chain omega 6 series fatty acids ($C \geq 20$) to total long chain omega 3 series fatty acids ($C \geq 20$) that is not less than 1 in an infant formula or follow-on formula which contains those fatty acids; and
- (d) for any long chain *polyunsaturated fatty acids that are present—must have an eicosapentaenoic acid (20:5 n-3) content of no more than the docosahexaenoic acid (22:6 n-3) content; and
- (e) for a fatty acid that is listed in the table to section S29—8—must comply with the limits (if any) specified in the table.

2.9.1—12 Infant formula and follow-on formula—vitamins, minerals and electrolytes—further requirements

- (1) Infant formula and follow-on formula must contain the vitamins, minerals and electrolytes specified in column 1 of the table to section S29—9 in an amount that is:
 - (a) no less than the minimum amount specified in column 2 of the table; and
 - (b) no more than the maximum amount (if any) specified in column 3 of the table.
- (2) Any vitamins, minerals or electrolytes that are used as nutritive substances must be in a permitted form as listed in the table to section S29—7.
- (3) Infant formula and follow-on formula must contain no less than 0.5 mg of Vitamin E/g of polyunsaturated fatty acids.
- (4) The ratio of calcium to phosphorus in infant formula and follow-on formula must be no less than 1.2 to 1 and no more than 2 to 1.
- (5) The ratio of zinc to copper must be:
 - (a) for infant formula—no more than 15 to 1; and
 - (b) for follow-on formula—no more than 20 to 1.

Division 4 Infant formula products for special dietary use

2.9.1—13 Products formulated for premature or low birthweight infants

- (1) A compositional requirement of this Standard does not apply to the extent that it would prevent the sale of an infant formula product that has been specifically formulated for premature or low birthweight infants.
- (2) If an infant formula product would not comply with this Standard apart from this section, then for the labelling provisions:
 - (a) the following *warning statement is required: ‘Suitable only for pre-term infants under specialist medical supervision’; and
 - (b) the name of food must include the words ‘pre-term’.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—14

Products for metabolic, immunological, renal, hepatic and malabsorptive conditions

2.9.1—14 Products for metabolic, immunological, renal, hepatic and malabsorptive conditions

- (1) A compositional requirement of this Standard does not apply to the extent that it would prevent the sale of an infant formula product that is specifically formulated to satisfy particular metabolic, immunological, renal, hepatic or malabsorptive conditions.
- (2) If:
 - (a) an infant formula product would not comply with this Standard apart from this section; and
 - (b) the label contains a statement that the infant formula product is suitable for infants with metabolic, immunological, renal, hepatic or malabsorptive conditions;

then for the labelling provisions, a statement indicating the following is required:

- (c) that the product is not suitable for general use and should be used under medical supervision; and
- (d) the condition, disease or disorder for which the product has been specially formulated; and
- (e) the nutritional modifications, if any, which have been made to the product.

Note The labelling provisions are set out in Standard 1.2.1.

Special requirements for food represented as lactose free and low lactose formulas

- (3) A compositional or labelling requirement of this Standard, other than a requirement that relates to lactose content, applies to an infant formula product that is represented as lactose free formula or low lactose formula.
- (4) If the formula is represented as lactose free, it must contain no detectable lactose.
- (5) If the formula is represented as low lactose, it must contain no more than 0.3 g lactose/100 mL of infant formula product.
- (6) For the labelling provisions, if a label contains a claim that the infant formula product is lactose free, low lactose or words of similar import:
 - (a) the name of food must include the following:
 - (i) for a formula represented as lactose free—the words ‘lactose free’; and
 - (ii) for a formula represented as low lactose—the words ‘low lactose’; and
 - (b) the following statements are required:
 - (i) the amount of lactose expressed in g/100 mL; and
 - (ii) the amount of galactose expressed in g/100 mL.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—15

Products for specific dietary use based on a protein substitute

2.9.1—15 Products for specific dietary use based on a protein substitute

- (1) The protein content of an infant formula product based on a *protein substitute may be in the form of a protein substitute.
- (2) Such infant formula product must:
 - (a) have an energy content of:
 - (i) for an infant formula—no less than 2 500 kJ/L and no more than 3 150 kJ/L; and
 - (ii) for a follow-on formula—no less than 2 500 kJ/L and no more than 3 550 kJ/L; and
 - (b) have a potential renal solute load of no more than 8 mOsm/100 kJ; and
 - (c) have a protein content of no less than 0.45 g/100 kJ and no more than 1.4 g/100 kJ; and
 - (d) have a fat content of no less than 0.93 g/100 kJ and no more than 1.5 g/100 kJ; and
 - (e) contain:
 - (i) chromium in an amount of no less than 0.35 µg/100 kJ and no more than 2.0 µg/100 kJ; and
 - (ii) molybdenum in an amount of no less than 0.36 µg/100 kJ and no more than 3.0 µg/100 kJ.
- (3) Section 2.9.1—10 applies to such infant formula product as if it were infant formula.
- (4) Such infant formula product may contain added medium chain triglycerides.

Division 5 Labelling and packaging requirements

2.9.1—16 Representations about food as an infant formula product

A food may only be represented as an infant formula product if it complies with this Standard.

2.9.1—17 Prescribed names

The following are *prescribed names:

- (a) 'Infant formula'; and
- (b) 'Follow-on formula'.

2.9.1—18 Requirement for measuring scoop

- (1) A package of infant formula product in a powdered form must contain a scoop to enable the use of the infant formula product in accordance with the directions contained in the label on the package.
- (2) Subsection (1) does not apply to single serve sachets, or packages containing single serve sachets, of an infant formula product in a powdered form.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—19

Requirement for warning statements and directions

2.9.1—19 Requirement for warning statements and directions

- (1) For the labelling provisions, the following *warning statements are required:
- (a) for infant formula product in powdered form—‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not change proportions of powder except on medical advice. Incorrect preparation can make your baby very ill’;
 - (b) for concentrated infant formula product—‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not change proportions of concentrate except on medical advice. Incorrect preparation can make your baby very ill’;
 - (c) for ready-to-drink infant formula product—‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not dilute or add anything to this ‘ready to drink’ formula except on medical advice. Incorrect preparation can make your baby very ill’;
 - (d) subject to subsection (2), a heading that states ‘Important Notice’ (or words to that effect), with under it the *warning statement—‘Breast milk is best for babies. Before you decide to use this product, consult your doctor or health worker for advice’.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) Paragraph (1)(d) does not apply to infant formula products for metabolic, immunological, renal, hepatic or malabsorptive conditions.
- (3) For the labelling provisions, directions (in words and pictures) for the preparation and use of the infant formula product are required, which instruct that:
- (a) each bottle should be prepared individually; and
 - (b) if a bottle of made up formula is to be stored prior to use, it must be refrigerated and used within 24 hours; and
 - (c) potable, previously boiled water should be used; and
 - (d) if a package contains a measuring scoop—only the enclosed scoop should be used; and
 - (e) formula left in the bottle after a feed must be discarded.

Note The labelling provisions are set out in Standard 1.2.1.

- (4) For the labelling provisions, the required statements are ones indicating that:
- (a) for infant formula—the infant formula product may be used from birth; and
 - (b) for follow-on formula—the infant formula product should not be used for infants aged under the age of 6 months; and
 - (c) subject to subsection (5), it is recommended that infants from the age of 6 months should be offered foods in addition to the infant formula product.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—20

Print size

- (5) Paragraph (4)(c) does not apply to packages of pre-term formula.

2.9.1—20 Print size

The statements required by subsections 2.9.1—19(1) and 2.9.1—13(2) must be in a *size of type of at least:

- (a) if the package of infant formula product has a net weight of more than 500 g—3 mm;
- (b) if the package of infant formula product has net weight of 500 g or less—1.5 mm.

2.9.1—21 Declaration of nutrition information

- (1) For the labelling provisions, a statement of the following nutrition information is required:

- (a) for 'ready to drink' infant formula product, and for powdered or concentrated infant formula product:
 - (i) the *average energy content expressed in kJ/100 mL; and
 - (ii) the average amount of protein, fat and *carbohydrate expressed in g/100 mL; and
 - (iii) the average amount of each vitamin or mineral and any other substance *used as a nutritive substance permitted by this Standard expressed in weight/100 mL (including any naturally-occurring amount); and
 - (iv) if added, the average amount of the following, expressed in weight/100 mL:
 - (A) inulin-type fructans; or
 - (B) galacto-oligosaccharides; or
 - (C) a combination of *inulin-type fructans and galacto-oligosaccharides; and
- (b) for a powdered or concentrated form of infant formula product, additionally, a declaration of:
 - (i) the proportion of powder or concentrate required to reconstitute the formula according to directions; and
 - (ii) for powdered infant formula product—the weight of one scoop.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) For a powdered or concentrated form of infant formula product, the information mentioned in subsection (1) must be expressed in terms of the product as reconstituted according to directions on the package.

- (3) The information required by this section may be expressed in the form of a table.

Note For an example of how the nutrition information may be presented, see the guidelines set out in section S29—10.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—22

Date marking and storage instructions

2.9.1—22 Date marking and storage instructions

- (1) Infant formula product that complies with this Standard does not need to be date marked in accordance with subsection 1.2.5—3(2).
- (2) For the labelling provisions, the storage instructions must cover the period after the package is opened.

Note The labelling provisions are set out in Standard 1.2.1.

2.9.1—23 Statements of protein source and dental fluorosis

- (1) For the labelling provisions, the required statements are:
 - (a) a statement of the specific source, or sources, of protein in the product, immediately adjacent to the name of the product; and
 - (b) if the infant formula product is one to which subsection (2) applies:
 - (i) a statement to the effect that consumption of the formula has the potential to cause dental fluorosis; and
 - (ii) a statement recommending that the risk of dental fluorosis should be discussed with a medical practitioner or other health professional.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) This subsection applies to an infant formula product that contains:
 - (a) for a powdered or concentrated infant formula product—more than 17 µg of fluoride/100 kJ prior to reconstitution; or
 - (b) for a ready-to-drink formula—more than 0.15 mg of fluoride/100 mL.

2.9.1—24 Prohibited representations

- (1) The label on a package of infant formula product must not contain:
 - (a) a picture of an infant; or
 - (b) a picture that idealises the use of infant formula product; or
 - (c) the word ‘humanised’ or ‘maternalised’ or any word or words having the same or similar effect; or
 - (d) words claiming that the formula is suitable for all infants; or
 - (e) information relating to the nutritional content of human milk; or
 - (f) subject to subsection 2.9.1—14(2), a reference to the presence of any nutrient or substance that may be used as a nutritive substance, except for a reference in:
 - (i) a statement relating to lactose under subsection 2.9.1—14(6); or
 - (ii) a statement of ingredients; or
 - (iii) a declaration of nutrition information under section 2.9.1—21; or
 - (g) subject to Division 4, a representation that the food is suitable for a particular condition, disease or disorder.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.1 Infant formula products

Section 2.9.1—25

Guidelines for infant formula product

- (2) Subject to subsection 2.9.1—14(2), the label on a package of infant formula product must not contain a reference to *inulin-type fructans or *galacto-oligosaccharides except for a reference in:
- (a) a statement of ingredients; or
 - (b) a declaration of nutrition information under section 2.9.1—21.

Division 6 Guidelines

2.9.1—25 Guidelines for infant formula product

Guidelines for infant formula product are set out in section S29—10.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.2 Food for infants

Section 2.9.2—1

Name

Standard 2.9.2 Food for infants

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.9.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.2 — Food for infants*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.9.2—2 Definitions

Note In this Code (see section 1.1.2—3):

cereal-based food for infants means a food for infants, not including a beverage, that is based on cereal.

food for infants:

- (a) means a food that is intended or represented for use as a source of nourishment for infants; and
- (b) does not include:
 - (i) infant formula products; or
 - (ii) formulated meal replacements; or
 - (iii) formulated supplementary foods; or
 - (iv) unprocessed fruit and vegetables.

fruit-based food means food that is based on fruit.

2.9.2—3 Food for infants—general compositional requirements

(1) Food for infants must not contain:

- (a) for a cereal-based food for infants—more than 50 mg/100 g of total iron on a moisture free basis; or
- (b) honey, unless it has been treated to inactivate *Clostridium botulinum* spores; or
- (c) more than the following amounts of sodium:
 - (i) for rusks—350 mg/100 g;
 - (ii) for biscuits—300 mg/100 g;
 - (iii) for any of the following—100 mg/100 g:
 - (A) flours and pasta;

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.2 Food for infants

Section 2.9.2—4

Additional compositional requirements for cereal-based food for infants from the age of 6 months

- (B) ready-to-eat foods for infants (including cereal-based foods for infants other than rusks and biscuits);
 - (C) fruit drink, vegetable juice and ready-to-eat fruit-based foods; or
 - (d) for fruit drink, vegetable juice or a ready-to-eat fruit-based food—added salt; or
 - (e) for fruit drink, vegetable juice or a non-alcoholic beverage—a total monosaccharide and disaccharide content of more than 4 g/100 g.
- (2) If *inulin-type fructans or *galacto-oligosaccharides are added to food for infants, the total amount of those substances in the food (including the amount added and the amount naturally occurring) must not be greater than 0.8 g/100 g, based on the product as consumed.
- (3) Food for infants may contain lactic acid producing microorganisms.
- (4) If food for infants is intended for infants under the age of 6 months, it must be formulated and manufactured to a consistency that minimises the risk of choking.

2.9.2—4 Additional compositional requirements for cereal-based food for infants from the age of 6 months

- (1) This section applies to cereal-based food for infants that:
- (a) contains more than 70% cereal, on a moisture free basis; and
 - (b) is promoted as suitable for infants from the age of 6 months.
- (2) The food must contain at least 20 mg/100 g of iron on a moisture free basis.
- (3) The food may contain:
- (a) added iron in the following forms:
 - (i) electrolytic iron; or
 - (ii) reduced iron; or
 - (iii) the forms permitted in the table to section S29—7; and
 - (b) added thiamin, niacin, vitamin B₆, vitamin C, folate, magnesium in permitted forms set out in the table to section S29—7; and
 - (c) added vitamin C to a maximum level of 90 mg/100 g on a moisture free basis.

2.9.2—5 Additional compositional requirements for cereal-based food for infants from the age of 4 months

- (1) This section applies to cereal-based food for infants that:
- (a) contains more than 70% cereal, on a moisture free basis; and
 - (b) is promoted as suitable for infants from the age of 4 months.
- (2) The food may contain:
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.2 Food for infants

Section 2.9.2—6

Additional compositional requirements for non-cereal-based food for infants

- (a) added iron in the following forms:
 - (i) electrolytic iron; or
 - (ii) reduced iron; or
 - (iii) the forms permitted in the table to section S29—7; and
- (b) added vitamin C in the forms permitted in the table to section S29—7 to a maximum amount of 90 mg/100 g on a moisture free basis.

2.9.2—6 Additional compositional requirements for non-cereal-based food for infants

- (1) This section applies to food for infants other than cereal-based food for infants.
- (2) If the food is vegetable juice, fruit drink or fruit gel, it must contain no less than 25 mg/100 g of vitamin C.
- (3) If the food is a fruit-based food, it may contain vitamin C or folate or both in the permitted forms set out in the table to section S29—7.

2.9.2—7 Labelling

- (1) This section does not apply to packaged water.
- (2) The label on a package of food for infants must not include a recommendation, whether express or implied, that the food is suitable for infants under the age of 4 months.
- (3) For the labelling provisions, the required information relating to composition is:
 - (a) a statement indicating the consistency of the food; and
 - (b) a statement indicating the minimum age, expressed in numbers, of the infants for whom the food is recommended; and
 - (c) if the food is recommended for infants under the age of 6 months—in association with the statement required by paragraph (b), the *warning statement ‘Not recommended for infants under the age of 4 months’; and
 - (d) if the monosaccharide and disaccharide content of added sugars and honey is more than 4 g/100 g—the word ‘sweetened’; and
 - (e) if honey has been used as an ingredient—in association with the word ‘honey’, the word ‘sterilised’.

Note The labelling provisions are set out in Standard 1.2.1.

2.9.2—8 Additional labelling requirements relating to specific nutrients and energy information

- (1) For the labelling provisions, the required information relating to composition is:
 - (a) if a reference is made in the label (including in the name of the food) to milk, eggs, cheese, fish, meat (including poultry), nuts or legumes—the percentage of that ingredient in the food for sale; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.2 Food for infants

Section 2.9.2—9

Prohibited representations

- (b) if the food contains more than of 3 g of protein/ 100 kJ—the *warning statement ‘Not suitable for infants under the age of 6 months’.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) A claim must not be made that a food for infants is a source of protein unless at least 12% of the *average energy content of the food is derived from protein.

2.9.2—9 Prohibited representations

- (1) A food must not be represented as being the sole or principal source of nutrition for infants.
- (2) The label on a package of food for infants must not include a recommendation that the food can be added to bottle feeds of an infant formula product.

2.9.2—10 Claims about vitamins and minerals

- (1) A claim must not be made in relation to food for infants comparing the vitamin or mineral content of the food with that of any other food unless such a claim is expressly permitted elsewhere in this Standard.
- (2) A claim as to the presence of a vitamin or mineral in a food for infants may be made if the food contains in a normal serving at least 10% *RDI or *ESADDI, as appropriate, for that vitamin or mineral.

Note The RDIs and ESSADIs for vitamins and minerals are set out in Schedule 1.

- (3) A claim that food for infants is a good source of a vitamin or mineral may be made if a *reference quantity of the food contains at least 25% *RDI or *ESADDI, as appropriate, for that vitamin or mineral.

Note The RDIs and ESSADIs for vitamins and minerals are set out in Schedule 1.

- (4) A claim must not be made in relation to a fruit-based food for infants that the food contains more than:
- (a) 60 mg/100 g of vitamin C; or
 - (b) 150 µg/100 g of folate.
- (5) If a vitamin or mineral has been *used as a nutritive substance in a cereal-based food for infants, a claim must not be made that a normal serving of the food contains that vitamin or mineral in an amount greater than that specified in relation to that vitamin or mineral in the table to section S29—11.

2.9.2—11 Nutrition information

- (1) Food for infants need not comply with:
- (a) the requirement to include the *average quantity of saturated fat on a nutrition information panel (subparagraph 1.2.8—6(1)(d)(ii)); or
 - (b) subsections 1.2.8—6(3), 1.2.8—6(5) or 1.2.8—7(1); or
 - (c) sections 1.2.8—8, 1.2.8—11 or 1.2.8—14.
- (2) Food for infants need not comply with the requirement in Standard 1.2.7 to indicate the potassium content of a food in the nutrition information panel.
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.2 Food for infants

Section 2.9.2—12

Food in dehydrated or concentrated form

- (3) The nutrition information panel for food for infants must be set out in the format set out in section S12—6.

2.9.2—12 Food in dehydrated or concentrated form

- (1) This section applies to food for infants that is in dehydrated or concentrated form.
- (2) For the labelling provisions, directions are required for how the food should be reconstituted.

Note The labelling provisions are set out in Standard 1.2.1.

- (3) The particulars set out in each column of the nutrition information panel must be expressed as a proportion of the food as reconstituted according to those directions.
- (4) If more than one fluid for preparing the food is nominated in the label:
 - (a) the particulars set out in the column should be adjusted according to the first liquid nominated; and
 - (b) the name of this liquid must be included in the nutrition information panel.

2.9.2—13 Storage requirements

For the labelling provisions, the storage instructions must cover the period after the package is opened.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Section 2.9.3—1

Name

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.9.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.3 — Formulated meal replacements and formulated supplementary foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.9.3—2 Definitions

Note In this Code (see sections 1.1.2—2 and 1.1.2—3):

servicing means an amount of the food which constitutes one normal serving when prepared according to manufacturer's directions or when the food requires no further preparation before consumption, and in the case of a formulated meal replacement is equivalent to one meal.

formulated meal replacement means a food for sale or a prepackaged selection of food for sale that:

- (a) has been specifically formulated as a replacement for one or more meals of the day, but not as a total diet replacement; and
- (b) is represented as a formulated meal replacement.

formulated supplementary food means a food specifically formulated as, and sold on the basis that it is, a supplement to a normal diet to address situations where intakes of energy and nutrients may not be adequate to meet an individual's requirements.

formulated supplementary food for young children means a formulated supplementary food for children aged 1 to 3 years.

Note 2 In this Standard, the following term is defined: *claimable vitamin or mineral*.

Division 2 Formulated meal replacements

2.9.3—3 Compositional requirements for formulated meal replacements

(1) A formulated meal replacement must contain in a serving no less than:

- (a) 12 g protein; and
- (b) 850 kJ; and
- (c) 25% *RDI of each vitamin and mineral listed in column 1 of the table to section S29—12.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Section 2.9.3—4

Labelling of formulated meal replacements

- (2) A vitamin or mineral may be *used as a nutritive substance in a formulated meal replacement if:
- (a) the vitamin or mineral is listed in column 1 of:
 - (i) the table to section S29—12; or
 - (ii) the table to section S29—13; and
 - (b) the total of the naturally occurring and added vitamin or mineral in a serving is not greater than the amount, if any, specified in relation to that vitamin or mineral in column 2 of the relevant table; and
 - (c) the vitamin or mineral is in a permitted form specified in:
 - (i) section S17—2 or S17—3; or
 - (ii) section S29—17; or
 - (iii) for vitamin K—section S29—7.

2.9.3—4 Labelling of formulated meal replacements

- (1) The nutrition information panel on the label on a package of formulated meal replacement must include a declaration of the average quantities of the vitamins and minerals that:
- (a) in the case of vitamins and minerals listed in the table in section S29—12—are present in the food; and
 - (b) in the case of vitamins and minerals listed in the table in section S29—13—have been *used as a nutritive substance in the food.
- (2) A claim as to the presence in a formulated meal replacement of a vitamin or mineral listed in the table to section S29—12 or S29—13 may be made on the label on a package of formulated meal replacement only if:
- (a) no less than 10% *RDI or *ESADDI of that vitamin or mineral is present in a serving of the food; and
 - (b) for a vitamin or mineral that has been *used as a nutritive substance in the food—the claimed amount of that vitamin or mineral in a serving is no more than the amount set out in column 3 of the relevant table to section S29—12 or S29—13.
- Note* If such a claim is made, subparagraph 1.2.8—6(1)(d)(iv) might be relevant.
- (3) A claim that a formulated meal replacement is a good source of a vitamin or mineral may be made if:
- (a) the vitamin or mineral is listed in column 1 of the table to section S29—12 or S29—13; and
 - (b) a serving of the food contains at least 25% *RDI or *ESADDI of that vitamin or mineral; and
 - (c) where the vitamin or mineral has been *used as a nutritive substance in the food, the claimed amount of that vitamin or mineral in a serving is no more than the amount set out in column 3 of the table to section S29—12 or S29—13.
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Section 2.9.3—5

Compositional requirements for formulated supplementary foods

- (4) 'Formulated meal replacement' is a *prescribed name.
- (5) For the labelling provisions, the required statement is words to the effect that the product must not be used as a total diet replacement.

Note The labelling provisions are set out in Standard 1.2.1.

Division 3 Formulated supplementary foods

2.9.3—5 Compositional requirements for formulated supplementary foods

- (1) A formulated supplementary food must contain in a serving no less than:
 - (a) 8 g protein; and
 - (b) 550 kJ; and
 - (c) 20% *RDI of at least 1 vitamin or mineral listed in column 1 of the table to S29—14.
- (2) A vitamin or mineral may be *used as a nutritive substance in a formulated supplementary food if:
 - (a) the vitamin or mineral is listed in column 1 of the table to S29—14; and
 - (b) the total of the naturally occurring and added amount of each vitamin or mineral in a serving is not more than the amount, if any, set out in relation to that vitamin or mineral in column 2 of the table; and
 - (c) the vitamin or mineral is in a permitted form specified in the table in section S17—2 or S17—3.

2.9.3—6 Labelling of formulated supplementary foods

- (1) The nutrition information panel on the label on a package of formulated supplementary food must include a declaration of the average quantities of any vitamin or mineral that:
 - (a) is listed in column 1 of the table to S29—14; and
 - (b) is present in the food.
- (2) A claim as to the presence in a formulated supplementary food of a vitamin or mineral listed in section S17—2, S17—3 or S29—14 may be made on the label on a package of formulated supplementary food if:
 - (a) no less than 10%* RDI or *ESADDI, as appropriate, of the vitamin or mineral listed in column 1 of the table to section S29—14 is in a serving of the food; and
 - (b) for a vitamin or mineral that has been *used as a nutritive substance in the food, the claimed amount in a serving of the food is no more than the amount set out in column 3 of the table.
- (3) A claim that a formulated supplementary food is a good source of a vitamin or mineral may be made if:
 - (a) the vitamin or mineral is listed in section S17—2, S17—3 or S29—14; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Section 2.9.3—7

Compositional requirements for formulated supplementary foods for young children

- (b) a serving of the food contains at least 25% *RDI or *ESADDI of that vitamin or mineral; and
 - (c) where the vitamin or mineral has been *used as a nutritive substance in the food, the claimed amount of that vitamin or mineral in a serving is no more than the amount set out in column 3 of the table to section S29—14.
- (4) For the labelling provisions, the required statement is a description of the role of the food as a supplement to a normal diet to address situations where intakes of energy and nutrients may not be adequate to meet an individual's requirements.
- Note* The labelling provisions are set out in Standard 1.2.1.
- (5) 'Formulated supplementary food' is a *prescribed name.

Division 4 Formulated supplementary foods for young children

2.9.3—7 Compositional requirements for formulated supplementary foods for young children

- (1) A formulated supplementary food for young children must contain in a serving no less than:
- (a) 2.5 g protein; and
 - (b) 330 kJ; and
 - (c) 20% *RDI of at least 1 vitamin or mineral listed in column 1 of the table to section S29—15.
- (2) A vitamin or mineral may be *used as a nutritive substance in a formulated supplementary food for young children if:
- (a) the vitamin or mineral is listed in column 1 of the table to section S29—15; and
 - (b) the total of the naturally occurring and added amount of each vitamin or mineral in a serving is not more than the amount, if any, set out in relation to that vitamin or mineral in column 2 of the table; and
 - (c) the vitamin or mineral is in a permitted form specified in the table in section S17—2 or S17—3.
- (3) If *inulin-type fructans or *galacto-oligosaccharides are added to a formulated supplementary food for young children, the total amount of those substances, both added and naturally occurring, must not be more than 1.6 g/serving.
- (4) Lutein may be *used as a nutritive substance in a formulated supplementary food for young children only if:
- (a) the lutein is derived from *Tagetes erecta L.*; and
 - (b) the total amount of lutein, both added and naturally occurring, is not more than 100 µg/serving.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.3 Formulated meal replacements and formulated supplementary foods

Section 2.9.3—8

Labelling of formulated supplementary foods for young children

2.9.3—8 Labelling of formulated supplementary foods for young children

- (1) The nutrition information panel on the label on a package of formulated supplementary foods for young children must include a declaration of the *average quantity of any vitamin or mineral that:
 - (a) is listed in column 1 of the table to section S29—15; and
 - (b) is *used as a nutritive substance in the food.
 - (2) A claim as to the presence in a formulated supplementary food for young children of a vitamin or mineral in section S17—2, S17—3 or S29—15 may be made on the label on a package of formulated supplementary food for young children if:
 - (a) no less than 10% *RDI or *ESADDI, as appropriate, of the vitamin or mineral listed in column 1 of the table is present in a serving of the food; and
 - (b) for a vitamin or mineral that has been *used as a nutritive substance in the food, the claimed amount of that vitamin or mineral in a serving of the food is no more than the amount set out in column 3 of the table.
 - (3) A claim that a formulated supplementary food for young children is a good source of a vitamin or mineral may be made if:
 - (a) the vitamin or mineral is a claimable vitamin or mineral; and
 - (b) a serving of the food contains at least 25% *RDI or *ESADDI of that vitamin or mineral; and
 - (c) where the vitamin or mineral has been *used as a nutritive substance in the food, the claimed amount of that vitamin or mineral in a serving is no more than the amount set out in column 3 of the table to section S29—15.
 - (4) For the labelling provisions, the required statement is a description of the role of the food as a supplement to a normal diet to address situations where intakes of energy and nutrients may not be adequate to meet an individual's requirements.

Note The labelling provisions are set out in Standard 1.2.1.
 - (5) 'Formulated supplementary food for young children' is a *prescribed name.
 - (6) The label on a package of formulated supplementary food for young children must not include any words indicating, or any other indication, that the product contains lutein unless the total amount of lutein is no less than 30 µg/serving.
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.4 Formulated supplementary sports foods

Section 2.9.4—1

Name

Standard 2.9.4 Formulated supplementary sports foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.9.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.4 — Formulated supplementary sports foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

Division 2 Formulated supplementary sports foods generally

2.9.4—2 Definitions

Note In this Code (see sections 1.1.2—2 and 1.1.2—3):

formulated supplementary sports food means a product that is specifically formulated to assist sports people in achieving specific nutritional or performance goals.

one-day quantity, in relation to a formulated supplementary sports food, means the amount of that food which is to be consumed in one day in accordance with directions specified in the label.

Note 2 **Average energy content** is calculated using the equation in section S11—2.

2.9.4—3 Composition of formulated supplementary sports foods

(1) Formulated supplementary sports food may contain:

(a) a vitamin or mineral if:

(i) the vitamin or mineral is listed in the table to section S29—16; and

(ii) it is added in a permitted form specified in:

(A) section S17—2 or S17—3; or

(B) section S29—17; and

(iii) the amount of the vitamin or mineral in the food is no more than the amount, if any, specified in column 2 of the table in section S29—16; and

(b) an amino acid that is *used as a nutritive substance, if:

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.4 Formulated supplementary sports foods

Section 2.9.4—4

Labelling information

- (i) the amino acid is listed in the table to section S29—18; and
- (ii) the amount of the amino acid added is no more than the amount specified in column 2 of the table; and
- (c) any other substance that is *used as a nutritive substance, if:
 - (i) the substance is listed in the table to section S29—19; and
 - (ii) the amount of the substance added is no more than the amount specified in relation to that substance in column 2 of the table.
- (2) Formulated supplementary sports food must not contain, in a *one-day quantity, more than:
 - (a) 70 mmol sodium; or
 - (b) 95 mmol potassium.

2.9.4—4 Labelling information

- (1) For the labelling provisions:
 - (a) the required statements are:
 - (i) a statement to the effect that the food is not a sole source of nutrition and should be consumed in conjunction with a nutritious diet; and
 - (ii) a statement to the effect that the food should be used in conjunction with an appropriate physical training or exercise program; and
 - (iii) the *warning statement ‘Not suitable for children under 15 years of age or pregnant women: Should only be used under medical or dietetic supervision’; and
 - (iv) if the food contains added phenylalanine—the warning statement ‘Phenylketonurics: Contains phenylalanine’; and
 - (b) the required information is:
 - (i) directions stating the recommended amount and frequency of intake of the food; and
 - (ii) a statement of the recommended consumption in one day; and
 - (iii) a nutrition information panel.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) ‘Formulated supplementary sports food’ is a *prescribed name.

2.9.4—5 Nutritive substance claims

- (1) This section applies in relation to a package of formulated supplementary sports food if:
 - (a) the label on the package includes a statement referring to the presence of a substance that is *used as a nutritive substance in the food; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.4 Formulated supplementary sports foods

Section 2.9.4—6

Vitamin and mineral claims

- (b) the substance is not a vitamin or a mineral; and
 - (c) the statement is not required by another provision of this Code.
- (2) The label must either:
- (a) state the amount by weight (expressed /100 g food or as a percentage) of the substance, either:
 - (i) immediately after the statement referring to the presence of the substance; or
 - (ii) immediately following the name of the substance in the statement of ingredients; or
 - (b) list, in the nutrition information panel, the substance and the *average quantity by weight of the substance in:
 - (i) a serving of the food; and
 - (ii) a *unit quantity of the food.

2.9.4—6 Vitamin and mineral claims

- (1) The label on a package of formulated supplementary sports food must not claim the presence of a vitamin or mineral unless:
- (a) the reference is required elsewhere in this Code; or
 - (b) the reference is specifically permitted by this section.
- (2) The label on a package of formulated supplementary sports food may claim the presence of a vitamin or mineral in the food only if:
- (a) a serving of the food, or, for a food that requires dilution of reconstitution according to directions, the amount of the food that produces a normal serving, contains at least 10% *RDI for that vitamin or mineral specified in column 3 of the table to section S1—2 or S1—3, as appropriate; or
 - (b) the amount claimed is no more than the amount specified in column 3 of the table to section S29—16 for that vitamin or mineral.

2.9.4—7 Prohibited representations

Unless specific permission is given in Division 3, the label on a package of formulated supplementary sports food must not include an express or implied representation that relates any property or proposed use of the food to enhanced athletic performance or beneficial physiological effects.

Division 3 Particular formulated supplementary sports foods

2.9.4—8 High carbohydrate supplement

- (1) For the labelling provisions, for a package of high carbohydrate supplement, the following statements are required:
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.4 Formulated supplementary sports foods

Section 2.9.4—9

Protein energy supplement

- (a) a statement to the effect that, if used during exercise, the food should be consumed in accordance with directions, to avoid the possibility of gastro-intestinal upset; and
- (b) a statement to the effect that the food must be consumed with an appropriate fluid intake.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) The label on a package of a high carbohydrate supplement may include statements to the effect that:

- (a) the food is useful before, during, or after sustained strenuous exercise; and
- (b) appropriate usage may assist in the provision of energy in the form of carbohydrates.

- (3) In this section:

high carbohydrate supplement means a formulated supplementary sports food for which:

- (a) not less than 90% of the *average energy content of the product is derived from carbohydrate; and
- (b) more than 15% of the product by weight is *carbohydrate when prepared as directed.

2.9.4—9 Protein energy supplement

- (1) For the labelling provisions, for a package of protein energy supplement, a statement to the effect that the food must be consumed with an appropriate fluid intake is required.

Note The labelling provisions are set out in Standard 1.2.1.

- (2) The label on a package of protein energy supplement may include statements to the effect that:

- (a) the product may assist in providing a low-bulk diet as may be required during training; and
- (b) the product may assist in supplementing the diet with a high energy source as may be required during training; and
- (c) usage as directed may assist in the development of muscle bulk; and
- (d) the product is useful before, during, or after sustained strenuous exercise.

- (3) In this section:

protein energy supplement means a formulated supplementary sports food for which:

- (a) not more than 30% and not less than 15% of the *average energy content of the product is derived from protein; and
- (b) not more than 25% of the average energy content of the product is derived from fat; and

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.4 Formulated supplementary sports foods

Section 2.9.4—10

Energy supplement

- (c) not more than 70% of the average energy content of the product is derived from carbohydrate.

2.9.4—10 Energy supplement

- (1) For the labelling provisions, for a package of energy supplement, the following statements are required:
 - (a) a statement to the effect that, if used during exercise, the food should be consumed in accordance with directions, to avoid the possibility of gastro-intestinal upset; and
 - (b) a statement to the effect that the food must be consumed with an appropriate fluid intake; and
 - (c) if more than 30% of the *average energy content of the food is derived from fat—a statement to the effect that the product is a high fat food and should be used for special fat loading strategies rather than everyday use.
- Note* The labelling provisions are set out in Standard 1.2.1.
- (2) The label on a package of energy supplement may include statements to the effect that:
 - (a) the product may assist in supplementing the diet with an energy source as may be required during training; and
 - (b) the product is useful before, during or after sustained strenuous exercise.
 - (3) In this section:

energy supplement means a formulated supplementary sports food for which not more than 20% of the *average energy content of the food is derived from protein.
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—1

Name

Standard 2.9.5 Food for special medical purposes

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Division 1 Preliminary

2.9.5—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.5 — Food for special medical purposes*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.9.5—2 Definitions

Note 1 Section 1.1.2—5 (Definition of *food for special medical purposes*) provides as follows:

(1) In this Code:

food for special medical purposes means a food that is:

- (a) specially formulated for the dietary management of individuals:
 - (i) by way of exclusive or partial feeding, who have special medically determined nutrient requirements or whose capacity is limited or impaired to take, digest, absorb, metabolise or excrete ordinary food or certain nutrients in ordinary food; and
 - (ii) whose dietary management cannot be completely achieved without the use of the food; and
- (b) intended to be used under medical supervision; and
- (c) represented as being:
 - (i) a food for special medical purposes; or
 - (ii) for the dietary management of a disease, disorder or medical condition.

(2) Despite subsection (1), a food is not *food for special medical purposes* if it is:

- (a) formulated and represented as being for the dietary management of obesity or overweight; or
- (b) an infant formula product.

Note 2 In this Code (see section 1.1.2—2):

inner package, in relation to a food for special medical purposes, means an individual package of the food that:

- (a) is contained and sold within another package that is labelled in accordance with section 2.9.5—9; and
- (b) is not designed for individual sale, other than a sale by a responsible institution to a patient or resident of the responsible institution.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—3

Application of other standards

Example An example of an inner package is an individual sachet (or sachets) of a powdered food contained within a box that is fully labelled, being a box available for retail sale.

responsible institution means a hospital, hospice, aged care facility, disability facility, prison, boarding school or similar institution that is responsible for the welfare of its patients or residents and provides food to them.

Note 3 In this Standard (see section 1.1.2—2), a reference to a **package** does not include a reference to a plate, cup, tray or other food container in which food for special medical purposes is served by a responsible institution to a patient or resident of the responsible institution.

2.9.5—3 Application of other standards

The following provisions do not apply to food for special medical purposes:

- (a) Standard 1.2.7 (nutrition, health and related claims) or Standard 1.1A.2 (transitional standard for health claims);
- (b) unless the contrary intention appears, Part 2 of Chapter 1 (labelling and other information requirements);
- (c) Standard 1.3.2 or Standard 1.5.1 (vitamins and minerals, novel foods);
- (d) Standard 2.9.2, Standard 2.9.3 or Standard 2.9.4 (food for infants, formulated meal replacements and formulated supplementary foods, formulated supplementary sports foods).

2.9.5—4 Claims must not be therapeutic in nature

A claim in relation to food for special medical purposes must not:

- (a) refer to the prevention, diagnosis, cure or alleviation of a disease, disorder or condition; or
- (b) compare the food with a good that is:
 - (i) represented in any way to be for therapeutic use; or
 - (ii) likely to be taken to be for therapeutic use, whether because of the way in which the good is presented or for any other reason.

Division 2 Sale of food for special medical purposes

2.9.5—5 Restriction on the persons by whom, and the premises at which, food for special medical purposes may be sold

- (1) A food for special medical purposes must not be sold to a consumer, other than from or by:
 - (a) a medical practitioner or dietitian; or
 - (b) a medical practice, pharmacy or responsible institution; or
 - (c) a majority seller of that food for special medical purposes.
- (2) In this section:

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—6

Permitted forms of particular substances

medical practitioner means a person registered or licensed as a medical practitioner under legislation in Australia or New Zealand, as the case requires, for the registration or licensing of medical practitioners.

majority seller: a person is a *majority seller* of a food for special medical purposes during any 24 month period if:

- (a) during the period, the person sold that food for special medical purposes to medical practitioners, dietitians, medical practices, pharmacies or responsible institutions; and
- (b) the sales mentioned in paragraph (a) represent more than one half of the total amount of that food for special medical purposes sold by the person during the period.

Division 3 Composition

2.9.5—6 Permitted forms of particular substances

- (1) The following substances may be added to food for special medical purposes:
 - (a) a substance that is listed in column 1 of the table to section S29—20 and that is in a corresponding form listed in column 2 of that table;
 - (b) a substance that is listed in column 1 of the table to section S29—7 and that is in a corresponding form listed in column 2 of that table;
 - (c) any other substance, regardless of its form, that is permitted under this Code to be added to a food, if that substance is added in accordance with any applicable requirement of this Code.
- (2) If a provision of this Code limits the amount of a substance referred to in paragraph (1)(a) or (b) that may be added to a food, that limit does not apply in relation to food for special medical purposes.

2.9.5—7 Compositional requirements for food represented as being suitable for use as sole source of nutrition

- (1) If food for special medical purposes is represented as being suitable for use as a sole source of nutrition, the food must contain:
 - (a) not less than the minimum amount, as specified in column 2 of the table to section S29—21, of each vitamin, mineral and electrolyte listed in column 1 of that table; and
 - (b) if applicable, not more than the maximum amount, as specified in column 3 of that table, of each vitamin and mineral listed in column 1.
- (2) However, the food is not required to comply with subsection (1) to the extent that:
 - (a) a variation from a maximum or minimum amount is required for a particular medical purpose; and
 - (b) the labelling complies with subparagraph 2.9.5—10(1)(g)(ii).

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—8

Labelling and related requirements

Division 4

Labelling

2.9.5—8 Labelling and related requirements

- (1) If a food for sale consisting of food for special medical purposes is not in a package:
 - (a) the food for sale must either *bear a label, or have labelling that is displayed in connection with its sale, with the information relating to irradiated foods (see section 1.5.3—9); and
 - (b) there is no other labelling requirement under this Code.
- (2) If the food for sale is in a package, it is required to *bear a label that complies with section 2.9.5—9.
- (3) If the food for sale is in an *inner package:
 - (a) the inner package is required to *bear a label that complies with section 2.9.5—16; and
 - (b) there is no labelling requirement under this Code for any other packaging associated with the food for sale.
- (4) If the food for sale is in a *transportation outer:
 - (a) the transportation outer or package containing the food for sale is required to *bear a label that complies with section 2.9.5—17; and
 - (b) there is no labelling requirement under this Code for any other packaging associated with the food for sale.

2.9.5—9 Mandatory labelling information

- (1) Subject to this section, the label that is required for food for special medical purposes must state the following information in accordance with the provision indicated:
 - (a) a name or description sufficient to indicate the true nature of the food (see section 1.2.2—2);
 - (b) lot identification (see section 1.2.2—3);
 - (c) if the sale of the food for sale is one to which Division 2 or Division 3 of Standard 1.2.1 applies—information relating to irradiated food (see section 1.5.3—9);
 - (d) any required advisory statements, *warning statements and other statements (see section 2.9.5—10);
 - (e) information relating to ingredients (see section 2.9.5—11);
 - (f) date marking information (see section 2.9.5—12);
 - (g) directions for the use or the storage of the food, if the food is of such a nature to require such directions for health or safety reasons;
 - (h) nutrition information (see section 2.9.5—13);

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—10

Advisory and warning statements—food for special medical purposes

- (i) if appropriate, the information required by subsection 2.9.5—14(4) or 2.9.5—15(5).
- (2) The label must comply with Division 6 of Standard 1.2.1.

2.9.5—10 Advisory and warning statements—food for special medical purposes

- (1) For paragraph 2.9.5—9(1)(d), the following statements are required:
 - (a) a statement to the effect that the food must be used under medical supervision;
 - (b) a statement indicating, if applicable, any precautions and contraindications associated with consumption of the food;
 - (c) a statement indicating the medical purpose of the food, which may include a disease, disorder or medical condition for which the food has been formulated;
 - (d) a statement describing the properties or characteristics which make the food appropriate for the medical purpose indicated in paragraph (c);
 - (e) if the food has been formulated for a specific age group—a statement to the effect that the food is intended for persons within the specified age group;
 - (f) a statement indicating whether or not the food is suitable for use as a sole source of nutrition;
 - (g) if the food is represented as being suitable for use as a sole source of nutrition:
 - (i) a statement to the effect that the food is not for parenteral use; and
 - (ii) if the food has been modified to vary from the compositional requirements of section 2.9.5—7 such that the content of one or more nutrients falls short of the prescribed minimum, or exceeds the prescribed maximum (if applicable):
 - (A) a statement indicating the nutrient or nutrients which have been modified; and
 - (B) unless provided in other documentation about the food—a statement indicating whether each modified nutrient has been increased, decreased, or eliminated from the food, as appropriate.
- (2) For paragraph 2.9.5—9(1)(d), the required advisory and other statements are any that are required by:
 - (a) items 1, 4, 6 or 9 of the table in Schedule 9; or
 - (b) subsection 1.2.3—2(2); or
 - (c) section 1.2.3—4.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—11

Information relating to ingredients—food for special medical purposes

- (3) For paragraph 2.9.5—9(1)(d), the *warning statement referred to in section 1.2.3—3, if applicable, is required.

2.9.5—11 Information relating to ingredients—food for special medical purposes

For paragraph 2.9.5—9(1)(e), the information relating to ingredients is:

- (a) a statement of ingredients; or
- (b) information that complies with Article 6, Directive 2000/13/EC of the European Parliament and of the Council of 20 March 2000 on the approximation of the laws of the Member States relating to the labelling, presentation and advertising of foodstuffs; or
- (c) information that complies with 21 CFR § 101.4.

2.9.5—12 Date marking information—food for special medical purposes

- (1) For paragraph 2.9.5—9(1)(f), the required date marking information is date marking information in accordance with Standard 1.2.5.
- (2) Despite subsection (1), for subparagraph 1.2.5—5(2)(a)(ii), the words ‘Expiry Date’, or similar words, may be used on the label.

2.9.5—13 Nutrition information—food for special medical purposes

For paragraph 2.9.5—9(1)(h), the nutrition information is the following, expressed per given amount of the food:

- (a) the minimum or average energy content; and
- (b) the minimum amount or *average quantity of:
 - (i) protein, fat and carbohydrate; and
 - (ii) any vitamin, mineral or electrolyte that has been *used as a nutritive substance in the food; and
 - (iii) any substance listed in the table to section S29—20 that has been *used as a nutritive substance in the food; and
 - (iv) subject to paragraph 2.9.5—9(1)(i), any other substance in respect of which a nutrition content claim has been made.

2.9.5—14 Claims in relation to lactose content

- (1) A claim in relation to the lactose content of a food for special medical purposes must not be made unless expressly permitted by this section.
- (2) A claim to the effect that a food for special medical purposes is lactose free may be made if the food for sale contains no detectable lactose.
- (3) A claim to the effect that a food for special medical purposes is low lactose may be made if the food for sale contains not more than 2 g of lactose per 100 g of the food.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—15

Claims in relation to gluten content

- (4) If a claim in relation to the lactose content of a food for special medical purposes is made, the information required is the *average quantity of the lactose and galactose in the food, expressed per given quantity of the food.

Note See paragraph 2.9.5—9(1)(i).

2.9.5—15 Claims in relation to gluten content

- (1) A claim in relation to the *gluten content of a food for special medical purposes is prohibited unless expressly permitted by this section.
- (2) A claim to the effect that a food for special medical purposes is gluten free may be made if the food contains:
- (a) no detectable gluten; and
 - (b) no oats or oat products; and
 - (c) no cereals containing *gluten that have been malted, or products of such cereals.
- (3) A claim to the effect that a food for special medical purposes has a low gluten content may be made if the food contains no more than 20 mg *gluten per 100 g of the food.
- (4) A claim to the effect that a food for special medical purposes contains *gluten or is high in gluten may be made.
- (5) If a claim is made in relation to the *gluten content of a food for special medical purposes, the information required is the *average quantity of the gluten in the food, expressed per given amount of the food.

Note See paragraph 2.9.5—9(1)(i).

2.9.5—16 Labelling requirement—food for special medical purposes in inner package

- (1) The label on an *inner package that contains food for special medical purposes must state the following information in accordance with the provision indicated:
- (a) a name or description sufficient to indicate the true nature of the food (see section 1.2.2—2);
 - (b) lot identification (see section 1.2.2—3);
 - (c) any declaration that is required by section 1.2.3—4;
 - (d) date marking information (see section 2.9.5—12).
- (2) The label must comply with Division 6 of Standard 1.2.1.
- (3) To avoid doubt, this section continues to apply to the label on the *inner package if a *responsible institution subsequently supplies the inner package to a patient or resident of the responsible institution.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.5 Food for special medical purposes

Section 2.9.5—17

Labelling requirement—food for special medical purposes in transportation outer

2.9.5—17 Labelling requirement—food for special medical purposes in transportation outer

- (1) If packages of food for special medical purposes are contained in a transportation outer, the information specified in subsection (2) must be:
 - (a) contained in a label on the transportation outer; or
 - (b) contained in a label on a package of the food for sale, and clearly discernable through the transportation outer.
 - (2) For subsection (1), the information is:
 - (a) a name or description sufficient to indicate the true nature of the food (see section 1.2.2—2); and
 - (b) lot identification (see section 1.2.2—3); and
 - (c) unless it is provided in accompanying documentation—the name and address of the *supplier (see section 1.2.2—4).
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.6 Transitional standard for special purpose foods (including amino acid modified foods)

Section 2.9.6—1

Name

Standard 2.9.6 Transitional standard for special purpose foods (including amino acid modified foods)

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 3 This Standard incorporates the provisions of regulations 237 and 239A of the former New Zealand *Food Regulations (1984)*, in so far as they relate to special purpose foods and the labelling of amino acid modified foods.

Note 4 This Standard operates solely in relation to food sold or imported into New Zealand.

2.9.6—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.9.6 — Transitional standard for special purpose foods (including amino acid modified foods)*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.9.6—2 Definitions of amino acid modified food and special purpose food

(1) In this Standard:

amino acid modified food means a special purpose food if, in the preparation of the food:

- (a) there is a restriction in the use of ingredients containing one or more particular amino acids; or
- (b) there is a reduction of the content of one or more particular amino acids in any of the ingredients of the food.

special purpose food means a food specially processed or formulated to satisfy particular dietary requirements that exist because of:

- (a) a particular physical or physiological condition; or
- (b) a specific disease or disorder; or
- (c) both such a condition and a disease or disorder;

and are presented as such.

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.6 Transitional standard for special purpose foods (including amino acid modified foods)

Section 2.9.6—3

Application

- (2) Other than in Division 2 of Standard 2.9.3 (Formulated meal replacements), a reference in this Code to a special purpose food is taken to be a reference to formulated meal replacement.

Note The effect of subsection (2) is that additives permitted in formulated meal replacements are permitted in special purpose foods. Subsection (2) exempts special purpose foods from the requirements for minimum levels for protein, kJ; and the minimum and maximum levels for vitamins and minerals. The definition of formulated meal replacements is not intended to be taken literally in relation to special purpose foods. i.e. special purpose foods are not necessarily intended as a meal replacement.

2.9.6—3 Application

- (1) This Standard applies in relation to food produced in, or imported into, New Zealand.
- (2) Despite subsection (1), this Standard does not apply to food produced in, or imported into, Australia.
- (3) This Standard ceases to have effect 2 years after the commencement of any alternative applicable provisions elsewhere in this Code.

Note Standard 2.9.5 regulates amino acid modified foods and other special purpose foods, except for foods formulated and represented as being for the dietary management of obesity or overweight, also known as food for very low energy diets (VLEDs). This Standard will continue to apply to VLEDs until a joint standard is published

2.9.6—4 Composition

A special purpose food may contain any of the vitamins and minerals specified in column 1 of the table to section S29—12 or S29—13.

2.9.6—5 Labelling of special purpose foods

For the labelling provisions, the required information for special purpose foods is a statement of the special purpose of the food.

Note The labelling provisions are set out in Standard 1.2.1.

2.9.6—6 Labelling of amino acid modified foods

For the labelling provisions, the required information for *amino acid modified foods is:

- (a) one or more of the following:
- (i) the words ‘amino acid modified food’;
 - (ii) the name of the amino acid or amino acids that have been restricted;
 - (iii) the name of the disease, or a name describing the condition of the group of people, for which the product is intended;
 - (iv) the words ‘low protein’, where applicable; and
- (b) in the nutrition information panel, a statement of each of the following:
-

Chapter 2 Food standards for specific foods

Part 9 Special purpose foods

Standard 2.9.6 Transitional standard for special purpose foods (including amino acid modified foods)

Section 2.9.6—6

Labelling of amino acid modified foods

- (i) the amount of carbohydrate, protein, and fat in the food, expressed in g;
 - (ii) the energy content of the food, expressed in kJ;
 - (iii) the amount of sodium, and of potassium, in the food, expressed in mg;
 - (iv) the amount of the particular amino acid or protein present in the food, or both, as appropriate for the intended use of the food; and
- (c) in the principal display panel, in 3 mm lettering, the words ‘Take only on medical advice’.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.1 Vinegar and related products

Section 2.10.1—1

Name

Part 10 Standards for other foods

Standard 2.10.1 Vinegar and related products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.10.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.10.1 — Vinegar and related products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.10.1—2 Definitions

Note In this Code (see section 1.1.2—3):

imitation vinegar means a food that is prepared by mixing water and acetic acid.

vinegar means a food that is the sour liquid prepared by acetous fermentation, with or without alcoholic fermentation, of any suitable food, and including blends and mixtures of such liquids.

2.10.1—3 Requirement for food sold as vinegar or imitation vinegar

A food that is sold as ‘imitation vinegar’ or ‘vinegar’ must be imitation vinegar or vinegar, as appropriate, and contain no less than 40 g/kg of acetic acid.

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.2 Salt and salt products

Section 2.10.2—1

Name

Standard 2.10.2 Salt and salt products

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.10.2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.10.2 — Salt and salt products*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.10.2—2 Definitions

Note In this Code (see section 1.1.2—3):

iodised salt or *iodised reduced sodium salt mixture*, means a food that is salt, or a reduced sodium salt mixture, as appropriate, or such a food containing any of the following:

- (a) potassium iodide;
- (b) potassium iodate;
- (c) sodium iodide;
- (d) sodium iodate; and

added in an amount that is equivalent to:

- (e) no less than 25 mg/kg of iodine; and
- (f) no more than 65 mg/kg of iodine.

reduced sodium salt mixture means a food that:

- (a) is prepared from a mixture of sodium chloride and potassium chloride; and
- (b) contains no more than 200 g/kg sodium; and
- (c) contains no more than 400 g/kg potassium.

salt means a food that is the crystalline product consisting predominantly of sodium chloride, that is obtained from the sea, underground rock salt deposits or from natural brine.

salt substitute means a food that:

- (a) is made as a substitute for salt; and
- (b) consists of substances that may be used as food additives in relation to salt substitute in accordance with item 12 of the table to Schedule 15; and
- (c) contains no more than 1.2 g/kg of sodium.

2.10.2—3 Requirement for food sold as salt

A food that is sold as ‘salt’ must be salt and contain:

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.2 Salt and salt products

Section 2.10.2—4

Requirement for food sold as reduced sodium salt mixture

- (a) no less than 970 g/kg sodium chloride on a dry basis, exclusive of permitted additives; and

2.10.2—4 Requirement for food sold as reduced sodium salt mixture

A food that is sold as a reduced sodium salt mixture must be a reduced sodium salt mixture.

2.10.2—5 Requirement for food sold as salt substitute

A food that is sold as a salt substitute must be salt substitute.

2.10.2—6 Requirement for food sold as iodised salt

A food that is sold as ‘iodised’ salt must be iodised salt.

2.10.2—7 Requirement for food sold as iodised reduced sodium salt mixture

A food that is sold as ‘iodised’ reduced sodium salt mixture must be iodised reduced sodium salt mixture.

2.10.2—8 Labelling requirement for reduced sodium salt mixtures and salt substitutes

- (1) For the labelling provisions, the required information is a declaration of the sodium and potassium content, expressed per 100 g.
- (2) The label may include a declaration of the percentage reduction of sodium in the food, relative to salt.
- (3) Such a declaration is not a nutrition content claim or a health claim.

Note The labelling provisions are set out in Standard 1.2.1.

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.3 Chewing gum

Section 2.10.3—1

Name

Standard 2.10.3 Chewing gum

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.10.3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.10.3 — Chewing gum*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.10.3—2 Definition

Note In this Code (see section 1.1.2—2):

releasable calcium, Ca_R , means the amount of calcium, in mg/g of chewing gum, released into the mouth during 20 minutes of chewing that is calculated using the following equation:

$$Ca_R = \frac{(Ca_O \times W_O) - (Ca_C \times W_C)}{W_O}$$

where:

Ca_O is the original calcium concentration in the chewing gum in mg/g of chewing gum.

W_O is the weight of the original chewing gum in g.

Ca_C is the residual calcium in the gum after it has been chewed for 20 minutes in mg/g of chewing gum.

W_C is the weight of the chewed gum in g.

small package means a package with a surface area of less than 100 cm².

2.10.3—3 Addition of calcium to chewing gum

Calcium may be added to chewing gum only if:

- (a) the chewing gum contains no more than 0.2% residual sugars; and
- (b) the calcium is in a permitted form specified in section S17—3.

2.10.3—4 Claims about the presence of calcium in chewing gum

- (1) Despite subsection 1.2.7—12(1), a claim to the effect that chewing gum is a good source of calcium or *releasable calcium must not be made.

Note Subsection 1.2.7—12(1) and the table to section S4—3 regulate when nutrition content claims may be made, including nutrition content claims about a food being a good source of vitamins or minerals.

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.3 Chewing gum

Section 2.10.3—5

Labelling requirements

- (2) A claim about the presence of *releasable calcium in chewing gum may be made only if:
- (a) the chewing gum contains no more than 0.2% residual sugars; and
 - (b) the chewing gum contains no less than 80 mg (10% RDI) of releasable calcium per serve; and
 - (c) the amount claimed is no more than 200 mg (25% RDI) of releasable calcium per serve; and
 - (d) the *supplier who makes the claim or includes it on a label or in an advertisement:
 - (i) has records that substantiate the matters listed in paragraphs (b) and (c); and
 - (ii) makes the records available to the *relevant authority upon request.

2.10.3—5 Labelling requirements

- (1) If a claim is made in accordance with section 2.10.3—4, the nutrition information panel must include:
- (a) for chewing gum in a small package:
 - (i) the *average quantity of *releasable calcium per serve; and
 - (ii) the serving size; and
 - (b) for chewing gum other than in a small package—the average quantity of releasable calcium per serve and per 100 g; and
 - (c) in any case:
 - (i) the proportion of the *RDI (for calcium) of releasable calcium per serve; and
 - (ii) a statement to the effect that the average quantity of calcium is released during 20 minutes of chewing.
- (2) For chewing gum in a small package:
- (a) the information need not be set out in a nutrition information panel; and
 - (b) to avoid doubt, paragraph 1.2.8—14(1)(b) does not apply in relation to a claim made in accordance with section 2.10.3—4.
- (3) For chewing gum other than in a small package, the nutrition information panel may be set out in the form specified in section S12—7.
-

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.4 Miscellaneous standards for other foods

Section 2.10.4—1

Name

Standard 2.10.4 Miscellaneous standards for other foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

2.10.4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 2.10.4 — Miscellaneous standards for other foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

2.10.4—2 Definitions

Note In this Code (see section 1.1.2—3):

chocolate means a confectionery product that is characterised by:

- (a) the presence of
 - (i) cocoa bean derivatives; and
 - (ii) no more than 50 g/kg of edible oils, other than cocoa butter or dairy fats; and
- (b) preparation from a minimum of 200 g/kg of cocoa bean derivatives.

cocoa means the powdered product prepared from cocoa beans from which a portion of the fat may have been removed, with or without the addition of salt or spices.

coffee means the product prepared by roasting, grinding, or both roasting and grinding, coffee beans.

decaffeinated coffee means coffee from which most of the caffeine has been removed that contains no more than 1 g/kg of anhydrous caffeine on a dry basis.

decaffeinated tea means tea from which most of the caffeine has been removed that contains no more than 4 g/kg of anhydrous caffeine on a dry basis.

gelatine means a protein product prepared from animal skin, bone or other collagenous material, or any combination of those things.

instant coffee means the dried soluble solids prepared from the water extraction of coffee.

instant tea means dried soluble solids prepared from the water extraction of tea.

peanut butter means a peanut based spread.

tea means the product made from the leaves and leaf buds of one or more of varieties and cultivars of *Camelia sinensis* (L.) O. Kuntz.

Chapter 2 Food standards for specific foods

Part 10 Standards for other foods

Standard 2.10.4 Miscellaneous standards for other foods

Section 2.10.4—3

Requirements for food sold as tea or coffee

2.10.4—3 Requirements for food sold as tea or coffee

Food that is sold on the basis that it is a product listed in column 1 of the table to this section must satisfy the corresponding requirement in column 2:

Requirements for tea and coffee	
<i>Column 1</i>	<i>Column 2</i>
<i>If food is sold on the basis that it is:</i>	<i>the food must be:</i>
‘coffee’	coffee
‘decaffeinated coffee’	decaffeinated coffee that contains no more than 1 g/kg of anhydrous caffeine on a dry basis
‘decaffeinated instant coffee’ or ‘decaffeinated soluble coffee’	instant coffee that contains no more than 3 g/kg of anhydrous caffeine on a dry basis.
‘decaffeinated instant tea’ or ‘decaffeinated soluble tea’	instant tea that contains no more than 3 g/kg of anhydrous caffeine on a dry basis.
‘decaffeinated tea’	decaffeinated tea that contains no more than 4 g/kg of anhydrous caffeine on a dry basis
‘instant coffee’ or ‘soluble coffee’	instant coffee
‘instant tea’ or ‘soluble tea’	instant tea
‘tea’	tea

2.10.4—4 Requirement for food sold as peanut butter

Food that is sold as ‘peanut butter’ must:

- (a) be peanut butter; and
- (b) contain not less than 850 g/kg of peanuts.

2.10.4—5 Requirement for food sold as chocolate

Food that is sold as ‘chocolate’ must be chocolate.

2.10.4—6 Requirement for food sold as cocoa

Food that is sold as ‘cocoa’ must be cocoa.

2.10.4—7 Requirement for food sold as gelatine

Food that is sold as ‘gelatine’ must be gelatine.

Chapter 3 Food safety standards (Australia only)

Standard 3.1.1—Interpretation and Application;

Standard 3.2.1—Food Safety Programs;

Standard 3.2.2—Food Safety Practices and General Requirements;

Standard 3.2.3—Food Premises and Equipment;

Standard 3.3.1—Food Safety Programs for Food Service to Vulnerable Persons.

Chapter 4 Primary production and processing standards (Australia only)

Standard 4.1.1—Primary Production and Processing Standards – Preliminary Provisions;

Section 5.1.1—1

Name

Chapter 5 Revocation, transitionals etc

Standard 5.1.1 Revocation and transitional provisions—2014 Revision

Division 1 Preliminary

5.1.1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Standard 5.1.1 — Revocation and Transitional Provisions — 2014 Revision*.

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Note 2 This instrument is part of a revision of the Code made in 2014 in which most of the Standards are repealed and replaced by new versions.

Note 3 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

Note 4 Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

Division 2 Revocations

5.1.1—2 Revocation of standards

The following standards are revoked:

- (a) Standard 1.1.1—Preliminary Provisions - Application, Interpretation and General Prohibitions;
- (b) Standard 1.1.2—Supplementary Definitions for Foods;
- (c) Standard 1.1A.6—Transitional Standard for Special purposes Foods (including Amino Acid Modified Foods);
- (d) Standard 1.2.1—Application of Labelling and Other Information Requirements;
- (e) Standard 1.2.2—Food Identification Requirements;
- (f) Standard 1.2.3—Mandatory Warning and Advisory Statements and Declarations;
- (g) Standard 1.2.4—Labelling of Ingredients;

Schedule 1 RDIs and ESADDIs

Section S1—1

Name

Schedules of the Code

Schedule 1 RDIs and ESADDIs

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.1.1 relates to introductory matters and standards that apply to all foods. This Standard specifies RDIs and ESADDIs for section 1.1.2—10.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S1—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 1 — RDIs and ESADDIs*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S1—2 RDIs and ESADDIs for vitamins

For section 1.1.2—10, the table of RDIs and ESADDIs for vitamins is:

RDIs and ESADDIs for vitamins

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Vitamin</i>	<i>RDI or ESADDI</i>		<i>for children aged 1-3 years</i>	<i>for infants</i>
Vitamin A	RDI	750 µg retinol equivalents ¹	300 µg retinol equivalents ¹	300 µg retinol equivalents ¹
Thiamin (Vitamin B ₁)	RDI	1.1 mg thiamin	0.5 mg thiamin	0.35 mg thiamin
Riboflavin (Vitamin B ₂)	RDI	1.7 mg riboflavin	0.8 mg riboflavin	0.6 mg riboflavin
Niacin	RDI	10 mg niacin ²	5 mg niacin ²	3 mg niacin ²
Folate	RDI	200 µg	100 µg	75 µg
Vitamin B ₆	RDI	1.6 mg pyridoxine	0.7 mg pyridoxine	0.45 mg pyridoxine
Vitamin B ₁₂	RDI	2.0 µg cyanocobalamin	1.0 µg cyanocobalamin	0.7 µg cyanocobalamin
Biotin	ESADDI	30 µg biotin	8 µg biotin	6 µg biotin
Pantothenic acid	ESADDI	5.0 mg	2.0 mg	1.8 mg

Schedule 1 RDIs and ESADDIs

Section S1—3		RDIs and ESADDIs for minerals		
Vitamin C	RDI	pantothenic acid 40 mg ³	pantothenic acid 30 mg ³	pantothenic acid 30 mg ³
RDIs and ESADDIs for vitamins				
Column 1	Column 2	Column 3	Column 4	Column 5
<i>Vitamin</i>	<i>RDI or ESADDI</i>		<i>for children aged 1-3 years</i>	<i>for infants</i>
		total of L-ascorbic and dehydro-ascorbic acid	total of L-ascorbic and dehydro-ascorbic acid	total of L-ascorbic and dehydro-ascorbic acid
Vitamin D	RDI	10 µg	5 µg	5 µg
		cholecalciferol	cholecalciferol	cholecalciferol
Vitamin E	RDI	10 mg alpha-tocopherol equivalents ⁴	5 mg alpha-tocopherol equivalents ⁴	4 mg alpha-tocopherol equivalents ⁴
Vitamin K	ESADDI	80 µg	15 µg	10 µg
		phylloquinone	phylloquinone	phylloquinone

Note 1 See paragraph 1.1.2—14(a).

Note 2 See paragraph 1.1.2—14(b).

Note 3 See paragraph 1.1.2—14(c).

Note 4 See paragraph 1.1.2—14(d).

S1—3 RDIs and ESADDIs for minerals

For section 1.1.2—10, the table of ESADDIs and RDIs for minerals is:

RDIs and ESADDIs for minerals				
Column 1	Column 2	Column 3	Column 4	Column 5
<i>Mineral</i>	<i>RDI or ESADDI</i>		<i>for children aged 1-3 years</i>	<i>for infants</i>
Calcium	RDI	800 mg	700 mg	550 mg
Chromium	ESADDI	200 µg	60 µg	40 µg
Copper	ESADDI	3.0 mg	0.8 mg	0.65 mg
Iodine	RDI	150 µg	70 µg	60 µg
Iron	RDI	12 mg	6 mg	(a) 9 mg, for infants from 6 months (b) 3 mg, for infants under 6 months
Magnesium	RDI	320 mg	80 mg	60 mg
Manganese	ESADDI	5.0 mg	1.5 mg	0.8 mg
Molybdenum	ESADDI	250 µg	50 µg	30 µg
Phosphorus	RDI	1 000 mg	500 mg	300 mg
Selenium	RDI	70 µg	25 µg	15 µg
Zinc	RDI	12 mg	4.5 mg	4.5 mg

Schedule 1 RDIs and ESADDIs

Section S1—4 Calculation of retinol equivalents for provitamin A forms of vitamin A

S1—4 Calculation of retinol equivalents for provitamin A forms of vitamin A

For paragraph 1.1.2—14(a), the conversion factors are:

Conversion factors—vitamin A	
<i>Provitamin A form</i>	<i>Conversion factor (µg/1 µg retinol equivalents)</i>
beta-apo-8'-carotenal	12
beta-carotene-synthetic	6
Carotenes-natural	12
beta-apo-8'-carotenoic acid ethyl ester	12

Note Natural forms of provitamin A may have conversion factors that are not provided in this table.

S1—5 Calculation of alpha-tocopherol equivalents for vitamin E

(1) For paragraph 1.1.2—14(d), the conversion factors are:

- (a) if, for a particular form of Vitamin E, the table to subsection (2) specifies a conversion factor—that conversion factor; or
- (b) if, for a particular form of Vitamin E, the table to subsection (2) does not specify a conversion factor—a conversion factor determined by the composition of the form of Vitamin E.

(2) The table to this subsection is:

Conversion factors—vitamin E	
<i>Vitamin E form</i>	<i>Conversion factor (µg/1 µg alpha-tocopherol equivalents)</i>
dl-alpha-tocopherol	1.36
d-alpha-tocopherol concentrate	(see paragraph (1)(b))
Tocopherols concentrate, mixed	(see paragraph (1)(b))
d-alpha-tocopherol acetate	1.10
dl-alpha-tocopherol acetate	1.49
d-alpha-tocopherol acetate concentrate	(see paragraph (1)(b))
d-alpha-tocopherol acid succinate	1.23

Note Natural forms of vitamin E may have conversion factors that are not provided in this table.

Schedule 2 Units of measurement

Section S2—1

Name

Schedule 2 Units of measurement

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.1.1 relates to introductory matters and standards that apply to all foods. This Standard assigns meanings to symbols of measurement for section 1.1.1—6, which are used throughout this Code.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S2—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 2 — Units of measurement*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S2—2 Units of measurement

For section 1.1.1—7, the units of measurement are as follows:

Units of measurement	
<i>Symbol / unit</i>	<i>Meaning</i>
%	per cent
Bq	becquerel
°C	degrees Celsius
cfu/g	colony forming units per gram
Cal or kcal	kilocalorie
cm ²	square centimetre
cm	centimetre
dm ²	square decimetre
g	gram
gN/kg	gram of nitrogen per kilogram
Gy	Gray
J	joule
kg	kilogram
kGy	kiloGray
kJ	kilojoule
kPa	kilopascal
L or l	litre
mJ	Megajoule
M	Molar concentration
mg	milligram
mg/kg	milligram per kilogram

Schedule 2 Units of measurement

Section S2—2

Units of measurement

milliequiv	milliequivalent
mL or ml	millilitre

Units of measurement

<i>Symbol / unit</i>	<i>Meaning</i>
m/m	mass per mass
mm	millimetre
mmol	millimole
mOsm	milliosmoles
nm	nanometre
Osm	osmoles
Pa	pascal
ppm	parts per million
µg or mcg	microgram
µg/kg	microgram per kilogram
µL or µl	microlitre
µm	micrometre

Schedule 3 Identity and purity

Section S3—1

Name

Schedule 3 Identity and purity

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.1.1 relates to introductory matters and standards that apply to all foods. Section 1.1.1—15 requires certain substances to comply with relevant specifications. This Standard sets out the relevant specifications.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S3—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 3 — Identity and purity*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S3—2 Substances with specifications in primary sources

- (1) For subsection 1.1.1—15(2), the specifications are:
- (a) any relevant provision listed in the table to subsection (2); or
 - (b) Combined Compendium of Food Additive Specifications, FAO JECFA Monographs 1 (2005), Food and Agriculture Organisation of the United Nations, Rome, as superseded by specifications published in any of the following:
 - (i) FAO JECFA Monographs 3 (2006);
 - (ii) FAO JECFA Monographs 4 (2007);
 - (iii) FAO JECFA Monographs 5 (2008);
 - (iv) FAO JECFA Monographs 7 (2009);
 - (v) FAO JECFA Monographs 10 (2010);
 - (vi) FAO JECFA Monographs 11 (2011);
 - (vii) FAO JECFA Monographs 13 (2012); or
 - (c) United States Pharmacopeial Convention (2014) Food chemicals codex. 9th ed, United States Pharmacopeial Convention, Rockville, MD; or
 - (d) Commission Regulation (EU) No 231/2012 of 9 March 2012 laying down specifications for food additives.

Schedule 3 Identity and purity

Section S3—3 Substances with specifications in secondary sources

(2) The table to this subsection is:

Substance Provision	Relevant provisions
advantame.....	section S3—5
agarose ion exchange resin.....	section S3—6
bentonite.....	section S3—7
bromo-chloro-dimethylhydantoin.....	section S3—8
carboxymethyl cellulose ion exchange resin.....	section S3—9
dibromo-dimethylhydantoin.....	section S3—10
diethyl aminoethyl cellulose ion exchange resin.....	section S3—11
dimethyl ether.....	section S3—12
dried marine micro-algae (<i>Schizochytrium</i> sp.) rich in docosahexaenoic acid (DHA).....	section S3—13
ice structuring protein type III HPLC 12 preparation.....	section S3—14
isomaltulose.....	section S3—15
<i>Listeria</i> phage P100.....	section S3—16
nucleotides.....	sections S3—17 and S3—18
oil derived from the algae <i>Cryptocodinium cohnii</i> rich in docosahexaenoic acid (DHA).....	section S3—19
oil derived from the fungus <i>Mortierella alpina</i> rich in..... arachidonic acid (ARA)	section S3—20
oil derived from marine micro-algae (<i>Schizochytrium</i> sp.) rich in docosahexaenoic acid (DHA).....	section S3—21
oil derived from marine micro-algae (<i>Ulkenia</i> sp.) rich in docosahexaenoic acid (DHA).....	section S3—22
oxidised polyethylene.....	section S3—23
phytosterols, phytostanols and their esters.....	section S3—24
quaternary amine cellulose ion exchange resin.....	section S3—25
resistant maltodextrins.....	section S3—26
tall oil phytosterol esters.....	section S3—27
yeast—enriched selenium.....	section S3—28
yeast—high chromium.....	section S3—29
yeast—high molybdenum.....	section S3—30

S3—3 Substances with specifications in secondary sources

If there is no relevant specification under section S3—2, the specification is a specification listed in one of the following:

- (a) British Pharmacopoeia Commission (2014) British Pharmacopoeia 2014. TSO, Norwich;
- (b) United States Pharmacopeial Convention (2013) United States pharmacopeia and the national formulary. 37th revision. 32nd ed, United States Pharmacopeial Convention, Rockville, MD;

Schedule 3 Identity and purity

Section S3—4

Additional and supplementary requirements

- (c) Royal Pharmaceutical Society of Great Britain. Lund W (1994) *Pharmaceutical codex: principles and practice of pharmaceutics*, 12th ed, Pharmaceutical Press, London;
- (d) Sweetman SC (2011) *Martindale: the complete drug reference*. 37th ed, Pharmaceutical Press, London;
- (e) the European Pharmacopoeia 8th Edition, Council of Europe, Strasbourg (2014);
- (f) the International Pharmacopoeia 4th Edition, World Health Organization, Geneva (2006 and 2008 supplement);
- (g) the Merck Index, 15th Edition, (2013);
- (h) the Code of Federal Regulations;
- (i) the Specifications and Standards for Food Additives, 8th Edition (2007), Ministry of Health and Welfare (Japan); or
- (j) the International Oenological Codex (2013), Organisation Internationale de la Vigne et du Vin (OIV).

S3—4

Additional and supplementary requirements

If there is no relevant specification under section S3—2 or S3—3, or if the monographs referred to in those sections do not contain a specification for identity and purity of a substance relating to arsenic or heavy metals, the specification is that the substance must not contain on a dry weight basis more than:

- (a) 2 mg/kg of lead; or
- (b) 1 mg/kg of arsenic; or
- (c) 1 mg/kg of cadmium; or
- (d) 1 mg/kg of mercury.

S3—5

Specifications for advantame

For advantame, the specifications are:

- (a) purity, using the analytical methodology indicated:
 - (i) assay:
 - (A) specification—not less than 97.0% and not more than 102.0% on anhydrous basis; and
 - (B) analytical methodology—high pressure liquid chromatography; and
 - (ii) specific rotation $[\alpha]^{20}_D$:
 - (A) specification—between -45° and -38° ; and
 - (B) analytical methodology—Japanese Pharmacopoeia; and
 - (iii) advantame-acid:

Schedule 3 Identity and purity

Section S3—6

Specification for agarose ion exchange resin

- (A) specification—not more than 1.0%; and
- (B) analytical methodology—HPLC; and
- (iv) total other related substances:
 - (A) specification—not more than 1.5%; and
 - (B) analytical methodology—HPLC; and
- (v) water:
 - (A) specification—not more than 5.0%; and
 - (B) analytical methodology—Karl Fischer coulometric titration; and
- (vi) residue on ignition:
 - (A) specification—no more than 0.2%; and
 - (B) analytical methodology—Japanese Pharmacopeia; and
- (b) residual solvents, using gas chromatography:
 - (i) methyl acetate—no more than 500 mg/kg; and
 - (ii) isopropyl acetate—no more than 2 000 mg/kg; and
 - (iii) methanol—no more than 500 mg/kg; and
 - (iv) 2-Propanol—no more than 500 mg/kg.

S3—6

Specification for agarose ion exchange resin

- (1) This specification relates to agarose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with tertiary amine groups whereby the amount of epichlorohydrin plus propylene oxide does not exceed 250% by weight of the starting amount of agarose.
- (2) The resins are limited to use in aqueous process streams for the removal of proteins and polyphenols from beer. The pH range for the resins shall be no less than 2 and no more than 5, and the temperatures of water and food passing through the resin bed shall not exceed 2°C. pH and temperature restrictions do not apply to cleaning processes.
- (3) When subjected to the extraction regime listed in the 21 CFR § 173.25(c)(4), but using dilute hydrochloric acid at pH 2 in place of 5% acetic acid, the ion exchange resins shall result in no more than 25 ppm of organic extractives.

S3—7

Specification for bentonite

Bentonite must comply with a monograph specification in section S3—2 or section S3—3, except that the pH determination for a bentonite dispersion must be no less than 4.5 and no more than 10.5.

S3—8

Specification for bromo-chloro-dimethylhydantoin

- (1) In this section:
-

Schedule 3 Identity and purity

Section S3—9

Specification for carboxymethyl cellulose ion exchange resin

bromo-chloro-dimethylhydantoin (CAS Number: 126-06-7) is the chemical with:

- (a) the formula $C_5H_6BrClN_2O_2$; and
 - (b) the formula weight 241.5.
- (2) For bromo-chloro-dimethylhydantoin, the chemical specifications are the following:
- (a) appearance—solid or free flowing granules;
 - (b) colour—white;
 - (c) odour—faint halogenous odour;
 - (d) melting point—163-164°C;
 - (e) specific gravity—1.8-2;
 - (f) solubility in water—0.2 g/100 g at 25°C;
 - (g) stability—stable when dry and uncontaminated.
- (3) Bromo-chloro-dimethylhydantoin must be manufactured in accordance with the following process:
- (a) solid dimethylhydantoin (DMH) must be dissolved in water with bromine and chlorine;
 - (b) the reaction must be 0.5 mole bromine and 1.5 mole chlorine for one mole DMH;
 - (c) during the reaction the pH must be kept basic by the addition of caustic soda;
 - (d) the wet product must be transferred to a drier where it is dried to a powder at low temperature;
 - (e) the powder may then be tableted or granulated.
- (4) Bromo-chloro-dimethylhydantoin may be assayed in accordance with various analytical methods, including GLC, HPLC, UV and NMR.

Note HPLC offers the best sensitivity.

S3—9

Specification for carboxymethyl cellulose ion exchange resin

- (1) This specification relates to regenerated cellulose that has been cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with carboxymethyl groups, as a result of which the amount of epichlorohydrin plus propylene oxide is no more than 70% by weight of the starting amount of cellulose.
- (2) The resins are limited to use in aqueous process streams for the isolation and purification of protein concentrates and isolates. The pH range for the resins shall be no less than 2 and no more than 10, and the temperatures of water and food passing through the resin bed must be no more than 40°C.

Schedule 3 Identity and purity

Section S3—10 Specification for dibromo-dimethylhydantoin

- (3) When subjected to the extraction regime listed in the 21 CFR § 173.25(c)(4), but using dilute hydrochloric acid at pH 2 in place of 5% acetic acid, the ion exchange resins shall result in no more than 25 ppm of organic extractives.

S3—10 Specification for dibromo-dimethylhydantoin

- (1) In this section:

dibromo-dimethylhydantoin means the chemical with CAS Number 77-48-5 and formula C₅H₆Br₂N₂O₂.

- (2) For dibromo-dimethylhydantoin, the specifications (which relate to purity) are the following:
- (a) dibromo-dimethylhydantoin—no less than 97%;
 - (b) sodium bromide—no more than 2%;
 - (c) water—no more than 1%.

S3—11 Specification for diethyl aminoethyl cellulose ion exchange resin

- (1) This specification relates to:

- (a) regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with tertiary amine groups whereby the amount of epichlorohydrin plus propylene oxide is no more than 70% by weight of the starting amount of cellulose; and
- (b) regenerated cellulose, cross-linked and alkylated with epichlorohydrin then derivatised with tertiary amine groups whereby the amount of epichlorohydrin is no more than 10% by weight of the starting amount of cellulose.

- (2) The resins are limited to use in aqueous process streams for the isolation and purification of protein concentrates and isolates. The pH range for the resins shall be no less than 2 and no more than 10, and the temperatures of water and food passing through the resin bed must be no more than 50°C.
- (3) When subjected to the extraction regime listed in the 21 CFR § 173.25(c)(4), but using dilute hydrochloric acid at pH 2 in place of 5% acetic acid, the ion exchange resins shall result in no more than 25 ppm of organic extractives.

S3—12 Specification for dimethyl ether

For dimethyl ether, the specifications are the following:

- (a) purity—minimum of 99.8%;
- (b) methanol—not greater than 200 mg/kg.

S3—13 Specification for dried marine micro-algae (*Schizochytrium* sp.) rich in docosahexaenoic acid (DHA)

For docosahexaenoic acid (DHA)-rich dried marine micro-algae (*Schizochytrium* sp.), the specifications are the following:

Schedule 3 Identity and purity

Section S3—14

Specification for ice structuring protein type III HPLC 12 preparation

- (a) full chemical name—4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA);
- (b) solids (%)—minimum 95.0;
- (c) DHA (%)—minimum 15.0;
- (d) lead (mg/kg)—maximum 0.5;
- (e) arsenic (mg/kg)—maximum 0.5.

S3—14 Specification for ice structuring protein type III HPLC 12 preparation

- (1) In this section:

ice structuring protein type III HPLC 12 preparation means the protein excreted from the fermentation of a genetically modified yeast (*Saccharomyces cerevisiae*) to which a synthetic gene encoding for the protein has been inserted into the yeast's genome.

- (2) For ice structuring protein type III HPLC 12 preparation, the specifications are the following:

- (a) assay—not less than 5 g/L active ice structuring protein type III HPLC 12;
- (b) pH—3.0+/-0.5;
- (c) ash—not more than 2%;
- (d) appearance—light brown aqueous preparation;
- (e) heavy metals—not more than 2 mg/L;
- (f) microbial limits:
 - (i) total microbial count—<3 000/g; and
 - (ii) coliforms—<10/g; and
 - (iii) yeast and mould count—<100/g; and
 - (iv) *listeria* sp.—absent in 25 g; and
 - (v) *salmonella* sp.—absent in 25 g; and
 - (vi) *bacillus cereus*—<100/g.

S3—15 Specification for isomaltulose

For isomaltulose, the specifications are the following:

- (a) chemical name—6-O- α -D-glucopyranosyl-D-fructofuranose;
 - (b) description—white or colourless, crystalline, sweet substance, faint isomaltulose specific odour;
 - (c) isomaltulose (%)—not less than 98% on a dry weight basis;
 - (d) water—maximum 6%;
 - (e) other saccharides—maximum 2% on a dry weight basis;
-

Schedule 3 Identity and purity

Section S3—16

Specification for *Listeria* phage P100

- (f) ash—maximum 0.01% on a dry weight basis;
- (g) lead—maximum 0.1 ppm on a dry weight basis.

S3—16 Specification for *Listeria* phage P100

For *Listeria* phage P100, the biological classification is the following:

- (a) order—*Caudovirales*;
- (b) family—*Myoviridae*;
- (c) subfamily—*Spounaviridae*;
- (d) genus—twort-like;
- (e) species—*Listeria* phage P100;
- (f) GenBank Accession Number—DQ004855.

S3—17 Descriptions and physical constraints for nucleotides

Uridine-5'-monophosphate disodium salt (UMP)

(1) For uridine-5'-monophosphate disodium salt (UMP), the specifications are the following:

- (a) empirical chemical formula— $C_9 H_{11} N_2 O_9 P N a_2$;
- (b) the compound must be of the 5 species, with the disodium monophosphate structure attached to the fifth carbon in the central structure;
- (c) molecular weight—368.15;
- (d) structure or physical character—occurs as a colourless or white crystal or as a white crystalline powder. It is odourless and has a characteristic taste;
- (e) solubility—freely soluble in water; very slightly soluble in alcohol.

Adenosine-5'-monophosphate (AMP)

(2) For adenosine-5'-monophosphate (AMP), the specifications are the following:

- (a) empirical chemical formula— $C_{10} H_{14} N_5 O_7 P$;
- (b) the compound must be of the 5 species, with the monophosphate structure attached to the fifth carbon in the central structure;
- (c) molecular weight—347.22;
- (d) structure or physical character—occurs as a colourless or white crystal or as a white crystalline powder. It is odourless and has a characteristic acidic taste;
- (e) solubility—very slightly soluble in water; practically insoluble in alcohol.

Cytidine-5'-monophosphate (CMP)

(3) For cytidine-5'-monophosphate (CMP), the specifications are the following:

Schedule 3 Identity and purity

Section S3—18

Testing requirements for nucleotides

- (a) empirical chemical formula— $C_9H_{14}N_3O_8P$;
- (b) the compound must be of the 5 species, with the monophosphate structure attached to the fifth carbon in the central structure;
- (c) molecular weight—323.20;
- (d) structure or physical character—occurs as a colourless or white crystal or as a white crystalline powder. It is odourless and has a characteristic slightly acidic taste;
- (e) solubility—very slightly soluble in water; practically insoluble in alcohol.

S3—18

Testing requirements for nucleotides

The testing requirements for nucleotides are as follows:

- (a) physical inspection—white crystals or crystalline powder;
- (b) identification:
 - (i) ultraviolet absorbance: a 1 in 12 500 solution of the powder in 0.01N hydrochloric acid exhibits an absorbance maximum at an absorbance of:
 - (A) for inosine-5'-monophosphate disodium salt— $250 \pm 2\text{nm}$; and
 - (B) for uridine-5'-monophosphate disodium salt— $260 \pm 2\text{nm}$; and
 - (C) for adenosine-5'-monophosphate— $257 \pm 2\text{nm}$; and
 - (D) for cytidine-5'-monophosphate (CMP)— $280 \pm 2\text{nm}$; and
 - (E) guanosine-5'-monophosphate disodium salt (gMP)— $256 \pm 2\text{nm}$; and
 - (ii) IMP, UMP and gMP must test positive for sodium phosphate; and
 - (iii) IMP, UMP, AMP, CMP and gMP must test positive for organic phosphate;
- (c) assay (HPLC)—optimum of not less than 96% (corrected for moisture content);
- (d) IMP and gMP have a pH of a 1 in 20 solution: between 7.0 and 8.5;
- (e) clarity and colour of solution:
 - (i) 500 mg/10 mL H_2O for IMP: is colourless and shows only a trace of turbidity; and
 - (ii) 100 mg/10 mL H_2O for gMP: is colourless and shows only a trace of turbidity;
- (f) moisture:

Schedule 3 Identity and purity

Section S3—19

Specification for oil derived from the algae *Cryptocodinium cohnii* rich in docosahexaenoic acid (DHA)

- (i) for inosine-5'-monophosphate disodium salt—not more than 28.5%: Karl Fischer; and
- (ii) for uridine-5'-monophosphate disodium salt—not more than 26.0%: Karl Fischer; and
- (iii) guanosine-5'-monophosphate disodium salt (gMP)—loss in drying of not more than 25% (4 hrs @ 120°C); and
- (iv) for cytidine-5'-monophosphate (CMP)—loss in drying of not more than 6.0% (4 hrs @ 120°C); and
- (v) adenosine-5'-monophosphate—loss in drying of not more than 6.0% (4 hrs @ 120°C);
- (g) impurities—all nucleotides:
 - (i) for IMP, gMP—amino acids: negative; and
 - (ii) for IMP, gMP—ammonium salts: negative; and
 - (iii) for IMP, UMP, AMP, CMP, gMP—arsenic: not more than 2 ppm; and
 - (iv) for IMP, UMP, AMP, CMP, gMP—heavy metals: not more than 10 ppm;
- (h) related foreign substances:
 - (i) for IMP—only 5'-inosinic acid is detected by thin layer chromatography; and
 - (ii) for gMP—only 5'-guanylic acid is detected by thin layer chromatography;
- (i) bacteriological profile:
 - (i) *SPC—not more than 1 000/g, test per current FDA/BAM procedures; and
 - (ii) coliforms—negative by test; test per current FDA/BAM procedures; and
 - (iii) yeast and mould—not more than 300/g, test per current FDA/BAM procedures; and
 - (iv) *salmonella*—negative, test per current FDA/BAM procedures.

S3—19

Specification for oil derived from the algae *Cryptocodinium cohnii* rich in docosahexaenoic acid (DHA)

For oil derived from the algae *Cryptocodinium cohnii* rich in docosahexaenoic acid (DHA), the specifications are the following:

- (a) full chemical name for DHA—4,7,10,13,16,19-docosahexaenoic acid (22:6n-3);
 - (b) DHA (%)—minimum 35;
 - (c) *trans fatty acids (%)—maximum 2.0;
-

Schedule 3 Identity and purity

Section S3—20

Specification for oil derived from the fungus *Mortierella alpina* rich in arachidonic acid (ARA)

- (d) lead (mg/kg)—maximum 0.1;
- (e) arsenic (mg/kg)—maximum 0.1;
- (f) mercury (mg/kg)—maximum 0.1;
- (g) hexane (mg/kg)—maximum 0.3.

S3—20 Specification for oil derived from the fungus *Mortierella alpina* rich in arachidonic acid (ARA)

For oil derived from the fungus *Mortierella alpina* rich in arachidonic acid (ARA), the specifications are the following:

- (a) full chemical name for ARA—5,8,11,14-eicosatetraenoic acid (20:4n-6 ARA);
- (b) ARA (%)—minimum 35;
- (c) *trans fatty acids (%)—maximum 2.0;
- (d) lead (mg/kg)—maximum 0.1;
- (e) arsenic (mg/kg)—maximum 0.1;
- (f) mercury (mg/kg)—maximum 0.1;
- (g) hexane (mg/kg)—maximum 0.3.

S3—21 Specification for oil derived from marine micro-algae (*Schizochytrium* sp.) rich in docosahexaenoic acid (DHA)

For oil derived from marine micro-algae (*Schizochytrium* sp.) rich in docosahexaenoic acid (DHA), the specifications are the following:

- (a) full chemical name—4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA);
- (b) DHA (%)—minimum 32;
- (c) *trans fatty acids (%)—maximum 2.0;
- (d) lead (mg/kg)—maximum 0.1;
- (e) arsenic (mg/kg)—maximum 0.1;
- (f) mercury (mg/kg)—maximum 0.1;
- (g) hexane (mg/kg)—maximum 0.3.

S3—22 Specification for oil derived from marine micro-algae (*Ulkenia* sp.) rich in docosahexaenoic acid (DHA)

For oil derived from marine micro-algae (*Ulkenia* sp.) rich in docosahexaenoic acid (DHA), the specifications are the following:

- (a) full chemical name for DHA—4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA);
 - (b) DHA (%)—minimum 32;
-

Schedule 3 Identity and purity

Section S3—23	Specification for oxidised polyethylene
---------------	---

- (c) *trans fatty acids (%)—maximum 2.0;
- (d) lead (mg/kg)—maximum 0.2;
- (e) arsenic (mg/kg)—maximum 0.2;
- (f) mercury (mg/kg)—maximum 0.2;
- (g) hexane (mg/kg)—maximum 10.

S3—23 Specification for oxidised polyethylene

- (1) In this section:

ASTM refers to standard test methods prepared by the American Society for Testing and Materials.

CAS means the Chemical Abstracts Service (CAS) Registry Number.

oxidised polyethylene (CAS 68441-17-8) is the polymer produced by the mild air oxidation of polyethylene.

- (2) For oxidised polyethylene, the specifications are the following:

- (a) average molecular weight—min 1200 (osmometric);
- (b) viscosity at 125°C—min 200cP;
- (c) oxygen content—max 9.1%;
- (d) acid value—max 70 mgKOH/g (ASTM D 1386);
- (e) drop point—min 95°C (ASTM D 566);
- (f) density (20°C)—0.93-1.05 g/cm³ (ASTM D 1298, D 1505);
- (g) extractable constituents:
 - (i) in water—maximum 1.5%; and
 - (ii) in 10% ethanol—max 2.3%; and
 - (iii) in 3% acetic acid—max 1.8%; and
 - (iv) in n-pentane—max 26.0%.

Note Extraction of oxidised Polyethylene—25.0 g of finely ground oxidised polyethylene powder (particle size 300-1 000 µm) is extracted for 5 hours in the Soxhlet apparatus with 350 mL of solvent. The solvent is then distilled off and the distillation residue is dried in a vacuum oven at 80-90°C. After weighing the obtained residue, the components soluble in the solvent are calculated in % weight (based on the initial weight used).

S3—24 Specification for phytosterols, phytosterols and their esters

- (1) Subject to subsections (2) and (3), *phytosterols, phytosterols and their esters must comply with a monograph specification in section S3—2 or section S3—3.
- (2) However, for a mixture which contains no less than 950 g/kg of phytosterol and phytosterols, the concentration of hexane, isopropanol, ethanol, methanol or methyl ethyl ketone either singly or in combination must be no more than 2 g/kg.

Schedule 3 Identity and purity

Section S3—25

Specification for quaternary amine cellulose ion exchange resin

- (3) The *total plant sterol equivalents content must contain no less than 95% des-methyl sterols.

S3—25 Specification for quaternary amine cellulose ion exchange resin

- (1) This specification relates to regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with quaternary amine groups whereby the amount of epichlorohydrin plus propylene oxide is no more than 250% by weight of the starting amount of cellulose.
- (2) The resins are limited to use in aqueous process streams for the isolation and purification of protein concentrates and isolates. The pH range for the resins shall be no less than 2 and no more than 10, and the temperatures of water and food passing through the resin bed must be no more than 50°C.
- (3) When subjected to the extraction regime listed in the 21 CFR § 173.25(c)(4), but using dilute hydrochloric acid at pH 2 in place of 5% acetic acid, the ion exchange resins shall result in no more than 25 ppm of organic extractives.

S3—26 Specification for resistant maltodextrins

For resistant maltodextrins, the specifications are the following:

- (a) chemical structure—glucopyranose linked by $\alpha(1-4)$, $\alpha(1-6)$, $\alpha/\beta(1-2)$, and $\alpha/\beta(1-3)$ glucosidic bonds; and contains levoglucosan;
- (b) dextrose equivalent—8-12;
- (c) appearance—free-flowing fine powder;
- (d) colour—white;
- (e) taste/odour—slightly sweet/odourless;
- (f) solution—clear;
- (g) pH (in 10% solution)—4-6;
- (h) moisture (%)—maximum 5;
- (i) ash (%)—maximum 0.2;
- (j) arsenic (ppm)—maximum 1;
- (k) heavy metals (ppm)—maximum 5;
- (l) microbiological:
 - (i) standard plate count (cfu/g)—maximum 300;
 - (ii) yeast and mould (cfu/g)—maximum 100;
 - (iii) *salmonella*—negative to test;
 - (iv) coliforms—negative to test.

S3—27 Specification for tall oil phytosterol esters

- (1) In this section:
-

Schedule 3 Identity and purity

Section S3—28

Specification for yeast—selenium-enriched

tall oil phytosterol esters are phytosterols derived from Tall Oil Pitch esterified with long-chain fatty acids derived from edible vegetable oils

- (2) For tall oil phytosterol esters, the specifications are the following:
- (a) phytosterol content:
 - (i) phytosterol esters plus free phytosterols—no less than 97%; and
 - (ii) free phytosterols after saponification—no less than 59%; and
 - (iii) free phytosterols—no more than 6%; and
 - (iv) steradienes—no more than 0.3%;
 - (b) sterol profile based on input sterols:
 - (i) campesterol—no less than 4.0% and no more than 25.0%; and
 - (ii) campestanol—no more than 14.0%; and
 - (iii) B-sitosterol—no less than 36.0% and no more than 79.0%; and
 - (iv) B-sitostanol—no less than 6.0% and no more than 34%; and
 - (v) fatty acid methylester—no more than 0.5%; and
 - (vi) moisture—no more than 0.1%; and
 - (vii) solvents—no more than 50 mg/kg; and
 - (viii) residue on ignition—no more than 0.1%;
 - (c) heavy metals:
 - (i) iron—no more than 1.0 mg/kg; and
 - (ii) copper—no more than 0.5 mg/kg; and
 - (iii) arsenic—no more than 3 mg/kg; and
 - (iv) lead—no more than 0.1 mg/kg;
 - (d) microbiological:
 - (i) total aerobic count—no more than 10 000 cfu/kg; and
 - (ii) combined moulds and yeasts—no more than 100 cfu/g; and
 - (iii) coliforms—negative; and
 - (iv) *E. coli*—negative; and
 - (v) *salmonella*—negative.

S3—28

Specification for yeast—selenium-enriched

- (1) Selenium-enriched yeasts are produced by culture in the presence of sodium selenite as a source of selenium.
- (2) These yeasts must contain selenium according to the following criteria:
- (a) total selenium content—no more than 2.5 mg/kg of the dried form as marketed;
 - (b) levels of organic selenium (% total as extracted selenium):
-

Schedule 3 Identity and purity

Section S3—29

Specification for yeast—high chromium

- (i) selenomethionine—no less than 60% and no more than 85%; and
- (ii) other organic selenium compounds (including selenocysteine)—no more than 10%;
- (c) levels of inorganic selenium (% total extracted selenium)—no more than 1%.

S3—29 Specification for yeast—high chromium

For high chromium yeast:

- (a) the physical specifications are the following:
 - (i) appearance—fine, free-flowing powder;
 - (ii) colour—light off-white or light tan;
 - (iii) odour—slight yeast aroma;
 - (iv) particle size—minimum 90% through a #100 USS screen; and
- (b) the chemical specifications are the following:
 - (i) moisture—maximum 6%;
 - (ii) chromium—1.8-2.25 g/kg.

S3—30 Specification for yeast—high molybdenum

For high molybdenum yeast:

- (a) the physical specifications are the following:
 - (i) appearance—fine, free-flowing powder;
 - (ii) colour—light off-white or light tan;
 - (iii) odour—slight yeast aroma;
 - (iv) particle size—minimum 85% through a #100 USS screen; and
 - (b) the chemical specifications are the following:
 - (i) moisture—maximum 6%;
 - (ii) molybdenum—1.8-2.25 g/kg.
-

Schedule 4 Nutrition, health and related claims

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

This Standard, together with Schedule 5 and Schedule 6, relates to Standard 1.2.7 (nutrition, health and related claims), and sets out information for the purpose of that Standard.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S4—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 4 — Nutrition, health and related claims*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S4—2 Definitions

Note In this Code (see section 1.1.2—2):

sugars:

- (a) in Standard 1.2.7, Standard 1.2.8 and Schedule 4 (except where it appears with an asterisk as ‘sugars*’)—means monosaccharides and disaccharides; and
- (a) otherwise—means any of the following products, derived from any source:
 - (i) hexose monosaccharides and disaccharides, including dextrose, fructose, sucrose and lactose;
 - (ii) starch hydrolysate;
 - (iii) glucose syrups, maltodextrin and similar products;
 - (iv) products derived at a sugar refinery, including brown sugar and molasses;
 - (v) icing sugar;
 - (vi) invert sugar;
 - (vii) fruit sugar syrup;

but does not include:

- (i) malt or malt extracts; or
- (ii) sorbitol, mannitol, glycerol, xylitol, polydextrose, isomalt, maltitol, maltitol syrup, erythritol or lactitol.

Note *Sugar* is defined differently—see section 1.1.2—3.

Note *Sugars** is relevant for claims about no added sugar.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

S4—3 Conditions for nutrition content claims

For subsection 1.2.7—12(1), the table is:

Conditions for nutrition content claims			
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>
<i>*Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
*Carbohydrate		Reduced or light/lite	The food contains at least 25% less *carbohydrate than in the same amount of *reference food.
		Increased	The food contains at least 25% more *carbohydrate than in the same amount of *reference food.
Cholesterol	The food meets the conditions for a nutrition content claim about low saturated fatty acids.	Low	The food contains no more cholesterol than: (a) 10 mg/100 mL for liquid food; or (b) 20 mg/100 g for solid food.
		Reduced or Light/Lite	The food contains at least 25% less cholesterol than in the same amount of *reference food.
*Dietary fibre	A serving of the food contains at least 2 g of *dietary fibre unless the claim is about low or reduced dietary fibre.	Good source	A serving of the food contains at least 4 g of *dietary fibre.
		Excellent source	A serving of the food contains at least 7 g of *dietary fibre.
		Increased	(a) The *reference food contains at least 2 g of *dietary fibre per serving; and (b) the food contains at least 25% more *dietary fibre than in the same amount of reference food.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Energy		Low	The *average energy content of the food is no more than: (a) 80 kJ/100 mL for liquid food; or (b) 170 kJ/100 g for solid food.
		Reduced or Light/Lite	The food contains at least 25% less energy than in the same amount of *reference food.
		Diet	(a) The food meets the NPSC, unless the food is a special purpose food; and (b) either of the following is satisfied: (i) the *average energy content of the food is no more than 80 kJ/100 mL for liquid food or 170 kJ/100 g for solid food; or (ii) the food contains at least 40% less energy than in the same amount of *reference food.
Fat		% Free	The food meets the conditions for a nutrition content claim about low fat.
		Low	The food contains no more fat than: (a) 1.5 g/100 mL for liquid food; or (b) 3 g/100 g for solid food.
		Reduced or Light/Lite	The food contains at least 25% less fat than in the same amount of *reference food.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Gluten		Free	The food must not contain: (a) detectable gluten; or (b) oats or oat products; or (c) cereals containing *gluten that have been malted, or products of such cereals.
		Low	The food contains no more than 20 mg gluten/100 g of the food.
*Glycaemic Index	(a) The food meets the NPSC, unless the food is a special purpose food; and (b) the claim or the nutrition information panel includes the numerical value of the *glycaemic index of the food.	Low	The numerical value of the *glycaemic index of the food is 55 or below.
		Medium	The numerical value of the *glycaemic index of the food is at least 56 and does not exceed 69.
		High	The numerical value of the *glycaemic index of the food is 70 or above.
Glycaemic load	The food meets the NPSC, unless the food is a special purpose food.		
Lactose	The nutrition information panel indicates the lactose and galactose content.	Free	The food contains no detectable lactose.
		Low	The food contains no more than 2 g of lactose/100 g of the food.
Mono-unsaturated fatty acids	The food contains, as a proportion of the total fatty acid content: (a) no more than 28% saturated fatty acids and trans fatty acids; and (b) no less than 40% monounsaturated fatty acids.	Increased	(a) The food contains at least 25% more *monounsaturated fatty acids than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about monounsaturated fatty acids.

Schedule 4 Nutrition, health and related claims

<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Omega fatty acids (any)	The type of omega fatty acid is specified immediately after the word 'omega'.		
Omega-3 fatty acids	<ul style="list-style-type: none"> (a) The food meets the conditions for a nutrition content claim about omega fatty acids; and (b) the food contains no less than: <ul style="list-style-type: none"> (i) 200 mg alpha-linolenic acid per serving; or (ii) 30 mg total eicosapentaenoic acid and docosahexaenoic acid per serving; and (c) other than for fish or fish products with no added *saturated fatty acids, the food contains: <ul style="list-style-type: none"> (i) as a proportion of the total fatty acid content, no more than 28% saturated fatty acids and trans fatty acids; or (ii) no more saturated fatty acids and *trans fatty acids than 5 g per 100 g; and (d) the nutrition information panel indicates the type and amount of omega-3 fatty acids, that is, alpha-linolenic acid, docosahexaenoic acid or eicosapentaenoic acid, or a combination of the above. 	<p style="margin-bottom: 10px;">Good Source</p> <p style="margin-bottom: 10px;">Increased</p>	<ul style="list-style-type: none"> (a) The food contains no less than 60 mg total eicosapentaenoic acid and docosahexaenoic acid/serving; and (b) the food may contain less than 200 mg alpha-linolenic acid/serving. (a) The food contains at least 25% more omega-3 fatty acids than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about omega-3 fatty acids.

Schedule 4 Nutrition, health and related claims

Section S4—3

Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Omega-6 fatty acids	(a) The food meets the conditions for a nutrition content claim about omega fatty acids; and (b) the food contains, as a proportion of the total fatty acid content: <ul style="list-style-type: none"> (i) no more than 28% *saturated fatty acids and trans fatty acids; and (ii) no less than 40% omega-6 fatty acids. 	Increased	(a) The food contains at least 25% more omega-6 fatty acids than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about omega-6 fatty acids.
Omega-9 fatty acids	(a) The food meets the conditions for a nutrition content claim about omega fatty acids; and (b) the food contains, as a proportion of the total fatty acid content: <ul style="list-style-type: none"> (i) no more than 28% *saturated fatty acids and trans fatty acids; and (ii) no less than 40% omega-9 fatty acids. 	Increased	(a) The food contains at least 25% more omega-9 fatty acids than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about omega-9 fatty acids.
Poly-unsaturated fatty acids	The food contains, as a proportion of the total fatty acid content: <ul style="list-style-type: none"> (a) no more than 28% *saturated fatty acids and trans fatty acids; and (b) no less than 40% polyunsaturated fatty acids. 	Increased	(a) The food contains at least 25% more *polyunsaturated fatty acids than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about polyunsaturated fatty acids.
Potassium	The nutrition information panel indicates the sodium and potassium content.		

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Protein	The food contains at least 5 g of protein/serving unless the claim is about low or reduced protein.	Good Source	The food contains at least 10 g of protein/serving.
		Increased	(a) The food contains at least 25% more protein than in the same amount of *reference food; and (b) the reference food meets the general claim conditions for a nutrition content claim about protein.
Salt or sodium	The nutrition information panel indicates the potassium content.	Low	The food contains no more sodium than: (a) 120 mg/100 mL for liquid food; or (b) 120 mg/100 g for solid food.
		Reduced or Light/Lite	The food contains at least 25% less sodium than in the same amount of *reference food.
		No added	(a) The food contains no added sodium compound including no added salt; and (b) the ingredients of the food contain no added sodium compound including no added salt.
		Unsalted	The food meets the conditions for a nutrition content claim about no added salt or sodium.

Schedule 4 Nutrition, health and related claims

Section S4—3

Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Saturated and trans fatty acids		Low	<p>The food contains no more *saturated and *trans fatty acids than:</p> <p>(a) 0.75 g/100 mL for liquid food; or</p> <p>(b) 1.5 g/100 g for solid food.</p>
		Reduced or Light/Lite	<p>(a) The food contains at least 25% less saturated and *trans fatty acids than in the same amount of *reference food; and</p> <p>(b) both saturated and trans fatty acids are reduced relative to the same amount of reference food.</p>
		Low proportion	<p>(a) The food contains as a proportion of the total fatty acid content, no more than 28% *saturated fatty acids and *trans fatty acids; and</p> <p>(b) the claim expressly states in words to the effect of ‘low proportion of *saturated and *trans fatty acids of total fatty acid content’.</p>
Saturated fatty acids		Free	<p>(a) The food contains no detectable *saturated fatty acids; and</p> <p>(b) the food contains no detectable *trans fatty acids.</p>
		Low	<p>The food contains no more *saturated and *trans fatty acids than:</p> <p>(a) 0.75 g/100 mL for liquid food; or</p> <p>(b) 1.5 g/100 g for solid food.</p>

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
*Saturated fatty acids		Reduced or Light/Lite	The food contains: <ul style="list-style-type: none"> (a) at least 25% less *saturated fatty acids than in the same amount of *reference food; and (b) no more *trans fatty acids than in the same amount of reference food.
		Low proportion	<ul style="list-style-type: none"> (a) The food contains as a proportion of the total fatty acid content, no more than 28% *saturated fatty acids and trans fatty acids; and (b) the claim expressly states in words to the effect of ‘low proportion of saturated fatty acids of the total fatty acid content’.
Sugar or Sugars		% Free	The food meets the conditions for a nutrition content claim about low sugar.
		Low	The food contains no more sugars than: <ul style="list-style-type: none"> (a) 2.5 g/100 mL for liquid food; or (b) 5 g/100 g for solid food.
		Reduced or Light/Lite	The food contains at least 25% less sugars than in the same amount of *reference food.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
Column 1	Column 2	Column 3	Column 4
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Sugar or sugars		No added	<ul style="list-style-type: none"> (a) The food contains no added sugars*, honey, malt, or malt extracts; and (b) the food contains no added concentrated fruit juice or deionised fruit juice, unless the food is any of the following: <ul style="list-style-type: none"> (i) a brewed soft drink; (ii) an electrolyte drink; (iii) an electrolyte drink base; (iv) juice blend; (v) a formulated beverage; (vi) fruit juice; (vii) fruit drink; (viii) vegetable juice; (ix) mineral water or spring water; (x) a non-alcoholic beverage.
		Unsweetened	<ul style="list-style-type: none"> (a) The food meets the conditions for a nutrition content claim about no added sugar; and (b) the food contains no intense sweeteners, sorbitol, mannitol, glycerol, xylitol, isomalt, maltitol syrup or lactitol.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
Trans fatty acids		Free	The food contains no detectable trans fatty acids, and contains: <ul style="list-style-type: none"> (a) no more than: <ul style="list-style-type: none"> (i) 0.75 g saturated fatty acids/100 mL of liquid food; or (ii) 1.5 g saturated fatty acids/100 g of solid food; or (b) no more than 28% saturated fatty acids as a proportion of the total fatty acid content.
		Reduced or Light/Lite	The food contains: <ul style="list-style-type: none"> (a) at least 25% less *trans fatty acids than in the same amount of *reference food, and (b) no more *saturated fatty acids than in the same amount of reference food.
Vitamin or mineral (not including potassium or sodium)	<ul style="list-style-type: none"> (a) The vitamin or mineral is mentioned in column 1 of the table to section S1—2 or S1—3; and (b) a serving of the food contains at least 10% *RDI or *ESADDI for that vitamin or mineral; and (c) a claim is not for more of the particular vitamin or mineral than the amount permitted by section 1.3.2—4 or 1.3.2—5; and 	Good source	A serving of the food contains no less than 25% *RDI or *ESADDI for that vitamin or mineral.

Schedule 4 Nutrition, health and related claims

Section S4—3 Conditions for nutrition content claims

Conditions for nutrition content claims			
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>
<i>Property of food</i>	<i>General claim conditions that must be met</i>	<i>Specific descriptor</i>	<i>Conditions that must be met if using specific descriptor in column 3</i>
<p>Vitamin or mineral (not including potassium or sodium)</p>	<p>(d) the food is not any of the following:</p> <ul style="list-style-type: none"> (i) a formulated caffeinated beverage; (ii) food for infants; (iii) a formulated meal replacement; (iv) a formulated supplementary food; (v) a formulated supplementary sports food. <p>For food for infants, the food satisfies the condition for making a claim under subsection 2.9.2—10(2).</p> <p>For a formulated meal replacement, the food meets the condition for making a claim under subsection 2.9.3—4(2).</p> <p>For a formulated supplementary food, the food meets the conditions for making a claim under subsection 2.9.3—6(2).</p> <p>For a formulated supplementary food for young children, the food meets the conditions for making a claim under 2.9.3—8(2).</p>		

Schedule 4 Nutrition, health and related claims

Section S4—4 Conditions for permitted high level health claims

S4—4 Conditions for permitted high level health claims

For subsection 1.2.7—18(2), the table is:

Conditions for permitted high level health claims				
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Context claim statements</i>	<i>Conditions</i>
A high intake of fruit and vegetables	Reduces risk of coronary heart disease		Diet containing a high amount of both fruit and vegetables	(a) Claims are not permitted on: <ul style="list-style-type: none"> (i) juice blend; or (ii) fruit juice; or (iii) vegetable juice; or (iv) a formulated beverage; or (v) mineral water or spring water; or (vi) a non-alcoholic beverage; or (vii) brewed soft drink; or (viii) fruit drink; or (ix) electrolyte drink; or (x) electrolyte drink base; and (b) the food must contain no less than 90% fruit or vegetable by weight.
Beta-glucan	Reduces blood cholesterol		Diet low in saturated fatty acids Diet containing 3 g of beta-glucan per day	The food must contain: <ul style="list-style-type: none"> (a) one or more of the following oat or barley foods: <ul style="list-style-type: none"> (i) oat bran; (ii) wholegrain oats; or (iii) wholegrain barley; and (b) at least 1 g per serving of beta-glucan from the foods listed in (a).

Schedule 4 Nutrition, health and related claims

Section S4—4 Conditions for permitted high level health claims

Conditions for permitted high level health claims				
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Context claim statements</i>	<i>Conditions</i>
Calcium	Enhances bone mineral density		Diet high in calcium	The food must contain no less than 200 mg of calcium/serving.
	Reduces risk of osteoporosis Reduces risk of osteoporotic fracture	Persons 65 years and over	Diet high in calcium, and adequate vitamin D status	The food must contain no less than 290 mg of calcium/serving
Calcium and Vitamin D	Reduces risk of osteoporosis	Persons 65 years and over	Diet high in calcium, and adequate vitamin D status	The food must: (a) contain no less than 290 mg of calcium/serving; and
	Reduces risk of osteoporotic fracture			(b) meet the general claim conditions for making a nutrition content claim about vitamin D.
Folic acid (but not folate)	Reduces risk of foetal neural tube defects	Women of child bearing age	Consume at least 400 µg of folic acid per day, at least the month before and three months after conception	The food must: (a) contain no less than 40 µg folic acid/serving; and (b) the food is not: (i) soft cheese; or (ii) pâté; or (iii) liver or liver product; or (iv) food containing added *phytosterols, phytosterols and their esters; or (v) a formulated caffeinated beverage; or (vi) a formulated supplementary sports food; or (vi) a formulated meal replacement.

Schedule 4 Nutrition, health and related claims

Section S4—4 Conditions for permitted high level health claims

Conditions for permitted high level health claims				
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Context claim statements</i>	<i>Conditions</i>
Increased intake of fruit and vegetables	Reduces risk of coronary heart disease		Diet containing an increased amount of both fruit and vegetables	(a) Claims are not permitted on: <ul style="list-style-type: none"> (i) juice blend; or (ii) fruit juice; or (iii) vegetable juice; or (iv) a formulated beverage; or (v) mineral water or spring water; or (vi) a non-alcoholic beverage; or (vii) a brewed soft drink; or (viii) fruit drink; or (ix) an electrolyte drink; or (x) an electrolyte drink base; and (b) the food must contain no less than 90% fruit or vegetable by weight.

Schedule 4 Nutrition, health and related claims

Section S4—4 Conditions for permitted high level health claims

Conditions for permitted high level health claims				
<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Context claim statements</i>	<i>Conditions</i>
*Phytosterols, phytostanols and their esters	Reduces blood cholesterol		Diet low in saturated fatty acids Diet containing 2 g of *phytosterols, phytostanols and their esters per day	The food must: (a) meet the relevant conditions specified in the table in section S25—2; and (b) contain a minimum of 0.8 g total plant sterol equivalents content/serving
Saturated fatty acids	Reduces total blood cholesterol or blood LDL cholesterol		Diet low in saturated fatty acids	The food must meet the conditions for making a nutrition content claim about low saturated fatty acids.
Saturated and trans fatty acids	Reduces total blood cholesterol or blood LDL cholesterol		Diet low in saturated and trans fatty acids	The food must meet the conditions for making a nutrition content claim about low saturated and trans fatty acids.
Sodium or salt	Reduces blood pressure		Diet low in salt or sodium	The food must meet the conditions for making a nutrition content claim about low sodium or salt.

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

S4—5 Conditions for permitted general level health claims

For subsection 1.2.7—18(3), the table is:

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Calcium	Necessary for normal teeth and bone structure Necessary for normal nerve and muscle function Necessary for normal blood coagulation Contributes to normal energy metabolism Contributes to the normal function of digestive enzymes Contributes to normal cell division	Children		The food must meet the general claim conditions for making a nutrition content claim about calcium
Chromium	Contributes to normal macronutrient metabolism			The food must meet the general claim conditions for making a nutrition content claim about chromium
Copper	Contributes to normal connective tissue structure Contributes to normal iron transport and metabolism			The food must meet the general claim conditions for making a nutrition content claim about copper

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Copper	<p>Contributes to cell protection from free radical damage</p> <p>Necessary for normal energy production</p> <p>Necessary for normal neurological function</p> <p>Necessary for normal immune system function</p> <p>Necessary for normal skin and hair colouration</p>	Children		
Fluoride	Contributes to the maintenance of tooth mineralisation			The food must contain no less than 0.6 mg fluoride/L
Iodine	<p>Necessary for normal production of thyroid hormones</p> <p>Necessary for normal neurological function</p> <p>Necessary for normal energy metabolism</p> <p>Contributes to normal cognitive function</p> <p>Contributes to the maintenance of normal skin</p>			The food must meet the general claim conditions for making a nutrition content claim about iodine

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Iodine	Contributes to normal growth and development	Children		
Iron	<p>Necessary for normal oxygen transport</p> <p>Contributes to normal energy production</p> <p>Necessary for normal immune system function</p> <p>Contributes to normal blood formation</p> <p>Necessary for normal neurological development in the foetus</p> <p>Contributes to normal cognitive function</p> <p>Contributes to the reduction of tiredness and fatigue</p> <p>Necessary for normal cell division</p>			The food must meet the general claim conditions for making a nutrition content claim about iron
	Contributes to normal growth and development	Children		
	Contributes to normal cognitive development	Children		

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Manganese	<p>Contributes to normal bone formation</p> <p>Contributes to normal energy metabolism</p> <p>Contributes to cell protection from free radical damage</p> <p>Contributes to normal connective tissue structure</p>	<p>Children</p>		<p>The food must meet the general claim conditions for making a nutrition content claim about manganese</p>
Magnesium	<p>Contributes to normal energy metabolism</p> <p>Necessary for normal electrolyte balance</p> <p>Necessary for normal nerve and muscle function</p> <p>Necessary for teeth and bone structure</p> <p>Contributes to a reduction of tiredness and fatigue</p> <p>Necessary for normal protein synthesis</p> <p>Contributes to normal psychological function</p>			<p>The food must meet the general claim conditions for making a nutrition content claim about magnesium</p>

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Magnesium	Necessary for normal cell division	Children		
	Contributes to normal growth and development			
Molybdenum	Contributes to normal sulphur amino acid metabolism			The food must meet the general claim conditions for making a nutrition content claim about molybdenum
Phosphorus	Necessary for normal teeth and bone structure			The food must meet the general claim conditions for making a nutrition content claim about phosphorus
	Necessary for the normal cell membrane structure			
	Necessary for normal energy metabolism			
	Contributes to normal growth and development	Children		
Selenium	Necessary for normal immune system function			The food must meet the general claim conditions for making a nutrition content claim about selenium
	Necessary for the normal utilisation of iodine in the production of thyroid hormones			
	Necessary for cell protection from some types of free radical damage			
	Contributes to normal sperm production			

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Selenium	<p>Contributes to the maintenance of normal hair and nails</p> <hr/> <p>Contributes to normal growth and development</p>	Children		
Zinc	<p>Necessary for normal immune system function</p> <p>Necessary for normal cell division</p> <p>Contributes to normal skin structure and wound healing</p> <hr/> <p>Contributes to normal growth and development</p> <hr/> <p>Contributes to normal acid-base metabolism</p> <p>Contributes to normal carbohydrate metabolism</p> <p>Contributes to normal cognitive function</p> <p>Contributes to normal fertility and reproduction</p> <p>Contributes to normal macronutrient metabolism</p>	Children		The food must meet the general conditions for making a nutrition content claim about zinc

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 1—Minerals

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Zinc	<p>Contributes to normal metabolism of fatty acids</p> <p>Contributes to normal metabolism of vitamin A</p> <p>Contributes to normal protein synthesis</p> <p>Contributes to the maintenance of normal bones</p> <p>Contributes to the maintenance of normal hair and nails</p> <p>Contributes to the maintenance of normal testosterone levels in the blood</p> <p>Contributes to cell protection from free radicals</p> <p>Contributes to the maintenance of normal vision</p>			

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 2—Vitamins

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Biotin	<p>Contributes to normal fat metabolism and energy production</p> <p>Contributes to normal functioning of the nervous system</p> <p>Contributes to normal macronutrient metabolism</p> <p>Contributes to normal psychological function</p> <p>Contributes to maintenance of normal hair</p> <p>Contributes to maintenance of normal skin and mucous membranes</p>			The food must meet the general conditions for making a nutrition content claim about biotin
Choline	<p>Contributes to normal homocysteine metabolism</p> <p>Contributes to normal fat metabolism</p> <p>Contributes to the maintenance of normal liver function</p>			The food must contain no less than 50 mg choline/serve

Schedule 4 Nutrition, health and related claims

Section S4—5 Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 2—Vitamins

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Folate	Necessary for normal blood formation Necessary for normal cell division Contributes to normal growth and development Contributes to maternal tissue growth during pregnancy Contributes to normal amino acid synthesis Contributes to normal homocysteine metabolism Contributes to normal psychological function Contributes to normal immune system function Contributes to the reduction of tiredness and fatigue	Children		The food must meet the general conditions for making a nutrition content claim about folate

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Beta-glucan	Reduces dietary and biliary cholesterol absorption		Diet low in saturated fatty acids Diet containing 3 g of beta-glucan per day	The food must contain: (a) one or more of the following oat or barley foods: (i) oat bran; or (ii) wholegrain oats; or (iii) wholegrain barley; and (b) at least 1 g per serving of beta-glucan from the foods listed in (a)
*Carbohydrate	Contributes energy for normal metabolism			(a) *Carbohydrate must contribute at least 55% of the energy content of the food; or (b) the food must: (i) be a formulated meal replacement or a formulated supplementary food; and (ii) have a maximum 10% of *carbohydrate content from sugars
	Contributes energy for normal metabolism	Young children aged 1-3 years		The food must: (a) be a formulated supplementary food for young children; and (b) have a maximum 10% of *carbohydrate content from sugars

Schedule 4 Nutrition, health and related claims

Section S4—5

Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 3—Other

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Dietary fibre	Contributes to regular laxation			The food must meet the general conditions for making a nutrition content claim about dietary fibre
Eicosa-pentaenoic acid (EPA) and Docosa-hexaenoic acid (DHA) (but not Omega-3)	Contributes to heart health		Diet containing 500 mg of EPA and DHA per day	(a) The food must contain a minimum of 50 mg EPA and DHA combined in a serving of food; and (b) other than for fish or fish products with no added saturated fatty acids—the food contains: <ul style="list-style-type: none"> (i) as a proportion of the total fatty acid content, no more than 28% *saturated fatty acids and trans fatty acids; or (ii) no more than 5 g per 100 g saturated fatty acids and trans fatty acids.
Energy	Contributes energy for normal metabolism			The food must contain a minimum of 420 kJ of energy/serving
	Contributes energy for normal metabolism	Young children aged 1-3 years		The food must be a formulated supplementary food for young children

Conditions for permitted general level health claims

Conditions for permitted general level health claims

Part 3—Other

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>	<i>Column 4</i>	<i>Column 5</i>
<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Energy	Contributes to weight loss or weight maintenance		Diet reduced in energy and including regular exercise	The food: (a) meets the conditions for making a ‘diet’ nutrition content claim; or (b) is a formulated meal replacement and contains no more than 1200 kJ per serving
Live yoghurt cultures	Improves lactose digestion	Individuals who have difficulty digesting lactose		The food must: (a) be yoghurt or fermented milk; and (b) contain at least 108 cfu/g (<i>Lactobacillus delbrueckii</i> subsp. <i>bulgaricus</i> and <i>Streptococcus thermophilus</i>)
*Phytosterols, phytostanols and their esters	Reduces dietary and biliary cholesterol absorption		Diet low in saturated fatty acids Diet containing 2 g of *phytosterols, phytostanols and their esters per day	The food must: (a) meet the relevant conditions specified in the table to section S25—2; and (b) contain a minimum of 0.8 g *total plant sterol equivalents content per serving

<i>Food or property of food</i>	<i>Specific health effect</i>	<i>Relevant population</i>	<i>Dietary context</i>	<i>Conditions</i>
Potassium	Necessary for normal water and electrolyte balance			The food contains no less than 200 mg of potassium/serving
	Contributes to normal growth and development	Children		
	Contributes to normal functioning of the nervous system			
	Contributes to normal muscle function			
Protein	Necessary for tissue building and repair			The food must meet the general conditions for making a nutrition content claim about protein
	Necessary for normal growth and development of bone	Children and adolescents aged 4 years and over		
	Contributes to the growth of muscle mass			
	Contributes to the maintenance of muscle mass			
	Contributes to the maintenance of normal bones			
	Necessary for normal growth and development	Children aged 4 years and over		
	Necessary for normal growth and development	Infants aged 6 months to 12 months		The food must be a food for infants and comply with subsection 2.9.2—8(2).

Imfeld, Volume 11, Monographs in Oral Science, 1983</p>

Schedule 4 Nutrition, health and related claims

Section S4—6 Nutrient profiling scoring criterion

S4—6 Nutrient profiling scoring criterion

For this Code, the *NPSC (nutrient profiling scoring criterion) is:

NPSC		
	Column 1	Column 2
<i>Category score</i>	<i>NPSC category</i>	<i>The *nutrient profiling score</i>
		<i>must be less than ...</i>
1	Beverages	1
2	Any food other than those included in category 1 or 3	4
3	(a) Cheese or processed cheese with calcium content greater than 320 mg/100 g; or (b) edible oil; or (c) edible oil spread; or (d) margarine; or (e) butter.	28

Note With regard to NPSC category 3(a), all other cheeses (with calcium content of less than or equal to 320 mg/100 g) are classified as an NPSC category 2 food.

Schedule 5 Nutrient profiling scoring method

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

This Standard, together with Schedule 4 and Schedule 6, relates to Standard 1.2.7 (nutrition, health and related claims), and sets out information for the purpose of that Standard.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S5—1

Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 5 — Nutrient profiling scoring method*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S5—2

Steps in determining a nutrient profiling score

- (1) For a food in Category 1 in the table to section S4—6, calculate the food's:
 - (a) baseline points in accordance with section S5—3; then
 - (b) fruit and vegetable points in accordance with section S5—4 (V points); then
 - (c) protein points in accordance with section S5—5 (P points); then
 - (d) final score in accordance with section S5—7 (the nutrient profile score).

Note Category 1 foods do not score fibre (F) points.
- (2) For a food in Category 2 in the table to section S4—6, calculate the food's:
 - (a) baseline points in accordance with section S5—3; then
 - (b) fruit and vegetable points in accordance with section S5—4 (V points); then
 - (c) protein points in accordance with section S5—5 (P points); then
 - (d) fibre points in accordance with section S5—6 (F points); then
 - (e) final score in accordance with section S5—7 (the nutrient profile score).
- (3) For a food in Category 3 in the table to section S4—6, calculate the food's:
 - (a) baseline points in accordance with section S5—3; then
 - (b) fruit and vegetable points in accordance with section S5—4 (V points); then
 - (c) protein points in accordance with section S5—5 (P points); then

Schedule 5 Nutrient profiling scoring method

Section S5—3

Baseline Points

- (d) fibre points in accordance with section S5—6 (F points); then
- (e) final score in accordance with section S5—7 (the nutrient profile score).

S5—3 **Baseline Points**

Calculate the baseline points for the content of energy and each nutrient in a *unit quantity of the food (based on the units used in the nutrition information panel) using the following equation:

$$T = AEC + ASFA + ATS + AS$$

where:

T is the total baseline points.

AEC is the number of points for average energy content:

- (a) for category 1 or category 2 foods—in table 1; and
- (b) for category 3 foods—in table 2.

ASFA is the number of points for average saturated fatty acids:

- (a) for category 1 or category 2 foods—in table 1; and
- (b) for category 3 foods—in table 2.

ATS is the number of points for average total sugars

- (a) for category 1 or category 2 foods—in table 1; and
- (b) for category 3 foods—in table 2.

AS is the number of points for average sodium:

- (a) for category 1 or category 2 foods—in table 1; and
- (b) for category 3 foods—in table 2.

Table 1—Baseline points for Category 1 or 2 foods

<i>Baseline points</i>	<i>Average energy content (kJ) per unit quantity</i>	<i>Average saturated fatty acids (g) per unit quantity</i>	<i>Average total sugars (g) per unit quantity</i>	<i>Average sodium (mg) per unit quantity</i>
0	≤ 335	≤ 1.0	≤ 5.0	≤ 90
1	> 335	> 1.0	> 5.0	> 90
2	> 670	> 2.0	> 9.0	> 180
3	> 1 005	> 3.0	> 13.5	> 270
4	> 1 340	> 4.0	> 18.0	> 360
5	> 1 675	> 5.0	> 22.5	> 450
6	> 2 010	> 6.0	> 27.0	> 540
7	> 2 345	> 7.0	> 31.0	> 630
8	> 2 680	> 8.0	> 36.0	> 720
9	> 3 015	> 9.0	> 40.0	> 810
10	> 3 350	> 10.0	> 45.0	> 900

Table 2—Baseline Points for Category 3 Foods

<i>Baseline points</i>	<i>Average energy content (kJ) per unit quantity</i>	<i>Average saturated fatty acids (g) per unit quantity</i>	<i>Average total sugars (g) per unit quantity</i>	<i>Average sodium (mg) per unit quantity</i>
0	≤ 335	≤ 1.0	≤ 5.0	≤ 90
1	> 335	> 1.0	> 5.0	> 90
2	> 670	> 2.0	> 9.0	> 180
3	> 1 005	> 3.0	> 13.5	> 270
4	> 1 340	> 4.0	> 18.0	> 360
5	> 1 675	> 5.0	> 22.5	> 450
6	> 2 010	> 6.0	> 27.0	> 540
7	> 2 345	> 7.0	> 31.0	> 630
8	> 2 680	> 8.0	> 36.0	> 720
9	> 3 015	> 9.0	> 40.0	> 810
10	> 3 350	> 10.0	> 45.0	> 900
11	> 3 685	> 11.0		> 990
12		> 12.0		> 1 080
13		> 13.0		> 1 170
14		> 14.0		> 1 260
15		> 15.0		> 1 350
16		> 16.0		> 1 440
17		> 17.0		> 1 530
18		> 18.0		> 1 620
19		> 19.0		> 1 710
20		> 20.0		> 1 800
21		> 21.0		> 1 890
22		> 22.0		> 1 980
23		> 23.0		> 2 070
24		> 24.0		> 2 160

Table 2—Baseline Points for Category 3 Foods

<i>Baseline points</i>	<i>Average energy content (kJ) per unit quantity</i>	<i>Average saturated fatty acids (g) per unit quantity</i>	<i>Average total sugars (g) per unit quantity</i>	<i>Average sodium (mg) per unit quantity</i>
25		> 25.0		> 2 250
26		> 26.0		> 2 340
27		> 27.0		> 2 430
28		> 28.0		> 2 520
29		> 29.0		> 2 610
30		> 30.0		> 2 700

Schedule 5 Nutrient profiling scoring method

Section S5—4

Fruit and vegetable points (V points)

S5—4 Fruit and vegetable points (V points)

- (1) V points can be scored for fruits, vegetables, nuts and legumes including coconut, spices, herbs, fungi, seeds and algae (*fvnl*) including:
- (a) *fvnl* that are fresh, cooked, frozen, canned, pickled or preserved; and
 - (b) *fvnl* that have been peeled, diced or cut (or otherwise reduced in size), puréed or dried.

- (2) V points cannot be scored for:

- (a) a constituent, extract or isolate of a food mentioned in subsection (1); or
- (b) cereal grains mentioned as a class of food in Schedule 22.

Note An example of a constituent, extract or isolate under paragraph (a) is peanut oil derived from peanuts. In this example, peanut oil would not be able to score V points. Other examples of extracts or isolates are fruit pectin and de-ionised juice.

- (3) Despite subsection (2), V points may be scored for:

- (a) fruit juice or vegetable juice including concentrated juices and purees;
- (b) coconut flesh (which is to be scored as a nut), whether juiced, dried or desiccated, but not processed coconut products such as coconut milk, coconut cream or coconut oil; and
- (c) the water in the centre of the coconut.

- (4) Calculate the percentage of *fvnl* in the food in accordance with the appropriate method in Standard 1.2.10 and not the form of the food determined in accordance with section 1.2.7—7.

Note The effect of subsection (4) is to make it a requirement to determine the percentage of *fvnl* using only the appropriate method in Standard 1.2.10. For this paragraph only, it is not necessary to consider the form of the food determined by section 1.2.7—7.

- (5) Use Column 1 of Table 3 if the fruit or vegetables in the food are all concentrated (including dried).

Note For example, if dried fruit and tomato paste are the components of the food for which V points can be scored, column 1 should be used.

- (6) Use Column 2 of Table 3 if:

- (a) there are no concentrated (or dried) fruit or vegetables in the food; or
- (b) the percentages of all concentrated ingredients are calculated based on the ingredient when reconstituted (according to subsection 1.2.10—4(3) or subsection 1.2.10—4(4)); or
- (c) the food contains a mixture of concentrated fruit or vegetables and non-concentrated *fvnl* sources (after following the equation mentioned in subsection (8)); or
- (d) the food is potato crisps or a similar low moisture vegetable product.

Schedule 5 Nutrient profiling scoring method

Section S5—5 Protein points (P points)

- (7) Work out the V points (to a maximum of 8) in accordance with Table 3.

Table 3—V Points

	Column 1	Column 2
<i>Points</i>	<i>% concentrated fruit or vegetables</i>	<i>% fvnl</i>
0	< 25	≤ 40
1	≥ 25	> 40
2	≥ 43	> 60
5	≥ 67	> 80
8	= 100	= 100

- (8) If the food contains a mixture of concentrated fruit or vegetables and non-concentrated fvnl sources, the percentage of total fvnl must be worked out as follows:

$$P = \frac{NC + (2 \times C)}{NC + (2 \times C) + NI} \times \frac{100}{1}$$

where:

NC is the percentage of non-concentrated fvnl ingredients in the food determined using the appropriate calculation method in Standard 1.2.10.

C is the percentage of concentrated fruit or vegetable ingredients in the food determined using the appropriate calculation method in Standard 1.2.10.

NI is the percentage of non-fvnl ingredients in the food determined using the appropriate calculation method outlined in Standard 1.2.10.

- (9) For the equation in subsection (8), potato crisps and similar low moisture vegetable products are taken to be non-concentrated.

S5—5 Protein points (P points)

- (1) Use Table 4 to determine the 'P points' scored, depending on the amount of protein in the food. A maximum of five points can be awarded.
- (2) Foods that score ≥ 13 baseline points are not permitted to score points for protein unless they score five or more V points.

Table 4—P Points

<i>Points</i>	<i>Protein (g) per 100 g or 100 mL</i>
0	≤ 1.6
1	> 1.6
2	≥ 3.2
3	> 4.8
4	> 6.4
5	> 8.0

Schedule 5 Nutrient profiling scoring method

Section S5—6

Fibre points (F points)

S5—6 Fibre points (F points)

- (1) Use Table 5 to determine the ‘F points’ scored, depending on the amount of *dietary fibre in the food. A maximum of five points can be awarded.
- (2) The prescribed method of analysis to determine total dietary fibre is outlined in S11—4.

Table 5—F Points

<i>Points</i>	<i>Dietary fibre (g) per 100 g or 100 mL</i>
0	≤0.9
1	>0.9
2	>1.9
3	>2.8
4	>3.7
5	>4.7

- (3) Category 1 foods do not score F points.

S5—7 Calculating the final score

Calculate the final score using the following equation:

$$F = BP - VP - PP - FP$$

where:

F is the final score.

BP is the number of baseline points.

VP is the number of V points.

PP is the number of P points.

FP is the number of F points.

Schedule 6 Required elements of a systematic review

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

This Standard, together with Schedule 4 and Schedule 5, relates to Standard 1.2.7 (nutrition, health and related claims), and sets out information for the purpose of that Standard.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S6—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 6 — Required elements of a systematic review*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S6—2 Required elements of a systematic review

For sections 1.2.7—18, 1.2.7—19 and 1.2.7—20, a systematic review must include the following elements:

- (a) A description of the food or property of food, the *health effect and the proposed relationship between the food or *property of food and the health effect.
- (b) A description of the search strategy used to capture the scientific evidence relevant to the proposed relationship between the food or property of food and the health effect, including the inclusion and exclusion criteria.
- (c) A final list of studies based on the inclusion and exclusion criteria. Studies in humans are essential. A relationship between a food or property of food and the health effect cannot be established from animal and in vitro studies alone.
- (d) A table with key information from each included study. This must include information on:
 - (i) the study reference; and
 - (ii) the study design; and
 - (iii) the objectives; and
 - (iv) the sample size in the study groups and loss to follow-up or non-response; and
 - (v) the participant characteristics; and

Schedule 6 Required elements of a systematic review

Section S6—2

Required elements of a systematic review

- (vi) the method used to measure the food or property of food including amount consumed; and
 - (vii) confounders measured; and
 - (viii) the method used to measure the health effect; and
 - (ix) the study results, including effect size and statistical significance; and
 - (x) any adverse effects.
- (e) An assessment of the quality of each included study based on consideration of, as a minimum:
- (i) a clearly stated hypothesis; and
 - (ii) minimisation of bias; and
 - (iii) adequate control for confounding; and
 - (iv) the study participants' background diets and other relevant lifestyle factors; and
 - (v) study duration and follow-up adequate to demonstrate the health effect; and
 - (vi) the statistical power to test the hypothesis.
- (f) An assessment of the results of the studies as a group by considering whether:
- (i) there is a consistent association between the food or property of food and the health effect across all high quality studies; and
 - (ii) there is a causal association between the consumption of the food or property of food and the health effect that is independent of other factors (with most weight given to well-designed experimental studies in humans); and
 - (iii) the proposed relationship between the food or property of food and the health effect is biologically plausible; and
 - (iv) the amount of the food or property of food to achieve the health effect can be consumed as part of a normal diet of the Australian and New Zealand populations.
- (g) A conclusion based on the results of the studies that includes:
- (i) whether a causal relationship has been established between the food or property of food and the health effect based on the totality and weight of evidence; and
 - (ii) where there is a causal relationship between the food or property of food and the health effect:
 - (A) the amount of the food or property of food required to achieve the health effect; and

Schedule 6 Required elements of a systematic review

Section S6—2

Required elements of a systematic review

- (B) whether the amount of the food or property of food to achieve the health effect is likely to be consumed in the diet of the Australian and New Zealand populations or by the target population group, where relevant.
 - (h) An existing systematic review may be used if it is updated to include:
 - (i) the required elements (a) to (f) above for any relevant scientific data not included in the existing systematic review; and
 - (ii) the required element (g) above incorporating the new relevant scientific data with the conclusions of the existing systematic review.
-

Schedule 7 Food additive class names (for statement of ingredients)

Section S7—1

Name

Schedule 7 Food additive class names (for statement of ingredients)

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.4 is a standard for the information requirements relating to the statement of ingredients, and contains provisions relating to, among other things, substances used as food additives. This Standard lists classes of food additives for paragraph 1.2.4—7(1)(a).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S7—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 7 — Food additive class names (for statement of ingredients)*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S7—2 Food additive class names

For paragraph 1.2.4—7(1)(a), the class names of food additives are as follows:

Class names of food additives

Prescribed class names	Optional class names
acid	antifoaming agent
acidity regulator	emulsifying salt
alkali	enzyme
anticaking agent	mineral salt
antioxidant	modified starch
bulking agent	vegetable gum
colour	
emulsifier	
firming agent	
flavour enhancer	
foaming agent	
gelling agent	
glazing agent	
humectant	
preservative	
raising agent	
stabiliser	
sweetener	
thickener	

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—1

Name

Schedule 8 Food additive names and code numbers (for statement of ingredients)

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.4 is a standard for the information requirements relating to the statement of ingredients, and contains provisions relating to, among other things, substances used as food additives. This Standard lists food additive numbers for the definition of the term **code number** in section 1.1.2—2, and names and code numbers for subsection 1.2.4—7(1).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S8—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 8 — Food additive names and code numbers (for statement of ingredients)*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S8—2 Food additive names and code numbers

For the definition of **code number** in section 1.1.2—2 and for subsection 1.2.4—7(1), the food additive names and *code numbers are as listed in the following table (first in alphabetical order, then in numerical order):

Food additive names—alphabetical listing			
Acacia or gum Arabic	414	Alkaline treated starch	1402
Acesulphame potassium	950	Alkanet or Alkannin	103
Acetic acid, glacial	260	Allura red AC	129
Acetic and fatty acid esters of glycerol	472a	Aluminium	173
Acetylated distarch adipate	1422	Aluminium silicate	559
Acetylated distarch phosphate	1414	Amaranth	123
Acetylated oxidised starch	1451	Ammonium acetate	264
Acid treated starch	1401	Ammonium adipates	359
Adipic acid	355	Ammonium alginate	403
Advantame	969	Ammonium carbonate	503
Agar	406	Ammonium chloride	510
Alginic acid	400	Ammonium citrate	380
Alitame	956	Ammonium fumarate	368

Schedule 8 Food additive names and code numbers
(for statement of ingredients)

Section S8—2	Food additive names and code numbers	
Ammonium hydrogen carbonate	503	Calcium gluconate 578
Ammonium lactate	328	Calcium glutamate 623
Ammonium malate	349	Calcium hydroxide 526
Ammonium phosphate, dibasic	342	Calcium lactate 327
Ammonium phosphate, monobasic or Ammonium dihydrogen phosphates	342	Calcium lactylate 482
Ammonium salts of phosphatidic acid	442	Calcium lignosulphonate (40-65) 1522
α -Amylase	1100	Calcium malate 352
Annatto extracts	160b	Calcium oleyl lactylate 482
Anthocyanins or Grape skin extract or Blackcurrant extract	163	Calcium oxide 529
Arabinogalactan or larch gum	409	Calcium phosphate, dibasic or calcium hydrogen phosphate 341
Ascorbic acid	300	Calcium phosphate, monobasic or calcium dihydrogen phosphate 341
Ascorbyl palmitate	304	Calcium phosphate, tribasic 341
Aspartame	951	Calcium propionate 282
Aspartame-acesulphame salt	962	Calcium silicate 552
Azorubine or Carmoisine	122	Calcium sorbate 203
		Calcium stearoyl lactylate 482
b-apo-8'-Carotenoic acid methyl or ethyl ester		Calcium sulphate 516
	160f	Calcium tartrate 354
b-apo-8'-Carotenal	160e	Caramel I 150a
Beeswax, white and yellow	901	Caramel II 150b
Beet red	162	Caramel III 150c
Bentonite	558	Caramel IV 150d
Benzoic acid	210	Carbon blacks or Vegetable carbon 153
Bleached starch	1403	Carbon dioxide 290
Bone phosphate	542	Carnauba wax 903
Brilliant black BN or Brilliant Black PN	151	Carotene 160a
Brilliant Blue FCF	133	Carrageenan 407
Brown HT	155	Cellulose microcrystalline 460
Butane	943a	Cellulose, powdered 460
Butylated hydroxyanisole	320	Chlorophyll 140
Butylated hydroxytoluene	321	Chlorophyll-copper complex 141
		Chlorophyllin copper complex, sodium and potassium salts 141
Calcium acetate	263	Choline salts 1001
Calcium alginate	404	Citric acid 330
Calcium aluminium silicate	556	Citric and fatty acid esters of glycerol 472c
Calcium ascorbate	302	Cochineal or carmines or carminic acid 120
Calcium benzoate	213	Cupric sulphate 519
Calcium carbonate	170	Curcumin or turmeric 100
Calcium chloride	509	Cyclamate or calcium cyclamate or sodium cyclamate 952
Calcium citrate	333	
Calcium disodium ethylenediaminetetraacetate or calcium disodium EDTA	385	
Calcium fumarate	367	Dextrin roasted starch 1400

Schedule 8 Food additive names and code numbers
(for statement of ingredients)

Section S8—2		Food additive names and code numbers	
Diacetyltartaric and fatty acid esters of glycerol		Isomalt	953
	472e	Karaya gum	416
Diocetyl sodium sulphosuccinate	480	Kryptoxanthin	161c
Disodium-5'-ribonucleotides	635		
Disodium-5'-guanylate	627	L-cysteine monohydrochloride	920
Disodium-5'-inosinate	631	L-Leucine	641
Distarch phosphate	1412	Lactic acid	270
Dodecyl gallate	312	Lactic and fatty acid esters of glycerol	472b
		Lactitol	966
Enzyme treated starches	1405	Lecithin	322
Erythorbic acid	315	Lipases	1104
Erythritol	968	Locust bean gum or carob bean gum	410
Erythrosine	127	Lutein	161b
Ethyl lauroyl arginate	243	Lycopene	160d
Ethyl maltol	637	Lysozyme	1105
Fatty acid salts of aluminium, ammonia, calcium, magnesium, potassium and sodium	470	Magnesium carbonate	504
Fast green FCF	143	Magnesium chloride	511
Ferric ammonium citrate	381	Magnesium gluconate	580
Ferrous gluconate	579	Magnesium glutamate	625
Flavoxanthin	161a	Magnesium lactate	329
Fumaric acid	297	Magnesium oxide	530
Gellan gum	418	Magnesium phosphate, dibasic	343
Glucono δ -lactone or Glucono delta-lactone	575	Magnesium phosphate, monobasic	343
		Magnesium phosphate, tribasic	343
Glucose oxidase	1102	Magnesium silicate or Talc	553
L-glutamic acid	620	Magnesium sulphate	518
Glycerin or glycerol	422	Malic acid	296
Glycerol esters of wood rosins	445	Maltitol and maltitol syrup or hydrogenated glucose syrup	965
Glycine	640	Maltol	636
Gold	175	Mannitol	421
Green S	142	Metatartaric acid	353
Guar gum	412	Methyl ethyl cellulose	465
		Methyl cellulose	461
4-hexylresorcinol	586	Methylparaben or Methyl-p-hydroxy-benzoate	218
Hydrochloric acid	507		
Hydroxypropyl cellulose	463	Mixed tartaric, acetic and fatty acid esters of glycerol or tartaric, acetic and fatty acid esters of glycerol (mixed)	472f
Hydroxypropyl distarch phosphate	1442		
Hydroxypropyl methylcellulose	464	Mono- and di-glycerides of fatty acids	471
Hydroxypropyl starch	1440	Monoammonium L-glutamate	624
		Monopotassium L-glutamate	622
Indigotine	132	Monosodium L-glutamate or MSG	621
Iron oxide	172	Monostarch phosphate	1410
Isobutane	943b		

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2		Food additive names and code numbers	
		Potassium dihydrogen citrate	332
Natamycin or pimaricin	235	Potassium ferrocyanide	536
Neotame	961	Potassium fumarate	366
Nisin	234	Potassium gluconate	577
Nitrogen	941	Potassium lactate	326
Nitrous oxide	942	Potassium malate	351
		Potassium metabisulphite	224
Octafluorocyclobutane	946	Potassium nitrate	252
Octyl gallate	311	Potassium nitrite	249
Oxidised polyethylene	914	Potassium phosphate, dibasic	340
Oxidised starch	1404	Potassium phosphate, monobasic	340
		Potassium phosphate, tribasic	340
Paprika oleoresins	160c	Potassium polymetaphosphate	452
Pectin	440	Potassium propionate	283
Petrolatum or petroleum jelly	905b	Potassium pyrophosphate	450
Phosphated distarch phosphate	1413	Potassium silicate	560
Phosphoric acid	338	Potassium sodium tartrate	337
Polydextrose	1200	Potassium sorbate	202
Polydimethylsiloxane or Dimethylpolysiloxane		Potassium sulphate	515
	900a	Potassium sulphite	225
Polyethylene glycol 8000	1521	Potassium tartrate or Potassium acid tartrate	
Polyglycerol esters of fatty acids	475		336
Polyglycerol esters of interesterified ricinoleic acid	476	Potassium tripolyphosphate	451
Polyoxyethylene (40) stearate	431	Processed eucheuma seaweed	407a
Polysorbate 60 or Polyoxyethylene (20) sorbitan monostearate	435	Propane	944
Polysorbate 65 or Polyoxyethylene (20) sorbitan tristearate	436	Propionic acid	280
Polysorbate 80 or Polyoxyethylene (20) sorbitan monooleate	433	Propyl gallate	310
Polyvinylpyrrolidone	1201	Propylene glycol	1520
Ponceau 4R	124	Propylene glycol alginate	405
Potassium acetate or potassium diacetate	261	Propylene glycol mono - and di-esters or Propylene glycol esters of fatty acids	477
Potassium adipate	357	Propylparaben or Propyl-p-hydroxy-benzoate	216
Potassium alginate	402	Proteases (papain, bromelain, ficin)	1101
Potassium aluminium silicate	555	Quillaia extract (type 1)	999(i)
Potassium ascorbate	303	Quillaia extract (type 2)	999(ii)
Potassium benzoate	212	Quinoline yellow	104
Potassium bicarbonate	501	Rhodoxanthin	161f
Potassium bisulphite	228	Riboflavin	101
Potassium carbonate	501	Riboflavin-5'-phosphate sodium	101
Potassium chloride	508	Rubixanthin	161d
Potassium citrate	332		

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2		Food additive names and code numbers	
Saccharin or calcium saccharine or sodium saccharine or potassium saccharine	954	Sodium tartrate	335
Saffron or crocetin or crocin	164	Sodium tripolyphosphate	451
Shellac	904	Sorbic acid	200
Silicon dioxide, amorphous	551	Sorbitan monostearate	491
Silver	174	Sorbitan tristearate	492
Sodium acetate	262	Sorbitol or sorbitol syrup	420
Sodium acid pyrophosphate	450	Stannous chloride	512
Sodium alginate	401	Starch acetate	1420
Sodium aluminium phosphate	541	Starch sodium octenylsuccinate	1450
Sodium aluminosilicate	554	Stearic acid or fatty acid	570
Sodium ascorbate	301	Steviol glycosides	960
Sodium benzoate	211	Succinic acid	363
Sodium bicarbonate	500	Sucralose	955
Sodium bisulphite	222	Sucrose acetate isobutyrate	444
Sodium carbonate	500	Sucrose esters of fatty acids	473
Sodium carboxymethylcellulose	466	Sulphur dioxide	220
Sodium citrate	331	Sunset yellow FCF	110
Sodium diacetate	262		
Sodium dihydrogen citrate	331	Tannic acid or tannins	181
Sodium erythorbate	316	Tara gum	417
Sodium ferrocyanide	535	Tartaric acid	334
Sodium fumarate	365	Tartrazine	102
Sodium gluconate	576	<i>tert</i> -Butylhydroquinone	319
Sodium hydrogen malate	350	Thaumatococcus	957
Sodium hydrosulphite	-	Titanium dioxide	171
Sodium lactate	325		
Sodium lactylate	481	α -Tocopherol	307
Sodium malate	350	δ -Tocopherol	309
Sodium metabisulphite	223	γ -Tocopherol	308
Sodium metaphosphate, insoluble	452	Tocopherols concentrate, mixed	307b
Sodium nitrate	251	Tragacanth gum	413
Sodium nitrite	250	Triacetin	1518
Sodium oleyl lactylate	481	Triammonium citrate	380
Sodium phosphate, dibasic	339	Triethyl citrate	1505
Sodium phosphate, monobasic	339		
Sodium phosphate, tribasic	339	Violoxanthin	161e
Sodium polyphosphates, glassy	452		
Sodium propionate	281	Xanthan gum	415
Sodium pyrophosphate	450	Xylitol	967
Sodium sorbate	201		
Sodium stearoyl lactylate	481	Yeast mannoproteins	455
Sodium sulphate	514		
Sodium sulphite	221		

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2

Food additive names and code numbers

Food additive names—numerical listing

-	Sodium hydrosulphite	162	Beet red
100	Curcumin or turmeric	163	Anthocyanins or Grape skin extract or Blackcurrant extract
101	Riboflavin	164	Saffron or crocetin or crocin
101	Riboflavin-5'-phosphate sodium	170	Calcium carbonate
102	Tartrazine	171	Titanium dioxide
103	Alkanet or Alkannin	172	Iron oxide
104	Quinoline yellow	173	Aluminium
110	Sunset yellow FCF	174	Silver
120	Cochineal or carmines or carminic acid	175	Gold
122	Azorubine or Carmoisine	181	Tannic acid or tannins
123	Amaranth		
124	Ponceau 4R		
127	Erythrosine	200	Sorbic acid
129	Allura red AC	201	Sodium sorbate
132	Indigotine	202	Potassium sorbate
133	Brilliant Blue FCF	203	Calcium sorbate
140	Chlorophyll	210	Benzoic acid
141	Chlorophyll-copper complex	211	Sodium benzoate
141	Chlorophyllin copper complex, sodium and potassium salts	212	Potassium benzoate
142	Green S	213	Calcium benzoate
143	Fast green FCF	216	Propylparaben or Propyl-p-hydroxybenzoate
150a	Caramel I	218	Methylparaben or Methyl-p-hydroxybenzoate
150b	Caramel II	220	Sulphur dioxide
150c	Caramel III	221	Sodium sulphite
150d	Caramel IV	222	Sodium bisulphite
151	Brilliant black BN or Brilliant Black PN	223	Sodium metabisulphite
153	Carbon blacks or Vegetable carbon	224	Potassium metabisulphite
155	Brown HT	225	Potassium sulphite
160a	Carotene	228	Potassium bisulphite
160b	Annatto extracts	234	Nisin
160c	Paprika oleoresins	235	Natamycin or pimaricin
160d	Lycopene	243	Ethyl lauroyl arginate
160e	b-apo-8'-Carotenal	249	Potassium nitrite
160f	b-apo-8'-Carotenoic acid methyl or ethyl ester	250	Sodium nitrite
161a	Flavoxanthin	251	Sodium nitrate
161b	Lutein	252	Potassium nitrate
161c	Kryptoxanthin	260	Acetic acid, glacial
161d	Rubixanthin	261	Potassium acetate or potassium diacetate
161e	Violoanthin	262	Sodium acetate
161f	Rhodoxanthin	262	Sodium diacetate
		263	Calcium acetate

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2	Food additive names and code numbers	
264	Ammonium acetate	339 Sodium phosphate, monobasic
270	Lactic acid	339 Sodium phosphate, tribasic
280	Propionic acid	340 Potassium phosphate, dibasic
281	Sodium propionate	340 Potassium phosphate, monobasic
282	Calcium propionate	340 Potassium phosphate, tribasic
283	Potassium propionate	341 Calcium phosphate, dibasic or calcium hydrogen phosphate
290	Carbon dioxide	
296	Malic acid	341 Calcium phosphate, monobasic or calcium dihydrogen phosphate
297	Fumaric acid	341 Calcium phosphate, tribasic
300	Ascorbic acid	342 Ammonium phosphate, dibasic
301	Sodium ascorbate	342 Ammonium phosphate, monobasic or Ammonium dihydrogen phosphates
302	Calcium ascorbate	
303	Potassium ascorbate	343 Magnesium phosphate, dibasic
304	Ascorbyl palmitate	343 Magnesium phosphate, monobasic
307b	Tocopherols concentrate, mixed	343 Magnesium phosphate, tribasic
307	α-Tocopherol	349 Ammonium malate
308	δ-Tocopherol	350 Sodium hydrogen malate
309	γ-Tocopherol	350 Sodium malate
310	Propyl gallate	351 Potassium malate
311	Octyl gallate	352 Calcium malate
312	Dodecyl gallate	353 Metatartaric acid
315	Erythorbic acid	354 Calcium tartrate
316	Sodium erythorbate	355 Adipic acid
319	<i>tert</i> -Butylhydroquinone	357 Potassium adipate
320	Butylated hydroxyanisole	359 Ammonium adipates
321	Butylated hydroxytoluene	363 Succinic acid
322	Lecithin	365 Sodium fumarate
325	Sodium lactate	366 Potassium fumarate
326	Potassium lactate	367 Calcium fumarate
327	Calcium lactate	368 Ammonium fumarate
328	Ammonium lactate	380 Ammonium citrate
329	Magnesium lactate	380 Triammonium citrate
330	Citric acid	381 Ferric ammonium citrate
331	Sodium citrate	385 Calcium disodium ethylenediaminetetraacetate or calcium disodium EDTA
331	Sodium dihydrogen citrate	
332	Potassium citrate	
332	Potassium dihydrogen citrate	
333	Calcium citrate	400 Alginic acid
334	Tartaric acid	401 Sodium alginate
335	Sodium tartrate	402 Potassium alginate
336	Potassium tartrate or Potassium acid tartrate	403 Ammonium alginate
		404 Calcium alginate
337	Potassium sodium tartrate	405 Propylene glycol alginate
338	Phosphoric acid	406 Agar
339	Sodium phosphate, dibasic	407 Carrageenan

Schedule 8 Food additive names and code numbers
(for statement of ingredients)

Section S8—2	Food additive names and code numbers	
407a	Processed eucheuma seaweed	472c Citric and fatty acid esters of glycerol
409	Arabinogalactan or larch gum	472e Diacetyltartaric and fatty acid esters of glycerol
410	Locust bean gum or carob bean gum	
412	Guar gum	472f Mixed tartaric, acetic and fatty acid esters of glycerol or tartaric, acetic and fatty acid esters of glycerol (mixed)
413	Tragacanth gum	
414	Acacia or gum arabic	473 Sucrose esters of fatty acids
415	Xanthan gum	475 Polyglycerol esters of fatty acids
416	Karaya gum	476 Polyglycerol esters of interesterified ricinoleic acid
417	Tara gum	
418	Gellan gum	477 Propylene glycol mono - and di-esters or Propylene glycol esters of fatty acids
420	Sorbitol or sorbitol syrup	
421	Mannitol	
422	Glycerin or glycerol	480 Dioctyl sodium sulphosuccinate
431	Polyoxyethylene (40) stearate	481 Sodium lactylate
433	Polysorbate 80 or Polyoxyethylene (20) sorbitan monooleate	481 Sodium oleyl lactylate
435	Polysorbate 60 or Polyoxyethylene (20) sorbitan monostearate	481 Sodium stearoyl lactylate
436	Polysorbate 65 or Polyoxyethylene (20) sorbitan tristearate	482 Calcium lactylate
440	Pectin	482 Calcium oleyl lactylate
442	Ammonium salts of phosphatidic acid	482 Calcium stearoyl lactylate
444	Sucrose acetate isobutyrate	491 Sorbitan monostearate
445	Glycerol esters of wood rosins	492 Sorbitan tristearate
450	Potassium pyrophosphate	
450	Sodium acid pyrophosphate	500 Sodium bicarbonate
450	Sodium pyrophosphate	500 Sodium carbonate
451	Potassium tripolyphosphate	501 Potassium bicarbonate
451	Sodium tripolyphosphate	501 Potassium carbonate
452	Potassium polymetaphosphate	503 Ammonium carbonate
452	Sodium metaphosphate, insoluble	503 Ammonium hydrogen carbonate
452	Sodium polyphosphates, glassy	504 Magnesium carbonate
455	Yeast mannoproteins	507 Hydrochloric acid
460	Cellulose microcrystalline	508 Potassium chloride
460	Cellulose, powdered	509 Calcium chloride
461	Methyl cellulose	510 Ammonium chloride
463	Hydroxypropyl cellulose	511 Magnesium chloride
464	Hydroxypropyl methylcellulose	512 Stannous chloride
465	Methyl ethyl cellulose	514 Sodium sulphate
466	Sodium carboxymethylcellulose	515 Potassium sulphate
470	Fatty acid salts of aluminium, ammonia, calcium, magnesium, potassium and sodium	516 Calcium sulphate
471	Mono- and di-glycerides of fatty acids	518 Magnesium sulphate
472a	Acetic and fatty acid esters of glycerol	519 Cupric sulphate
472b	Lactic and fatty acid esters of glycerol	526 Calcium hydroxide
		529 Calcium oxide
		530 Magnesium oxide
		535 Sodium ferrocyanide
		536 Potassium ferrocyanide

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2		Food additive names and code numbers	
541	Sodium aluminium phosphate	943b	Isobutane
542	Bone phosphate	944	Propane
551	Silicon dioxide, amorphous	946	Octafluorocyclobutane
552	Calcium silicate	950	Acesulphame potassium
553	Magnesium silicate or Talc	951	Aspartame
554	Sodium aluminosilicate	952	Cyclamate or calcium cyclamate or sodium cyclamate
555	Potassium aluminium silicate	953	Isomalt
556	Calcium aluminium silicate	954	Saccharin
558	Bentonite	955	Sucralose
559	Aluminium silicate	956	Alitame
560	Potassium silicate	957	Thaumatococcus
570	Stearic acid or fatty acid	961	Neotame
575	Glucono δ -lactone or Glucono delta-lactone	960	Steviol glycosides
576	Sodium gluconate	962	Aspartame-acesulphame salt
577	Potassium gluconate	965	Maltitol and maltitol syrup or hydrogenated glucose syrup
578	Calcium gluconate	966	Lactitol
579	Ferrous gluconate	967	Xylitol
580	Magnesium gluconate	968	Erythritol
586	4-hexylresorcinol	969	Advantame
620	L-glutamic acid	999(i)	Quillaia extract (type 1)
621	Monosodium L-glutamate or MSG	999(ii)	Quillaia extract (type 2)
622	Monopotassium L-glutamate		
623	Calcium glutamate	1001	Choline salts
624	Monoammonium L-glutamate	1100	α -Amylase
625	Magnesium glutamate		
627	Disodium-5'-guanylate	1101	Proteases (papain, bromelain, ficin)
631	Disodium-5'-inosinate	1102	Glucose oxidase
635	Disodium-5'-ribonucleotides	1104	Lipases
636	Maltol	1105	Lysozyme
637	Ethyl maltol		
640	Glycine	1200	Polydextrose
641	L-Leucine	1201	Polyvinylpyrrolidone
900a	Polydimethylsiloxane or Dimethylpolysiloxane	1400	Dextrin roasted starch
901	Beeswax, white and yellow	1401	Acid treated starch
903	Carnauba wax	1402	Alkaline treated starch
904	Shellac	1403	Bleached starch
905b	Petrolatum or petroleum jelly	1404	Oxidised starch
914	Oxidised polyethylene	1405	Enzyme treated starches
920	L-cysteine monohydrochloride	1410	Monostarch phosphate
941	Nitrogen	1412	Distarch phosphate
942	Nitrous oxide		
943a	Butane	1413	Phosphated distarch phosphate

**Schedule 8 Food additive names and code numbers
(for statement of ingredients)**

Section S8—2 Food additive names and code numbers

1414	Acetylated distarch phosphate
1420	Starch acetate
1422	Acetylated distarch adipate
1440	Hydroxypropyl starch
1442	Hydroxypropyl distarch phosphate
1450	Starch sodium octenylsuccinate
1451	Acetylated oxidised starch
1505	Triethyl citrate
1518	Triacetin
1520	Propylene glycol
1521	Polyethylene glycol 8000
1522	Calcium lignosulphonate (40-65)

Schedule 9 Mandatory advisory statements

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.3 is a standard for the information requirements relating to warning statements, advisory statements and declarations. Standard 2.9.5 contains similar information requirements for food for special medical purposes. This Standard lists mandatory advisory statements for subsection 1.2.3—2(1) and paragraph 2.9.5—10(2)(a).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S9—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 9 — Mandatory advisory statements*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S9—2 Mandatory advisory statements

For subsection 1.2.3—2(1) and paragraph 2.9.5—10(2)(a), the table is:

Mandatory advisory statements		
<i>Item</i>	<i>Column 1</i>	<i>Column 2</i>
	<i>Food</i>	<i>Advisory statement indicating that ...</i>
1	(a) Bee pollen (b) A food containing bee pollen as an ingredient	the product contains bee pollen which can cause severe allergic reactions.
2	(a) A cereal-based beverage that contains less than 3% m/m protein. (b) An evaporated or dried product made from cereals that, when reconstituted as a beverage according to directions for direct consumption, contains less than 3% m/m protein.	the product is not suitable as a complete milk replacement for children under 5 years.
3	(a) A cereal-based beverage that contains: (i) no less than 3% m/m protein; and (ii) no more than 2.5% m/m fat. (b) An evaporated or dried product made from cereals that, when reconstituted as a beverage according to directions for direct consumption, contains: (i) no less than 3% m/m protein; and (ii) no more than 2.5% m/m fat.	the product is not suitable as a complete milk food for children under 2 years.

Schedule 9 Mandatory advisory statements

Section S9—2

Mandatory advisory statements

Mandatory advisory statements		
<i>Item</i>	<i>Column 1</i>	<i>Column 2</i>
	<i>Food</i>	<i>Advisory statement indicating that ...</i>
	(c) Milk, or an analogue beverage made from soy, that contains no more than 2.5% m/m fat.	
	(d) Evaporated milk, dried milk, or an equivalent product made from soy, that, when reconstituted as a beverage according to directions for direct consumption, contains no more than 2.5% m/m fat.	
4	A food that contains aspartame or aspartame-acesulphame salt.	the food contains phenylalanine.
5	A food that contains quinine.	the food contains quinine.
6	A food that contains guarana or extracts of guarana.	the food contains caffeine.
7	A food that contains added phytosterols, phytostanols or their esters.	(a) when consuming this product, it should be consumed as part of a healthy diet; and (b) the product may not be suitable for children under 5 years and pregnant or lactating women; and (c) plant sterols do not provide additional benefits when consumed in excess of 3 grams per day.
8	(a) A cola beverage that contains added caffeine. (b) A food that contains a cola beverage that also contains added caffeine as an ingredient.	the product contains caffeine.
9	(a) Propolis. (b) A food that contains propolis as an ingredient.	the product contains propolis which can cause severe allergic reactions.
10	Unpasteurised egg products.	the product is unpasteurised.
11	(a) Unpasteurised milk. (b) Unpasteurised liquid milk products.	the product has not been pasteurised.

**Schedule 10 Generic names of ingredients and
conditions for their use**

Section S10—1

Name

Schedule 10 Generic names of ingredients and conditions for their use

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.4 is a standard for the information requirements relating to the statement of ingredients, and contains provisions relating to, the labelling of ingredients. This Standard specifies generic names for ingredients and conditions for subparagraph 1.2.4—4(b)(i).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S10—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 10 — Generic names of ingredients and conditions for their use*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S10—2 Generic names of ingredients and conditions for their use

For section 1.2.4—4, the generic ingredient names and conditions (if any) for their use are:

Generic names of ingredients and conditions for their use (if any)

<i>Generic name</i>	<i>Condition for use (if any)</i>
cereals	If the cereal is wheat, rye, barley, oats or spelt or a hybridised strain of one of those cereals, the specific name of the cereal must be declared.
cheese	
cocoa butter	
crystallised fruit	
fats or oils	(a) The statement of ingredients must declare: <ul style="list-style-type: none"> (i) whether the source is animal or vegetable; and (ii) if the source of oil is peanut, soy bean or sesame—the specific source name; and (iii) if the food is a dairy product, including ice cream—the specific source of animal fats or oils. (b) This generic name must not be used for diacylglycerol oil.
fish	If crustacea, the specific name of the crustacea must be declared.
fruit	
gum base	
herbs	

Schedule 10 Generic names of ingredients and conditions for their use

Section S10—2

Generic names of ingredients and conditions for their use

meat

milk protein

milk solids

May be used to describe:

- (a) milk powder, skim milk powder or dried milk products; or
 - (b) any 2 or more of the following ingredients:
 - (i) whey;
 - (ii) whey powder;
 - (iii) whey proteins;
 - (iv) lactose;
 - (v) caseinates;
 - (vi) milk proteins;
 - (vii) milk fat.
-

Nuts

The specific name of the nut must be declared.

poultry meat

spices

starch

- (a) If the source of the starch is wheat, rye, barley, oats or spelt, or hybridised strains of those cereals—the specific name of the cereal must be declared.
 - (b) The name ‘starch’ may be used for any unmodified starch or any starch which has been modified by either physical means or enzymes.
-

sugar

- (a) The name ‘sugar’ may be used to describe:
 - (i) white sugar; or
 - (ii) white refined sugar; or
 - (iii) caster sugar or castor sugar; or
 - (iv) loaf sugar or cube sugar; or
 - (v) icing sugar; or
 - (vi) coffee sugar; or
 - (vii) coffee crystals; or
 - (viii) raw sugar.
 - (b) The name ‘sugars’ must not be used in a statement of ingredients.
-

vegetables

Schedule 11 Calculation of values for nutrition information panel

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.8 is a standard for nutrition information requirements. This Standard:

- sets out how to calculate *average energy content*, *available carbohydrate* and *available carbohydrate by difference* for sections 1.1.2—2 and 1.2.8—4; and
- sets out how to determine dietary fibre for subsection 1.2.8—7(7) and subsection S5—6(2); and
- lists substances for paragraph 1.2.8—6(9)(a) and subparagraph 1.2.8—14(1)(c)(ii).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S11—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 11 — Calculation of values for nutrition information panel*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S11—2 Calculation of average energy content

- (1) For section 1.1.2—2, the *average energy content* of a food means the energy content AE , in kJ/100 g, calculated using the following equation:

$$AE = \sum_{i=1}^N W_i \times F_i$$

where:

N is the number of *components in the food.

W_i is the average amount of a component of the food measured in g/100 g of the food.

F_i is the energy factor, expressed in kJ/g:

- (a) for a general component listed in the table to subsection (2)—indicated in the corresponding row of that table; and
- (b) for a specific component listed in the table to subsection (3)—indicated in the corresponding row of that table.

Schedule 11 Calculation of values for nutrition information panel

Section S11—3

Calculation of available carbohydrate and available carbohydrate by difference

- (2) For subsection (1), particular energy factors, in kJ/g, for certain *components are listed below:

Energy factors for general components

Component	Energy factor
alcohol	29
*carbohydrate (excluding unavailable carbohydrate)	17
unavailable carbohydrate (including dietary fibre)	8
fat	37
protein	17

- (3) For subsection (1), and for paragraph 1.2.8—6(9)(a) and subparagraph 1.2.8—14(1)(c)(ii), particular energy factors, in kJ/g, for specific *components are listed below:

Energy factors for specific components

Component	Energy factor
erythritol	1
glycerol	18
isomalt	11
lactitol	11
maltitol	13
mannitol	9
organic acids	13
polydextrose	5
sorbitol	14
D-Tagatose	11
Xylitol	14

- (4) If for Standard 1.2.8 the *average energy content may be expressed in calories/100 g, the number of calories must be calculated in accordance with the following equation:

$$AE(C) = \frac{AE(kJ)}{4.18}$$

where

AE(C) is the average energy content in calories/100 g;

AE(kJ) is the average energy content in kilojoules/100 g, calculated in accordance with the equation set out in subsection (1).

**Schedule 11 Calculation of values for nutrition
information panel**

Section S11—3

Calculation of available carbohydrate and available carbohydrate by difference

**S11—3 Calculation of available carbohydrate and available carbohydrate
by difference**

Calculation of available carbohydrate

- (1) For section 1.1.2—2(3), **available carbohydrate**, for a food, is calculated by summing the *average quantity in the food of:
- (a) total available sugars and starch; and
 - (b) if quantified or added to the food—any available oligosaccharides, glycogen and maltodextrins.

Calculation of available carbohydrate by difference

- (2) For section 1.1.2—2(3), **available carbohydrate by difference**, for a food, is calculated by subtracting from 100 the *average quantity in the food, expressed as a percentage, of the following substances:
- (a) water;
 - (b) protein;
 - (c) fat;
 - (d) dietary fibre;
 - (e) ash;
 - (f) alcohol;
 - (g) if quantified or added to the food—any other unavailable carbohydrate;
 - (h) a substance listed in subsection S11—2(3).

S11—4 Methods of analysis for dietary fibre and other fibre content

- (1) This section applies for the purposes of subsection 1.2.8—7(7) and section S5—6(2).
- (2) The total dietary fibre, and amount of any specifically named fibre, in a food must be determined in accordance with any one or more of the methods contained in following sections of the AOAC:
- (a) for total dietary fibre—sections 985.29 or 991.43;
 - (b) for total dietary fibre (including all resistant maltodextrins)—section 2001.03;
 - (c) for inulin and fructooligosaccharide—section 997.08;
 - (d) for inulin—section 999.03;
 - (e) for polydextrose—section 2000.11.
- (3) If the *dietary fibre content of a food has been determined by more than 1 method of analysis, the total dietary fibre content is calculated by:
- (a) adding together the results from each method of analysis; and
 - (b) subtracting any portion of dietary fibre which has been included in the results of more than one method of analysis.

**Schedule 11 Calculation of values for nutrition
information panel**

Section S11—4

Methods of analysis for dietary fibre and other fibre content

(4) In this section:

AOAC means the *Official methods of Analysis of AOAC International*,
eighteenth edition, 2005, published by AOAC International, Maryland USA.

Schedule 12 Nutrition information panels

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.8 is a standard for nutrition information requirements. This Standard sets out nutrition information panels for subsection 1.2.8—6(2), subsection 1.2.8—6(3), subsection 1.2.8—6(5), subsection 1.2.8—8(3), paragraph 2.6.4—5(2)(b), subsection 2.9.2—11(3) and subsection 2.10.3—5(3).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S12—1 Name

This *Standard is Australia New Zealand Food Standards Code — Schedule 12 — Nutrition information panels.*

Note Commencement:
 This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S12—2 Format for nutrition information panel—subsection 1.2.8—6(2)

For subsection 1.2.8—6(2), the format for a nutrition information panel is:

NUTRITION INFORMATION		
Servings per package: (insert number of servings)		
Serving size: g (or mL or other units as appropriate)		
	Quantity per serving	Quantity per 100 g (or 100 mL)
Energy	kJ (Cal)	kJ (Cal)
Protein	g	g
Fat, total	g	g
—saturated	g	g
Carbohydrate	g	g
—sugars	g	g
Sodium	mg (mmol)	mg (mmol)
(insert any other nutrient or biologically active substance to be declared)	g, mg, µg (or other units as appropriate)	g, mg, µg (or other units as appropriate)

Schedule 12 Nutrition information panels

Section S12—3

Format for nutrition information panels—subsection 1.2.8—6(3) and 1.2.8—6(5)

S12—3 Format for nutrition information panels—subsection 1.2.8—6(3) and 1.2.8—6(5)

For subsection 1.2.8—6(3) and 1.2.8—6(5), the format for a nutrition information panel is:

NUTRITION INFORMATION		
Servings per package: (insert number of servings)		
Serving size: g (or mL or other units as appropriate)		
	Quantity per Serving	Quantity per 100 g (or 100 mL)
Energy	kJ (Cal)	kJ (Cal)
Protein, total	g	g
—*	g	g
Fat, total	g	g
—saturated	g	g
—**	g	g
—trans	g	g
—**	g	g
—polyunsaturated	g	g
—**	g	g
—monounsaturated	g	g
—**	g	g
Cholesterol	mg	mg
Carbohydrate	g	g
—sugars	g	g
—**	g	g
—**	g	g
—**	g	g
Dietary fibre, total	g	g
—*	g	g
Sodium	mg (mmol)	mg (mmol)
(insert any other nutrient or biologically active substance to be declared)	g, mg, µg (or other units as appropriate)	g, mg, µg (or other units as appropriate)

Note * indicates a sub-group nutrient

** indicates a sub-sub-group nutrient

Note The word ‘total’ following ‘protein’ or ‘dietary fibre’ in the first column of the panel need only be included if it is followed immediately by a sub-group.

Schedule 12 Nutrition information panels

Section S12—4

Format for nutrition information panel—percentage daily intake information

S12—4 Format for nutrition information panel—percentage daily intake information

For subsection 1.2.8—8(3), an example nutrition information panel with percentage daily intake information is:

NUTRITION INFORMATION			
Servings per package: (insert number of servings)			
Serving size: g (or mL or other units as appropriate)			
	Quantity per serving	% Daily intake* (per serving)	Quantity per 100 g (or 100 mL)
Energy	kJ (Cal)	%	kJ (Cal)
Protein	g	%	g
Fat, total	g	%	g
—saturated	g	%	g
Carbohydrate	g	%	g
—sugars	g	%	g
Sodium	mg (mmol)	%	mg (mmol)
(insert any other nutrient or biologically active substance to be declared)	g, mg, µg (or other units as appropriate)	%	g, mg, µg (or other units as appropriate)
* Percentage daily intakes are based on an average adult diet of 8700 kJ. Your daily intakes may be higher or lower depending on your energy needs.			

Schedule 12 Nutrition information panels

Section S12—5

Sample format for nutrition information panel—formulated caffeinated beverages

S12—5 Sample format for nutrition information panel—formulated caffeinated beverages

For section 2.6.4—5, an example of the placement of the declarations required by paragraph 2.6.4—5(2)(b) adjacent to or following a nutrition information panel is.

NUTRITION INFORMATION		
Servings per package: (insert number of servings)		
Serving size: 250 mL		
	Quantity per Serving	Quantity per 100 mL
Energy	kJ (Cal)	kJ (Cal)
Protein	g	g
Fat, total	g	g
– saturated	g	g
Carbohydrate, total	g	g
– sugars	g	g
Sodium	mg (mmol)	mg (mmol)
COMPOSITION INFORMATION		
Caffeine	mg	mg
Thiamin	mg	mg
Riboflavin	mg	mg
Niacin	mg	mg
Vitamin B ₆	mg	mg
Vitamin B ₁₂	µg	µg
Pantothenic acid	mg	mg
Taurine	mg	mg
Glucuronolactone	mg	mg
Inositol	mg	mg

Schedule 12 Nutrition information panels

Section S12—6

Nutrition information panel—food for infants

S12—6 Nutrition information panel—food for infants

For subsection 2.9.2—11(3), the format for the nutrition information panel is:

NUTRITION INFORMATION		
Servings per package: (insert number of servings)		
Serving size: g (or mL or other units as appropriate)		
	Quantity per Serving	Quantity per 100g (or 100 mL)
Energy	kJ (Cal)	kJ (Cal)
Protein	g	g
Fat, total	g	g
- (insert claimed fatty acids)	g	g
Carbohydrate	g	g
- sugars	g	g
Sodium	mg (mmol)	mg (mmol)
(insert any other nutrient or biologically active substance to be declared)	g, mg, µg (or other units as appropriate)	g, mg, µg (or other units as appropriate)

Schedule 12 Nutrition information panels

Section S12—7

Nutrition information panel—calcium in chewing gum

S12—7 Nutrition information panel—calcium in chewing gum

For section 2.10.3—5(3), the nutrition information panel may, for example, be set out in the following format:

NUTRITION INFORMATION		
Servings per package: 10		
Serving size: 3 g		
	Average quantity per serve	Average quantity per 100 g
Energy	25 kJ	833 kJ
Protein	0 g	0 g
Fat, total	0 g	0 g
– saturated	0 g	0 g
Carbohydrate	Less than 1 g	Less than 1 g
– sugars	Less than 1 g	Less than 1 g
Dietary fibre	0 g	0 g
Sodium	0 mg	0 mg
Calcium*	80 mg (10% RDI**)	2670 mg
*average quantity of calcium released during 20 minutes of chewing		
**Recommended Dietary Intake		

Schedule 13 Nutrition information required for food in small packages

Section S13—1

Name

Schedule 13 Nutrition information required for food in small packages

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Standard 1.2.8 is a standard for nutrition information requirements. This Standard sets out labelling information for paragraph 1.2.8—14(1)(b).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S13—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 13 — Nutrition information required for food in small packages*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S13—2 Nutrition information required for food in small packages

For paragraph 1.2.8—14(1)(b), the table is:

Nutrition information for food in small packages	
Column 1	Column 2
<i>Claim is about</i>	<i>Label must include</i>
Any nutrient or biologically active substance (other than a vitamin or mineral with a RDI)	Average quantity of the nutrient or biologically active substance present per serving of the food
Any vitamin or mineral with a RDI	(a) *Average quantity of the vitamin or mineral present per serving of the food; and (b) Percentage of the RDI for the vitamin or mineral contributed by one serving of the food, and calculated in accordance with section 1.2.8—9.
Cholesterol, saturated fatty acids, trans fatty acids, polyunsaturated fatty acids, monounsaturated fatty acids, omega-6 or omega-9 fatty acids	Saturated fatty acids, trans fatty acids, *polyunsaturated fatty acids and monounsaturated fatty acids content per serving of the food
Dietary fibre, sugars or any other *carbohydrate	Average quantity of energy, carbohydrate, sugars and *dietary fibre (calculated in accordance with section S11—4) present per serving of the food
Energy	Average quantity of energy present per serving of the food
Fat-free	Average quantity of energy present per serving of the food
Omega-3 fatty acids	(a) *Saturated fatty acids, *trans fatty acids, *polyunsaturated fatty acids and *monounsaturated fatty acids content per serving of the food; and

Schedule 13 Nutrition information required for food in small packages

Section S13—2

Nutrition information required for food in small packages

Nutrition information for food in small packages	
Column 1	Column 2
<i>Claim is about</i>	<i>Label must include</i>
Lactose	(b) Type and amount of omega-3 fatty acids per serving of the food, namely alpha-linolenic acid, or docosahexaenoic acid, or eicosapentaenoic acid, or a combination of the above Galactose content per serving of the food
Potassium	Sodium and potassium content per serving of the food
Sodium or salt	Sodium and potassium content per serving of the food

**Schedule 14 Technological purposes performed by
substances used as food additives**

Section S14—1

Name

Schedule 14 Technological purposes performed by substances used as food additives

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Substances used as food additives and substances used as processing aids are regulated by Standard 1.1.1, Standard 1.3.1 and Standard 1.3.3. This Standard lists technological purposes for paragraph 1.1.2—11(1)(b) (definition of *used as a food additive*) and paragraph 1.1.2—13(1)(c) and subparagraph 1.1.2—13(2)(a)(iii) (definition of *used as a processing aid*).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S14—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 14 — Technological purposes performed by substances used as food additives*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S14—2 Technological purposes

The technological purposes performed by substances used as food additives are set out in the table.

Technological purposes

Purpose	Sub-classes	Definition
Acidity regulator	acid, alkali, base, buffer, buffering agent, pH adjusting agent	alters or controls the acidity or alkalinity of a food
Anti-caking agent	anti-caking agent, anti-stick agent, drying agent, dusting powder	reduces the tendency of individual food particles to adhere or improves flow characteristics
Antioxidant	antioxidant, antioxidant synergist	retards or prevents the oxidative deterioration of a food
Bulking agent	bulking agent, filler	contributes to the volume of a food without contributing significantly to its available energy
Colouring		adds or restores colour to foods
Colour fixative	colour fixative, colour stabiliser	stabilises, retains or intensifies an existing colour of a food
Emulsifier	emulsifier, emulsifying salt, plasticiser, dispersing agent, surface active agent, surfactant, wetting agent	facilitates the formation or maintenance of an emulsion between two or more immiscible phases

Schedule 14 Technological purposes performed by substances used as food additives

Section S14—2

Technological purposes

Technological purposes		
<i>Purpose</i>	<i>Sub-classes</i>	<i>Definition</i>
Firming agent		contributes to firmness of food or interact with gelling agents to produce or strengthen a gel
Flavour enhancer	flavour enhancer, flavour modifier, tenderiser	enhances the existing taste or odour of a food
Flavouring (excluding herbs and spices and intense sweeteners)		intense preparations which are added to foods to impart taste or odour, which are used in small amounts and are not intended to be consumed alone, but do not include herbs, spices and substances which have an exclusively sweet, sour or salt taste
Foaming agent	whipping agent, aerating agent	facilitates the formation of a homogeneous dispersion of a gaseous phase in a liquid or solid food
Gelling agent		modifies food texture through gel formation
Glazing agent	coating, sealing agent, polish	imparts a coating to the external surface of a food
Humectant	moisture/water retention agent, wetting agent	retards moisture loss from food or promotes the dissolution of a solid in an aqueous medium
Intense sweetener		replaces the sweetness normally provided by sugars in foods without contributing significantly to their available energy
Preservative	anti-microbial preservative, anti-mycotic agent, bacteriophage control agent, chemosterilant, disinfection agent	retards or prevents the deterioration of a food by micro organisms
Propellant		gas, other than air, which expels a food from a container
Raising agent		liberates gas and thereby increase the volume of a food
Sequestrant		forms chemical complexes with metallic ions
Stabiliser	binder, firming agent, water binding agent, foam stabiliser	maintains the homogeneous dispersion of two or more immiscible substances in a food
Thickener	thickening agent, texturiser, bodying agent	increases the viscosity of a food

Schedule 15 Substances that may be used as food additives

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Substances used as food additives are regulated by Standard 1.1.1 and Standard 1.3.1. This Standard:

- identifies substances for subparagraph 1.1.2—11(2)(a)(i); and
- contains permissions to use substances as food additives for paragraph 1.3.1—3(1)(a); and
- contains associated restrictions for paragraph 1.3.1—3(1)(b); and
- sets out maximum permitted levels for section 1.3.1—4.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S15—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 15 — Substances that may be used as food additives*).

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S15—2 Permissions to use substances as food additives

For each class of food identified by a numbered heading in the table to section S15—5, the substances that may be *used as a food additive in any food within that class are the following:

- (a) any of the substances listed directly under the heading;
- (b) any of the substances listed directly under a higher-level heading.

Example For the heading numbered 4.3.4, higher-level headings are those numbered 4.3 and 4. However, headings such as those numbered 4.3.4.1, 4.3.3, 4.2 and 3 are not higher-level headings.

Note In many cases, there is more than 1 substance listed directly under a heading.

S15—3 Preparations of food additives

If a substance may be *used as a food additive under the table to section S15—5:

- (a) the substance may be added in the form of a preparation of the substance; and
- (b) other substances may be used as food additives in the preparation in accordance with the permissions under category 0 of the table (preparations of food additives).

**Schedule 15 Substances that may be used as food
additives**

Section S15—4

Definitions

S15—4 Definitions

- (1) In the table to section S15—5:
 - (a) *MPL* means the maximum permitted level, measured (unless otherwise indicated) in mg/kg; and
 - (b) a reference to ‘GMP’ is a reference to the maximum level necessary to achieve 1 or more technological purposes under conditions of GMP.
- (2) If a food without a garnish would be included in items 1 to 14 of the table to section S15—5, it will also be included if a garnish is added.

S15—5 Table of permissions for food additives

The table to this section is:

Schedule 15 Substances that may be used as food additives

Section S15—5

Table of permissions for food additives

Permissions for food additives			
<i>INS (if any)</i>	<i>Description</i>	<i>MPL</i>	<i>Conditions</i>
0	PREPARATIONS OF FOOD ADDITIVES		
	additives permitted at GMP		
200 201 202 203	Sorbic acid and sodium, potassium and calcium sorbates	1 000	
210 211 212 213	Benzoic acid and sodium, potassium and calcium benzoates	1 000

Schedule 16 Types of substances that may be used as food additives

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Substances used as food additives are regulated by Standard 1.1.1 and Standard 1.3.1. This Standard lists substances for the definitions, in subsection 1.1.2—11(3), of *additive permitted at GMP*, *colouring permitted at GMP* and *colouring permitted to a maximum level*.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S16—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 16 — Types of substances that may be used as food additives*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—2

Additives permitted at GMP

S16—2 Additives permitted at GMP

For subsection 1.1.2—11(3), the additives permitted at GMP are the substances listed in the following table (first in alphabetical order, then in numerical order):

Additives permitted at GMP—alphabetical listing

Acetic acid, glacial	260	Calcium glutamate, Di-L-	623
Acetic and fatty acid esters of glycerol	472a	Calcium hydroxide	526
Acetylated distarch adipate	1422	Calcium lactate	327
Acetylated distarch phosphate	1414	Calcium lactylates	482
Acetylated oxidised starch	1451	Calcium lignosulphonate (40-65)	1522
Acid treated starch	1401	Calcium malates	352
Adipic acid	355	Calcium oxide	529
Advantame	969	Calcium phosphates	341
Agar	406	Calcium silicate	552
Alginic acid	400	Calcium sulphate	516
Alkaline treated starch	1402	Calcium tartrate	354
Aluminium silicate	559	Carbon dioxide	290
Ammonium acetate	264	Carnauba wax	903
Ammonium alginate	403	Carrageenan	407
Ammonium carbonates	503	Cellulose, microcrystalline and powdered	460
Ammonium chloride	510	Citric acid	330
Ammonium citrates	380	Citric and fatty acid esters of glycerol	472c
Ammonium fumarate	368	Cupric sulphate	519
Ammonium lactate	328	Dextrin roasted starch	1400
Ammonium malate	349	Diacetyltartaric and fatty acid esters of glycerol	472e
Ammonium phosphates	342	Disodium guanylate, 5'-	627
Ammonium salts of phosphatidic acid	442	Disodium inosinate, 5'-	631
Arabinogalactan (larch gum)	409	Disodium ribonucleotides, 5'-	635
Ascorbic acid	300	Distarch phosphate	1412
Aspartame (technological use consistent with section 1.3.1—5 only)	951		
Beeswax, white & yellow	901	Enzyme treated starches	1405
Bentonite	558	Erythorbic acid	315
Bleached starch	1403	Erythritol	968
Butane (for pressurised food containers only)	943a	Fatty acid salts of aluminium, ammonia, calcium, magnesium, potassium and sodium	470
Calcium acetate	263	Ferric ammonium citrate	381
Calcium alginate	404	Ferrous gluconate	579
Calcium aluminium silicate	556	*Permitted flavouring substances, excluding quinine and caffeine	-
Calcium ascorbate	302	Fumaric acid	297
Calcium carbonates	170		
Calcium chloride	509	Gellan gum	418
Calcium citrate	333	Glucono delta-lactone	575
Calcium fumarate	367		
Calcium gluconate	578		

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—2	Additives permitted at GMP		
Glycerin (glycerol)	422	Neotame (technological use consistent with section 1.3.1—5 only)	961
Guar gum	412	Nitrous oxide	942
Gum arabic (Acacia)	414	Octafluorocyclobutane (for pressurised food containers only)	946
Hydrochloric acid	507	Oxidised starch	1404
Hydroxypropyl cellulose	463	Pectins	440
Hydroxypropyl distarch phosphate	1442	Petrolatum (petroleum jelly)	905b
Hydroxypropyl methylcellulose	464	Phosphated distarch phosphate	1413
Hydroxypropyl starch	1440	Polydextroses	1200
Isobutane (for pressurised food containers only)	943b	Polydimethylsiloxane	900a
Isomalt	953	Polyethylene glycol 8000	1521
Karaya gum	416	Polyoxyethylene (20) sorbitan monooleate	433
L -glutamic acid	620	Polyoxyethylene (20) sorbitan monostearate	435
Lactic acid	270	Polyoxyethylene (20) sorbitan tristearate	436
Lactic and fatty acid esters of glycerol	472b	Polyphosphates	452
Lactitol	966	Potassium acetate or potassium diacetate	261
Lecithin	322	Potassium adipate (Salt reduced and low sodium foods only)	357
Locust bean (carob bean) gum	410	Potassium alginate	402
Lysozyme	1105	Potassium ascorbate	303
Magnesium carbonates	504	Potassium carbonates	501
Magnesium chloride	511	Potassium chloride	508
Magnesium glutamate, Di-L-	625	Potassium citrates	332
Magnesium lactate	329	Potassium fumarate	366
Magnesium phosphates	343	Potassium gluconate	577
Magnesium silicates	553	Potassium lactate	326
Magnesium sulphate	518	Potassium malates	351
Malic acid	296	Potassium phosphates	340
Maltitol & maltitol syrup	965	Potassium sodium tartrate	337
Mannitol	421	Potassium sulphate	515
Metatartaric acid	353	Potassium tartrates	336
Methyl cellulose	461	Processed eucheuma seaweed	407a
Methyl ethylcellulose	465	Propane (for pressurised food containers only)	944
Mono- and diglycerides of fatty acids	471	Propylene glycol	1520
Monoammonium glutamate, L-	624	Propylene glycol alginate	405
Monopotassium glutamate, L-	622	Propylene glycol esters of fatty acids	477
Monosodium glutamate, L-	621	Pyrophosphates	450
Monostarch phosphate	1410	Shellac	904
Nitrogen	941	Silicon dioxide (amorphous)	551
		Sodium acetates	262
		Sodium alginate	401

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—2	Additives permitted at GMP	
Sodium aluminosilicate	554	Stearic acid 570
Sodium ascorbate	301	Sucralose (technological use consistent with
Sodium carbonates	500	section 1.3.1—5 only) 955
Sodium carboxymethylcellulose	466	Sucrose esters of fatty acids 473
Sodium citrates	331	
Sodium erythorbate	316	Tara gum 417
Sodium fumarate	365	Tartaric acid 334
Sodium gluconate	576	Tartaric, acetic and fatty acid esters of glycerol
Sodium lactate	325	(mixed) 472f
Sodium lactylates	481	Thaumatococcus 957
Sodium malates	350	Tragacanth gum 413
Sodium phosphates	339	Triacetin 1518
Sodium sulphates	514	Triphosphates 451
Sodium tartrate	335	
Sorbitan monostearate	491	Xanthan gum 415
Sorbitan tristearate	492	Xylitol 967
Sorbitol	420	
Starch acetate	1420	Yeast mannoproteins 455
Starch sodium octenylsuccinate	1450	

Schedule 16 Types of substances that may be used as food additives

Section S16—2

Additives permitted at GMP

Additives permitted at GMP—numerical listing

–	*Permitted flavouring substances, excluding quinine and caffeine	353	Metatartaric acid
		354	Calcium tartrate
		355	Adipic acid
170	Calcium carbonates	357	Potassium adipate (Salt reduced and low sodium foods only)
260	Acetic acid, glacial	365	Sodium fumarate
261	Potassium acetate or potassium diacetate	366	Potassium fumarate
		367	Calcium fumarate
262	Sodium acetates	368	Ammonium fumarate
263	Calcium acetate	380	Ammonium citrates
264	Ammonium acetate	381	Ferric ammonium citrate
270	Lactic acid		
290	Carbon dioxide	400	Alginic acid
296	Malic acid	401	Sodium alginate
297	Fumaric acid		
		402	Potassium alginate
300	Ascorbic acid	403	Ammonium alginate
301	Sodium ascorbate	404	Calcium alginate
302	Calcium ascorbate	405	Propylene glycol alginate
303	Potassium ascorbate	406	Agar
315	Erythorbic acid	407	Carrageenan
316	Sodium erythorbate	407a	Processed eucheuma seaweed
322	Lecithin	409	Arabinogalactan (larch gum)
325	Sodium lactate	410	Locust bean (carob bean) gum
326	Potassium lactate	412	Guar gum
327	Calcium lactate	413	Tragacanth gum
328	Ammonium lactate	414	Gum arabic (Acacia)
329	Magnesium lactate	415	Xanthan gum
330	Citric acid	416	Karaya gum
331	Sodium citrates	417	Tara gum
332	Potassium citrates	418	Gellan gum
333	Calcium citrate	420	Sorbitol
334	Tartaric acid	421	Mannitol
335	Sodium tartrate	422	Glycerin (glycerol)
336	Potassium tartrates	433	Polyoxyethylene (20) sorbitan monooleate
337	Potassium sodium tartrate		
339	Sodium phosphates	435	Polyoxyethylene (20) sorbitan monostearate
340	Potassium phosphates		
341	Calcium phosphates	436	Polyoxyethylene (20) sorbitan tristearate
342	Ammonium phosphates		
343	Magnesium phosphates	440	Pectins
349	Ammonium malate	442	Ammonium salts of phosphatidic acid
350	Sodium malates	450	Pyrophosphates
351	Potassium malates	451	Triphosphates
352	Calcium malates	452	Polyphosphates

Schedule 16 Types of substances that may be used as food additives

Section S16—2	Additives permitted at GMP
455	Yeast mannoproteins
460	Cellulose, microcrystalline and powdered
461	Methyl cellulose
463	Hydroxypropyl cellulose
464	Hydroxypropyl methylcellulose
465	Methyl ethylcellulose
466	Sodium carboxymethylcellulose
470	Fatty acid salts of aluminium, ammonia, calcium, magnesium, potassium and sodium
471	Mono- and diglycerides of fatty acids
472a	Acetic and fatty acid esters of glycerol
472b	Lactic and fatty acid esters of glycerol
472c	Citric and fatty acid esters of glycerol
472e	Diacetyltartaric and fatty acid esters of glycerol
472f	Tartaric, acetic and fatty acid esters of glycerol (mixed)
473	Sucrose esters of fatty acids
477	Propylene glycol esters of fatty acids
481	Sodium lactylates
482	Calcium lactylates
491	Sorbitan monostearate

529	Calcium oxide
551	Silicon dioxide (amorphous)
552	Calcium silicate
553	Magnesium silicates
554	Sodium aluminosilicate
556	Calcium aluminium silicate
558	Bentonite
559	Aluminium silicate
570	Stearic acid
575	Glucono delta-lactone
576	Sodium gluconate
577	Potassium gluconate
578	Calcium gluconate
579	Ferrous gluconate
620	L -glutamic acid
621	Monosodium glutamate, L-
622	Monopotassium glutamate, L-
623	Calcium glutamate, Di-L-
624	Monoammonium glutamate, L-
625	Magnesium glutamate, Di-L-
627	Disodium guanylate, 5'-
631	Disodium inosinate, 5'-
635	Disodium ribonucleotides, 5'-
900a	Polydimethylsiloxane
901	Beeswax, white & yellow
903	Carnauba wax
904	Shellac
905b	Petrolatum (petroleum jelly)
941	Nitrogen
942	Nitrous oxide
943a	Butane (for pressurised food containers only)
943b	Isobutane (for pressurised food containers only)
944	Propane (for pressurised food containers only)
946	Octafluorocyclobutane (for pressurised food containers only)
951	Aspartame (technological use consistent with section 1.3.1—5 only)
953	Isomalt
955	Sucralose (technological use consistent with section 1.3.1—5 only)
957	Thaumatococcus
961	Neotame (technological use consistent with section 1.3.1—5 only)
965	Maltitol & maltitol syrup
966	Lactitol
967	Xylitol

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—2		Additives permitted at GMP	
968	Erythritol	1412	Distarch phosphate
969	Advantame	1413	Phosphated distarch phosphate
		1414	Acetylated distarch phosphate
1105	Lysozyme	1420	Starch acetate
1200	Polydextroses	1422	Acetylated distarch adipate
		1440	Hydroxypropyl starch
1400	Dextrin roasted starch	1442	Hydroxypropyl distarch phosphate
1401	Acid treated starch	1450	Starch sodium octenylsuccinate
1402	Alkaline treated starch	1451	Acetylated oxidised starch
1403	Bleached starch	1518	Triacetin
1404	Oxidised starch	1520	Propylene glycol
1405	Enzyme treated starches	1521	Polyethylene glycol 8000
1410	Monostarch phosphate	1522	Calcium lignosulphonate (40-65)

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—3

Colouring permitted at GMP

S16—3 Colouring permitted at GMP

(1) For section subsection 1.1.2—11(3), the *colourings permitted at GMP are the substances listed in the following table (first in alphabetical order, then in numerical order):

Colouring permitted at GMP—alphabetical listing

Alkanet (& Alkannin)	103	Curcumins	100
Anthocyanins	163	Flavoxanthin	161a
Beet Red	162	Iron oxides	172
Caramel I - plain	150a	Kryptoxanthin	161c
Caramel II - caustic sulphite process	150b	Lutein	161b
Caramel III - ammonia process	150c	Lycopene	160d
Caramel IV - ammonia sulphite process	150d	Paprika oleoresins	160c
Carotenal, b-apo-8'-	160e	Rhodoxanthin	161f
Carotenes	160a	Riboflavins	101
Carotenoic acid, b-apo-8'-, methyl or ethyl esters	160f	Rubixanthan	161d
Chlorophylls	140	Saffron, crocetin and crocin	164
Chlorophylls, copper complexes	141	Titanium dioxide	171
Cochineal and carmines	120	Vegetable carbon	153
		Violoanthin	161e

Colouring permitted at GMP—numerical listing

100	Curcumins	160e	Carotenal, b-apo-8'-
101	Riboflavins	160f	Carotenoic acid, b-apo-8'-, methyl or ethyl esters
103	Alkanet (& Alkannin)	161a	Flavoxanthin
120	Cochineal and carmines	161b	Lutein
140	Chlorophylls	161c	Kryptoxanthin
141	Chlorophylls, copper complexes	161d	Rubixanthan
150a	Caramel I - plain	161e	Violoanthin
150b	Caramel II - caustic sulphite process	161f	Rhodoxanthin
150c	Caramel III - ammonia process	162	Beet Red
150d	Caramel IV - ammonia sulphite process	163	Anthocyanins
153	Vegetable carbon	164	Saffron, crocetin and crocin
160a	Carotenes	171	Titanium dioxide
160c	Paprika oleoresins	172	Iron oxides
160d	Lycopene		

**Schedule 16 Types of substances that may be used as
food additives**

Section S16—4 Colourings permitted to a maximum level

S16—4 Colourings permitted to a maximum level

For subsection 1.1.2—11(3), the colourings permitted to a maximum level are the substances listed in the following table (first in alphabetical order, then in numerical order):

Note see subsection 1.3.1—4(3), which establishes a maximum level for all colourings used in a food

Colourings permitted to maximum level—alphabetical listing

Allura red AC	129	Green S	142
Azorubine / Carmoisine	122	Indigotine	132
Brilliant black BN	151	Ponceau 4R	124
Brilliant blue FCF	133	Quinoline yellow	104
Brown HT	155	Sunset yellow FCF	110
Fast green FCF	143	Tartrazine	102

Colourings permitted to maximum level—numerical listing

102	Tartrazine	132	Indigotine
104	Quinoline yellow	133	Brilliant blue FCF
110	Sunset yellow FCF	142	Green S
122	Azorubine / Carmoisine	143	Fast green FCF
124	Ponceau 4R	151	Brilliant black BN
129	Allura red AC	155	Brown HT

Schedule 17 Vitamins and minerals

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Use of vitamins and minerals is regulated by several standards, including Standard 1.1.1 and Standard 1.3.2. This Standard:

- lists foods and amounts for the definition of *reference quantity* in section 1.1.2—2; and
- contains permissions to use vitamins and minerals as nutritive substances for section 1.3.2—3; and
- lists permitted forms of vitamins and minerals for subparagraph 2.9.3—3(2)(c)(i), paragraph 2.9.3—5(2)(c), paragraph 2.9.3—7(2)(c) and sub-subparagraph 2.9.4—3(1)(a)(ii)(A), as well as permitted forms of calcium for paragraph 2.10.3—3(b); and
- lists vitamins and minerals for the definition of *claimable vitamin or mineral* in subsection 2.9.3—6(6) and subsection 2.9.3—8(7).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S17—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 17 — Vitamins and minerals*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

Schedule 17 Vitamins and minerals

Section S17—3

Permitted forms of minerals

S17—3 Permitted forms of minerals

For section 1.3.2—3(a), subparagraph 2.9.3—3(2)(c)(i), paragraph 2.9.3—5(2)(c), paragraph 2.9.3—7(2)(c), sub-subparagraph 2.9.4—3(1)(a)(ii)(A), and paragraph 2.10.3—3(b), the permitted forms of minerals are:

Permitted forms of minerals	
<i>Mineral</i>	<i>Permitted form</i>
Calcium	Calcium carbonate Calcium chloride Calcium chloride, anhydrous Calcium chloride solution Calcium citrate Calcium gluconate Calcium glycerophosphate Calcium lactate Calcium oxide Calcium phosphate, dibasic Calcium phosphate, monobasic Calcium phosphate, tribasic Calcium sodium lactate Calcium sulphate
Iron	Ferric ammonium citrate, brown or green Ferric ammonium phosphate Ferric citrate Ferric hydroxide Ferric phosphate Ferric pyrophosphate Ferric sodium edetate (other than for breakfast cereals as purchased or formulated supplementary food for young children) Ferric sulphate (iron III sulphate) Ferrous carbonate Ferrous citrate Ferrous fumarate Ferrous gluconate Ferrous lactate Ferrous succinate

Schedule 17 Vitamins and minerals

Section S17—3

Permitted forms of minerals

Permitted forms of minerals	
<i>Mineral</i>	<i>Permitted form</i>
Iron	Ferrous sulphate (iron II sulphate)
	Ferrous sulphate, dried
	Iron, reduced (ferrum reductum)
Iodine	Potassium iodate
	Potassium iodide
	Sodium iodate
	Sodium iodide
Magnesium	Magnesium carbonate
	Magnesium chloride
	Magnesium gluconate
	Magnesium oxide
	Magnesium phosphate, dibasic
	Magnesium phosphate, tribasic
Phosphorus	Magnesium sulphate
	Calcium phosphate, dibasic
	Calcium phosphate, monobasic
	Calcium phosphate, tribasic
	Bone phosphate
	Magnesium phosphate, dibasic
	Magnesium phosphate, tribasic
	Calcium glycerophosphate
	Potassium glycerophosphate
	Phosphoric acid
	Potassium phosphate, dibasic
	Potassium phosphate, monobasic
	Sodium phosphate, dibasic
Selenium	Seleno methionine
	Sodium selenate
	Sodium selenite
Zinc	Zinc acetate
	Zinc chloride
	Zinc gluconate
	Zinc lactate
	Zinc oxide
	Zinc sulphate

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

S17—4 Permitted uses of vitamins and minerals

For sections 1.3.2—3 and 1.3.2—4, the foods are listed in the table:

Permitted uses of vitamins and minerals		
<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Cereals and cereal products</i>		
<i>Biscuits containing not more than 200 g/kg fat and not more than 50 g/kg sugars</i>		
<i>Reference quantity—35 g</i>		
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin E	2.5 mg (25%)	
Folate	100 µg (50%)	
Calcium	200 mg (25%)	
Iron	3.0 mg (25%)	
Magnesium	80 mg (25%)	
Zinc	1.8 mg (15%)	
<i>Bread</i>		
<i>Reference quantity—50 g</i>		
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin E	2.5 mg (25%)	
Iron	3.0 mg (25%)	
Magnesium	80 mg (25%)	
Zinc	1.8 mg (15%)	
Folate	(a) bread that contains no wheat flour—100 µg (50%); (b) other foods—0	

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals

<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Cereals and cereal products</i>		
<i>Breakfast cereals, as purchased</i>		
<i>Reference quantity—a normal serving</i>		
Provitamin A forms of Vitamin A	200 µg (25%)	
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin C	10 mg (25%)	
Vitamin E	2.5 mg (25%)	
Folate	100 µg (50%)	
Calcium	200 mg (25%)	
Iron – except ferric sodium edetate	3.0 mg (25%)	
Magnesium	80 mg (25%)	
Zinc	1.8 mg (15%)	
<i>Cereal flours</i>		
<i>Reference quantity—35 g</i>		
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin E	2.5 mg (25%)	
Folate	100 µg (50%)	
Iron	3.0 mg (25%)	
Magnesium	80 mg (25%)	
Zinc	1.8 mg (15%)	

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals		
<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Cereals and cereal products</i>		
<i>Pasta</i>		
<i>Reference quantity—the amount that is equivalent to 35 g of uncooked dried pasta</i>		
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin E	2.5 mg (25%)	
Folate	100 µg (50%)	
Iron	3.0 mg (25%)	
Magnesium	80 mg (25%)	
Zinc	1.8 mg (15%)	
<i>Dairy products</i>		
<i>Dried milks</i>		
<i>Reference quantity—200 mL</i>		
Vitamin A	110 µg (15%)	125 µg
Riboflavin	0.4 mg (25%)	
Vitamin D	2.5 µg (25%)	3.0 µg
Calcium	400 mg (50%)	
<i>Modified milks and skim milk</i>		
<i>Reference quantity—200 mL</i>		
Vitamin A	110 µg (15%)	125 µg
Vitamin D	1.0 µg (10%)	1.6 µg
Calcium	400 mg (50%)	
<i>Cheese and cheese products</i>		
<i>Reference quantity—25 g</i>		
Vitamin A	110 µg (15%)	125 µg
Calcium	200 mg (25%)	
Phosphorus	150 mg (15%)	
Vitamin D	1.0 µg (10%)	1.6 µg

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals		
<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Dairy products</i>		
<i>Yoghurts (with or without other foods)</i>		
<i>Reference quantity—150 g</i>		
Vitamin A	110 µg (15%)	125 µg
Vitamin D	1.0 µg (10%)	1.6 µg
Calcium	320 mg (40%)	
<i>Dairy desserts containing no less than 3.1% m/m milk protein</i>		
<i>Reference quantity—150 g</i>		
Vitamin A	110 µg (15%)	125 µg
Vitamin D	1.0 µg (10%)	1.6 µg
Calcium	320 mg (40%)	
<i>Ice cream and ice confections containing no less than 3.1% m/m milk protein</i>		
<i>Reference quantity—75 g</i>		
Calcium	200 mg (25%)	
<i>Cream and cream products containing no more than 40% m/m milkfat</i>		
<i>Reference quantity—30 mL</i>		
Vitamin A	110 µg (15%)	125 µg
<i>Butter</i>		
<i>Reference quantity—10 g</i>		
Vitamin A	110 µg (15%)	125 µg
Vitamin D	1.0 µg (10%)	1.6 µg
<i>Edible oils and spreads</i>		
<i>Edible oil spreads and margarine</i>		
<i>Reference quantity—10 g</i>		
Vitamin A	110 µg (15%)	125 µg
Vitamin D	1.0 µg (10%)	1.6 µg
Vitamin E	(a) edible oil spreads and margarine containing no more than 28% total *saturated fatty acids and trans fatty acids—3.5 mg (35%); (b) other foods—0	

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals

<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Edible oils and spreads</i>		
<i>Edible oils</i>		
<i>Reference quantity—10 g</i>		
Vitamin E	(a) sunflower oil and safflower oil—7.0 mg (70%); (b) other edible oils containing no more than 28% total *saturated fatty acids and trans fatty acids—3.0 mg (30%)	
<i>Extracts</i>		
<i>Extracts of meat, vegetables or yeast (including modified yeast) and foods containing no less than 800 g/kg of extracts of meat, vegetables or yeast (including modified yeast)</i>		
<i>Reference quantity—5 g</i>		
Thiamin	0.55 mg (50%)	
Riboflavin	0.43 mg (25%)	
Niacin	2.5 mg (25%)	
Vitamin B ₆	0.4 mg (25%)	
Vitamin B ₁₂	0.5 µg (25%)	
Folate	100 µg (50%)	
Iron	1.8 mg (15%)	
<i>Fruit juice, vegetable juice, fruit drink and fruit cordial</i>		
<i>All fruit juice and concentrated fruit juice (including tomato juice)</i>		
<i>Reference quantity—200 mL</i>		
Calcium	200 mg (25%)	
Folate	100 µg (50%)	
Vitamin C	(a) blackcurrant juice—500 mg (12.5 times) (b) guava juice—400 mg (10 times) (c) other juice—120 mg (3 times)	
Provitamin A forms of Vitamin A	(a) mango juice—800 µg (1.1 times) (b) pawpaw juice—300 µg (40%) (c) other juice—200 µg (25%)	

Schedule 17 Vitamins and minerals

Section S17—4

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals

<i>Vitamin or mineral</i>	<i>Maximum claim per reference quantity (maximum percentage RDI claim)</i>	<i>Maximum permitted amount per reference quantity</i>
<i>Fruit juice, vegetable juice, fruit drink and fruit cordial</i>		
<i>Vegetable juice (including tomato juice)</i>		
<i>Reference quantity—200 mL</i>		
Vitamin C	60 mg (1.5 times)	
Provitamin A forms of Vitamin A	200 µg (25%)	
Folate	100 µg (50%)	
Calcium	200 mg (25%)	
<i>Fruit drinks, vegetable drinks and fruit and vegetable drinks containing at least 250 mL/L of the juice, puree or comminution of the fruit or vegetable or both; fruit drink, vegetable drink or fruit and vegetable drink concentrate which contains in a reference quantity at least 250 mL/L of the juice, puree or comminution of the fruit or vegetable, or both</i>		
<i>Reference quantity—200 mL</i>		
Folate	refer to section 1.3.2—5	
Vitamin C	refer to section 1.3.2—5	
Provitamin A forms of vitamin A	refer to section 1.3.2—5	
Calcium	200 mg (25%)	
<i>Fruit cordial, fruit cordial base</i>		
<i>Reference quantity—200 mL</i>		
Vitamin C	refer to section 1.3.2—5	

Schedule 17 Vitamins and minerals

Permitted uses of vitamins and minerals

Permitted uses of vitamins and minerals		
Vitamin or mineral	Maximum claim per reference quantity (maximum percentage RDI claim)	Maximum permitted amount per reference quantity
<i>Analogues derived from legumes</i>		
<i>Beverages containing no less than 3% m/m protein derived from legumes</i>		
<i>Reference quantity—200 mL</i>		
Vitamin A	110 µg (15%)	125 µg
Thiamin	no claim permitted	0.10 mg
Riboflavin	0.43 mg (25%)	
Vitamin B ₆	no claim permitted	0.12 mg
Vitamin B ₁₂	0.8 µg (40%)	
Vitamin D	1.0 µg (10%)	1.6 µg
Folate	no claim permitted	12 µg
Calcium	240 mg (30%)	
Magnesium	no claim permitted	22 mg
Phosphorus	200 mg (20%)	
Zinc	no claim permitted	0.8 mg
Iodine	15 µg (10%)	
<i>Analogues of meat, where no less than 12% of the energy value of the food is derived from protein, and the food contains 5 g protein per serve of the food</i>		
<i>Reference quantity—100 g</i>		
Thiamin	0.16 mg (15%)	
Riboflavin	0.26 mg (15%)	
Niacin	5.0 mg (50%)	
Vitamin B ₆	0.5 mg (30%)	
Vitamin B ₁₂	2.0 µg (100%)	
Folate	no claim permitted	10 µg
Iron	3.5 mg (30%)	
Magnesium	no claim permitted	26 mg
Zinc	4.4 mg (35%)	

Schedule 17 Vitamins and minerals

Schedule 18 Processing aids

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Substances used as processing aids are regulated by Standard 1.1.1 and Standard 1.3.3. This standard lists substances that may be used as processing aids for paragraph 1.1.2—13(3)(a) and contains permissions to use substances as processing aids for Standard 1.3.3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S18—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 18 — Processing aids*.

Note Commencement:
 This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S18—2 Generally permitted processing aids—substances for section 1.3.3—4

(1) For paragraph 1.3.3—4(2)(b), the substances are:

Generally permitted processing aids

activated carbon	oxygen
ammonia	perlite
ammonium hydroxide	phospholipids
argon	phosphoric acid
bone phosphate	polyethylene glycols
carbon monoxide	polyglycerol esters of fatty acids
diatomaceous earth	polyglycerol esters of
ethoxylated fatty alcohols	interesterified ricinoleic acid
ethyl alcohol	polyoxyethylene 40 stearate
fatty acid polyalkylene glycol ester	potassium hydroxide
furcellaran	propylene glycol alginate
hydrogenated glucose syrups	silica or silicates
isopropyl alcohol	sodium hydroxide
magnesium hydroxide	sodium lauryl sulphate
oleic acid	sulphuric acid
oleyl oleate	tannic acid

(2) In this section:

silica or *silicates* includes:

- (a) sodium calcium polyphosphate silicate; and
- (b) sodium hexafluorosilicate; and

Schedule 18 Processing aids

Section S18—3 Permitted processing aids for certain purposes

- (c) sodium metasilicate; and
- (d) sodium silicate; and
- (e) silica; and
- (f) modified silica;

that complies with a specification in section S3—2 or S3—3.

Note Silicates that are additives permitted at GMP (see section S16—2) may also be used as processing aids, in accordance with paragraph 1.3.3—4(2)(a).

S18—3 Permitted processing aids for certain purposes

For section 1.3.3—5, the substances, foods and maximum permitted levels are:

Permitted processing aids for certain purposes (section 1.3.3—5)

Substance	Maximum permitted level (mg/kg)
<i>Technological purpose—Antifoam agent</i>	
Butanol	10
Oxystearin	GMP
Polydimethylsiloxane	10
Polyethylene glycol dioleate	GMP
Polyethylene/ polypropylene glycol copolymers	GMP
Soap	GMP
Sorbitan monolaurate	1
Sorbitan monooleate	1
<i>Technological purpose—Catalyst</i>	
Chromium (excluding chromium VI)	0.1
Copper	0.1
Molybdenum	0.1
Nickel	1.0
Peracetic acid	0.7
Potassium ethoxide	1.0
Potassium (metal)	GMP
Sodium (metal)	GMP
Sodium ethoxide	1.0
Sodium methoxide	1.0
<i>Technological purpose— decolourants, clarifying, filtration and adsorbent agents</i>	
Acid clays of montmorillonite	GMP
Chloromethylated aminated styrene-divinylbenzene resin	GMP
Co-extruded polystyrene and polyvinyl polypyrrolidone	GMP
Copper sulphate	GMP
Dimethylamine-epichlorohydrin copolymer	150
Dimethyldialkylammonium chloride	GMP

Schedule 18 Processing aids

Section S18—3

Permitted processing aids for certain purposes

Permitted processing aids for certain purposes (section 1.3.3—5)

Substance	Maximum permitted level (mg/kg)
<i>Technological purpose—decolourants, clarifying, filtration and adsorbent agents</i>	
Divinylbenzene copolymer	GMP
High density polyethylene co-extruded with kaolin	GMP
Iron oxide	GMP
Fish collagen, including isinglass	GMP
Magnesium oxide	GMP
Modified polyacrylamide resins	GMP
Nylon	GMP
Phytates (including phytic acid, magnesium phytate & calcium phytate)	GMP
Polyester resins, cross-linked	GMP
Polyethylene	GMP
Polypropylene	GMP
Polyvinyl polypyrrolidone	GMP
Potassium ferrocyanide	0.1
<i>Technological purpose—desiccating preparation</i>	
Aluminium sulphate	GMP
Ethyl esters of fatty acids	GMP
Short chain triglycerides	GMP
<i>Technological purpose—ion exchange resin</i>	
Completely hydrolysed copolymers of methyl acrylate and divinylbenzene	GMP
Completely hydrolysed terpolymers of methyl acrylate, divinylbenzene and acrylonitrile	GMP
Cross-linked phenol-formaldehyde activated with one or both of the following: triethylene tetramine and tetraethylenepentamine	GMP
Cross-linked polystyrene, chloromethylated, then aminated with trimethylamine, dimethylamine, diethylenetriamine, or dimethylethanolamine	GMP
Diethylenetriamine, triethylene-tetramine, or tetraethylenepentamin cross-linked with epichlorohydrin	GMP
Divinylbenzene copolymer	GMP
Epichlorohydrin cross-linked with ammonia	GMP

Schedule 18 Processing aids

Section S18—3

Permitted processing aids for certain purposes

Permitted processing aids for certain purposes (section 1.3.3—5)

<i>Substance</i>	<i>Maximum permitted level (mg/kg)</i>
<i>Technological purpose—ion exchange resin</i>	
Epichlorohydrin cross-linked with ammonia and then quaternised with methyl chloride to contain not more than 18% strong base capacity by weight of total exchange capacity	GMP
Hydrolysed copolymer of methyl acrylate and divinylbenzene	GMP
Methacrylic acid-divinylbenzene copolymer	GMP
Methyl acrylate-divinylbenzene copolymer containing not less than 2% by weight of divinylbenzene, aminolysed with dimethylaminopropylamine	GMP
Methyl acrylate-divinylbenzene copolymer containing not less than 3.5% by weight of divinylbenzene, aminolysed with dimethylaminopropylamine	GMP
Methyl acrylate-divinylbenzene-diethylene glycol divinyl ether terpolymer containing not less than 3.5% by weight divinylbenzene and not more than 0.6% by weight of diethylene glycol divinyl ether, aminolysed with dimethylaminopropylamine	GMP
Methyl acrylate-divinylbenzene-diethylene glycol divinyl ether terpolymer containing not less than 7% by weight divinylbenzene and not more than 2.3% by weight of diethylene glycol divinyl ether, aminolysed with dimethylaminopropylamine and quaternised with methyl chloride	GMP
Reaction resin of formaldehyde, acetone, and tetraethylenepentamine	GMP
Regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with carboxymethyl groups whereby the amount of epichlorohydrin plus propylene oxide is no more than 70% of the starting amount of cellulose	GMP
Regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with tertiary amine groups whereby the amount of epichlorohydrin plus propylene oxide is no more than 70% of the starting amount of cellulose	GMP
Regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with quaternary amine groups whereby the amount of epichlorohydrin plus propylene oxide is no more than 250% of the starting amount of cellulose	GMP

Schedule 18 Processing aids

Section S18—3

Permitted processing aids for certain purposes

Permitted processing aids for certain purposes (section 1.3.3—5)

<i>Substance</i>	<i>Maximum permitted level (mg/kg)</i>
<i>Technological purpose—ion exchange resin</i>	
Regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then sulphonated, whereby the amount of epichlorohydrin plus propylene oxide employed is no more than 250% of the starting amount of cellulose	GMP
Styrene-divinylbenzene cross-linked copolymer, chloromethylated then aminated with dimethylamine and oxidised with hydrogen peroxide whereby the resin contains not more than 15% of vinyl N,N-dimethylbenzylamine-N-oxide and not more than 6.5% of nitrogen	GMP
Sulphite-modified cross-linked phenol-formaldehyde, with modification resulting in sulphonic acid groups on side chains	GMP
Sulphonated anthracite coal	GMP
Sulphonated copolymer of styrene and divinylbenzene	GMP
Sulphonated terpolymers of styrene, divinylbenzene, and acrylonitrile or methyl acrylate	GMP
Sulphonated tetrapolymer of styrene, divinylbenzene, acrylonitrile, and methyl acrylate derived from a mixture of monomers containing not more than a total of 2% by weight of acrylonitrile and methyl acrylate	GMP
<i>Technological purpose—lubricant, release and anti-stick agent</i>	
Acetylated mono- and diglycerides	100
Mineral oil based greases	GMP
Thermally oxidised soya-bean oil	320
White mineral oil	GMP
<i>Technological purpose—carrier, solvent, diluent</i>	
Benzyl alcohol	500
Croscarmellose sodium	GMP
Ethyl acetate	GMP
Glycerol diacetate	GMP
Glyceryl monoacetate	GMP
Glycine	GMP
Isopropyl alcohol	1000
L-Leucine	GMP
Triethyl citrate	GMP

Schedule 18 Processing aids

Section S18—4

Permitted enzymes

S18—4 Permitted enzymes

- (1) For section 1.3.3—6, the enzymes and sources are set out in:
 - (a) subsection (3) (permitted enzymes of animal origin); and
 - (b) subsection (4) (permitted enzymes of plant origin); and
 - (c) subsection (5) (permitted enzymes of microbial origin).
- (2) The sources listed in relation to enzymes of microbial origin may contain additional copies of genes from the same organism.

Note 1 EC, followed by a number, means the number the Enzyme Commission uses to classify the principal enzyme activity, which is known as the Enzyme Commission number.

Note 2 ATCC, followed by a number, means the number which the American Type Culture Collection uses to identify a prokaryote.

Note 3 Some enzyme sources identified in this section are protein engineered. If such an enzyme is used as a processing aid, the resulting food may have as an ingredient a food produced using gene technology, and the requirements relating to foods produced using gene technology will apply—see Standard 1.2.1 and Standard 1.5.2. The relevant enzymes are the following:

- Glycerophospholipid cholesterol acyltransferase, protein engineered variant;
- Lipase, triacylglycerol, protein engineered variant;
- Maltotetrahydrolase, protein engineered variant;

- (3) The permitted enzymes of animal origin are:

Permitted enzymes (section 1.3.3—6)—Enzymes of animal origin

Enzyme	Source
Lipase, triacylglycerol (EC 3.1.1.3)	Bovine stomach; salivary glands or forestomach of calf, kid or lamb; porcine or bovine pancreas
Pepsin (EC 3.4.23.1)	Bovine or porcine stomach
Phospholipase A ₂ (EC 3.1.1.4)	Porcine pancreas
Thrombin (EC 3.4.21.5)	Bovine or porcine blood
Trypsin (EC 3.4.21.4)	Porcine or bovine pancreas

Schedule 18 Processing aids

Section S18—4 Permitted enzymes

(4) The permitted enzymes of plant origin are:

Permitted enzymes (section 1.3.3—6)—Enzymes of plant origin

Enzyme	Source
α -Amylase (EC 3.2.1.1)	Malted cereals
β -Amylase (EC 3.2.1.2)	Sweet potato (<i>Ipomoea batatas</i>) Malted cereals
Actinidin (EC 3.4.22.14)	Kiwifruit (<i>Actinidia deliciosa</i>)
Ficin (EC 3.4.22.3)	<i>Ficus</i> spp.
Fruit bromelain (EC 3.4.22.33)	Pineapple fruit (<i>Ananas comosus</i>)
Papain (EC 3.4.22.2)	<i>Carica papaya</i>
Stem bromelain (EC 3.4.22.32)	Pineapple stem (<i>Ananas comosus</i>)

(5) The permitted enzymes of microbial origin are:

Permitted enzymes (section 1.3.3—6)—Enzymes of microbial origin

Enzyme	Source
α -Acetolactate decarboxylase (EC 4.1.1.5)	<i>Bacillus amyloliquefaciens</i> <i>Bacillus subtilis</i> <i>Bacillus subtilis</i> , containing the gene for α -Acetolactate decarboxylase isolated from <i>Bacillus brevis</i>
Aminopeptidase (EC 3.4.11.1)	<i>Aspergillus oryzae</i> <i>Lactococcus lactis</i>
α -Amylase (EC 3.2.1.1)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus licheniformis</i> <i>Bacillus licheniformis</i> , containing the gene for α -Amylase isolated from <i>Geobacillus stearothermophilus</i> <i>Bacillus subtilis</i> <i>Bacillus subtilis</i> , containing the gene for α -Amylase isolated from <i>Geobacillus stearothermophilus</i> <i>Geobacillus stearothermophilus</i>
β -Amylase (EC 3.2.1.2)	<i>Bacillus amyloliquefaciens</i> <i>Bacillus subtilis</i>
Amylomaltase (EC 2.4.1.25)	<i>Bacillus amyloliquefaciens</i> , containing the gene for amylomaltase derived from <i>Thermus thermophilus</i>
α -Arabinofuranosidase (EC 3.2.1.55)	<i>Aspergillus niger</i>
Asparaginase (EC 3.5.1.1)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i>

Schedule 18 Processing aids

Section S18—4

Permitted enzymes

Permitted enzymes (section 1.3.3—6)—Enzymes of microbial origin

Enzyme	Source
Aspergillopepsin I (EC 3.4.23.6)	<i>Aspergillus niger</i>
	<i>Aspergillus oryzae</i>
Aspergillopepsin II (EC 3.4.23.19)	<i>Aspergillus niger</i>
Carboxylesterase (EC 3.1.1.1)	<i>Rhizomucor miehei</i>
Catalase (EC 1.11.1.6)	<i>Aspergillus niger</i>
	<i>Micrococcus luteus</i>
Cellulase (EC 3.2.1.4)	<i>Aspergillus niger</i>
	<i>Penicillium funiculosum</i>
	<i>Trichoderma reesei</i>
	<i>Trichoderma viride</i>
Chymosin (EC 3.4.23.4)	<i>Aspergillus niger</i>
	<i>Escherichia coli</i> K-12 strain GE81
	<i>Kluyveromyces lactis</i>
Cyclodextrin glucanotransferase (EC 2.4.1.19)	<i>Paenibacillus macerans</i>
Dextranase (EC 3.2.1.11)	<i>Chaetomium gracile</i>
	<i>Penicillium lilacinum</i>
Endo-arabinase (EC 3.2.1.99)	<i>Aspergillus niger</i>
Endo-protease (EC 3.4.21.26)	<i>Aspergillus niger</i>
β -Fructofuranosidase (EC 3.2.1.26)	<i>Aspergillus niger</i>
	<i>Saccharomyces cerevisiae</i>
α -Galactosidase (EC 3.2.1.22)	<i>Aspergillus niger</i>
β -Galactosidase (EC 3.2.1.23)	<i>Aspergillus niger</i>
	<i>Aspergillus oryzae</i>
	<i>Bacillus circulans</i> ATCC 31382
	<i>Kluyveromyces marxianus</i> <i>Kluyveromyces lactis</i>
Glucan 1,3- β -glucosidase (EC 3.2.1.58)	<i>Trichoderma harzianum</i>
β -Glucanase (EC 3.2.1.6)	<i>Aspergillus niger</i>
	<i>Aspergillus oryzae</i>
	<i>Bacillus amyloliquefaciens</i>
	<i>Bacillus subtilis</i>
	<i>Disporotrichum dimorphosporum</i>
	<i>Humicola insolens</i>
	<i>Talaromyces emersonii</i>
<i>Trichoderma reesei</i>	
Glucoamylase (EC 3.2.1.3)	<i>Aspergillus niger</i>
	<i>Aspergillus oryzae</i>
	<i>Rhizopus delemar</i>
	<i>Rhizopus oryzae</i>

Schedule 18 Processing aids

Section S18—4

Permitted enzymes

Permitted enzymes (section 1.3.3—6)—Enzymes of microbial origin

Enzyme	Source
	<i>Rhizopus niveus</i>
Glucose oxidase (EC 1.1.3.4)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> , containing the gene for glucose oxidase isolated from <i>Aspergillus niger</i>
α -Glucosidase (EC 3.2.1.20)	<i>Aspergillus oryzae</i> <i>Aspergillus niger</i>
β -Glucosidase (EC 3.2.1.21)	<i>Aspergillus niger</i>
Glycerophospholipid cholesterol acyltransferase, protein engineered variant (EC 2.3.1.43)	<i>Bacillus licheniformis</i> , containing the gene for glycerophospholipid cholesterol acyltransferase isolated from <i>Aeromonas salmonicida</i> subsp. <i>salmonicida</i>
Hemicellulase endo-1,3- β -xylanase (EC 3.2.1.32)	<i>Humicola insolens</i>
Hemicellulase endo-1,4- β -xylanase (EC 3.2.1.8)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> <i>Aspergillus oryzae</i> , containing the gene for Endo-1,4- β -xylanase isolated from <i>Aspergillus aculeatus</i> <i>Aspergillus oryzae</i> , containing the gene for Endo-1,4- β -xylanase isolated from <i>Thermomyces lanuginosus</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus subtilis</i> <i>Humicola insolens</i> <i>Trichoderma reesei</i>
Hemicellulase multicomponent enzyme (EC 3.2.1.78)	<i>Aspergillus niger</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus subtilis</i> <i>Trichoderma reesei</i>
Hexose oxidase (EC 1.1.3.5)	<i>Hansenula polymorpha</i> , containing the gene for Hexose oxidase isolated from <i>Chondrus crispus</i>
Inulinase (EC 3.2.1.7)	<i>Aspergillus niger</i>
Lipase, monoacylglycerol (EC 3.1.1.23)	<i>Penicillium camembertii</i>
Lipase, triacylglycerol (EC 3.1.1.3)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> <i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Fusarium oxysporum</i> <i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Humicola lanuginosa</i>

Schedule 18 Processing aids

Section S18—4

Permitted enzymes

Permitted enzymes (section 1.3.3—6)—Enzymes of microbial origin

Enzyme	Source
	<i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Rhizomucor miehei</i> <i>Candida rugosa</i> <i>Hansenula polymorpha</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Fusarium heterosporum</i> <i>Mucor javanicus</i> <i>Penicillium roquefortii</i> <i>Rhizopus arrhizus</i> <i>Rhizomucor miehei</i> <i>Rhizopus niveus</i> <i>Rhizopus oryzae</i>
Lipase, triacylglycerol, protein engineered variant (EC 3.1.1.3)	<i>Aspergillus niger</i> , containing the gene for lipase, triacylglycerol isolated from <i>Fusarium culmorum</i>
Lysophospholipase (EC 3.1.1.5)	<i>Aspergillus niger</i>
Maltogenic α -amylase (EC 3.2.1.133)	<i>Bacillus subtilis</i> containing the gene for maltogenic α -amylase isolated from <i>Geobacillus stearothermophilus</i>
Maltotetrahydrolase, protein engineered variant (EC 3.2.1.60)	<i>Bacillus licheniformis</i> , containing the gene for maltotetrahydrolase isolated from <i>Pseudomonas stutzeri</i>
Metalloproteinase	<i>Aspergillus oryzae</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus coagulans</i> <i>Bacillus subtilis</i>
Mucorpepsin (EC 3.4.23.23)	<i>Aspergillus oryzae</i> <i>Aspergillus oryzae</i> , containing the gene for Aspartic proteinase isolated from <i>Rhizomucor meihei</i> <i>Rhizomucor meihei</i> <i>Cryphonectria parasitica</i>
Pectin lyase (EC 4.2.2.10)	<i>Aspergillus niger</i>
Pectinesterase (EC 3.1.1.11)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> , containing the gene for pectinesterase isolated from <i>Aspergillus aculeatus</i>
Phospholipase A ₁ (EC 3.1.1.32)	<i>Aspergillus oryzae</i> , containing the gene for phospholipase A ₁ isolated from <i>Fusarium venenatum</i>
Phospholipase A ₂ (EC 3.1.1.4)	<i>Aspergillus niger</i> , containing the gene isolated from porcine pancreas <i>Streptomyces violaceoruber</i>

Schedule 18 Processing aids

Section S18—4

Permitted enzymes

Permitted enzymes (section 1.3.3—6)—Enzymes of microbial origin

Enzyme	Source
3-Phytase (EC 3.1.3.8)	<i>Aspergillus niger</i>
4-Phytase (EC 3.1.3.26)	<i>Aspergillus oryzae</i> , containing the gene for 4-phytase isolated from <i>Peniophora lycii</i>
Polygalacturonase or Pectinase multicomponent enzyme (EC 3.2.1.15)	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> <i>Trichoderma reesei</i>
Pullulanase (EC 3.2.1.41)	<i>Bacillus acidopullulyticus</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus licheniformis</i> <i>Bacillus subtilis</i> <i>Bacillus subtilis</i> , containing the gene for pullulanase isolated from <i>Bacillus acidopullulyticus</i> <i>Klebsiella pneumoniae</i>
Serine proteinase (EC 3.4.21.14)	<i>Aspergillus oryzae</i> <i>Bacillus amyloliquefaciens</i> <i>Bacillus halodurans</i> <i>Bacillus licheniformis</i> <i>Bacillus subtilis</i>
Transglucosidase (EC 2.4.1.24)	<i>Aspergillus niger</i>
Transglutaminase (EC 2.3.2.13)	<i>Streptomyces mobaraensis</i>
Urease (EC 3.5.1.5)	<i>Lactobacillus fermentum</i>
Xylose isomerase (EC 5.3.1.5)	<i>Actinoplanes missouriensis</i> <i>Bacillus coagulans</i> <i>Microbacterium arborescens</i> <i>Streptomyces olivaceus</i> <i>Streptomyces olivochromogenes</i> <i>Streptomyces murinus</i> <i>Streptomyces rubiginosus</i>

Schedule 18 Processing aids

Section S18—5

Permitted microbial nutrients and microbial nutrient adjuncts

S18—5 Permitted microbial nutrients and microbial nutrient adjuncts

For section 1.3.3—7, the substances are:

Permitted microbial nutrients and microbial nutrient adjuncts

adenine	inosine
adonitol	inositol
ammonium sulphate	manganese chloride
ammonium sulphite	manganese sulphate
arginine	niacin
asparagine	nitric acid
aspartic acid	pantothenic acid
benzoic acid	peptone
biotin	phytates
calcium pantothenate	polyvinylpyrrolidone
calcium propionate	pyridoxine hydrochloride
copper sulphate	riboflavin
cystine	sodium formate
cysteine monohydrochloride	sodium molybdate
dextran	sodium tetraborate
ferrous sulphate	thiamin
glutamic acid	threonine
glycine	uracil
guanine	xanthine
histidine	zinc chloride
hydroxyethyl starch	zinc sulphate

Schedule 18 Processing aids

Section S18—6

Permitted processing aids for water

S18—6 Permitted processing aids for water

For section 1.3.3—8, the substances and maximum permitted levels are:

Permitted processing aids for water (section 1.3.3—8)

<i>Substance</i>	<i>Maximum permitted level (mg/kg)</i>
Aluminium sulphate	GMP
Ammonium sulphate	GMP
Calcium hypochlorite	5 (available chlorine)
Calcium sodium polyphosphate	GMP
Chlorine	5 (available chlorine)
Chlorine dioxide	1 (available chlorine)
Cobalt sulphate	2
Copper sulphate	2
Cross-linked phenol-formaldehyde activated with one or both of triethylenetetramine or tetraethylenepentamine	GMP
Cross-linked polystyrene, first chloromethylated then aminated with trimethylamine, dimethylamine, diethylenetriamine or dimethylethanolamine	GMP
Diethylenetriamine, triethylenetetramine or tetraethylenepentamine cross-linked with epichlorohydrin	GMP
Ferric chloride	GMP
Ferric sulphate	GMP
Ferrous sulphate	GMP
Hydrofluorosilicic acid (fluorosilicic acid) (only in water used as an ingredient in other foods)	1.5 (as fluoride)
Hydrolysed copolymers of methyl acrylate and divinylbenzene	GMP
Hydrolysed terpolymers of methyl acrylate, divinylbenzene and acrylonitrile	GMP
Hydrogen peroxide	5
1-Hydroxyethylidene-1,1-diphosphonic acid	GMP
Lignosulphonic acid	GMP
Magnetite	GMP
Maleic acid polymers	GMP
Methyl acrylate-divinylbenzene copolymer containing not less than 2% divinylbenzene aminolysed with dimethylaminopropylamine	GMP
Methacrylic acid-divinylbenzene copolymer	GMP
Methyl acrylate-divinylbenzene-diethylene glycol divinyl ether terpolymer containing not less than 3.5% divinylbenzene and not more than 0.6% diethylene glycol divinyl ether, aminolysed with dimethylaminopropylamine	GMP

Schedule 18 Processing aids

Section S18—6

Permitted processing aids for water

Permitted processing aids for water (section 1.3.3—8)

Substance	Maximum permitted level (mg/kg)
Modified polyacrylamide resins	GMP
Monobutyl ethers of polyethylene-polypropylene glycol	GMP
Ozone	GMP
Phosphorous acid	GMP
Polyacrylamide (polyelectrolytes) (as acrylamide monomer)	0.0002
Polyaluminium chloride	GMP
Polydimethyldiallyl ammonium chloride	GMP
Polyoxypropylene glycol	GMP
Potassium permanganate	GMP
Reaction resin of formaldehyde, acetone and tetraethylenepentamine	GMP
Regenerated cellulose, cross-linked and alkylated with epichlorohydrin and propylene oxide, then sulphonated whereby the amount of epichlorohydrin plus propylene oxide employed is no more than 250% of the starting amount of cellulose	GMP
Silver ions	0.01
Sodium aluminate	GMP
Sodium fluoride (only in water used as an ingredient in other foods)	1.5 (as fluoride)
Sodium fluorosilicate (Sodium silicofluoride) (only in water used as an ingredient in other foods)	1.5 (as fluoride)
Sodium glucoheptonate	0.08 (measured as cyanide)
Sodium gluconate	GMP
Sodium humate	GMP
Sodium hypochlorite	5 (available chlorine)
Sodium lignosulphonate	GMP
Sodium metabisulphite	GMP
Sodium nitrate	50 (as nitrate)
Sodium polymethacrylate	2.5
Sodium sulphite (neutral or alkaline)	GMP
Styrene-divinylbenzene cross-linked copolymer	0.02 (as styrene)
Sulphonated copolymer of styrene and divinylbenzene	GMP
Sulphonated terpolymers of styrene, divinylbenzene acrylonitrile and methyl acrylate	GMP
Sulphite modified cross-linked phenol-formaldehyde	GMP
Tannin powder extract	GMP
Tetrasodium ethylene diamine tetraacetate	GMP
Zinc sulphate	GMP

Schedule 18 Processing aids

Section S18—7

Permitted bleaching, washing and peeling agents—various foods

S18—7 Permitted bleaching, washing and peeling agents—various foods

For section 1.3.3—9, the substances, foods and maximum permitted levels are:

Permitted bleaching, washing and peeling agents (section 1.3.3—9)

<i>Substance</i>	<i>Food</i>	<i>Maximum permitted level (mg/kg)</i>
Benzoyl peroxide	All foods	40 (measured as benzoic acid)
Bromo-chloro-dimethylhydantoin	All foods	1.0 (available chlorine) 1.0 (inorganic bromide) 2.0 (dimethylhydantoin)
Calcium hypochlorite	All foods	1.0 (available chlorine)
Chlorine	All foods	1.0 (available chlorine)
Chlorine dioxide	All foods	1.0 (available chlorine)
Diammonium hydrogen orthophosphate	All foods	GMP
Dibromo-dimethylhydantoin	All foods	2.0 (inorganic bromide) 2.0 (dimethylhydantoin)
2-Ethylhexyl sodium sulphate	All foods	0.7
Hydrogen peroxide	All foods	5
Iodine	Fruits, vegetables and eggs	GMP
Oxides of nitrogen	All foods	GMP
Ozone	All foods	GMP
Peracetic acid	All foods	GMP
Sodium chlorite	All foods	1.0 (available chlorine)
Sodium dodecylbenzene sulphonate	All foods	0.7
Sodium hypochlorite	All foods	1.0 (available chlorine)
Sodium laurate	All foods	GMP
Sodium metabisulphite	Root and tuber vegetables	25
Sodium peroxide	All foods	5
Sodium persulphate	All foods	GMP
Triethanolamine	Dried vine fruit	GMP

Schedule 18 Processing aids

Section S18—8

Permitted extraction solvents—various foods

S18—8 Permitted extraction solvents—various foods

For section 1.3.3—10, the substances, foods and maximum permitted levels are:

Permitted extraction solvents (section 1.3.3—10)

<i>Substance</i>	<i>Food</i>	<i>Maximum permitted level (mg/kg)</i>
Acetone	Flavouring substances	2
	Other foods	0.1
Benzyl alcohol	All foods	GMP
Butane	Flavouring substances	1
	Other foods	0.1
Butanol	All foods	10
Cyclohexane	All foods	1
Dibutyl ether	All foods	2
Diethyl ether	All foods	2
Dimethyl ether	All foods	2
Ethyl acetate	All foods	10
Glyceryl triacetate	All foods	GMP
Hexanes	All foods	20
Isobutane	Flavouring substances	1
	Other foods	0.1
Methanol	All foods	5
Methylene chloride	Decaffeinated coffee	2
	Decaffeinated tea	2
	Flavouring substances	2
Methylethyl ketone	All foods	2
Propane	All foods	1
Toluene	All foods	1

Schedule 18 Processing aids

Section S18—9

Permitted processing aids—various technological purposes

S18—9 Permitted processing aids—various technological purposes

(1) For section 1.3.3—11, the substances, foods, technological purposes and maximum permitted levels are set out in the table to subsection (3).

(2) In this section:

agarose ion exchange resin means agarose cross-linked and alkylated with epichlorohydrin and propylene oxide, then derivatised with tertiary amine groups whereby the amount of epichlorohydrin plus propylene oxide does not exceed 250% by weight of the starting amount of agarose.

approved food for use of phage means food that:

- (a) is ordinarily consumed in the same state in which it is sold; and
- (b) is solid; and
- (c) is one of the following:
 - (i) meat or meat product;
 - (ii) fish or fish product;
 - (iii) fruit or fruit product;
 - (iv) vegetable or vegetable product;
 - (v) cheese; and
- (d) is not one of the following:
 - (i) whole nuts in the shell;
 - (ii) raw fruits and vegetables that are intended for hulling, peeling or washing by the consumer.

(3) The table is:

Permitted processing aids—various purposes (section 1.3.3—11)

Substance	Technological purpose and food	Maximum permitted level (mg/kg)
Agarose ion exchange resin	Removal of specific proteins and polyphenols from beer	GMP
Ammonium persulphate	Yeast washing agent	GMP
Ammonium sulphate	Decalcification agent for edible casings	GMP
Butanol	Suspension agent for sugar crystals	10
Carbonic acid	Bleached tripe washing agent	GMP
Cetyl alcohol	Coating agent on meat carcasses and primal cuts to prevent desiccation	1.0
Chitosan sourced from <i>Aspergillus niger</i>	Manufacture of wine, beer, cider, spirits and food grade ethanol	GMP

Schedule 18 Processing aids

Section S18—9

Permitted processing aids—various technological purposes

Permitted processing aids—various purposes (section 1.3.3—11)

Substance and food	Technological purpose	Maximum permitted level (mg/kg)
A colouring that is an additive permitted at GMP, a colouring permitted at GMP, or a colouring permitted to a maximum level	Applied to the outer surface of meat as a brand for the purposes of inspection or identification	GMP
Cupric citrate	Removal of sulphide compounds from wine	GMP
β-Cyclodextrin	Used to extract cholesterol from eggs	GMP
L-Cysteine (or HCl salt)	Dough conditioner	75
Ethyl acetate	Cell disruption of yeast	GMP
Ethylene diamine tetraacetic acid	Metal sequestrant for edible fats and oils and related products	GMP
Gibberellic acid	Barley germination	GMP
Gluteral	Manufacture of edible collagen casings	GMP
Hydrogen peroxide	Control of lactic acid producing microorganisms to stabilise the pH during the manufacture of: <ul style="list-style-type: none"> (a) fermented milk; (b) fermented milk products; (c) cheese made using lactic acid producing microorganisms; or (d) cheese products made using lactic acid producing microorganisms 	5
	Inhibiting agent for dried vine fruits, fruit and vegetable juices, sugar, vinegar and yeast autolysate	5
	Removal of glucose from egg	5
	Removal of sulphur dioxide	5
1-Hydroxyethylidene-1, 1-diphosphonic acid	Metal sequestrant for use with anti-microbial agents for meat, fruit and vegetables	GMP
Ice Structuring Protein type III HPLC 12	Manufacture of ice cream and edible ices	100
Indole acetic acid	Barley germination	GMP
Lactoperoxidase from bovine milk EC 1.11.1.7	Reduce the bacterial population or inhibit bacterial growth on meat surfaces	GMP
<i>Listeria</i> phage P100	Listericidal treatment for use on approved food for use of phage	GMP
Morpholine	Solubilising agent for coating mixtures on fruits	GMP
Oak	For use in the manufacture of wine	GMP

Schedule 18 Processing aids

Section S18—9

Permitted processing aids—various technological purposes

Permitted processing aids—various purposes (section 1.3.3—11)

<i>Substance and food</i>	<i>Technological purpose</i>	<i>Maximum permitted level (mg/kg)</i>
Octanoic acid	Anti-microbial agent for meat, fruit and vegetables	GMP
Paraffin	Coatings for cheese and cheese products	GMP
Polyvinyl acetate	Preparation of waxes for use in cheese and cheese products	GMP
Potassium bromate	Germination control in malting of bromate	Limit of determination
Sodium bromate	Germination control in malting of bromate	Limit of determination
Sodium chlorite	Anti-microbial agent for meat, fish, fruit and vegetables chlorous acid and chlorine dioxide	Limit of determination of chlorite, chlorate,
Sodium gluconate	Denuding, bleaching & neutralising tripe	GMP
Sodium glycerophosphate	Cryoprotectant for starter culture	GMP
Sodium metabisulphite	Dough conditioner	60
	Removal of excess chlorine	60
	Softening of corn kernels for starch manufacture	60 (in the starch)
	Treatment of hides for use in gelatine and collagen manufacture	GMP
Sodium sulphide	Treatment of hides for use in gelatine and collagen manufacture	GMP
Sodium sulphite	Dough conditioner	60
Sodium thiocyanate	Reduce and/or inhibit bacterial population on meat surfaces	GMP
Stearyl alcohol	Coating agent on meat carcasses and primal cuts to prevent desiccation	GMP
Sulphur dioxide	Control of nitrosodimethylamine in malting	750
	Treatment of hides for use in gelatine and collagen manufacture	750
Sulphurous acid	Softening of corn kernels	GMP
	Treatment of hides for use in gelatine and collagen manufacture	GMP
Triethanolamine	Solubilising agent for coating mixtures for fruits	GMP
Urea	Manufacture of concentrated gelatine solutions	1.5 times the mass of the gelatine present
	Microbial nutrient and microbial nutrient adjunct for the manufacture of all foods, except alcoholic beverages	GMP

Schedule 18 Processing aids

Section S18—10 Permission to use dimethyl dicarbonate as microbial control agent

Permitted processing aids—various purposes (section 1.3.3—11)

<i>Substance and food</i>	<i>Technological purpose</i>	<i>Maximum permitted level (mg/kg)</i>
Woodflour from untreated <i>Pinus radiata</i>	Gripping agent used in the treatment of hides	GMP

S18—10 Permission to use dimethyl dicarbonate as microbial control agent

For section 1.3.3—12, the foods and maximum permitted addition levels are:

Permission to use dimethyl dicarbonate as microbial control agent (section 1.3.3—12)

<i>Food</i>	<i>Maximum permitted addition level</i>
Any of the following:	250 mg/kg
(a) fruit juice;	
(b) vegetable juice;	
(c) fruit juice product;	
(d) vegetable juice product.	
Water based flavoured drinks	250 mg/kg
Formulated beverages	250 mg/kg
Any of the following:	200 mg/kg
(a) wine	
(b) sparkling wine;	
(c) fortified wine;	
(d) fruit wine (including cider and perry);	
(e) vegetable wine;	
(f) mead	

Schedule 19 Maximum levels of contaminants and natural toxicants

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Maximum levels of contaminants and natural toxicants are regulated by subsection 1.1.1—10(5) and Standard 1.4.1. This Standard lists contaminants and natural toxicants for food for subsection 1.4.1—3(1), and sets out the requirements for and method of calculating the level of mercury in fish for subsection 1.4.1—3(2).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S19—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 19 — Maximum levels of contaminants and natural toxicants*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S19—2 Definitions

In this Schedule:

arsenic is taken to be a metal.

ergot means the sclerotium or dormant winter form of the fungus *Claviceps purpurea*.

hydrocyanic acid, total means all hydrocyanic acid including hydrocyanic acid evolved from cyanogenic glycosides and cyanohydrins during or following enzyme hydrolysis or acid hydrolysis.

MU means the unit of measurement for neurotoxic shellfish poisons described in *Recommended procedures for examination of seawater and shellfish*, Irwin N. (ed) fourth edition, American Public Health Association Inc.

ready-to-eat cassava chips means the product made from sweet cassava that is represented as ready for immediate consumption with no further preparation required, and includes crisps, crackers and ‘vege’ crackers.

S19—3 Calculating levels of contaminants and toxicants

(1) In this Schedule:

- (a) a reference to a metal is taken to include a reference to each chemical species of that metal; and

Schedule 19 Maximum levels of contaminants and natural toxicants

Section S19—4

Maximum levels of metal contaminants

- (b) for a food for which only a portion is ordinarily consumed—a reference to the food is taken to be a reference to that portion; and
 - (c) in the case of seaweed—calculations are to be based on seaweed at 85% hydration; and
 - (d) subject to subsection S19—7 (3), if food other than seaweed is dried, dehydrated or concentrated—calculations are to be based on the food or its ingredients prior to drying, dehydration or concentration.
- (2) For paragraph (1)(d), calculations must be based on 1 or more of:
- (a) the manufacturer’s analysis of the food; or
 - (b) the actual amount or *average quantity of water in the ingredients of the food; or
 - (c) generally accepted data.

S19—4 Maximum levels of metal contaminants

Note For mean levels of mercury in fish, crustacea and molluscs, see section S19—7.

For each metal contaminant listed below, the maximum level (in mg/kg) for a particular food is listed in relation to that food:

Maximum levels of metal contaminants		
Contaminant	Food	Maximum level
Arsenic (total)	Cereal grains and milled cereal products (as specified in Schedule 22)	1
	Salt	0.5
Arsenic (inorganic)	Crustacea	2
	Fish	2
	Molluscs	1
	Seaweed	1
Cadmium	Chocolate and cocoa products	0.5
	Kidney of cattle, sheep and pig	2.5
	Leafy vegetables (as specified in Schedule 22)	0.1
	Liver of cattle, sheep and pig	1.25
	Meat of cattle, sheep and pig (excluding offal)	0.05
	Molluscs (excluding dredge/bluff oysters and queen scallops)	2
	Peanuts	0.5
	Rice	0.1
	Root and tuber vegetables (as specified in Schedule 22)	0.1
Salt	0.5	
Wheat	0.1	

Schedule 19 Maximum levels of contaminants and natural toxicants

Section S19—5

Maximum levels of non-metal contaminants

<i>Contaminant</i>	<i>Food</i>	<i>Maximum level</i>
Lead	Brassicas	0.3
	Cereals, Pulses and Legumes	0.2
	Edible offal of cattle, sheep, pig and poultry	0.5
	Fish	0.5
	Fruit	0.1
	Infant formula products	0.02
	Meat of cattle, sheep, pig and poultry (excluding offal)	0.1
	Molluscs	2
	Salt	2
	Vegetables (except brassicas)	0.1
Mercury	Fish, crustacea and molluscs	See S19—7
	Salt	0.1
Tin	All canned foods	250

S19—5 Maximum levels of non-metal contaminants

For each non-metal contaminant listed below, the maximum level (in mg/kg unless specified otherwise) for a particular food is listed in relation to that food:

Maximum levels of non-metal contaminants

<i>Contaminant</i>	<i>Food</i>	<i>Maximum level</i>
Acrylonitrile	All food	0.02
Aflatoxin	Peanuts	0.015
	Tree nuts (as specified in Schedule 22)	0.015
Amnesic shellfish poisons (Domoic acid equivalent)	Bivalve molluscs	20
3-chloro-1,2-propanediol	Soy sauce and oyster sauce	0.2 calculated on a 40% dry matter content
Diarrhetic shellfish poisons (Okadaic acid equivalent)	Bivalve molluscs	0.2
1,3-dichloro-2-propanol	Soy sauce and oyster sauce	0.005 calculated on a 40% dry matter content
Ergot	Cereal grains	500
Methanol	Red wine, white wine and fortified wine	3 g methanol / L of ethanol

Schedule 19 Maximum levels of contaminants and natural toxicants

Section S19—6

Maximum levels of natural toxicants

<i>Contaminant</i>	<i>Food</i>	<i>Maximum level</i>
	Whisky, Rum, Gin and Vodka	0.4 g methanol / L of ethanol
	Other spirits, fruit wine, vegetable wine and mead	8 g methanol / L of ethanol
Neurotoxic shellfish poisons	Bivalve molluscs	200 MU/kg
Paralytic shellfish poisons (Saxitoxin equivalent)	Bivalve molluscs	0.8
Phomopsins	Lupin seeds and the products of lupin seeds	0.005
Polychlorinated biphenyls, total	Mammalian fat	0.2
	Poultry fat	0.2
	Milk and milk products	0.2
	Eggs	0.2
	Fish	0.5
Vinyl chloride	All food except packaged water	0.01

S19—6 Maximum levels of natural toxicants

(1) For each natural toxicant listed below, the maximum level (in mg/kg) for a particular food is listed in relation to that food:

Maximum levels of natural toxicants

<i>Natural toxicant</i>	<i>Food</i>	<i>Maximum level</i>
Agaric acid	Food containing mushrooms	100
	Alcoholic beverages	100
Aloin	Alcoholic beverages	50
Berberine	Alcoholic beverages	10
Coumarin	Alcoholic beverages	10
Hypericine	Alcoholic beverages	2
Lupin alkaloids	Lupin flour, lupin kernel flour, lupin kernel meal and lupin hulls	200
Pulegone	Confectionery	350
	Beverages	250
Quassine	Alcoholic beverages	50
Quinine	Mixed alcoholic drinks not elsewhere classified	300
	Tonic drinks, bitter drinks and quinine drinks	100
	Wine based drinks and reduced alcohol wines	300
Safrole	Food containing mace and nutmeg	15
	Meat products	10

**Schedule 19 Maximum levels of contaminants and
natural toxicants**

Section S19—6

Maximum levels of natural toxicants

Maximum levels of natural toxicants

<i>Natural toxicant</i>	<i>Food</i>	<i>Maximum level</i>
Agaric acid	Food containing mushrooms	100
	Alcoholic beverages	5
Santonin	Alcoholic beverages	1
Sparteine	Alcoholic beverages	5
Thujones (alpha and beta)	Sage stuffing	250
	Bitters	35
	Sage flavoured foods	25
	Alcoholic beverages	10

(2) For each natural toxicant listed below, the maximum level (in mg/kg) for a particular food is listed in relation to that food:

Maximum levels of natural toxicants

<i>Natural toxicant</i>	<i>Food</i>	<i>Maximum level</i>
Erucic acid	Edible oils	20 000
Histamine	Fish and fish products	200
Hydrocyanic acid, total	Confectionery	25
	Stone fruit juices	5
	Marzipan	50
	Ready-to-eat cassava chips	10
	Alcoholic beverages	1 mg per 1% alcohol content

Schedule 19 Maximum levels of contaminants and natural toxicants

Section S19—7

Mean and maximum levels of mercury in fish, crustacea and molluscs

S19—7 Mean and maximum levels of mercury in fish, crustacea and molluscs

(1) For subsection 1.4.1—3(2), the following table applies:

<i>For:</i>	<i>if:</i>	<i>the mean level of mercury in sample units must be no greater than:</i>	<i>the maximum level of mercury in any sample unit must be no greater than:</i>
gemfish, billfish (including marlin), southern bluefin tuna, barramundi, ling, orange roughy, rays and all species of shark;	(a) both of the following are satisfied:	1.0 mg/kg	1.5 mg/kg
	(i) 10 or more sample units are available;		
	(ii) the concentration of mercury in any sample unit is greater than 1.0 mg/kg;		
	(b) 5 sample units are available:	1.0 mg/kg	(no level set)
	(c) there are insufficient samples to analyse in accordance with subsection S19—7(2):		1.0 mg/kg
other fish, fish products, crustacea and molluscs;	(a) both of the following are satisfied:	0.5 mg/kg	1.5 mg/kg
	(i) 10 or more sample units are available;		
	(ii) the concentration of mercury in any sample unit is greater than 1.0 mg/kg;		
	(b) 5 sample units are available:	0.5 mg/kg	(no level set)
	(c) there are insufficient samples to analyse in accordance with subsection S19—7(2):		1.0 mg/kg

(2) For this the table in subsection (1), calculations must be done on the basis of the following number of sample units:

- (a) for fish other than crustacea or molluscs:
 - (i) for a *lot of not more than 5 tonnes—10;
 - (ii) for a lot of more than 5 but not more than 10 tonnes—15;
 - (iii) for a lot of more than 10 but not more than 30 tonnes—20;
 - (iv) for a lot of more than 30 but not more than 100 tonnes—25;
 - (v) for a lot of more than 100 but not more than 200 tonnes—30;
 - (vi) for a lot of more than 200 tonnes—40;
- (b) for crustacea and molluscs:

Schedule 19 Maximum levels of contaminants and natural toxicants

Section S19—7

Mean and maximum levels of mercury in fish, crustacea and molluscs

- (i) for a lot of not more than 1 tonne—10;
 - (ii) for a lot of more than 1 but not more than 5 tonnes—15;
 - (iii) for a lot of more than 5 but not more than 30 tonnes—20;
 - (iv) for a lot of more than 30 but not more than 100 tonnes—25;
 - (v) for a lot of more than 100 tonnes—30;
- (c) if the number of sampling units specified in paragraph (a) of (b) is not available—5.
- (3) In this section, the mercury content of dried or partially dried fish must be calculated on an 80% moisture basis.

Definition of **sample unit**

- (4) In this section:

sample unit means a sample:

- (a) that has been randomly selected from the *lot being analysed; and
 - (b) that has been taken from the edible portion of a fish, mollusc or crustacean, whether packaged or otherwise; and
 - (c) that is sufficient for the purposes of analysis.
- (5) Each sample unit must be taken from a separate fish, mollusc, crustacean or package of fish product.
-

Schedule 20 Maximum residue limits

Section S20—1 Name

Schedule 20 Maximum residue limits

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Maximum residue limits are regulated by subsection 1.1.1—10(5) and Standard 1.4.2. This Standard identifies agvet chemicals, and their permitted residues, for the purpose of section 1.4.2—4.

S20—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 20—Maximum residue limits*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

Note 2 This Standard applies in Australia only. In New Zealand, maximum residue limits for agricultural compounds are set out in a Maximum Residue Limits Standard.

S20—2 Interpretation

In this Schedule:

- (a) an asterisk (*) indicates that the maximum residue limit is set at the limit of determination; and
- (b) the symbol ‘T’ indicates that the maximum residue limit is a temporary maximum residue limit.

S20—3 Maximum residue limits

For section 1.4.2—4, the *agvet chemicals, permitted residues, and amounts are as follows, expressed in mg per kg:

Maximum residue limits			
		Cucumber	0.02
		Currant, black	0.02
<i>Agvet chemical:</i> Abamectin		Egg plant	0.02
<i>Permitted residue:</i> <i>Sum of avermectin B1a, avermectin B1b and (Z)-8,9 avermectin B1a, and (Z)-8,9 avermectin B1b</i>		Goat fat	0.1
		Goat kidney	0.01
Adzuki bean (dry)	T*0.002	Goat liver	0.05
Almonds	T*0.01	Goat milk	0.005
Apple	0.01	Goat muscle	0.01
Blackberries	T0.1	Grapes	0.02
Blueberries	T*0.02	Herbs	T0.5
Cattle, edible offal of	0.1	Hops, dry	0.1
Cattle fat	0.1	Kaffir lime leaves	T0.5
Cattle meat	0.005	Lemon grass	T0.5
Cattle milk	0.02	Lettuce, head	0.05
Chervil	T0.5	Lettuce, leaf	T1
Citrus fruits	0.02	Maize	T*0.01
Common bean (dry)[navy bean]	T*0.002	Melons, except watermelon	T0.02
Coriander (leaves, stem, roots)	T0.5	Mung bean (dry)	T*0.002
Cotton seed	*0.01	Mushrooms	T0.05

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
Onion, Welsh	T0.05	<i>Agvet chemical:</i>	Acetamiprid
Papaya (pawpaw)	T0.1	<i>Permitted residue—commodities of plant origin:</i>	
Peanut	T*0.002	<i>Acetamiprid</i>	
Pear	0.01	<i>Permitted residue—commodities of animal origin:</i>	
Peas	T0.5	<i>Sum of acetamiprid and N-demethyl acetamiprid</i>	
Peppers	T0.1	<i>((E)-N¹-[(6-chloro-3-pyridyl)methyl]-N²-cyanoacetamidine), expressed as acetamiprid</i>	
Pig kidney	0.01	Citrus fruits	0.5
Pig liver	0.02	Cotton seed	*0.05
Pig meat (in the fat)	0.02	Cranberry	0.6
Popcorn	T*0.01	Cucumber	T0.2
Raspberries, red, black	T0.1	Date	T5
Rhubarb	T0.05	Edible offal (mammalian)	*0.05
Shallot	T0.05	Eggs	*0.01
Sheep, edible offal of	0.05	Grapes	0.35
Sheep meat (in the fat)	0.05	Meat (mammalian)	*0.01
Soya bean (dry)	*0.002	Milks	*0.01
Spring onion	T0.05	Potato	*0.05
Squash, Summer	0.02	Poultry, edible offal of	*0.05
Strawberry	0.1	Poultry meat	*0.01
Sweet corn (corn-on-the-cob)	T0.05	Stone fruits [except plums]	1
Tomato	0.05	Tomato	T0.1
Watercress	T0.5		
Watermelon	T0.02		
<hr/>		<i>Agvet chemical:</i>	Acibenzolar-S-methyl
<i>Permitted residue: Acephate (Note: the metabolite methamidophos has separate MRLs)</i>		<i>Permitted residue: Acibenzolar-S-methyl and all metabolites containing the benzo[1,2,3]thiadiazole-7-carboxyl moiety hydrolysed to benzo[1,2,3]thiadiazole-7-carboxylic acid, expressed as acibenzolar-S-methyl</i>	
Banana	1	Cotton seed	*0.02
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas	5	Edible offal (mammalian)	*0.02
Citrus fruits	5	Eggs	*0.02
Cotton seed	2	Meat (mammalian)	*0.02
Edible offal (mammalian)	0.2	Milks	*0.005
Eggs	0.2	Poultry, edible offal of	*0.02
Lettuce, head	10	Poultry meat	*0.02
Lettuce, leaf	10		
Macadamia nuts	*0.1	<hr/>	
Meat (mammalian) [except sheep meat]	0.2	<i>Agvet chemical:</i>	Acifluorfen
Peppers, Sweet	5	<i>Permitted residue: Acifluorfen</i>	
Potato	0.5	Edible offal (mammalian)	0.1
Sheep meat	*0.01	Eggs	*0.01
Soya bean (dry)	1	Legume vegetables	0.1
Sugar beet	0.1	Meat (mammalian)	*0.01
Tomato	5	Milks	*0.01
Tree tomato (tamarillo)	0.5	Peanut	0.05
<hr/>		Poultry, edible offal of	0.1
<i>Agvet chemical:</i>	Acequinocyl	Poultry meat	*0.01
<i>Permitted residue: Sum of acequinocyl and its metabolite 2-dodecyl-3-hydroxy-1,4-naphthoquinone, expressed as acequinocyl</i>		Pulses	0.1
Citrus fruits	0.2		
Grapes	1.6		

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Agvet chemical: **Albendazole**
Permitted residue: *Sum of albendazole, its sulfoxide, sulfone and sulfone amine, expressed as albendazole*

Cattle, edible offal of	*0.1
Cattle meat	*0.1
Goat, edible offal of	*0.1
Goat meat	*0.1
Sheep, edible offal of	3
Sheep meat	0.2

Agvet chemical: **Albendazole sulphoxide**
see Albendazole

Agvet chemical: **Aldicarb**
Permitted residue: *Sum of aldicarb, its sulfoxide and its sulfone, expressed as aldicarb*

Citrus fruits	0.05
Cotton seed	*0.05
Edible offal (mammalian)	*0.01
Meat (mammalian)	*0.01
Milks	*0.01
Sugar cane	*0.02

Agvet chemical: **Aldoxycarb**
Permitted residue: *Sum of aldoxycarb and its sulfone, expressed as aldoxycarb*

Cattle, edible offal of	0.2
Cattle meat	*0.02
Eggs	0.1
Milks	*0.02
Poultry, edible offal of	0.2
Poultry meat	*0.02
Wheat	*0.02

Agvet chemical: **Aliphatic alcohol ethoxylates**

Permitted residue: *Aliphatic alcohol ethoxylates*

Cattle, edible offal of	*0.1
Cattle meat	*0.1
Cattle milk	1

Agvet chemical: **Altrenogest**
Permitted residue: *Altrenogest*

Pig meat	*0.005
Pig, edible offal of	0.005

Agvet chemical: **Aluminium phosphide**
see Phosphine

Agvet chemical: **Ametoctradin**

Permitted residue—commodities of plant origin:
Ametoctradin

Permitted residue—commodities of animal origin:
Sum of ametoctradin and 6-(7-amino-5-ethyl [1,2,4] triazolo [1,5-a]pyrimidin-6-yl) hexanoic acid

Edible offal (mammalian)	*0.02
Eggs	*0.02
Grapes	3
Meat (mammalian)	*0.02
Milks	*0.02
Poultry, edible offal of	*0.02
Poultry meat	*0.02

Agvet chemical: **Ametryn**

Permitted residue: *Ametryn*

Cotton seed	0.05
Edible offal (mammalian)	*0.05
Meat (mammalian)	*0.05
Milks	*0.05
Pineapple	*0.05
Pome fruits	0.1
Sugar cane	0.05

Agvet chemical: **Aminoethoxyvinyl-glycine**

Permitted residue: *Aminoethoxyvinylglycine*

Apple	0.1
Stone fruits [except cherries]	0.2
Walnuts	*0.05

Agvet chemical: **Aminopyralid**

Permitted residue—commodities of plant origin:
Sum of aminopyralid and conjugates, expressed as aminopyralid

Permitted residue—commodities of animal origin:
Aminopyralid

Cereal grains	0.1
Edible offal (mammalian) [except kidney]	0.02
Eggs	*0.01
Kidney (mammalian)	0.3
Meat (mammalian)	*0.01
Milks	*0.01
Poultry, edible offal of	*0.01
Poultry meat	*0.01
Wheat bran, unprocessed	0.3

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Agvet chemical: **Amitraz**
Permitted residue: *Sum of amitraz and N-(2,4-dimethylphenyl)-n'-methylformamidine, expressed as N-(2,4-dimethylphenyl)-N'-methylformamidine*

Apple	0.5
Cotton seed	*0.1
Cotton seed oil, crude	1
Edible offal (mammalian)	0.5
Meat (mammalian)	0.1
Milks	0.1
Stone fruits [except cherries]	0.5

Agvet chemical: **Amitrole**
Permitted residue: *Amitrole*

Avocado	*0.01
Banana	*0.01
Blueberries	T*0.01
Cereal grains	*0.01
Citrus fruits	*0.01
Edible offal (mammalian)	*0.01
Grapes	*0.01
Hops, dry	*0.01
Meat (mammalian)	*0.01
Milks	*0.01
Oilseed	*0.01
Papaya (pawpaw)	*0.01
Passionfruit	*0.01
Pecan	*0.01
Pineapple	*0.01
Pome fruits	*0.01
Potato	*0.05
Pulses	*0.01
Stone fruits	*0.02
Sugar cane	*0.01

Agvet chemical: **Amoxicillin**
Permitted residue: *Inhibitory substance, identified as amoxicillin*

Cattle milk	*0.01
Edible offal (mammalian)	*0.01
Eggs	T*0.01
Meat (mammalian)	*0.01
Poultry, edible offal of	*0.01
Poultry meat	*0.01
Sheep milk	*0.01

Agvet chemical: **Ampicillin**
Permitted residue: *Inhibitory substance, identified as ampicillin*

Cattle milk	*0.01
Horse, edible offal of	*0.01
Horse meat	*0.01

Agvet chemical: **Amprolium**
Permitted residue: *Amprolium*

Eggs	4
Poultry, edible offal of	1
Poultry meat	0.5

Agvet chemical: **Apramycin**
Permitted residue: *Apramycin*

Edible offal (mammalian)	2
Meat (mammalian)	*0.05
Poultry, edible offal of	1
Poultry meat	*0.05

Agvet chemical: **Asulam**
Permitted residue: *Asulam*

Apple	*0.1
Edible offal (mammalian)	*0.1
Hops, dry	*0.1
Meat (mammalian)	*0.1
Milks	*0.1
Poppy seed	*0.1
Potato	0.4
Sugar cane	*0.1

Agvet chemical: **Atrazine**
Permitted residue: *Atrazine*

Edible offal (mammalian)	T*0.1
Lupin (dry)	*0.02
Maize	*0.1
Meat (mammalian)	T*0.01
Milks	T*0.01
Potato	*0.01
Rape seed (canola)	*0.02
Sorghum	*0.1
Sugar cane	*0.1
Sweet corn (corn-on-the-cob)	*0.1

Agvet chemical: **Avermectin B1**
see Abamectin

Agvet chemical: **Avilamycin**
Permitted residue: *Inhibitory substance, identified as avilamycin*

Poultry, edible offal of	*0.05
Poultry meat	*0.05

<i>Permitted residue:</i> <i>Chlorfenvinphos, sum of E and Z isomers</i>		<i>Permitted residue:</i> <i>Chloridazon</i>	
Broccoli	T0.05	Beetroot	*0.05
Brussels sprouts	T0.05		
Cabbages, head	T0.05	<hr/>	
Carrot	T0.4	<i>Agvet chemical:</i> Chlormequat	
Cattle, edible offal of	T*0.1	<i>Permitted residue:</i> <i>Chlormequat cation</i>	
Cattle meat (in the fat)	T0.2	Barley	T2
Cattle milk (in the fat)	T0.2	Dried grapes	0.75
Cauliflower	T0.1	Edible offal (mammalian)	0.5
Celery	T0.4	Eggs	0.1
Cotton seed	T0.05	Grapes	0.75
Deer meat (in the fat)	0.2	Meat (mammalian)	0.2
Egg plant	T0.05	Milks	0.5
Goat, edible offal of	T*0.1	Poultry, edible offal of	0.1
Goat meat (in the fat)	T0.2	Poultry meat	*0.05
Horseradish	T0.1	Wheat	5

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
<i>Agvet chemical:</i>	Chloropicrin	
<i>Permitted residue:</i>	<i>Chloropicrin</i>	
Cereal grains	*0.1	Vegetables [except asparagus; Brussels sprouts; carrot; celery; egg plant; fennel bulb; fruiting vegetables, cucurbits; garlic; leafy vegetables; leek; onion, bulb; peas (pods and succulent, immature seeds); potato; pulses; spring onion; tomato]
<i>Agvet chemical:</i>	Chlorothalonil	T7
<i>Permitted residue—commodities of plant origin:</i>	<i>Chlorothalonil</i>	Wasabi
<i>Permitted residue—commodities of animal origin:</i>	<i>4-hydroxy-2,5,6-trichloroisophthalonitrile metabolite, expressed as chlorothalonil</i>	
Almonds	T0.1	<i>Agvet chemical:</i>
Apricot	7	Chlorpropham
Asparagus	T*0.1	<i>Permitted residue:</i>
Banana	3	<i>Chlorpropham</i>
Berries and other small fruits [except blackcurrant and grapes]	T10	Garlic
Brussels sprouts	7	Onion, bulb
Carrot	7	Potato
Celery	10	
Cherries	10	<i>Agvet chemical:</i>
Coriander (leaves, stem, roots)	T20	Chlorpyrifos
Currant, black	10	<i>Permitted residue:</i>
Edible offal (mammalian)	7	<i>Chlorpyrifos</i>
Egg plant	T10	Asparagus
Fennel, bulb	5	Avocado
Fennel, leaf	5	Banana
Fennel, seed	5	Blackberries
Fruiting vegetables, cucurbits	5	Blueberries
Galangal, Greater	T7	Brassica (cole or cabbage) vegetables, Head
Galangal, Lesser	T7	cabbages, Flowerhead brassicas
Garlic	10	Cassava
Grapes	10	Celery
Herbs [except fennel, leaf]	T20	Cereal grains [except sorghum]
Leafy vegetables [except lettuce]	T100	Cherries
Leek	T10	Citrus fruits
Meat (mammalian) (in the fat)	2	Coffee beans
Milks	0.05	Cotton seed
Nectarine	7	Cotton seed oil, crude
Onion, bulb	10	Cranberry
Papaya (pawpaw)	10	Dried fruits
Peach	30	Edible offal (mammalian)
Peanut	0.2	Eggs
Peas (pods and succulent, immature seeds)	10	Ginger, root
Persimmon, Japanese	T5	Grapes
Plums (including prunes)	10	Kiwifruit
Potato	0.1	Leek
Poultry, edible offal of	*0.05	Mango
Poultry meat	*0.05	Meat (mammalian) (in the fat)
Pulses	3	Milks (in the fat)
Rice	T*0.1	Oilseed [except cotton seed and peanut]
Spring onion	T10	Olives
Sunflower seed	T*0.01	Parsley
Tomato	10	Passionfruit
Tree tomato	T10	Peanut
Turmeric root	T7	Peppers, Chili (dry)
		Peppers, Sweet
		Persimmon, Japanese
		Pineapple
		Pitaya (dragon fruit)
		Pome fruits
		Potato
		Poultry, edible offal of
		Poultry meat (in the fat)
		Sorghum

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Agvet chemical: Clomazone		Cranberry	0.01
Permitted residue: Clomazone		Dried grapes	10
Beans [except broad bean and soya beans]	*0.05	Edible offal (mammalian)	*0.02
Common beans (pod and/or immature seeds)	T*0.05	Eggs	*0.02
Fruiting vegetables, cucurbits	*0.05	Grapes [except wine grapes]	3
Poppy seed	*0.05	Maize	T*0.01
Potato	*0.05	Meat (mammalian)	*0.02
Rice	*0.01	Milks	*0.01
Agvet chemical: Clopyralid		Persimmon, American	T2
Permitted residue: Clopyralid		Persimmon, Japanese	T2
Cauliflower	T0.2	Pome fruits	T2
Cereal grains	2	Poultry, edible offal of	*0.02
Edible offal (mammalian) [except kidney]	0.5	Poultry meat	*0.02
Hops, dry	2	Rape seed (canola)	T*0.01
Kidney of cattle, goats, pigs and sheep	5	Sorghum	T*0.01
Meat (mammalian)	0.1	Soya bean (dry)	T0.02
Milks	0.05	Stone fruits [except cherries]	T3
Rape seed (canola)	0.5	Sugar cane	0.1
Agvet chemical: Cloquintocet-mexyl		Sunflower seed	T*0.01
Permitted residue: Sum of cloquintocet mexyl and 5-chloro-8-quinolinoxyacetic acid, expressed as cloquintocet mexyl		Sweet corn (corn-on-the-cob)	T0.02
Barley	*0.1	Wine grapes	*0.02
Edible offal (mammalian)	*0.1	Agvet chemical: Cloxacillin	
Eggs	*0.1	Permitted residue: Inhibitory substance, identified as Cloxacillin	
Meat (mammalian)	*0.1	Cattle milk	*0.01
Milks	*0.1	Agvet chemical: Coumaphos	
Poppy seed	T*0.02	Permitted residue: Sum of coumaphos and its oxygen analogue, expressed as coumaphos	
Poultry, edible offal of	*0.1	Cattle fat	*0.02
Poultry meat	*0.1	Cattle kidney	*0.02
Rye	*0.1	Cattle liver	*0.02
Triticale	*0.1	Cattle milk	*0.01
Wheat	*0.1	Cattle milk fat	0.1
Agvet chemical: Clorsulon		Cattle muscle	*0.02
Permitted residue: Clorsulon		Agvet chemical: Cyanamide	
Cattle, edible offal of	*0.1	Permitted residue: Cyanamide	
Cattle meat	*0.1	Apple	*0.02
Cattle milk	1.5	Blueberries	*0.05
Agvet chemical: Closantel		Grapes	*0.05
Permitted residue: Closantel		Kiwifruit	*0.1
Sheep, edible offal of	5	Pear, Oriental (nashi)	*0.1
Sheep meat	2	Stone fruits	T*0.05
Agvet chemical: Clothianidin		Agvet chemical: Cyanazine	
Permitted residue: Clothianidin		Permitted residue: Cyanazine	
Apricot	T2	Bulb vegetables	*0.02
Banana	*0.02	Cereal grains	*0.01
Cherries	T5	Leek	0.05
Cotton seed	*0.02	Peas	0.02
		Podded pea (young pods) (snow and sugar snap)	0.05
		Potato	0.02

Sugar cane	T0.3	Cotton seed oil, crude	0.2
Sugar cane molasses	T5	Edible offal (mammalian)	0.5
Sunflower seed	T20	Eggs	*0.01
Tea, green, black	2	Garlic	T0.05
Tree nuts	0.2	Guar bean (dry)	T2
Wheat	5	Linola seed	0.1
Wheat bran, unprocessed	20	Linseed	0.1
<i>Agvet chemical:</i>	Guazatine	Meat (mammalian) (in the fat)	0.02
<i>Permitted residue:</i>	<i>Guazatine</i>	Milks	0.02
Citrus fruits	5	Onion, bulb	T*0.05
Melons, except watermelon	10	Peanut	0.05
Tomato	5	Persimmon, Japanese	*0.05
<i>Agvet chemical:</i>	Halauxifen-methyl	Pome fruits	*0.05
<i>Permitted residue—Commodities of plant origin:</i>	<i>Halauxifen-methyl</i>	Poultry, edible offal of	0.05
<i>Permitted residue—Commodities of animal origin:</i>	<i>4-Amino-3-chloro-6-(4-chloro-2-fluoro-3-hydroxyphenyl)-pyridine-2-carboxylic acid, expressed as halauxifen-methyl</i>	Poultry meat (in the fat)	*0.01
Cereal grains	T*0.01	Pulses	0.1
Edible offal (mammalian)	T0.01	Rape seed (canola)	0.1
Eggs	T*0.01	Stone fruits	*0.05
Meat (mammalian)	T*0.01	Sugar cane	T0.03
Milks	T*0.01	Sunflower seed	*0.05
Poultry, edible offal	T*0.01	Tree nuts	*0.05
Poultry meat	T*0.01	<i>Agvet chemical:</i>	Hexaconazole
		<i>Permitted residue:</i>	<i>Hexaconazole</i>
		Apple	0.1
		Grapes	0.05
		Pear	0.1

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
<i>Agvet chemical:</i>	Hexazinone	
<i>Permitted residue:</i>	<i>Hexazinone</i>	
Blueberries	0.6	
Edible offal (mammalian)	*0.1	
Eggs	*0.05	
Meat (mammalian)	*0.1	
Milks	*0.05	
Pineapple	1	
Poultry, edible offal of	*0.05	
Poultry meat	*0.05	
Sugar cane	*0.1	
<i>Agvet chemical:</i>	Hexythiazox	
<i>Permitted residue:</i>	<i>Hexythiazox</i>	
Berries and other small fruits	1	
Pome fruits	1	
Stone fruits	1	
<i>Agvet chemical:</i>	Hydrogen phosphide	
<i>see Phosphine</i>		
<i>Agvet chemical:</i>	Imazalil	
<i>Permitted residue:</i>	<i>Imazalil</i>	
Chicken, edible offal of	*0.01	
Chicken meat	*0.01	
Citrus fruits	10	
Eggs	*0.01	
Melons, except watermelon	10	
Mushrooms	T1	
Pome fruits	5	
Potato	5	
<i>Agvet chemical:</i>	Imazamox	
<i>Permitted residue:</i>	<i>Imazamox</i>	
Adzuki bean (dry)	T*0.05	
Barley	*0.05	
Broad bean (dry) (fava beans)	T*0.05	
Edible offal (mammalian)	*0.05	
Field pea (dry)	*0.05	
Meat (mammalian)	*0.05	
Milks	*0.05	
Peanut	*0.05	
Poppy seed	T*0.05	
Rape seed (canola)	*0.05	
Soya bean (dry)	*0.05	
Wheat	*0.05	
<i>Agvet chemical:</i>	Imazapic	
<i>Permitted residue:</i>	<i>Sum of imazapic and its hydroxymethyl derivative</i>	
Edible offal (mammalian)	*0.05	
Eggs	*0.01	
Meat (mammalian) (in the fat)	*0.05	
Milks	*0.01	
<i>Agvet chemical:</i>	Imazapyr	
<i>Permitted residue:</i>	<i>Imazapyr</i>	
Barley	*0.05	
Edible offal (mammalian)	*0.05	
Meat (mammalian) (in the fat)	*0.05	
Maize	*0.05	
Milks	*0.01	
Poppy seed	T*0.05	
Rape seed (canola)	*0.05	
Wheat	*0.05	
<i>Agvet chemical:</i>	Imazethapyr	
<i>Permitted residue:</i>	<i>Imazethapyr</i>	
Edible offal (mammalian)	*0.1	
Eggs	*0.1	
Legume vegetables	*0.1	
Maize	*0.05	
Meat (mammalian)	*0.1	
Milks	*0.1	
Peanut	*0.1	
Poultry, edible offal of	*0.1	
Poultry meat	*0.1	
Pulses	*0.1	
<i>Agvet chemical:</i>	Imidacloprid	
<i>Permitted residue:</i>	<i>Sum of imidacloprid and metabolites containing the 6-chloropyridinylmethylene moiety, expressed as imidacloprid</i>	
Apple	0.3	
Assorted tropical and sub-tropical fruits – inedible peel [except banana]	T1	
Banana	0.5	
Beetroot	T0.05	
Bergamot	T5	
Berries and other small fruits [except blueberries; cranberry; grapes; strawberry]	5	
Blueberries	T0.1	
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas	0.5	
Broad bean (dry)	*0.05	
Burdock, greater	T0.05	
Burnet, Salad	T5	
Celery	0.3	
Cereal grains [except maize and sorghum]	*0.05	
Citrus fruits	2	
Common bean (dry) (navy bean)	T1	
Common bean (pods and/or immature seeds)	T1	
Coriander (leaves, stem, roots)	T5	

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
Coriander, seed	T5	<i>Agvet chemical:</i> Imidocarb (dipropionate salt)
Cotton seed	*0.02	<i>Permitted residue:</i> <i>Imidocarb</i>
Date	T1	Cattle, edible offal of
Dill, seed	T5	Cattle meat
Edible offal (mammalian)	0.2	Cattle milk
Eggs	*0.02	
Fennel, bulb	T0.1	
Fennel, seed	T5	
Field pea (dry)	*0.05	<i>Agvet chemical:</i> Indoxacarb
Fruiting vegetables, cucurbits	0.2	<i>Permitted residue:</i> <i>Sum of indoxacarb and its R-isomer</i>
Fruiting vegetables, other than cucurbits [except sweet corn, (corn-on-the-cob)]	0.5	Asparagus
Galangal, Greater	T0.05	Berries and other small fruits [except grapes]
Garlic	T0.5	Brassica (cole or cabbage) vegetables, Head cabbages and Flowerhead brassicas
Ginger, Japanese	T5	Celery
Ginger, root	T0.3	Chervil
Grapes	T0.1	Coriander (leaves, stem, roots)
Hazelnuts	T*0.01	Cotton seed
Herbs	T5	Dried grapes
Hops, dry	T10	Edible offal (mammalian) [except kidney]
Kaffir lime leaves	T5	Egg plant
Leafy vegetables [except lettuce, head]	20	Eggs
Lemon balm	T5	Grapes
Lemon grass	T5	Herbs
Lemon verbena (fresh weight)	T5	Kidney (mammalian)
Lentil (dry)	0.2	Leafy vegetables [except chervil; lettuce, head; mizuna; rucola]
Lettuce, head	5	Lemon balm
Lupin (dry)	0.2	Lettuce, head
Maize	0.05	Linseed
Meat (mammalian)	0.05	Meat (mammalian) (in the fat)
Milks	0.05	Mexican tarragon
Peanut	T0.5	Milk fats
Persimmon, Japanese	T1	Milks
Potato	0.3	Mizuna
Poultry, edible offal of	*0.02	Olives
Poultry meat	*0.02	Peanut
Radish, Japanese	T0.05	Peppers, Sweet
Rape seed (canola)	*0.05	Pome fruits
Rhubarb	T0.2	Poultry (edible offal of)
Rose and dianthus (edible flowers)	T5	Poultry meat (in the fat)
Sorghum	*0.02	Pulses
Stone fruits	0.5	Rape seed (canola)
Strawberry	0.5	Rucola (rocket)
Sugar cane	*0.05	Safflower seed
Sunflower seed	*0.02	Stone fruits
Sweet corn (corn-on-the-cob)	*0.05	Sunflower seed
Sweet potato	0.3	Tomato
Taro	T0.05	
Teas (tea and herb teas)	T10	<i>Agvet chemical:</i> Inorganic bromide
Tree tomato	T2	<i>Permitted residue:</i> <i>Bromide ion</i>
Turmeric, root (fresh)	T0.05	Avocado
Yam bean	T0.05	Cereal grains
Yams	T0.05	Citrus fruits
		Dates, dried

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
Dried fruits [except as otherwise listed under this chemical]	30	Brussels sprouts 0.5
Dried grapes	100	Cabbages, head T*0.05
Dried herbs	400	Carrot T0.5
Dried peach	50	Cauliflower T*0.05
Figs, dried	250	Celeriac T0.7
Fruit [except as otherwise listed under this chemical]	20	Celery 2
Peppers, Sweet	50	Chard (silver beet) T5
Prunes	20	Edible offal (mammalian) *0.1
Spices	400	Egg plant T1
Strawberry	30	Garlic T10
Vegetables [except as otherwise listed under this chemical]	20	Grapes 20
		Kiwifruit 10
		Lettuce, head 5
		Lettuce, leaf 5
		Lupin (dry) *0.1
		Macadamia nuts *0.01
		Mandarins T5
		Meat (mammalian) *0.1

		Passionfruit 10
		Peanut 0.05
		Peanut oil, crude 0.05
		Peppers T3
		Pistachio nut T*0.05
		Pome fruits 3
		Potato *0.05
		Rape seed (canola) 0.5
		Soya bean (dry) 0.05
		Spinach T5
		Stone fruits 10
		Tangelo, large-sized cultivars T5
		Tomato 2
<i>Agvet chemical:</i> Iodosulfuron methyl		
<i>Permitted residue:</i> <i>Iodosulfuron methyl</i>		
Barley	*0.01	
Edible offal (mammalian)	*0.01	
Eggs	*0.01	
Meat (mammalian) (in the fat)	*0.01	
Milks	*0.01	
Poultry, edible offal of	*0.01	
Poultry meat (in the fat)	*0.01	
Wheat	*0.01	
<i>Agvet chemical:</i> loxynil		
<i>Permitted residue:</i> <i>loxynil</i>		
Garlic	*0.02	
Leek	T2	
Onion, bulb	*0.02	
Onion, Welsh	T10	
Shallot	T10	
Spring onion	T10	
Sugar cane	*0.02	
<i>Agvet chemical:</i> Ipconazole		
<i>Permitted residue:</i> <i>Ipconazole</i>		
Cereal grains	*0.01	
Edible offal (mammalian)	*0.01	
Eggs	*0.01	
Meat (mammalian)	*0.01	
Milks	*0.01	
Poultry, edible offal of	*0.01	
Poultry meat	*0.01	
<i>Agvet chemical:</i> Iprodione		
<i>Permitted residue:</i> <i>Iprodione</i>		
Almonds	*0.02	
Beans [except broad bean and soya bean]	T1	
Beetroot	T0.1	
Berries and other small fruits [except grapes]	12	
Brassica leafy vegetables	15	
Broad bean (green pods and immature seeds)	0.2	
Broccoli	T*0.05	
		<i>Agvet chemical:</i> Isoeugenol
		<i>Permitted residue:</i> <i>Isoeugenol, sum of cis- and trans- isomers</i>
		Diadromous fish (whole commodity) 100
		Freshwater fish (whole commodity) 100
		Marine fish (whole commodity) 100
		<i>Agvet chemical:</i> Isoxaben
		<i>Permitted residue:</i> <i>Isoxaben</i>
		Assorted tropical and sub-tropical fruits – edible peel *0.01
		Assorted tropical and sub-tropical fruits – inedible peel *0.01
		Barley *0.01
		Citrus fruits *0.01

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
Poultry meat	*0.01	Agvet chemical: Kresoxim-methyl <i>Permitted residue—commodities of plant origin:</i> <i>Kresoxim-methyl</i> <i>Permitted residue—commodities of animal origin:</i> <i>Sum of a-(p-hydroxy-o-tolyloxy)-o-tolyl</i> <i>(methoxyimino) acetic acid and (E)-</i> <i>methoxyimino[a-(o-tolyloxy)-o-tolyl]acetic acid,</i> <i>expressed as kresoxim-methyl</i>	
Stone fruits	*0.01		
Tree nuts	*0.01		
Triticale	*0.01		
Wheat	*0.01		
Agvet chemical: Isoxaflutole <i>Permitted residue: The sum of isoxaflutole and</i> <i>2-cyclopropylcarbonyl-3-(2-methylsulfonyl-4-</i> <i>trifluoromethylphenyl)-3-oxopropanenitrile,</i> <i>expressed as isoxaflutole</i>			
Cereal grains	*0.02	Edible offal (mammalian) *0.01	
Chick-pea (dry)	*0.02	Fruiting vegetables, cucurbits 0.05	
Edible offal (mammalian)	0.1	Grapes 1	
Eggs	*0.05	Meat (mammalian) *0.01	
Meat (mammalian)	*0.05	Milks *0.001	
Milks	*0.05	Pome fruits 0.1	
Poppy seed	*0.02	Agvet chemical: Lambda-cyhalothrin <i>see Cyhalothrin</i>	
Poultry, edible offal of	*0.05	Agvet chemical: Lasalocid <i>Permitted residue: Lasalocid</i>	
Poultry meat	*0.05	Cattle milk *0.01	
Sugar cane	*0.01	Edible offal (mammalian) 0.7	
Agvet chemical: Ivermectin <i>Permitted residue: H₂B_{1a}</i>		Eggs *0.05	
Cattle kidney	*0.01	Meat (mammalian) *0.05	
Cattle liver	0.1	Poultry, edible offal of 0.4	
Cattle meat (in the fat)	0.04	Poultry meat *0.1	
Cattle milk	0.05	Poultry skin/fat 1	
Deer kidney	*0.01	Agvet chemical: Levamisole <i>Permitted residue: Levamisole</i>	
Deer liver	*0.01	Edible offal (mammalian) 1	
Deer meat (in the fat)	*0.01	Eggs 1	
Horse, edible offal of	*0.01	Goat milk 0.1	
Horse meat	*0.01	Meat (mammalian) 0.1	
Pig kidney	*0.01	Milks [except goat milk] 0.3	
Pig liver	*0.01	Poultry, edible offal of 0.1	
Pig meat (in the fat)	0.02	Poultry meat 0.1	
Sheep kidney	*0.01	Agvet chemical: Lincomycin <i>Permitted residue: Inhibitory substance,</i> <i>identified as lincomycin</i>	
Sheep liver	0.015	Cattle milk *0.02	
Sheep meat (in the fat)	0.02	Edible offal (mammalian) [except sheep, edible offal of] 0.2	
Agvet chemical: Ketoprofen <i>Permitted residue: Ketoprofen</i>		Eggs 0.2	
Cattle, edible offal of	*0.05	Goat milk *0.1	
Cattle meat	*0.05	Meat (mammalian) [except sheep meat] 0.2	
Cattle milk	*0.05	Poultry, edible offal of 0.1	
Agvet chemical: Kitasamycin <i>Permitted residue: Inhibitory substance,</i> <i>identified as kitasamycin</i>		Poultry meat 0.1	
Eggs	*0.2	Agvet chemical: Lindane <i>Permitted residue: Lindane</i>	
Pig, edible offal of	*0.2	Pineapple 0.5	
Pig meat	*0.2		

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Agvet chemical: Linuron		Citrus fruits	4
<i>Permitted residue: Sum of linuron plus 3,4-dichloroaniline, expressed as linuron</i>		Currant, black	T2
Celeriac	T0.5	Dried fruits	8
Celery	*0.05	Edible offal (mammalian)	1
Cereal grains	*0.05	Egg plant	0.5
Chervil	T1	Eggs	1
Coriander (leaves, stem, roots)	T1	Fruit [except citrus fruits; currant, black; dried fruits; grapes; pear; strawberry]	2
Coriander, seed	0.2	Garden pea	0.5
Edible offal (mammalian)	1	Grapes	8
Eggs	*0.05	Kale	3
Herbs	T1	Kohlrabi	0.5
Leek	*0.02	Lentil (dry)	8
Lemon grass	T1	Meat (mammalian) (in the fat)	1
Lemon verbena (dry leaves)	T1	Milks (in the fat)	1
Meat (mammalian)	*0.05	Oilseed except peanut	T10
Milks	*0.05	Onion, Welsh	T0.1
Mizuna	T1	Peanut	8
Parsnip	T0.05	Pear	0.5
Poultry, edible offal of	*0.05	Peppers, Sweet	0.5
Poultry meat	*0.05	Poultry, edible offal of	1
Rucola (rocket)	T1	Poultry meat (in the fat)	1
Turmeric root	T*0.05	Root and tuber vegetables	0.5
Vegetables [except celeriac; celery; leek; parsnip]	*0.05	Shallot	T0.1
		Spring onion	T0.1
		Strawberry	1
		Tomato	3
		Tree nuts	8
		Turnip, garden	0.5
		Vegetables [except beans (dry); cauliflower; chard (Silver beet); egg plant; garden pea; kale; kohlrabi; lentil (dry); onion, Welsh; Peppers, Sweet; root and tuber vegetables; shallot; spring onion; tomato; turnip, garden]	2
		Wheat bran, unprocessed	20
Agvet chemical: Lufenuron			
<i>Permitted residue: Lufenuron</i>			
Cotton seed	T0.2		
Cotton seed oil, crude	T0.5		
Edible offal (mammalian)	T*0.01		
Eggs	T0.05		
Meat (mammalian) (in the fat)	T1		
Milks	T0.2		
Poultry, edible offal of	T*0.01		
Poultry meat (in the fat)	T1		
Agvet chemical: Maduramicin			
<i>Permitted residue: Maduramicin</i>			
Poultry, edible offal of	1		
Poultry meat	0.1		
Agvet chemical: Magnesium phosphide			
<i>see Phosphine</i>			
Agvet chemical: Malathion			
<i>see Maldison</i>			
Agvet chemical: Maldison			
<i>Permitted residue: Maldison</i>			
Beans (dry)	8		
Cauliflower	0.5		
Cereal grains	8		
Chard (silver beet)	0.5		
		Agvet chemical: Maleic hydrazide	
		<i>Permitted residue: Sum of free and conjugated maleic hydrazide, expressed as maleic hydrazide</i>	
		Carrot	T40
		Garlic	15
		Onion, bulb	15
		Potato	50
		Agvet chemical: Mancozeb	
		<i>see Dithiocarbamates</i>	
		Agvet chemical: Mandipropamid	
		<i>Permitted residue: Mandipropamid</i>	
		Dried grapes (currants, raisins and sultanas)	2
		Edible offal (mammalian)	*0.01
		Eggs	*0.01
		Grapes	2
		Meat (mammalian) (in the fat)	*0.01
		Milks	*0.01
		Poppy seed	*0.01

Schedule 20 Maximum residue limits

		Milks
		Poultry, edible offal of
		Poultry meat
		Poultry meat
<hr/>		
<i>Agvet chemical:</i> Mefenpyr-diethyl		<i>Agvet chemical:</i> Mesosulfuron-methyl
<i>Permitted residue—commodities of plant origin:</i> <i>Sum of mefenpyr-diethyl and metabolites hydrolysed to 1-(2,4-dichlorophenyl)-5-methyl-2-pyrazoline-3,5-dicarboxylic acid, and 1-(2,4-dichlorophenyl)-5-methyl-pyrazole-3-carboxylic acid, expressed as mefenpyr-diethyl</i>		<i>Permitted residue:</i> <i>Mesosulfuron-methyl</i>
<i>Permitted residue—commodities of animal origin:</i> <i>Sum of mefenpyr-diethyl and 1-(2,4-dichlorophenyl)-5-ethoxycarbonyl-5-methyl-2-pyrazoline-3-carboxylic acid, expressed as mefenpyr-diethyl</i>		Edible offal (mammalian)
		Eggs
		Meat (mammalian)
		Milks
		Poultry, edible offal of
		Poultry meat
		Wheat
<hr/>		
		<i>Agvet chemical:</i> Metaflumizone
		<i>Permitted residue:</i> <i>Sum of metaflumizone, its E and Z isomers and its metabolite 4-{2-oxo-2-[3-(trifluoromethyl)phenyl]ethyl}-benzotrile expressed as metaflumizone</i>
		Grapes
<hr/>		
		<i>Agvet chemical:</i> Metalaxyl
		<i>Permitted residue:</i> <i>Metalaxyl</i>
		Avocado
		Berries and other small fruits [except grapes]
		Bulb vegetables
		Cereal grains
		Chives
		Coriander (leaves, stem, roots)
		Durian
		Edible offal (mammalian)
		Eggs

Schedule 20 Maximum residue limits

Agvet chemical: Permethrin			
<i>Permitted residue: Permethrin, sum of isomers</i>			
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas [except Brussels sprouts]	1	Agvet chemical: Phenmedipham	
Brussels sprouts	2	<i>Permitted residue—commodities of plant origin:</i>	
Celery	5	<i>Phenmedipham</i>	
Cereal grains	2	<i>Permitted residue—commodities of animal origin:</i>	
Cherries	4	<i>3-methyl-N-(3-hydroxyphenyl)carbamate</i>	
Common bean (dry) (navy bean)	0.1	Beetroot	0.5
Common bean (pods and/or immature seeds)	0.5	Chard (silver beet)	2
Coriander (leaves, stem, roots)	30	Edible offal (mammalian)	*0.1
Cotton seed	0.2	Leafy vegetables [except chard (silver beet)]	T1
Edible offal (mammalian)	0.5	Meat (mammalian)	*0.1
Eggs	0.1	Milks	*0.1
Fruiting vegetables, cucurbits	0.2	Radicchio	T1
Galangal, rhizomes	T5	Agvet chemical: Phenothrin	
Herbs	30	<i>Permitted residue: Sum of phenothrin (+)cis- and (+)trans-isomers</i>	
Kaffir lime leaves	30	Edible offal (mammalian)	*0.5
Kiwifruit	2	Eggs	*0.5
Leafy vegetables [except lettuce head and lettuce leaf]	T5	Meat (mammalian)	*0.5
Lemon balm	30	Milks	*0.05
Lemon grass	30	Wheat	2
Lemon verbena	T5	Wheat bran, unprocessed	5
		Wheat germ	5
		Agvet chemical: 2-Phenylphenol	
		<i>Permitted residue: Sum of 2-phenylphenol and 2-phenylphenate, expressed as 2-phenylphenol</i>	
		Carrot	20
		Cherries	3
		Citrus fruits	10
		Cucumber	10
		Melons, except watermelon	10
		Nectarine	3

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
Peach	20	Pome fruits	T*0.01
Pear	25	Pulses	*0.01
Peppers, Sweet	10	Seed for beverages	T*0.01
Pineapple	10	Spices	*0.01
Plums (including prunes)	15	Stone fruits	T*0.01
Sweet potato	15	Sugar cane	*0.01
Tomato	10	Tree nuts	*0.01
<hr/>		<hr/>	
<i>Agvet chemical:</i> Phorate		<i>Agvet chemical:</i> Phosphorous acid	
<i>Permitted residue:</i> <i>Sum of phorate, its oxygen analogue, and their sulfoxides and sulfones, expressed as phorate</i>		<i>Permitted residue:</i> <i>Phosphorous acid</i>	
Cotton seed	0.5	Anise myrtle leaves	T1000
Edible offal (mammalian)	*0.05	Assorted tropical and sub-tropical fruits – inedible peel [except avocado]	T100
Eggs	*0.05	Avocado	T500
Meat (mammalian)	*0.05	Berries and other small fruits [except ribberries]	T50
Milks	*0.05	Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas [except flowerhead brassicas]	T1
Poultry, edible offal of	*0.05	Bulb vegetables	T10
Poultry meat	*0.05	Citrus fruits	100
Vegetables	0.5	Coriander (leaves, stem, roots)	T150
<hr/>		Edible offal (mammalian)	5
<i>Agvet chemical:</i> Phosmet		Flowerhead brassicas	50
<i>Permitted residue:</i> <i>Sum of phosmet and its oxygen analogue, expressed as phosmet</i>		Fruiting vegetables, cucurbits	T100
Blueberries	10	Fruiting vegetables, other than cucurbits	T100
Cattle, edible offal of	1	Galangal, rhizomes	T100
Cattle meat (in the fat)	1	Ginger, root	T100
Cereal grains	*0.05	Herbs	T150
Cranberry	10	Kaffir lime leaves	T150
Goat, edible offal of	*0.05	Leafy vegetables	T150
Goat meat	*0.05	Lemon balm	T150
Kiwifruit	15	Lemon grass	T150
Lemon	5	Lemon myrtle leaves	T1000
Mandarins	5	Lemon verbena	T150
Milks (in the fat)	0.2	Meat (mammalian)	1
Pig, edible offal of	0.1	Peach	100
Pig meat	0.1	Peas, shelled	T100
Pome fruits	1	Poppy seed	1
Sheep, edible offal of	*0.05	Rhubarb	T100
Sheep meat	*0.05	Ribberries	T1000
Stone fruits	1	Root and tuber vegetables	T100
<hr/>		Rose and dianthus (edible flowers)	T150
<i>Agvet chemical:</i> Phosphine		Stone fruits [except cherries; peach]	T100
<i>Permitted residue:</i> <i>All phosphides, expressed as hydrogen phosphide (phosphine)</i>		Tree nuts	T1000
Assorted tropical and sub-tropical fruits – edible peel	T*0.01	Turmeric, root	T100
Cereal grains	*0.1	<hr/>	
Dried foods [except as otherwise listed under this chemical]	*0.01	<i>Agvet chemical:</i> Picloram	
Dried fruits	*0.01	<i>Permitted residue:</i> <i>Picloram</i>	
Dried vegetables	*0.01	Cereal grains	0.2
Honey	*0.01	Edible offal (mammalian)	5
Melons, except watermelon	T*0.01	Meat (mammalian)	*0.05
Oilseed	*0.01	Milks	*0.05
Peanut	*0.01	Sugar cane	*0.01

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
Agvet chemical: Picolinafen		
<i>Permitted residue—commodities of plant origin:</i> <i>Picolinafen</i>		
<i>Permitted residue—commodities of animal origin:</i> <i>Sum of picolinafen and 6-[3-trifluoromethyl phenoxy]-2-pyridine carboxylic acid</i>		
Cereal grains	*0.02	
Edible offal (mammalian)	0.05	
Eggs	*0.01	
Field pea (dry)	*0.02	
Lupin (dry)	*0.02	
Meat (mammalian) (in the fat)	*0.02	
Milks	*0.01	
Poultry, edible offal of	*0.02	
Poultry meat (in the fat)	*0.02	
Agvet chemical: Pinoxaden		
<i>Permitted residue: Sum of free and conjugated M4 metabolite, 8-(2,6-diethyl-4-hydroxymethylphenyl)-tetrahydro-pyrazolo [1,2-d][1,4,5] oxadiazepine-7,9-dione, expressed as Pinoxaden</i>		
Barley	0.1	
Edible offal (mammalian)	*0.02	
Eggs	*0.02	
Meat (mammalian)	*0.02	
Milks	*0.01	
Poultry, edible offal of	*0.02	
Poultry meat	*0.02	
Wheat	0.1	
Wheat bran, unprocessed	0.5	
Agvet chemical: Piperonyl butoxide		
<i>Permitted residue: Piperonyl butoxide</i>		
Cattle milk	0.05	
Cereal bran, unprocessed	40	
Cereal grains	20	
Dried fruits	8	
Dried vegetables	8	
Edible offal (mammalian)	0.1	
Eggs	*0.1	
Fruit	8	
Meat (mammalian)	0.1	
Oilseed	8	
Poultry, edible offal of	*0.5	
Poultry meat (in the fat)	*0.5	
Tree nuts	8	
Vegetables	8	
Wheat germ	50	
Agvet chemical: Pirimicarb		
<i>Permitted residue: Sum of pirimicarb, demethyl-pirimicarb and the N-formyl-(methylamino) analogue (demethylformamido-pirimicarb), expressed as pirimicarb</i>		
Adzuki bean (dry)	T0.5	
Celeriac	0.1	
Cereal grains	*0.02	
Chervil	T20	
Coriander (leaves, stem, roots)	T20	
Cotton seed	0.05	
Cotton seed oil, crude	T0.1	
Edible offal (mammalian)	*0.1	
Eggs	*0.1	
Fruit [except strawberry]	0.5	
Herbs	T20	
Hops, dry	0.5	
Leafy vegetables [except chervil; mizuna; rucola (rocket)]	T7	
Lemon balm	T20	
Lupin (dry)	*0.02	
Meat (mammalian)	*0.1	
Milks	*0.1	
Mizuna	T20	
Mung bean (dry)	T0.5	
Onion, Welsh	T3	
Peppers	1	
Poultry, edible offal of	*0.1	
Poultry meat	*0.1	
Rape seed (canola)	0.2	
Rucola (rocket)	T20	
Shallot	T3	
Soya bean (dry)	T0.5	
Spices	*0.05	
Spring onion	T3	
Strawberry	3	
Sweet corn (corn-on-the-cob)	T0.1	
Tree nuts	T*0.05	
Vegetables [except adzuki bean (dry); celeriac; leafy vegetables; lupin (dry); mung bean (dry); onion, Welsh; shallot; soya bean (dry); spring onion; sweet corn (corn-on-the-cob)]	1	
Agvet chemical: Pirimiphos-methyl		
<i>Permitted residue: Pirimiphos-methyl</i>		
Barley	7	
Cereal bran, unprocessed	20	
Edible offal (mammalian)	*0.05	
Eggs	*0.05	
Maize	7	
Meat (mammalian)	*0.05	
Milks	*0.05	
Millet	10	
Oats	7	
Peanut	5	
Peanut oil, edible	15	
Poultry, edible offal of	*0.05	
Poultry meat	*0.05	
Rice	10	
Rice, husked	2	
Rice, polished	1	
Rye	10	
Sorghum	10	

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
Triticale	10	Kaffir lime leaves	T3
Wheat	10	Lemon grass	T3
Wheat germ	30	Lemon verbena (fresh weight)	T3
<hr/>		Lentil (dry)	0.5
<i>Agvet chemical:</i>	Praziquantel	Lupin (dry)	T*0.01
<i>Permitted residue:</i>	<i>Praziquantel</i>	Meat (mammalian) (in the fat)	T0.2
Fish muscle/skin	T*0.01	Milks	T0.02
Sheep, edible offal of	*0.05	Mizuna	T2
Sheep meat	*0.05	Onion, bulb	T0.2
<hr/>		Peppers	T2
<i>Agvet chemical:</i>	Procaine penicillin	Pome fruits	T1
<i>Permitted residue:</i>	<i>Inhibitory substance, identified as procaine penicillin</i>	Potato	T0.1
Edible offal (mammalian)	*0.1	Poultry, edible offal of	T*0.01
Meat (mammalian)	*0.1	Poultry meat (in the fat)	T0.1
Milks	*0.0025	Rape seed (canola)	T1
<hr/>		Rape seed oil, crude	T2
<i>Agvet chemical:</i>	Prochloraz	Root and tuber vegetables [except potato]	T1
<i>Permitted residue:</i>	<i>Sum of prochloraz and its metabolites containing the 2,4,6-trichlorophenol moiety, expressed as prochloraz</i>	Rose and dianthus (edible flowers)	T3
Avocado	5	Rucola (rocket)	T2
Banana	5	Snow peas	T5
Custard apple	T2	Spinach	T2
Lettuce, head	2	Strawberry	*0.02
Litchi	T2	Stone fruits	T10
Mandarins	T10	Turmeric, root (fresh)	T0.5
Mango	5	Wine grapes	T2
Mushrooms	3	<hr/>	
Papaya (pawpaw)	5	<i>Agvet chemical:</i>	Profenofos
Pineapple	2	<i>Permitted residue:</i>	<i>Profenofos</i>
Pistachio nut	T0.5	Cattle milk	*0.01
Sugar cane	*0.05	Cotton seed	1
<hr/>		Cotton seed oil, edible	0.3
<i>Agvet chemical:</i>	Procymidone	Edible offal (mammalian)	*0.05
<i>Permitted residue:</i>	<i>Procymidone</i>	Eggs	*0.02
Adzuki bean (dry)	T0.2	Mangosteen	5
Bergamot	T3	Meat (mammalian)	*0.05
Broad bean (dry)	T10	Poultry, edible offal of	*0.05
Broad bean (green pods and immature seeds)	T10	Poultry meat	*0.05
Burnet, Salad	T3	<hr/>	
Chervil	T2	<i>Agvet chemical:</i>	Profoxydim
Chick-pea (dry)	T0.5	<i>Permitted residue:</i>	<i>Sum of profoxydim and all metabolites converted to dimethyl-3-(3-thianyl)glutarate-S-dioxide after oxidation and treatment with acidic methanol, expressed as profoxydim</i>
Common bean (dry) (navy bean)	T10	Edible offal (mammalian)	0.5
Common bean (pods and/or immature seeds)	T3	Eggs	*0.05
Coriander (leaves, stem, roots)	T3	Meat (mammalian)	*0.05
Coriander, seed	T3	Milks	*0.01
Dill, seed	T3	Poultry, edible offal of	*0.05
Edible offal (mammalian)	T0.05	Poultry meat	*0.05
Eggs	T*0.01	Rice	0.05
Fennel, bulb	T1	<hr/>	
Fennel, seed	T3		
Galangal, Greater	T0.5		
Garlic	T5		
Herbs	T3		

Schedule 20 Maximum residue limits

Rucola (rocket)	T*0.05
Shallot	T1
Spring onion	T1
Swede	*0.02
Sorghum	0.2
Spinach	T*0.02
Sweet corn (corn-on-the-cob)	0.05
Turnip, garden	*0.02

<i>Agvet chemical:</i> Propamocarb	
<i>Permitted residue:</i> Propamocarb (base)	
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas	T0.1
Fruiting vegetables, other than cucurbits	T0.3
Leafy vegetables	T20

<i>Agvet chemical:</i> Propanil	
<i>Permitted residue:</i> Propanil	
Cattle, edible offal of	*0.1
Cattle meat	*0.1
Eggs	*0.1
Milks	*0.01
Poultry, edible offal of	3
Poultry meat	*0.1
Rice	2
Sheep, edible offal of	*0.1
Sheep meat	*0.1

<i>Agvet chemical:</i> Propaquizafop	
<i>Permitted residue:</i> Propaquizafop and acid and oxophenoxy metabolites, measured as 6-chloro-2-methoxyquinoxaline, expressed as propaquizafop	
Edible offal (mammalian)	*0.02
Meat (mammalian)	*0.02
Milks	*0.01
Oilseed	*0.05
Onion, bulb	*0.05
Peas	*0.05
Pulses	*0.05

<i>Agvet chemical:</i> Propargite	
<i>Permitted residue:</i> Propargite	
Apple	3
Banana	3
Cotton seed	0.2
Currant, black	T3
Edible offal (mammalian)	*0.1
Eggs	*0.1
Hops, dry	3
Mangosteen	T3
Meat (mammalian) (in the fat)	*0.1
Milks	*0.1
Passionfruit	3
Pear	3
Poultry, edible offal of	*0.1
Poultry meat (in the fat)	*0.1
Rambutan	T3
Stone fruits	3
Strawberry	7
Vegetables	3

<i>Agvet chemical:</i> Propazine	
<i>Permitted residue:</i> Propazine	
Vegetables	*0.1

Rape seed (canola)	*0.1

<i>Agvet chemical:</i>	Terbacil
<i>Permitted residue:</i>	<i>Terbacil</i>
Almonds	0.5
Peppermint oil	*0.1
Pome fruits	*0.04
Stone fruits	*0.04

<i>Agvet chemical:</i>	Terbufos
<i>Permitted residue:</i>	<i>Sum of terbufos, its oxygen analogue and their sulfoxides and sulfones, expressed as terbufos</i>
Banana	0.05
Cattle, edible offal of	*0.05
Cattle meat	*0.05
Cattle milk	*0.01
Cereal grains	*0.01
Eggs	*0.01
Peanut	*0.05
Poultry, edible offal of	*0.05
Poultry meat	*0.05
Sunflower seed	*0.05
Sweet corn (corn-on-the-cob)	*0.05

<i>Agvet chemical:</i>	Terbutylazine
<i>Permitted residue:</i>	<i>Terbutylazine</i>
Cereal grains [except maize]	*0.01
Cotton seed	T0.01
Edible offal (mammalian)	*0.01
Eggs	*0.01
Maize	T*0.02
Meat (mammalian)	*0.01
Milks	*0.01
Poultry, edible offal of	*0.01
Poultry meat	*0.01
Pulses	*0.02
Rape seed (canola)	*0.02
Sweet corn (corn-on-the-cob)	T*0.02

<i>Agvet chemical:</i>	Terbutryn
<i>Permitted residue:</i>	<i>Terbutryn</i>
Cereal grains	*0.1
Edible offal (mammalian)	3
Eggs	*0.05
Meat (mammalian)	0.1
Milks	0.1
Peas	*0.1
Poultry, edible offal of	*0.05
Poultry meat	0.1
Sugar cane	*0.05

<i>Agvet chemical:</i>	Tetrachlorvinphos
<i>Permitted residue:</i>	<i>Tetrachlorvinphos</i>
Edible offal (mammalian)	0.05
Meat (mammalian)	0.05
Milks (in the fat)	0.05

<i>Agvet chemical:</i>	Tetraconazole
<i>Permitted residue:</i>	<i>Tetraconazole</i>
Edible offal (mammalian)	0.2
Grapes	0.5
Meat (mammalian) (in the fat)	*0.01
Milks	*0.01

<i>Agvet chemical:</i>	Tetracycline
<i>Permitted residue:</i>	<i>Inhibitory substance, identified as tetracycline</i>
Milks	*0.1

<i>Agvet chemical:</i>	Tetradifon
<i>Permitted residue:</i>	<i>Tetradifon</i>
Cotton seed	5
Fruit	5
Hops, dry	5
Vegetables	5

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
<i>Agvet chemical:</i>	Thiabendazole		Stone fruits 0.5
<i>Permitted residue—commodities of plant origin:</i>	<i>Thiabendazole</i>		Sunflower seed *0.02
			Sweet corn (corn-on-the-cob) *0.02
<i>Permitted residue—commodities of animal origin:</i>	<i>sum of thiabendazole and 5-hydroxythiabendazole</i>		
Apple	10	<i>Agvet chemical:</i>	Thidiazuron
Banana	3	<i>Permitted residue:</i>	<i>Thidiazuron</i>
Citrus fruits	10		Cotton seed *0.5
Edible offal (mammalian)	0.2		Edible offal (mammalian) *0.05
Meat (mammalian)	0.2		Meat (mammalian) *0.05
Milks	0.05		Milks *0.01
Mushrooms	0.5	<i>Agvet chemical:</i>	Thifensulfuron
Peanut	T*0.01	<i>Permitted residue:</i>	<i>Thifensulfuron</i>
Pear	10		Cereal grains [except maize, rice] *0.02
Potato	5		Edible offal (mammalian) *0.01
Sweet potato	0.05		Eggs *0.01
			Meat (mammalian) *0.01
<i>Agvet chemical:</i>	Thiacloprid		Milks 0.01
<i>Permitted residue:</i>	<i>Thiacloprid</i>		Poultry, edible offal of *0.01
Cotton seed	0.1		Poultry meat *0.01
Edible offal (mammalian)	*0.02	<i>Agvet chemical:</i>	Thiobencarb
Eggs	*0.02	<i>Permitted residue:</i>	<i>Thiobencarb</i>
Meat (mammalian)	*0.02		Rice *0.05
Milks	*0.01	<i>Agvet chemical:</i>	Thiodicarb
Pome fruits	1	<i>Permitted residue:</i>	<i>Sum of thiodicarb and methomyl, expressed as thiodicarb</i>
Poultry, edible offal of	*0.02		Brassica (cole or cabbage) vegetables, Head
Poultry meat	*0.02		cabbages, Flowerhead brassicas 2
Stone fruits	2		Chia T0.5
Strawberry	1		Cotton seed *0.1
			Cotton seed oil, crude *0.1
<i>Agvet chemical:</i>	Thiamethoxam		Edible offal (mammalian) *0.05
<i>Permitted residue—commodities of plant origin:</i>	<i>Thiamethoxam</i>		Maize *0.1
<i>Permitted residue—commodities of animal origin:</i>	<i>Sum of thiamethoxam and N-(2-chloro-thiazol-5-ylmethyl)-N'-methyl-N'-nitro-guanidine, expressed as thiamethoxam</i>		Meat (mammalian) *0.05
Berries and other small fruits [except grapes]	0.5		Milks *0.05
Brassica (cole or cabbage) vegetables, Head			Peppers, Sweet T5
cabbages, Flowerhead brassicas	3		Potato 0.1
Cereal grains [except maize; sorghum]	*0.01		Pulses *0.1
Citrus fruits	1		Sorghum T0.5
Cotton seed	*0.02		Sweet corn (corn-on-the-cob) *0.1
Edible offal (mammalian)	*0.02		Tomato 2
Eggs	*0.02	<i>Agvet chemical:</i>	Thiometon
Fruiting vegetables, other than cucurbits	0.05	<i>Permitted residue:</i>	<i>Sum of thiometon, its sulfoxide and sulfone, expressed as thiometon</i>
Grapes	0.2		Cereal grains 1
Leafy vegetables	2		Edible offal (mammalian) *0.05
Maize	*0.02		Eggs *0.05
Mango	T0.2		Fruit 1
Meat (mammalian)	*0.02		Lupin (dry) 0.5
Milks	*0.005		Meat (mammalian) *0.05
Poultry, edible offal of	*0.02		Milks *0.05
Poultry meat	*0.02		Oilseed *0.05
Rape seed (canola)	*0.01		
Sorghum	*0.02		

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
Poultry, edible offal of		*0.05
Poultry meat		*0.05
Vegetables		1
<hr/>		
<i>Agvet chemical:</i>	Thiophanate	
<i>see Carbendazim</i>		
<hr/>		
<i>Agvet chemical:</i>	Thiophanate-methyl	
<i>Permitted residue: Sum of thiophanate-methyl and 2-aminobenzimidazole, expressed as thiophanate-methyl</i>		
Cherries		20
Nectarine		3
Peach		3
<hr/>		
<i>Agvet chemical:</i>	Thiram	
<i>see Dithiocarbamates</i>		
<hr/>		
<i>Agvet chemical:</i>	Tiamulin	
<i>Permitted residue: Tiamulin</i>		
Pig, edible offal of		*0.1
Pig meat		*0.1
Poultry, edible offal of		*0.1
Poultry meat		*0.1
<hr/>		
<i>Agvet chemical:</i>	Tilmicosin	
<i>Permitted residue: Tilmicosin</i>		
Cattle, edible offal of		1
Cattle meat		*0.05
Cattle milk		T*0.025
Pig, edible offal of		1
Pig meat		0.05
<hr/>		
<i>Agvet chemical:</i>	Tolclofos-methyl	
<i>Permitted residue: Tolclofos-methyl</i>		
Beetroot		*0.01
Cotton seed		*0.01
Lettuce, head		T*0.01
Lettuce, leaf		T*0.01
Potato		0.1
<hr/>		
<i>Agvet chemical:</i>	Tolfenamic acid	
<i>Permitted residue: Tolfenamic acid</i>		
Cattle kidney		*0.01
Cattle liver		*0.01
Cattle meat		0.05
Cattle milk		0.05
Pig kidney		*0.01
Pig liver		0.1
Pig meat		*0.01
<hr/>		
<i>Agvet chemical:</i>	Toltrazuril	
<i>Permitted residue: Sum of toltrazuril, its sulfoxide and sulfone, expressed as toltrazuril</i>		
Cattle fat		1
Cattle kidney		1
Cattle liver		2
Cattle muscle		0.25
Chicken, edible offal of		5
Chicken meat		2
Eggs		*0.03
Pig, edible offal of		2
Pig meat (in the fat)		1
<hr/>		
<i>Agvet chemical:</i>	Tolyfluanid	
<i>Permitted residue: Tolyfluanid</i>		
Berries and other small fruits [except grapes and strawberry]		T15
Cucumber		T2
Dried grapes		T0.2
Grapes		T*0.05
Strawberry		3
<hr/>		
<i>Agvet chemical:</i>	Tralkoxydim	
<i>Permitted residue: Tralkoxydim</i>		
Cereal grains		*0.02
<hr/>		
<i>Agvet chemical:</i>	Trenbolone acetate	
<i>Permitted residue: Sum of trenbolone acetate and 17 Alpha- and 17 Beta-trenbolone, both free and conjugated, expressed as trenbolone</i>		
Cattle, edible offal of		0.01
Cattle meat		0.002
<hr/>		
<i>Agvet chemical:</i>	Triadimefon	
<i>Permitted residue: Sum of triadimefon and triadimenol, expressed as triadimefon</i>		
<i>see also Triadimenol</i>		
Apple		1
Cereal grains		0.5
Edible offal (mammalian)		*0.05
Eggs		*0.1
Field pea (dry)		0.1
Fruiting vegetables, cucurbits		0.2
Fruiting vegetables, other than cucurbits		0.2
Garden pea (shelled succulent seeds)		0.1
Garden pea (young pods, succulent seeds)		0.1
Grapes		1
Fats (mammalian)		*0.25
Meat (mammalian)		*0.05
Milks		*0.1
Poultry, edible offal of		*0.05
Poultry meat		*0.05
Sugar cane		*0.05

Schedule 20 Maximum residue limits

Maximum residue limits

<i>Agvet chemical:</i>	Triadimenol	<i>Agvet chemical:</i>	Tribenuron-methyl
<i>Permitted residue:</i>	<i>Triadimenol</i>	<i>Permitted residue:</i>	<i>Tribenuron-methyl</i>
<i>see also Triadimefon</i>			
Berries and other small fruits [except grapes; ribberries; strawberry]	T0.5	Barley	*0.01
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas	1	Chick-pea (dry)	*0.01
Cereal grains [except sorghum]	*0.01	Cotton seed	*0.05
Cotton seed	T0.01	Edible offal (mammalian)	*0.01
Cotton seed oil, crude	T0.05	Maize	*0.05
Edible offal (mammalian)	*0.01	Meat (mammalian)	*0.01
Eggs	*0.01	Milks	*0.01
Fruiting vegetables, cucurbits	0.5	Mung bean (dry)	*0.01
Fruiting vegetables, other than cucurbits	1	Oats	*0.01
Grapes	0.5	Rape seed (canola)	*0.01
Lemon grass	T*0.05	Sorghum	*0.01
Meat (mammalian)	*0.01	Soya bean (dry)	*0.01
Milks	*0.01	Sunflower seed	*0.01
Onion, bulb	0.05	Wheat	*0.01
Papaya (pawpaw)	0.2		
Parsnip	T0.2	<i>Agvet chemical:</i>	Trichlorfon
Poultry, edible offal of	*0.01	<i>Permitted residue:</i>	<i>Trichlorfon</i>
Poultry meat	*0.01	Achachairu	T3
Radish	T0.2	Assorted tropical and sub-tropical fruits – edible peel	T3
Ribberries	T5	Assorted tropical and sub-tropical fruits – inedible peel	T3
Sorghum	0.5	Babaco	T3
Sugar cane	*0.05	Beetroot	0.2
Swede	T0.2	Berries and other small fruits	T2
Turnip, garden	T0.2	Brussels sprouts	0.2
		Cape gooseberry	T0.5
<i>Agvet chemical:</i>	Triallate	Cattle, edible offal of	0.1
<i>Permitted residue:</i>	<i>Sum of triallate and 2,3,3-trichloroprop-2-ene sulfonic acid (TCPSA), expressed as triallate</i>	Cattle fat	0.1
Cereal grains	*0.05	Cattle meat	0.1
Edible offal (mammalian) [except kidney]	*0.1	Cauliflower	0.2
Eggs	*0.01	Celery	0.2
Fats (mammalian)	0.2	Cereal grains	0.1
Kidney of cattle, goats, pigs and sheep	0.2	Dried fruits	2
Legume vegetables	*0.05	Egg plant	T0.5
Meat (mammalian)	*0.1	Eggs	*0.05
Milks	*0.1	Fish muscle	T*0.01
Oilseed	0.1	Fruit [except achachairu; assorted tropical and sub-tropical fruits – edible peel; assorted tropical and sub-tropical fruits – inedible peel; babaco; berries and other small fruits; dried fruits; loquat; medlar; miracle fruit; quince; rollinia; shaddock (pomelo); stone fruits]	T0.1
Poultry, edible offal of	0.2	Goat, edible offal of	0.1
Poultry fats	0.2	Goat meat	0.1
Poultry meat	*0.1	Kale	0.2
Pulses	0.1	Loquat	T3
		Medlar	T3
<i>Agvet chemical:</i>	Triasulfuron	Milks	*0.05
<i>Permitted residue:</i>	<i>Triasulfuron</i>	Miracle fruit	T3
Cereal grains	*0.02	Oilseed [except peanut]	0.1
Edible offal (mammalian)	*0.05	Peanut	0.1
Eggs	*0.05	Pepino	T0.5
Meat (mammalian)	*0.05	Peppers	0.2
Milks	*0.01	Pig, edible offal of	0.1

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits	
Pig fat	0.1	<i>Agvet chemical:</i> Trifloxystrobin
Pig meat	0.1	<i>Permitted residue:</i> Sum of trifloxystrobin and its acid metabolite ((E,E)-methoxyimino-[2-[1-(3-trifluoromethylphenyl)-ethylideneaminooxymethyl]phenyl] acetic acid), expressed as trifloxystrobin equivalents
Poultry, edible offal of	*0.05	Banana
Poultry meat	*0.05	Beetroot
Pulses [except soya bean (dry)]	0.2	Celery
Quince	T3	Chard (silver beet)
Rollinia	T3	Chicory leaves
Shaddock (pomelo)	T3	Cucumber
Soya bean (dry)	0.1	Dried grapes
Stone fruits	T3	Edible offal (mammalian)
Sugar beet	0.05	Endive
Sugar cane	*0.05	Grapes
Sweet corn (corn-on-the-cob)	0.2	Macadamia nuts
Tree nuts	0.1	Meat (mammalian)
Vegetables [except beetroot; Brussels sprouts; cape gooseberry; cauliflower; celery; egg plant; kale; pepino; peppers; pulses; sugar beet; sweet corn (corn-on-the-cob)]	0.1	Milks
		Peppers, Sweet
<i>Agvet chemical:</i> Trichloroethylene		Pome fruits
<i>Permitted residue:</i> Trichloroethylene		Rape seed (canola)
Cereal grains	*0.1	Spinach
		Stone fruits
<i>Agvet chemical:</i> Triclabendazole		Strawberry
<i>Permitted residue:</i> Sum of triclabendazole and metabolites oxidisable to keto-triclabendazole and expressed as keto-triclabendazole equivalents		Tomato
Fat (mammalian)	1	<i>Agvet chemical:</i> Trifloxysulfuron sodium
Kidney (mammalian)	1	<i>Permitted residue:</i> Trifloxysulfuron
Liver (mammalian)	2	Cotton seed
Meat (mammalian)	0.5	Cotton seed oil, crude
		Cotton seed oil, edible
<i>Agvet chemical:</i> Triclopyr		Edible offal (mammalian)
<i>Permitted residue:</i> Triclopyr		Eggs
Cattle, edible offal of	5	Meat (mammalian)
Cattle meat (in the fat)	0.2	Milks
Citrus fruits	0.2	Poultry, edible offal of
Goat, edible offal of	5	Poultry meat
Goat meat (in the fat)	0.2	Sugar cane
Litchi	0.1	
Milks (in the fat)	0.1	<i>Agvet chemical:</i> Triflumizole
Poppy seed	*0.01	<i>Permitted residue:</i> Sum of triflumizole and (E)-4-chloro-a,a,a-trifluoro- N-(1-amino-2-propoxyethylidene)-o-toluidine, expressed as triflumizole
Sheep, edible offal of	5	Cherries
Sheep meat (in the fat)	0.2	Grapes
		Pome fruits
<i>Agvet chemical:</i> Tridemorph		
<i>Permitted residue:</i> Tridemorph		<i>Agvet chemical:</i> Triflumuron
Banana	T*0.05	<i>Permitted residue:</i> Triflumuron
Barley	0.1	Cereal grains
Fruiting vegetables, cucurbits	0.1	Edible offal (mammalian) [except sheep, edible offal of]
		Eggs

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Meat (mammalian) [except sheep meat (in the fat)]	*0.05
Milks	*0.05
Mushrooms	0.1
Poultry, edible offal of	0.01
Poultry meat (in the fat)	0.1
Sheep, edible offal of	0.1
Sheep meat (in the fat)	2

Agvet chemical: Trifluralin

Permitted residue: Trifluralin

Adzuki bean (dry)	*0.05
Bergamot	T*0.05
Broad bean (dry)	*0.05
Burnet, salad	T*0.05
Carrot	0.5
Cereal grains	*0.05
Chia	T*0.01
Chick-pea (dry)	*0.05
Coriander (leaves, stem, roots)	T*0.05
Coriander, seed	T*0.05
Cowpea (dry)	*0.05
Dill, seed	T*0.05

Eggs	*0.05
Fennel, bulb	T0.5
Fennel, seed	T*0.05
Fruit	*0.05
Galangal, Greater	T0.5
Herbs	T*0.05
Hyacinth bean (dry)	*0.05
Kaffir lime leaves	T*0.05
Lemon grass	T*0.05
Lemon verbena (fresh weight)	T*0.05
Lupin (dry)	*0.05
Meat (mammalian)	*0.05
Milks	*0.05
Mizuna	T*0.05
Mung bean (dry)	*0.05
Oilseed	*0.05
Parsnips	T0.5
Poultry meat	*0.05
Poultry, edible offal of	*0.05
Rose and dianthus (edible flowers)	T*0.05
Sugar cane	*0.05
Turmeric, root (fresh)	T0.5
Vegetables [except as otherwise listed under this chemical]	0.05

Agvet chemical: Triforine

Permitted residue: Triforine

Pome fruits	1
Stone fruits	10

Agvet chemical: Trimethoprim	
<i>Permitted residue: Trimethoprim</i>	
Cattle milk	0.05
Edible offal (mammalian)	0.05
Eggs	T*0.02
Meat (mammalian)	0.05
Poultry, edible offal of	0.05
Poultry meat	0.05

Agvet chemical: Trinexapac-ethyl

Permitted residue: 4-(cyclopropyl- α -hydroxy-methylene)-3,5-dioxo-cyclohexanecarboxylic acid

Barley	T0.3
Edible offal (mammalian)	0.05
Meat (mammalian)	*0.02
Milks	*0.005
Oats	T0.3
Poppy seed	7
Sugar cane	T0.2
Wheat	T0.3

Agvet chemical: Triticonazole

Permitted residue: Triticonazole

Cereal grains	*0.05
Edible offal (mammalian)	*0.05
Eggs	*0.05
Meat (mammalian)	*0.05
Milks	*0.01
Poultry, edible offal of	*0.05
Poultry meat	*0.05

Agvet chemical: Tulathromycin

Permitted residue: Sum of tulathromycin and its metabolites that are converted by acid hydrolysis to (2R,3S,4R,5R,8R,10R,11R,12S,13S,14R)-2-ethyl-3,4,10,13-tetrahydroxy-3,5,8,10,12,14-hexamethyl-11-[[3,4,6-trideoxy-3-(dimethylamino)- β -D-xylohexopyranosyl]oxy]-1-oxa-6-azacyclopentadecan-15-one, expressed as tulathromycin equivalents

Cattle fat	0.1
Cattle kidney	1
Cattle liver	3
Cattle muscle	0.1
Pig kidney	3
Pig liver	2
Pig muscle	0.5
Pig skin/fat	0.3

Agvet chemical: Tylosin

Permitted residue: Tylosin A

Cattle, edible offal of	*0.1
Cattle meat	*0.1
Eggs	*0.2
Fish muscle	T*0.002

Schedule 20 Maximum residue limits

Section S20—3	Maximum residue limits		
Milks	*0.05	<i>Agvet chemical:</i>	Zeranol
Pig, edible offal of	*0.2	<i>Permitted residue:</i>	<i>Zeranol</i>
Pig fat	*0.1	Cattle, edible offal of	0.02
Pig meat	*0.2	Cattle meat	0.005
Poultry, edible offal of	*0.2	<i>Agvet chemical:</i>	Zetacypermethrin
Poultry fats	*0.1	<i>see Cypermethrin</i>	
Poultry meat	*0.2	<i>Agvet chemical:</i>	Zinc Phosphide
<i>Agvet chemical:</i>	Uniconazole-p	<i>see Phosphine</i>	
<i>Permitted residue:</i>	<i>Sum of uniconazole-p and its Z-isomer expressed as uniconazole-p</i>	<i>Agvet chemical:</i>	Zineb
Avocado	0.5	<i>see Dithiocarbamates</i>	
Custard apple	T*0.01	<i>Permitted residue:</i>	
Poppy seed	*0.01	<i>Agvet chemical:</i>	Ziram
<i>Agvet chemical:</i>	Virginiamycin	<i>see Dithiocarbamates</i>	
<i>Permitted residue:</i>	<i>Inhibitory substance, identified as virginiamycin</i>	<i>Permitted residue:</i>	
Cattle, edible offal of	0.2	<i>Agvet chemical:</i>	Zoxamide
Cattle fat	0.2	<i>Permitted residue:</i>	<i>Zoxamide</i>
Cattle milk	0.1	Grapes	3
Cattle meat	*0.1		
Eggs	*0.1		
Pig, edible offal of	0.2		
Pig fat	0.2		
Pig meat	*0.1		
Poultry, edible offal of	0.2		
Poultry fats	0.2		
Poultry meat	0.1		
Sheep, edible offal of	0.2		
Sheep meat	0.1		

Schedule 20 Maximum residue limits

Section S20—3

Maximum residue limits

Schedule 21 Extraneous residue limits

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Extraneous residue limits are regulated by subsection 1.1.1—10(5) and Standard 1.4.2. This Standard identifies *active constituents of agvet chemicals, and their permitted residues, for the purpose of section 1.4.2—5.

Note 2 This Standard applies in Australia only. In New Zealand, extraneous residue limits for agricultural compounds are set out in a Maximum Residue Limits Standard.

S21—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 21 — Extraneous residue limits*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S21—2 Interpretation

In this Schedule:

- (a) an asterisk (*) indicates that the *ERL is set at the limit of determination; and
- (b) the symbol ‘T’ indicates that the ERL is a temporary ERL; and
- (c) the symbol ‘E’ indicates an ERL.

S21—3 Extraneous residue limits

For section 1.4.2—5, the *agvet chemicals, permitted residues, and amounts are as follows, expressed in mg per kg:

Extraneous residue limits

Schedule 21 Extraneous residue limits

Section S21—3

Extraneous residue limits

Agvet chemical: Aldrin and Dieldrin

Permitted residue: Sum of HHDN and HEOD

Asparagus	E0.1
Banana	E0.05
Brassica (cole or cabbage) vegetables, Head cabbages, Flowerhead brassicas	E0.1
Cereal grains	E0.02
Citrus fruits	E0.05
Crustaceans	E0.1
Diadromous fish	E0.1
Edible offal (mammalian)	E0.2
Egg plant	E0.1
Eggs	E0.1
Freshwater fish	E0.1
Fruit	E0.05
Fruiting vegetables, cucurbits	E0.1
Lettuce, head	E0.1
Lettuce, leaf	E0.1
Marine fish	E0.1
Meat (mammalian) (in the fat)	E0.2
Milks (in the fat)	E0.15
Molluscs (including cephalopods)	E0.1
Onion, bulb	E0.1
Peanut	E0.05
Peppers, sweet	E0.1
Pimento, fruit	E0.1
Poultry, edible offal of	E0.2
Poultry meat (in the fat)	E0.2
Radish leaves (including radish tops)	E0.1
Root and tuber vegetables	E0.1
Sugar cane	E*0.01

Agvet chemical: BHC (other than the gamma isomer, Lindane)

Permitted residue: Sum of isomers of 1,2,3,4,5,6-hexachlorocyclohexane, other than lindane

Cereal grains	E0.1
Crustaceans	E0.01
Edible offal (mammalian)	E0.3
Eggs	E0.1
Fish	E0.01
Meat (mammalian) (in the fat)	E0.3
Milks (in the fat)	E0.1
Molluscs (including cephalopods)	E0.01
Peanut	E0.1
Poultry, edible offal of	E0.3
Poultry meat (in the fat)	E0.3
Sugar cane	E0.005

Schedule 21 Extraneous residue limits

Section S21—3

Extraneous residue limits

Agvet chemical: Chlordane

Permitted residue: Sum of *cis*- and *trans*-chlordane and in the case of animal products also includes 'oxychlordane'

Cereal grains	E0.02	
Citrus fruits	E0.02	
Cotton seed oil, crude	E0.05	
Cotton seed oil, edible	E0.02	
Crustaceans	E0.05	
Edible offal (mammalian)	E0.02	
Eggs	E0.02	
Fish	E0.05	
Fruiting vegetables, cucurbits	E0.05	
Linseed oil, crude	E0.05	
Meat (mammalian) (in the fat)	E0.2	
Milks (in the fat)	E0.05	
Molluscs (including cephalopods)	E0.05	
Pineapple	E0.02	
Pome fruits	E0.02	
Soya bean oil, crude	E0.05	
Soya bean oil, refined	E0.02	
Stone fruits	E0.02	
Sugar beet	E0.1	
Vegetables [except as otherwise listed under this chemical]		E0.02

Agvet chemical: DDT

Permitted residue: Sum of *p,p'*-DDT; *o,p'*-DDT; *p,p'*-DDE and *p,p'*-TDE (DDD)

Cereal grains	E0.1	
Crustaceans	E1

Schedule 22 Foods and classes of foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

This Standard describes foods and classes of foods for subsection 1.4.1—2(2), subsection 1.4.2—3(4), subsection 1.5.3—4(3), paragraph S5—4(2)(b), section S19—4 and section S19—5, and portions of food for subsection 1.4.2—3(2).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S22—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 22 — Foods and classes of foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S22—2 Foods and classes of foods

Animal food commodities

Mammalian products

Meat (mammalian)

Meats are the muscular tissues, including adhering fatty tissues such as intramuscular, intermuscular and subcutaneous fat from animal carcasses or cuts of these as prepared for wholesale or retail distribution. Meat (mammalian) includes farmed and game meat. The cuts offered may include bones, connective tissues and tendons as well as nerves and lymph nodes. It does not include edible offal. The entire commodity except bones may be consumed.

Commodities: Buffalo meat; Camel meat; Cattle meat; Deer meat; Donkey meat; Goat meat; Hare meat; Horse meat; Kangaroo meat; Pig meat; Possum meat; Rabbit meat; Sheep meat; Wallaby meat.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity (without bones). When the commodity description is qualified by (in the fat) a proportion of adhering fat is analysed and the MRLs apply to the fat.

Edible offal (mammalian)

Edible offal is the edible tissues and organs other than muscles and animal fat from slaughtered animals as prepared for wholesale or retail distribution. Edible offal includes brain, heart, kidney, liver, pancreas, spleen, thymus, tongue and tripe. The entire commodity may be consumed.

Commodities: Buffalo, edible offal of; Cattle, edible offal of; Camel, edible offal of; Deer, edible offal of; Donkey, edible offal of; Goat, edible offal of; Hare, edible offal of; Horse,

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

edible offal of; Kangaroo, edible offal of; Pig, edible offal of; Possum, edible offal of; Rabbit, edible offal of; Sheep, edible offal of; Wallaby, edible offal of.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Fats (mammalian)

Mammalian fats, excluding milk fats are derived from the fatty tissues of animals (not processed). The entire commodity may be consumed.

Commodities: Buffalo fat; Camel fat; Cattle fat; Goat fat; Horse fat; Pig fat; Rabbit fat; Sheep fat.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Milks

Milks are the mammary secretions of various species of lactating herbivorous ruminant animals.

Commodities: Buffalo milk; Camel milk; Cattle milk; Goat milk; Sheep milk. The entire commodity may be consumed.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity. When an *MRL for cattle milk or milks is qualified by '(in the fat)' the compound is regarded as fat-soluble, and the MRL and *ERL apply to the fat portion of the milk. In the case of a derived or a manufactured milk product with a fat content of 2% or more, the MRL also applies to the fat portion. For a milk product with fat content less than 2%, the MRL applied should be 1/50 that specified for 'milk (in the fat)', and should apply to the whole product.

Poultry

Poultry meat

Poultry meats are the muscular tissues, including adhering fat and skin, from poultry carcasses as prepared for wholesale or retail distribution. The entire product may be consumed. Poultry meat includes farmed and game poultry.

Commodities: Chicken meat; Duck meat; Emu meat; Goose meat; Guinea-fowl meat; Ostrich meat; Partridge meat; Pheasant meat; Pigeon meat; Quail meat; Turkey meat.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity (without bones). When the commodity description is qualified by (in the fat) a proportion of adhering fat is analysed and the *MRLs apply to the fat.

Poultry, edible offal

Poultry edible offal is the edible tissues and organs, other than poultry meat and poultry fat, as prepared for wholesale or retail distribution and include liver, gizzard, heart, skin. The

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

entire product may be consumed.

Commodities: Chicken, edible offal of; Duck, edible offal of; Emu, edible offal of; Goose, edible offal of; Ostrich, edible offal of; Turkey, edible offal of.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Note that poultry meat includes any attached skin, but poultry skin on its own (not attached) is considered as 'poultry edible offal'.

Poultry fats

Poultry fats are derived from the fatty tissues of poultry (not processed). The entire product may be consumed.

Commodities: Chicken fat; Duck fat; Goose fat; Turkey fat.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Eggs

Eggs are the reproductive bodies laid by female birds, especially domestic fowl. The edible portion includes egg yolk and egg white after removal of the shell.

Commodities: Chicken eggs; Duck eggs; Goose eggs; Quail eggs.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole egg whites and yolks combined after removal of shell.

Fish, crustaceans and molluscs

Fish includes freshwater fish, diadromous fish and marine fish.

Diadromous fish

Diadromous fish include species which migrate from the sea to brackish and/or fresh water and in the opposite direction. Some species are domesticated and do not migrate. The fleshy parts of the animals and, to a lesser extent, roe and milt are consumed.

Commodities: Barramundi; Salmon species; Trout species; Eel species.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity including bones and head (in general after removing the digestive tract).

Freshwater fish

Freshwater fish include a variety of species which remain lifelong, including the spawning period, in fresh water. Several species of freshwater fish are domesticated and bred in fish farms. The fleshy parts of the animals and, to a lesser extent, roe and milt are consumed.

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Commodities: a variety of species.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity including bones and head (in general after removing the digestive tract).

Marine fish

Marine fish generally live in open seas and are almost exclusively wild species. The fleshy parts of the animals and, to a lesser extent, roe and milt are consumed.

Commodities: a variety of species.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity including bones and head (in general after removing the digestive tract).

Molluscs – and other marine invertebrates

Molluscs includes Cephalopods and Coelenterates. Cephalopods and Coelenterates are various species of aquatic animals, wild or cultivated, which have an inedible outer or inner shell (invertebrates). A few species of cultivated edible land snails are included in this group. The edible aquatic molluscs live mainly in brackish water or in the sea.

Commodities: Clams; Cockles; Cuttlefish; Mussels; Octopus; Oysters; Scallops; Sea-cucumbers; Sea urchins; Snails, edible; Squids.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of shell.

Crustaceans

Crustaceans include various species of aquatic animals, wild and cultivated, which have an inedible chitinous outer shell. A small number of species live in fresh water, but most species live in brackish water and/or in the sea.

Crustaceans are largely prepared for wholesale and retail distribution after catching by cooking or parboiling and deep freezing.

Commodities: Crabs; Crayfish; Lobsters; Prawns; Shrimps.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity or the meat without the outer shell, as prepared for wholesale and retail distribution.

Honey and other miscellaneous primary food commodities of animal origin

Honey

Commodity: Honey.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Crop commodities

Fruit

Tropical and sub-tropical fruit—edible peel

Tropical and sub-tropical fruits - edible peel are derived from the immature or mature fruits of a large variety of perennial plants, usually shrubs or trees. The fruits are fully exposed to pesticides applied during the growing season. The whole fruit may be consumed in a succulent or processed form.

Commodities: Ambarella; Arbutus berry; Babaco; Barbados cherry; Bilimbi; Brazilian cherry (Grumichama); Carambola; Caranda; Carob; Cashew apple; Chinese olive; Coco plum; Cumquats; Date; Fig; Hog plum; Jaboticaba; Jujube; Natal plum; Olives; Otaheite gooseberry; Persimmon, Japanese; Pomerac; Rose apple; Sea grape; Surinam cherry; Tree tomato (Tamarillo).

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity. Dates and olives: Whole commodity after removal of stems and stones but residue calculated and expressed on the whole fruit.

Tropical and sub-tropical fruit—inedible peel

Tropical and sub-tropical fruits - inedible peel are derived from the immature or mature fruits of a large variety of perennial plants, usually shrubs or trees. Fruits are fully exposed to pesticides applied during the growing season but the edible portion is protected by skin, peel or husk. The edible part of the fruits may be consumed in a fresh or processed form.

Commodities: Akee apple; Avocado; Banana (includes banana dwarf); Bread fruit; Canistel; Cherimoya; Custard apple; Doum; Durian; Elephant fruit; Feijoa; Guava; Ilama; Jackfruit; Jambolan; Java apple; Kiwifruit; Longan; Litchi; Mammy apple; Mango; Mangosteen; Marmalade box; Mombin, yellow; Naranjilla; Passionfruit; Papaya (Pawpaw); Persimmon, American; Pineapple; Plantain; Pomegranate; Prickly pear; Pulasan; Rambutan; Rollinia; Sapodilla; Sapote, black; Sapote, green; Sapote, mammey; Sapote, white; Sentul; Soursop; Spanish lime; Star apple; Sugar apple; Tamarind; Tonka bean.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole fruit. Avocado, mangos and similar fruit with hard seeds: whole commodity after removal of stone but calculated on whole fruit. Banana: whole commodity after removal of any central stem and peduncle. Longan, edible aril: edible portion of the fruit. Pineapple: after removal of crown.

Berries and other small fruits

Berries and other small fruits are derived from a variety of perennial plants and shrubs having fruit characterised by a high surface to weight ratio. The fruits are fully exposed to pesticides applied during the growing season. The entire fruit, often including seed, may be consumed in a succulent or processed form.

Commodities: Bilberry; Blackberries; Blueberries; Cranberry; Currants, black, red, white; Dewberries (including Boysenberry, Loganberry and Youngberry); Elderberries; Gooseberry;

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Grapes; Juneberries; Mulberries; Raspberries, Red, Black; Rose hips; Strawberry; Vaccinium berries.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of caps and stems. Currants: fruit with stem.

Citrus fruits

Citrus fruits are produced on trees and shrubs of the family Rutaceae. These fruits are characterised by aromatic oily peel, globular form and interior segments of juice-filled vesicles. The fruit is fully exposed to pesticides applied during the growing season. Post-harvest treatments with pesticides and liquid waxes are often carried out to avoid deterioration due to fungal diseases, insect pests or loss of moisture. The fruit pulp may be consumed in succulent form and as a juice. The entire fruit may be used for preserves.

Commodities: Citron; Grapefruit; Lemon; Lime; Mandarins; Oranges, sweet, sour; Shaddock (Pomelo); Tangelo; Tangors.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Pome fruits

Pome fruits are produced on trees and shrubs belonging to certain genera of the rose family (Rosaceae), especially the genera *Malus* and *Pyrus*. They are characterised by fleshy tissue surrounding a core consisting of parchment-like carpels enclosing the seeds.

Pome fruits are fully exposed to pesticides applied during the growing season. Post-harvest treatments directly after harvest may also occur. The entire fruit, except the core, may be consumed in the succulent form or after processing.

Commodities: Apple; Crab-apple; Loquat; Medlar; Pear; Quince.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of stems.

Stone fruits

Stone fruits are produced on trees belonging to the genus *Prunus* of the family Rosaceae. They are characterised by fleshy tissue surrounding a single hard shelled seed. The entire fruit, except the seed, may be consumed in a succulent or processed form. The fruit is fully exposed to pesticides applied during the growing season. Dipping of fruit immediately after harvest, especially with fungicides, may also occur.

Commodities: Apricot; Cherries; Nectarine; Peach; Plums*.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of stems and stones, but the residue calculated and expressed on the whole commodity without stem.

*where plums is specified as '(including Prunes)' it includes all relevant prunes.

Vegetables

Brassica (cole or cabbage) vegetables

Cole vegetables (cabbage and flowerhead brassicas) are foods derived from the leafy heads and stems of plants belonging to the genus *Brassica* of the family *Cruciferae*. The edible part of the crop is partly protected from pesticides applied during the growing season by outer leaves, or skin. The entire vegetable after discarding obviously decomposed or withered leaves may be consumed.

Commodities: Broccoli; Broccoli, Chinese; Brussels sprouts; Cabbages, head; Cauliflower; Kohlrabi.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): Head cabbages and kohlrabi, whole commodity as marketed, after removal of obviously decomposed or withered leaves. Cauliflower and broccoli: flower heads (immature inflorescence only). Brussels sprouts: 'buttons only'.

Bulb vegetables

Bulb vegetables are pungent, highly flavoured bulbous vegetables derived from fleshy scale bulbs of the genus *Allium* of the lily family (*Liliaceae*). Bulb fennel has been included in this group as the bulb-like growth of this commodity gives rise to similar residues. The subterranean parts of the bulbs and shoots are protected from direct exposure to pesticides during the growing season. Although chives are alliums they have been classified with herbs. The entire bulb may be consumed after removal of the parchment-like skin. The leaves and stems of some species or cultivars may also be consumed.

Commodities: Fennel, bulb; Garlic; Leek; Onion, bulb; Onion, Chinese; Onion, Welsh; Shallot; Spring onion; Tree onion.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): Bulb/dry. Onions and garlic: Whole commodity after removal of roots and adhering soil and whatever parchment skin is easily detached. Leeks and spring onions: Whole vegetable after removal of roots and adhering soil.

Fruiting vegetables, cucurbits

Fruiting vegetables, Cucurbits are derived from the immature and mature fruits of various plants, belonging to the botanical family *Cucurbitaceae*. These vegetables are fully exposed to pesticides during the period of fruit development.

The edible portion of those fruits of which the inedible peel is discarded before consumption is protected from most pesticides by the skin or peel, except from pesticides with a systemic action.

The entire fruiting vegetable or the edible portion after discarding the inedible peel may be consumed in the fresh form or after processing.

Commodities: Balsam apple; Balsam pear; Bottle gourd; Chayote; Cucumber; Gherkin; Loofah; Melons, except Watermelon; Pumpkins; Snake gourd; Squash, summer (including Zucchini); Squash, winter; Watermelon.

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of stems.

Fruiting vegetables, other than cucurbits

Fruiting vegetables, other than Cucurbits are derived from the immature and mature fruits of various plants, usually annual vines or bushes. The group includes edible fungi and mushrooms, being comparable organs of lower plants. The entire fruiting vegetable or the edible portion after discarding husks or peels may be consumed in a fresh form or after processing. The vegetables of this group are fully exposed to pesticides applied during the period of fruit development, except those of which the edible portion is covered by husks, such as sweet corn.

Commodities: Cape gooseberry (ground cherries); Egg plant; Fungi, edible; Mushrooms; Okra; Pepino; Peppers, sweet, Chili; Roselle; Sweet corn*; Tomato.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of stems. Mushrooms: Whole commodity. Sweet corn and fresh corn: kernels plus cob without husk.

*sweet corn is specified as either '(corn-on-the-cob)' to indicate that the *MRL is set on the cob plus kernels, or as '(kernels)' to indicate that the MRL is set on the kernels only.

Leafy vegetables (including brassica leafy vegetables)

Leafy vegetables are foods derived from the leaves of a wide variety of edible plants. They are characterised by a high surface to weight ratio. The leaves are fully exposed to pesticides applied during the growing season. The entire leaf may be consumed either fresh or after processing.

Commodities: Amaranth; Box thorn; Chard (silver beet); Chervil; Chicory leaves; Chinese cabbage (Pe-tsai); Choisum; Cress, garden; Dandelion; Dock; Endive; Grape leaves; Indian mustard; Japanese greens; Kale; Kangkung; Komatsuma; Lettuce, Head; Lettuce, Leaf; Marsh marigold; Mizuna; Mustard greens; New Zealand spinach; Pak-choi; Pokeweed; Purslane; Radish leaves (including radish tops); Rape greens; Rucola; Sowthistle; Spinach; Turnip greens; Watercress.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of obviously decomposed or withered leaves.

Legume vegetables

Legume vegetables are derived from the succulent seed and immature pods of leguminous plants commonly known as beans and peas. Pods are fully exposed to pesticides during the growing season, whereas the succulent seed is protected within the pod from most pesticides, except pesticides with systemic action.

Commodities: Beans, except broad bean and soya bean; Broad bean (green pods and immature seeds); Chick-pea (green pods); Cluster bean (young pods); Common bean (pods and/or immature seeds); Cowpea (immature pods); Garden pea (young pods); Garden pea, shelled; Goa bean (immature pods); Haricot bean (green pods and/or immature seeds); Hyacinth bean (young pods, immature seeds); Lentil (young pods); Lima bean (young pods)

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

and/or immature beans); Lupin; Mung bean (green pods); Pigeon pea (green pods and/or young green seeds); Podded pea (young pods); Snap bean (immature seeds); Soya bean (immature seeds); Vetch.

Common bean (pods and/or immature seeds) includes Dwarf bean (immature pods and/or seeds); Field bean (green pods); Flageolet (fresh beans); French bean (immature pods and seeds); Green bean (green pods and immature seeds); Kidney bean (pods and/or immature seeds); Navy bean (young pods and/or immature seeds) and Runner bean (green pods and seeds).

Podded pea (young pods) includes sugar snap pea (young pods) and snow pea.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity (seed plus pod) unless otherwise specified.

Pulses

Pulses are derived from the mature seeds, naturally or artificially dried, of leguminous plants known as beans (dry) and peas (dry). The seeds in the pods are protected from most pesticides applied during the growing season except pesticides which show a systemic action. There may be registered post harvest treatments for dried peas and beans.

Commodities: Beans (dry); Peas (dry); Adzuki bean (dry); Broad bean (dry); Chick-pea (dry); Common bean (dry); Cowpea (dry); Field pea (dry); Hyacinth bean (dry); Lentil (dry); Lima bean (dry); Lupin (dry); Mung bean (dry); Pigeon pea (dry); Soya bean (dry).

Common bean (dry) includes Dwarf bean (dry); Field bean (dry); Flageolet (dry); Kidney bean (dry); Navy bean (dry).

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity (dried seed only).

Root and tuber vegetables

Root and tuber vegetables are the starchy enlarged solid roots, tubers, corms or rhizomes, mostly subterranean, of various species of plants. The underground location protects the edible portion from most pesticides applied to the aerial parts of the crop during the growing season, however the commodities in this group are exposed to pesticide residues from soil treatments. The entire vegetable may be consumed in the form of fresh or processed foods.

Commodities: Arrowroot; Beetroot; Canna, edible; Carrot; Cassava; Celeriac; Chicory, roots; Horseradish; Jerusalem artichoke; Parsnip; Potato; Radish; Radish, Japanese; Salsify; Scorzoneria; Sugar beet; Swede; Sweet potato; Taro; Turnip, garden; Yams.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removing tops. Remove adhering soil (e.g. by rinsing in running water or by gentle brushing of the dry commodity).

Stalk and stem vegetables

Stalk and stem vegetables are the edible stalks, leaf stems or immature shoots from a variety of annual or perennial plants. Globe artichokes have been included in this group. Depending upon the part of the crop used for consumption and the growing practices, stalk and stem

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

vegetables are exposed, in varying degrees, to pesticides applied during the growing season. Stalk and stem vegetables may be consumed in whole or in part and in the form of fresh, dried or processed foods.

Commodities: Artichoke, globe; Asparagus; Bamboo shoots; Celery; Celtuce; Palm hearts; Rhubarb; Witloof chicory.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of obviously decomposed or withered leaves. Rhubarb: leaf stems only. Globe artichoke: flowerhead only. Celery and asparagus: remove adhering soil.

Grasses

Cereal grains

Cereal grains are derived from the (heads) of starchy seeds produced by a variety of plants, primarily of the grass family (Gramineae). The edible seeds are protected to varying degrees from pesticides applied during the growing season by husks. Husks are removed before processing and/or consumption. There may be registered post harvest treatments for cereal grains.

Commodities: Barley; Buckwheat; Maize; Millet; Oats; Popcorn; Rice*; Rye; Sorghum; Triticale; Wheat; Wild rice.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity

* 'Rice' means 'Rice in Husk.'

Grasses for sugar or syrup production

Grasses for sugar or syrup production, includes species of grasses with a high sugar content especially in the stem. The stems are mainly used for sugar or syrup production.

Commodities: Sugar cane.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Nuts and seeds

Tree nuts

Tree nuts are the seeds of a variety of trees and shrubs which are characterised by a hard inedible shell enclosing an oily seed. The seed is protected from pesticides applied during the growing season by the shell and other parts of the fruit. The edible portion of the nut is consumed in succulent, dried or processed forms.

Commodities: Almonds; Beech nuts; Brazil nut; Cashew nut; Chestnuts; Coconut; Hazelnuts; Hickory nuts; Japanese horse-chestnut; Macadamia nuts; Pecan; Pine nuts; Pili nuts; Pistachio nuts; Sapucaia nut; Walnuts.

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of shell. Chestnuts: whole in skin.

Oilseed

Oilseed consists of seeds from a variety of plants used in the production of edible vegetable oils. Some oilseeds are used directly, or after slight processing, as food or for food flavouring. Oilseeds are protected from pesticides applied during the growing season by the shell or husk.

Commodities: Acacia seed; Cotton seed; Linseed; Mustard seed; Palm nut; Peanut; Plantago ovata seed; Poppy seed; Rape seed; Safflower seed; Sesame seed; Sunflower seed.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): seed or kernels, after removal of shell or husk.

Seed for beverages and sweets

Seeds for beverages and sweets are derived from tropical and sub-tropical trees and shrubs. These seeds are protected from pesticides applied during the growing season by the shell or other parts of the fruit.

Commodities: Cacao beans; Coffee beans; Cola nuts.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Herbs and spices

Herbs

Herbs consist of leaves, flowers, stems and roots from a variety of herbaceous plants, used in relatively small amounts as condiments to flavour foods or beverages. They are used either in fresh or naturally dried form. Herbs are fully exposed to pesticides applied during the growing season. There may be registered post-harvest treatments for dried herbs.

Commodities: Angelica; Balm leaves (*Melissa officinalis*); Basil; Bay leaves; Burnet, great (*Banguisorba officinalis*); Burnet, salad; Burning bush (*Dictamnus albus*); Catmint; Celery leaves; Chives; Curry leaves; Dill (*Anethum graveolens*); Fennel; Hops; Horehound; Hyssop; Kaffir lime leaves; Lavender; Lemon balm; Lemon grass; Lemon verbena; Lovage; Marigold flowers (*Calendula officinalis*); Marjoram; Mints; Nasturtium leaves (*Tropaeolum majus* L.); Parsley; Rosemary; Rue (*Ruta graveolens*); Sage; Sassafras leaves; Savoury, summer, winter; Sorrel; Sweet cicely; Tansy; Tarragon; Thyme; Winter cress; Wintergreen leaves (*Gaultheria procumbens* L.); Woodruff (*Asperula odorata*); Wormwoods (*Artemisia* spp.).

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Spices

Spices consist of the aromatic seeds, roots, berries or other fruits from a variety of plants, which are used in relatively small quantities to flavour foods. Spices are exposed in varying

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

degrees to pesticides applied during the growing season. There may be registered post-harvest treatments for dried spices.

Commodities: Angelica seed; Anise seed; Calamus root; Caper buds; Caraway seed; Cardamom seed; Cassia buds; Celery seed; Cinnamon bark; Cloves; Coriander, seed; Cumin seed; Dill seed; Elecampane root; Fennel seed; Fenugreek seed; Galangal, rhizomes; Ginger, root; Grains of paradise; Juniper berry; Licorice root; Lovage seed; Mace; Nasturtium pods; Nutmeg; Pepper, black, white; Pepper, long; Pimento, fruit; Tonka bean; Turmeric, root; Vanilla, beans.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Processed foods of plant and animal origin

Derived edible commodities of plant origin

'Derived edible products' are foods or edible substances isolated from primary food commodities or raw agricultural commodities using physical, biological or chemical processing. This includes groups such as vegetable oils (crude and refined), by-products of the fractionation of cereals and teas (fermented and dried).

Cereal grain milling fractions

This group includes milling fractions of cereal grains at the final stage of milling and preparation in the fractions, and includes processed brans.

Commodities: Cereal brans, processed; Maize flour; Maize meal; Rice bran, processed; Rye bran, processed; Rye flour; Rye wholemeal; Wheat bran, processed; Wheat germ; Wheat flour; Wheat wholemeal.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Tea

Teas are derived from the leaves of several plants, principally *Camellia sinensis*. They are used mainly in a fermented and dried form or only as dried leaves for the preparation of infusions.

Commodities: Tea, green, black.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Vegetable oils, crude

This group includes the crude vegetable oils derived from oil seed, tropical and sub-tropical oil-containing fruits such as olives, and some pulses. Exposure to pesticides is through pre-harvest treatment of the relevant crops or post-harvest treatment of the oilseeds or oil-containing pulses.

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Commodities: Vegetable oils, crude; Cotton seed oil, crude; Coconut oil, crude; Maize oil, crude; Olive oil, crude; Palm oil, crude; Palm kernel oil, crude; Peanut oil, crude; Rape seed oil, crude; Safflower seed oil, crude; Sesame seed oil, crude; Soya bean oil, crude.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Vegetable oils, edible

Vegetable oils, edible are derived from the crude oils through a refining and/or clarifying process. Exposure to pesticides is through pre-harvest treatment of the relevant crops or post-harvest treatment of the oilseeds or oil-containing pulses.

Commodities: Vegetable oils, edible; Cotton seed oil, edible; Coconut oil, refined; Maize oil, edible; Olive oil, refined; Palm oil, edible; Palm kernel oil, edible; Peanut oil, edible; Rape seed oil, edible; Safflower seed oil, edible; Sesame seed oil, edible; Soya bean oil, refined; Sunflower seed oil, edible.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Manufactured multi-ingredient cereal products

The commodities of this group are manufactured with several ingredients; products derived from cereal grains however form the major ingredient.

Commodities: Bread and other cooked cereal products; Maize bread; Rye bread; White bread; Wholemeal bread.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Miscellaneous

Commodities: Olives, processed; peppermint oil; Sugar cane molasses.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Secondary commodities of plant origin

The term 'Secondary food commodity' refers to a primary food commodity which has undergone simple processing, such as removal of certain portions, drying (except natural drying), husking, and comminution, which do not basically alter the composition or identity of the product. For the commodities referred to in dried fruits, dried vegetables and dried herbs refer to the commodity groupings for fruits, vegetables and herbs. Naturally field dried mature crops such as pulses or cereal grains are not considered as secondary food commodities.

Dried fruits

Dried fruits are generally artificially dried. Exposure to pesticides may arise from pre-harvest application, post-harvest treatment of the fruits before processing, or treatment of the dried

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

fruit to avoid losses during transport and distribution.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity after removal of stones, but the residue is calculated on the whole commodity.

Dried herbs

Dried herbs are generally artificially dried and often comminuted. Exposure to pesticides is from pre-harvest applications and/or treatment of the dry commodities.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Dried vegetables

Dried vegetables are generally artificially dried and often comminuted. Exposure to pesticides is from pre-harvest application and/or treatment of the dry commodities.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Milled cereal products (early milling stages)

The group 'milled cereal products (early milling stages)' includes the early milling fractions of cereal grains, except buckwheat, such as husked rice, polished rice and the unprocessed cereal grain brans. Exposure to pesticides is through pre-harvest treatments of the growing cereal grain crop and especially through post-harvest treatment of cereal grains.

Commodities: Bran, unprocessed; Rice bran, unprocessed; Rice, husked; Rice, polished; Rye bran, unprocessed; Wheat bran, unprocessed.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Secondary commodities of animal origin

The term 'secondary food commodity' refers to a primary food commodity which has undergone simple processing, such as removal of certain portions, drying, and comminution, which do not basically alter the composition or identity of the commodity.

Animal fats, processed

This group includes rendered or extracted (possibly refined and/or clarified) fats from mammals and poultry and fats and oils derived from fish.

Commodities: Tallow and lard from cattle, goats, pigs and sheep; Poultry fats, processed.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Schedule 22 Foods and classes of foods

Section S22—2

Foods and classes of foods

Dried meat and fish products

For the commodities referred to in dried meat and dried fish products refer to the commodity groupings for meat and fish. Dried meat and fish products includes naturally or artificially dried meat products and dried fish, mainly marine fish.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Milk fats

Milk fats are the fatty ingredients derived from the milk of various mammals.

Portion of the commodity to which the MRL and ERL apply (and which is analysed): whole commodity.

Schedule 23 Prohibited plants and fungi

Section S23—1

Name

Schedule 23 Prohibited plants and fungi

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Prohibited plants and fungi are regulated by paragraphs 1.1.1—10(3)(a) and (4)(e) and Standard 1.4.4. This Standard lists plants and fungi for the definition of *prohibited plant or fungus* in section 1.1.2—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S23—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 23 — Prohibited plants and fungi*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S23—2 Prohibited plants and fungi

For paragraph (a) of the definition of *prohibited plant or fungus* in section 1.1.2—3, the plants and fungi are:

Prohibited plants and fungi

Species name	Common name
<i>Abrus cantoniensis</i>	
<i>Abrus precatorius</i>	Jequirity seeds
<i>Acokanthera schimperi</i>	Arrow poison tree
<i>Aconitum spp.</i>	Aconite
<i>Acorus calamus</i>	Calamus oil
<i>Adonis vernalis</i>	False hellebore, Spring adonis
<i>Aesculus hippocastanum</i>	Horse chestnut, Buckeye
<i>Alocasia macrorrhiza</i>	Cunjevoi, Elephant ear, Kape, ‘Ape, Ta’amu
<i>Alstonia constricta</i>	Alstonia
<i>Amanita muscaria</i>	Agaricus, Fly agaric
<i>Amanita spp.</i>	Amanita Mushroom
<i>Ammi visnaga</i>	Bisnaga, Khella
<i>Anadenanthera peregrina</i>	Cohoba yope, Niopo
<i>Anchusa officinalis</i>	Bugloss
<i>Apocynum androsaemifolium</i>	Bitter root, Spreading dogbane
<i>Apocynum cannabinum</i>	Canadian hemp, Dogbane, Indian hemp
<i>Areca catechu nut</i>	Betel nut
<i>Argyreia nervosa</i>	Woolly morning glory
<i>Aristolochia spp.</i>	Birthwort, Snakeroot
<i>Arnica spp.</i>	Arnica
<i>Atropa belladonna</i>	Deadly nightshade, Dwale

Schedule 23 Prohibited plants and fungi

Prohibited plants and fungi

Prohibited plants and fungi	
Species name	Common name
<i>Banisteriopsis</i> spp.	Banisteria, Caapi
<i>Borago officinalis</i>	Borage
<i>Brachyglottis</i> spp.	Rangiora
<i>Brunfelsia uniflora</i>	Manaca, Mercury
<i>Bryonia alba</i>	European white bryony
<i>Bryonia dioica</i>	White bryony
<i>Cacalia</i> spp.	
<i>Calotropis</i> spp.	Calotropis
<i>Cannabis</i> spp.	Hemp, Marijuana
<i>Catha edulis</i>	Khat, Chat
<i>Catharanthus</i> spp.	Periwinkle
<i>Cestrum nocturnum</i>	Queen of the night, Night blooming jessamine
<i>Chelidonium majus</i>	Common celandine, Greater celandine
<i>Chenopodium ambrosioides</i>	Wormseed, Mexican goosefoot, Pigweed, America wormseed
<i>Cicuta virosa</i>	Cowbane, European water hemlock
<i>Clitocybe</i> spp.	Fungi
<i>Colchicum autumnale</i>	Autumn crocus, Meadow saffron
<i>Conium maculatum</i>	Hemlock
<i>Conocybe</i> spp.	
<i>Convallaria majalis</i>	Lily of the Valley
<i>Copelandia</i> spp.	Fungi
<i>Coprinus atramentarius</i>	Common ink cap
<i>Coriaria</i> spp.	Tutu, Tuupaakihī, Puuhou, Toot
<i>Cornyocarpus laevigatus</i> seed	Karaka kernel, New Zealand laurel
<i>Coronilla</i> spp.	Crown vetch
<i>Cortinarius</i> spp.	Fungi
<i>Coryanthe yohimbe</i>	Yohimbe
<i>Crotolaria</i> spp.	Crotolaria
<i>Croton tiglium</i>	Croton, Purging croton
<i>Cycas media</i>	Zamia palm
<i>Cynoglossum officinale</i>	Hound's tongue, Beggar's lice
<i>Cytisus scoparius</i> (see <i>Sarothamnus scoparius</i>)	
<i>Daphne</i> spp.	Daphne, Mezereum, Spurge laurel
<i>Datura stramonium</i>	Jimson weed, Datura, Thornapple
<i>Delphinium</i> spp.	Larkspur, Stavesacre
<i>Digitalis purpurea</i>	Foxglove
<i>Dryopteris filix-mas</i>	Male fern
<i>Duboisia</i> spp.	Corkwood, Pituri
<i>Echium plantagineum</i>	Patterson's curse, Salvation Jane
<i>Echium vulgare</i>	Viper's bugloss
<i>Entoloma sinuatus</i>	Fungus
<i>Ephedra sinica</i>	Ma-huang

Schedule 23 Prohibited plants and fungi

Prohibited plants and fungi

Prohibited plants and fungi	
Species name	Common name
<i>Erysimum canescens</i>	
<i>Euonymus europaeus</i>	Spindle tree, Skewer wood
<i>Eupatorium rugosum</i>	White snakeroot
<i>Euphorbia</i> spp.	Euphorbia, Milkweed, Spurge, Pennyroyal oil
<i>Farfugium japonicum</i>	
<i>Galanthus nivalis</i>	Snowdrop
<i>Galerina</i> spp.	Fungi
<i>Gelsemium sempervirens</i>	Yellow Jessamine, Gelsemium
<i>Gymnopilus</i> spp.	Fungi
<i>Gyromitra esculenta</i>	False morel
<i>Haemadictyon amazonica</i>	Yage
<i>Heliotropium</i> spp.	Heliotrope
<i>Helleborus niger</i>	Black hellebore, Christmas rose
<i>Hemerocallis fulva</i>	Pale day lily
<i>Hippomane mancinella</i>	Manzanillo
<i>Homeria breyniana</i> (see <i>Homeria collina</i>)	
<i>Homeria collina</i>	One-leaved cape tulip
<i>Homeria miniata</i>	Two-leaved cape tulip
<i>Hydrastis canadensis</i>	Goldenseal root or its extract
<i>Hydnocarpus anthelmentica</i>	Chalmoogra seed
<i>Hyoscyamus niger</i>	
<i>Hypholoma fasciculare</i>	Black henbane, Stinking nightshade Sulphur tuft
<i>Ilex aquifolium</i>	Holly, English holly
<i>Inocybe</i> spp.	Fungi
<i>Ipomoea burmanni</i>	Morning glory
<i>Ipomoea hederacea</i>	Morning glory
<i>Ipomoea tricolor</i> (see <i>Ipomoea violacea</i>)	
<i>Ipomoea violacea</i>	Morning glory
<i>Juniperus sabina</i> oil	Savin oil
<i>Kalmia latifolia</i>	Calico bush, Mountain Laurel, Ivy Bush
<i>Laburnum anagyroides</i>	Laburnum, Golden chain, Golden rain, Bean tree
<i>Lantana camara</i>	Lantana
<i>Laurelia nova-zelandiae</i>	Pukatea
<i>Lepiota morgani</i>	Fungus
<i>Lithospermum</i> spp.	
<i>Lobelia inflata</i>	Indian tobacco, Lobelia
<i>Lophophora</i> spp.	Peyote
<i>Lycium ferocissimum</i>	Boxthorn, African boxthorn
<i>Mahonia aquifolium</i>	Oregon grape or Mountain grape root or its extract
<i>Mandragora officinarum</i>	European mandrake
<i>Manihot esculenta</i> Crantz (other than Sweet Cassava)	Cassava

Prohibited plants and fungi	
Species name	Common name
<i>Melia azedarach</i>	White cedar, Indian bead tree, Chinaberry
<i>Menispermum canadense</i>	Yellow parilla, Moonseed
<i>Myoporum laetum</i>	Ngaio, Kaio
<i>Narcissus jonquilla</i>	Narcissus, Daffodil, Jonquil
<i>Narcissus poeticus</i>	Narcissus, Daffodil, Jonquil
<i>Narcissus pseudonarcissus</i>	Narcissus, Daffodil, Jonquil
<i>Nerium oleander</i>	Oleander
<i>Nicotiana</i> spp.	Tobacco
<i>Oenanthe aquatica</i> (see <i>Oenanthe phellandrium</i>)	
<i>Oenanthe phellandrium</i>	Water fennel, Water dropwort
<i>Omphalotus</i> spp.	Fungi
<i>Opuntia cylindrica</i>	San Pedro cactus, Cane cactus
<i>Panaeolus</i> spp.	Fungi
<i>Papaver bracteatum</i>	Oriental poppy
<i>Papaver somniferum</i> (other than seeds)	Opium poppy
<i>Pausinystalia yohimbe</i> (see <i>Coryanthe yohimbe</i>)	
<i>Peganum harmala</i>	Wild rue
<i>Petasites</i> spp.	Butterbur
<i>Peumus boldus</i>	Boldo
<i>Phoradendron flavescens</i> (see <i>Viscum flavescens</i>)	
<i>Phoradendron serotinum</i> (see <i>Viscum flavescens</i>)	
<i>Phoradendron tomentosum</i> (see <i>Viscum flavescens</i>)	
<i>Physostigma venenosum</i>	Calabar bean, Ordeal bean
<i>Phytolacca decandra</i>	Red pokeweed, Poke root
<i>Phytolacca americana</i> (see <i>Phytolacca decandra</i>)	
<i>Phytolacca octandra</i>	Inkweed, Red ink plant, Dyeberry
<i>Pilocarpus</i> spp.	
<i>Piptadenia macrocarpa</i>	Cebil colorado, Cura pag
<i>Piptadenia peregrina</i>	Cohoba, Coxoba, Yoke
<i>Pithomyces chartarum</i>	Fungus
<i>Pluteus</i> spp.	Fungi
<i>Podophyllum peltatum</i>	American mandrake, Mayapple, Podophyllum
<i>Prestonia amazonica</i> (see <i>Haemodictyon amazonica</i>)	
<i>Prunus laurocerasus</i>	Cherry laurel
<i>Psoralea corylifolia</i>	Malay tea
<i>Psylocybe</i> spp.	Fungi
<i>Pteridium aquilinum</i>	Bracken Fern
<i>Pulmonaria</i> spp.	Lungwort

Species name	Common name
<i>Punica granatum</i> stem and root bark	Pomegranate
<i>Rauwolfia</i> spp.	Devil pepper, Rauwolfia
<i>Ricinus communis</i>	Castor bean, Castor oil plant
<i>Robinia pseudoacacia</i>	Black locust, False acacia
<i>Sanguinaria canadensis</i>	Bloodroot, Bloodwort
<i>Sarothamnus scoparius</i>	Common broom
<i>Scopolia carniolica</i>	Scopolia
<i>Senecio</i> spp.	Ragwort
<i>Solanum aviculare</i>	Poroporo, Pooporo, Kohoho, Bullibulli
<i>Solanum diflorum</i>	False Jerusalem cherry
<i>Solanum dulcamara</i>	Bittersweet twigs, Blue bindweed, Woody nightshade, Nightshade
<i>Solanum laciniatum</i> (see <i>Solanum aviculare</i>)	
<i>Solanum linnaenum</i> (see <i>Solanum sodomeum</i>)	
<i>Solanum nigrum</i>	Black nightshade
<i>Solanum pseudocapsicum</i>	Jerusalem cherries
<i>Solanum sodomeum</i>	Apple of Sodom
<i>Sophora microphylla</i>	Kowhai
<i>Sophora secundiflora</i>	Mescal bean
<i>Spartium junceum</i>	Spanish broom
<i>Spigela marilandica</i>	Pinkroot, Worm grass
<i>Strophanthus gratus</i>	Strophanthus
<i>Strophanthus kombe</i>	Strophanthus
<i>Stropharia cubensis</i>	Fungus
<i>Strychnos gautheriana</i>	Hoang nan
<i>Strychnos ignatii</i>	Ignatious bean
<i>Strychnos malaccensis</i> (see <i>Strychnos gautheriana</i>)	
<i>Strychnos nux-vomica</i>	Poison nut, Nux vomica
<i>Symphytum asperum</i>	Prickly comfrey
<i>Symphytum officinale</i>	Common comfrey
<i>Symphytum x uplandicum</i>	Russian comfrey
<i>Tamus communis</i>	Blackeye root, Black bryony
<i>Taxus baccata</i>	Yew, European yew, Common yew
<i>Thevetia neriifolia</i> (see <i>Thevetia peruviana</i>)	
<i>Thevetia peruviana</i>	Snake nut
<i>Trichodesma africana</i>	
<i>Tricholoma muscarium</i>	Fungus
<i>Tussilago farfara</i>	Coltsfoot
<i>Veratrum</i> spp.	Hellebore
<i>Vinca</i> spp.	Periwinkle
<i>Virola sebifera</i>	Cuajo negro, Camaticaro

<i>Xysmalobium undulatum</i>	Uzara, Thornbush
<i>Zamia integrifolia</i>	Coonties, Florida arrowroot

Schedule 24 Restricted plants and fungi

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Restricted plants and fungi are regulated by paragraphs 1.1.1—10(3)(a) and (4)(e) and Standard 1.4.4. This Standard lists plants and fungi for the definition of *restricted plant or fungus* in section 1.1.2—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ). See also section 1.1.1—3.

S24—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 24 — Restricted plants and fungi*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S24—2 Restricted plants and fungi

For paragraph (a) of the definition of *restricted plant or fungus* in section 1.1.2—3, the plants and fungi are:

Restricted plants and fungi		
<i>Species name</i>	<i>Common Name</i>	<i>Natural Toxicant</i>
<i>Artemisia absinthium</i>	Common wormwood	Thujone, santonin
<i>Artemisia cina Berg</i>	Levant wormseed	Thujone, santonin
<i>Artemisia maritima</i>	Levant wormseed	Thujone, santonin
<i>Artemisia vulgaris</i>	Mugwort	Thujone, santonin
<i>Chrysanthemum balsamita</i>	Costmary	Thujone
<i>Chrysanthemum parthenium</i> (see <i>Tanacetum parthenium</i>)		
<i>Cinchona</i> spp.	Cinchona	Quinine
<i>Cinnamomum camphora</i>	Camphor tree oil	Safrole, coumarin
<i>Cinnamomum micranthum</i>	Micranthum oil	Safrole, coumarin
<i>Hedeoma pulegioides</i> oil	American pennyroyal White snakeroot oil	Pulegone
<i>Hypericum perforatum</i>	St John's wort	Hypericine
<i>Mentha pulegium</i> oil	European pennyroyal oil	Pulegone
<i>Sassafras albidum</i>	American sassafras oil	Safrole
<i>Sassafras officinale</i> (see <i>Sassafras albidum</i>)		
<i>Tanacetum balsamita</i> (see <i>Chrysanthemum balsamita</i>)		
<i>Tanacetum parthenium</i>	Feverfew	Santonin
<i>Tanacetum vulgare</i>	Tansy oil	Thujone
<i>Thuja occidentalis</i>	Thuja, White cedar	Thujone

Schedule 25 Permitted novel foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Novel foods are regulated by paragraphs 1.1.1—10(3)(b) and (4)(f) and Standard 1.5.1. This Standard lists permitted novel foods, and specifies conditions for their use, for section 1.5.1—3.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S25—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 25 — Permitted novel foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S25—2 Sale of novel foods

For section 1.5.1—3, the permitted *novel foods and their conditions for use are:

Sale of novel foods	
<i>Permitted novel food</i>	<i>Conditions of use</i>
α-cyclodextrin	1. The name ‘alpha cyclodextrin’ or ‘α- cyclodextrin’ must be used when declaring the ingredient in the statement of ingredients.
γ-cyclodextrin	1. The name ‘gamma cyclodextrin’ or ‘γ- cyclodextrin’ must be used when declaring the ingredient in the statement of ingredients.
Diacylglycerol oil (DAG-Oil)	1. The name ‘Diacylglycerol oil’ must be used when declaring the ingredient in the statement of ingredients.
Dried marine micro-algae (<i>Schizochytrium</i> sp.) rich in docosahexaenoic acid (DHA)	
Oil derived from marine micro-algae (<i>Schizochytrium</i> sp.) rich in docosahexaenoic acid (DHA)	
Oil derived from marine micro-algae (<i>Ulkenia</i> sp.) rich in docosahexaenoic acid (DHA)	
Isomaltulose	

Schedule 25 Permitted novel foods

Section S25—2

Sale of novel foods

<i>Permitted novel food</i>	<i>Conditions of use</i>
*Phytosterols, phytostanols and their esters	<ol style="list-style-type: none"> 1. The food must comply with requirements in Standard 1.2.1 insofar as they relate to section 1.2.3—2. 2. May only be added to edible oil spreads: <ol style="list-style-type: none"> (a) according to Standard 2.4.2; and (b) where the total *saturated and *trans fatty acids present in the food are no more than 28% of the total fatty acid content of the food; and 3. May only be added to breakfast cereals, not including breakfast cereal bars, if: <ol style="list-style-type: none"> (a) the total fibre content of the breakfast cereal is no less than 3 g/50 g serve; and (b) the breakfast cereal contains no more than 30g/100g of total sugars; and (c) the *total plant sterol equivalents content is no less than 15 g/kg and no more than 19 g/kg.
*Phytosterols, phytostanols and their esters	<ol style="list-style-type: none"> 4. Foods to which phytosterols, phytostanols or their esters have been added must not be used as ingredients in other foods. 5. May only be added to milk in accordance with Standard 2.5.1. 6. May only be added to yoghurt in accordance with Standard 2.5.3
D-Tagatose	
Tall oil phytosterol esters	<ol style="list-style-type: none"> 1. Tall oil phytosterol esters must comply with the specification for tall oil phytosterol esters in Schedule 3. 2. The food must comply with the requirements in Standard 1.2.1 insofar as they relate to section 1.2.3—2. 3. The name ‘tall oil phytosterol esters’ or ‘plant sterol esters’ must be used. 4. May only be added to cheese and processed cheese, in accordance with Standard 2.5.4. 6. Foods to which tall oil phytosterol esters have been added must not be used as ingredients in other foods.
Trehalose	

Schedule 26 Food produced using gene technology

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Food produced using gene technology is regulated by paragraphs 1.1.1—10(3)(c) and (4)(g) and Standard 1.5.2. This standard lists food produced using gene technology, and corresponding conditions, for paragraph 1.5.2—3(a).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S26—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 26 — Food produced using gene technology*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S26—2 Interpretation

(1) In this Schedule, headings in bold type are for information only, and do not list food for the purpose of section 1.5.2—3.

(2) In this Schedule:

conventional breeding means all methods used to produce plants, excluding techniques that use gene technology.

line means:

- (a) a plant, the genetic material of which includes a transformation event or events; or
- (b) any plant, descended from the plant referred to in paragraph (a), that is the result of conventional breeding of that plant with:
 - (i) any other plant that does not contain a transformation event or events; or
 - (ii) any other plant that contains a transformation event or events, whether expressed as a line or event, that is listed in the table to section S26—3;
 - (iii) but shall not be taken to mean any plant derived solely as a result of conventional breeding.

transformation event means a unique genetic modification arising from the use of gene technology.

S26—3 Permitted food produced using gene technology and conditions

(1) The table to subsection (4) lists permitted food produced using gene technology.

Schedule 26 Food produced using gene technology

Section S26—3

Permitted food produced using gene technology and conditions

- (2) Items 2(m), 7(e), (g) and (h) are subject to the condition that their labelling must comply with section 1.5.2—4.

Note That section requires the statement ‘genetically modified’.

- (3) Item 2(m) is also subject to the condition that, for the labelling provisions, unless the protein content has been removed as part of a refining process, the information relating to *foods produced using gene technology includes a statement to the effect that the high lysine corn line LY038 has been genetically modified to contain increased levels of lysine.
- (4) The table for this subsection is:

Food produced using gene technology	
Commodity	Food derived from:

Schedule 26 Food produced using gene technology

Section S26—3

Permitted food produced using gene technology and conditions

Food produced using gene technology

<i>Commodity</i>	<i>Food derived from:</i>
8 Sugarbeet	(a) herbicide-tolerant sugarbeet line 77
	(b) herbicide-tolerant sugarbeet line H7-1

Schedule 27 Microbiological limits for foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Microbiological limits for foods are regulated by subsection 1.1.1—11 and Standard 1.6.1. This Standard lists information for section 1.6.1—2 and subsection 1.6.1—3(2).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S27—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 27 — Microbiological limits for foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S27—2 Definitions

Note In this Code (see section 1.1.2—2):

SPC:

- (a) means a standard plate count at 30°C with an incubation time of 72 hours; and
- (b) in relation to powdered infant formula products with added lactic acid producing organisms—means that standard plate count prior to the addition of the microorganisms to the food.

In this Schedule:

processed, in relation to egg product, means pasteurised or subjected to an equivalent treatment.

S27—3 Limit for SPC in powdered infant formula products

The limit for SPC in section S27--4 does not apply to powdered infant formula products that contain lactic acid producing microorganisms.

S27—4 Microbiological limits for foods

For section 1.6.1—2, the table is:

Microbiological limits in foods				
Column 1	Column 2	Column 3	Column 4	Column 5
	(n)	(c)	(m)	(M)
<i>Butter made from unpasteurised milk and/or unpasteurised milk products</i>				
<i>Campylobacter</i> /25 g	5	0	not detected in 25g	
Coagulase-positive staphylococci/g	5	1	10/g	10 ²

Schedule 27 Microbiological limits for foods

Section S27—4

Microbiological limits for foods

Microbiological limits for foods				
Column 1	Column 2 (n)	Column 3 (c)	Column 4 (m)	Column 5 (M)
<i>Butter made from unpasteurised milk and/or unpasteurised milk products (cont)</i>				
Coliforms/g	5	1	10/g	10 ² /g
<i>Escherichia coli</i> /g	5	1	3/g	9/g
<i>Salmonella</i> /25 g	5	0	not detected in 25g	
SPC/g	5	0	5x10 ⁵ /g	
<i>All cheese</i>				
<i>Escherichia coli</i>	5	1	10/g	10 ² /g
<i>Soft and semi-soft cheese (moisture content > 39%) with pH > 5.0</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>All raw milk cheese (cheese made from milk not pasteurised or thermised)</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Raw milk unripened cheeses (moisture content > 50% with pH > 5.0) mixed tart</i>				
<i>Campylobacter</i>	5	0	not detected in 25g	
<i>Dried milk</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Unpasteurised milk for retail sale</i>				
<i>Campylobacter</i>	5	0	not detected in 25g	
Coliforms/mL	5	1	10 ² /mL	10 ³ /mL
<i>Escherichia coli</i> /mL	5	1	3/mL	9/mL
<i>Salmonella</i>	5	0	not detected in 25g	
SPC/mL	5	1	2.5x10 ⁴ /mL	2.5x10 ⁵ /mL
<i>Packaged cooked cured/salted meat</i>				
Coagulase-positive staphylococci	5	1	10 ² /g	10 ³ /g
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Packaged heat treated meat paste and packaged heat treated pâté</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>All comminuted fermented meat which has not been cooked during the production process</i>				
Coagulase-positive staphylococci	5	1	10 ³ /g	10 ⁴ /g
<i>Escherichia coli</i>	5	1	3.6/g	9.2/g
<i>Salmonella</i>	5	0	not detected in 25g	

Schedule 27 Microbiological limits for foods

Section S27—4

Microbiological limits for foods

Microbiological limits for foods				
Column 1	Column 2	Column 3	Column 4	Column 5
	(n)	(c)	(m)	(M)
<i>Cooked crustacea</i>				
Coagulase-positive staphylococci	5	2	10^2 /g	10^3 /g
<i>Salmonella</i>	5	0	not detected in 25g	
SPC/g	5	2	10^5 /g	10^6 /g
<i>Raw crustacea</i>				
Coagulase-positive staphylococci	5	2	10^2 /g	10^3 /g
<i>Salmonella</i>	5	0	not detected in 25g	
SPC	5	2	5×10^5 /g	5×10^6 /g
<i>Bivalve molluscs, other than scallops</i>				
<i>Escherichia coli</i>	5	1	2.3/g	7/g
<i>Ready-to-eat food in which growth of Listeria monocytogenes can occur</i>				
<i>Listeria monocytogenes</i>	5	0	10^2 cfu/g	
<i>Ready-to-eat food in which growth of Listeria monocytogenes will not occur</i>				
<i>Listeria monocytogenes</i>	5	0	not detected in 25g	
<i>Cereal-based foods for infants</i>				
Coliforms	5	2	less than 3/g	20/g
<i>Salmonella</i>	10	0	not detected in 25g	
<i>Powdered infant formula products</i>				
<i>Bacillus cereus</i>	5	0	100	
Coagulase-positive staphylococci	5	1	0	10/g
Coliforms	5	2	less than 3/g	10/g
<i>Salmonella</i>	10	0	not detected in 25g	
SPC	5	2	10^3	10^4 /g
<i>Pepper, paprika and cinnamon</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Dried, chipped, desiccated coconut</i>				
<i>Salmonella</i>	10	0	not detected in 25g	
<i>Cocoa powder</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Cultured seeds and grains (bean sprouts, alfalfa etc)</i>				
<i>Salmonella</i>	5	0	not detected in 25g	

Schedule 27 Microbiological limits for foods

Section S27—4

Microbiological limits for foods

Microbiological limits for foods				
Column 1	Column 2 (n)	Column 3 (c)	Column 4 (m)	Column 5 (M)
<i>Processed egg product</i>				
<i>Salmonella</i>	5	0	not detected in 25g	
<i>Mineral water</i>				
<i>Escherichia coli</i>	5	0	not detected in 100mL	
<i>Packaged water</i>				
<i>Escherichia coli</i>	5	0	not detected in 100mL	
<i>Packaged ice</i>				
<i>Escherichia coli</i>	5	0	not detected in 100mL	

Schedule 28 Formulated caffeinated beverages

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Formulated caffeinated beverages are regulated by subsection 1.1.1—10(5) and Standard 2.6.4. This Standard lists substances and their corresponding permitted amounts for Standard 2.6.4.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S28—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 28 — Formulated caffeinated beverages*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S28—2 Formulated caffeinated beverages

For section 2.6.4—2 and section 2.6.4—5, the table is:

Formulated caffeinated beverages	
<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Permitted amount</i>
Thiamin	40 mg
Riboflavin	20 mg
Niacin	40 mg
Vitamin B ₆	10 mg
Vitamin B ₁₂	10 µg
Pantothenic acid	10 mg
Taurine	2 000 mg
Glucuronolactone	1 200 mg
Inositol	100 mg

Schedule 29 Special purpose foods

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the Australia New Zealand Food Standards Code. See also section 1.1.1—3.

Special purpose foods are regulated by Part 9 of Chapter 2, which contains Standard 2.9.1, Standard 2.9.2, Standard 2.9.3, Standard 2.9.4, Standard 2.9.5 and Standard 2.9.6. This Standard prescribes information for these standards.

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ).. See also section 1.1.1—3.

S29—1 Name

This Standard is *Australia New Zealand Food Standards Code — Schedule 29 — Special purpose foods*.

Note Commencement:

This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the New Zealand Gazette under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S29—2 Infant formula product—calculation of energy

- (1) For paragraph 2.9.1—4(2)(a), the energy content of infant formula product must be calculated using:
 - (a) the energy contributions of the following *components only:
 - (i) fat; and
 - (ii) protein; and
 - (iii) carbohydrate; and
 - (b) the relevant energy factors set out in section S11—2.
- (2) The energy content of infant formula product must be expressed in kilojoules.

S29—3 Infant formula product—calculation of protein content

For paragraph 2.9.1—4(2)(b), the protein content (*PC*) of infant formula product must be calculated in accordance with the following equation:

$$PC = NC \times F$$

where:

NC is the nitrogen content of the infant formula product.

F is:

- (a) for milk proteins and their partial protein hydrolysates—6.38; or
- (b) otherwise—6.25.

S29—4 Infant formula product—calculation of potential renal solute load

- (1) For paragraph 2.9.1—4(2)(c), the potential renal solute load (*PRSL*), in mOsm/100 kJ, must be calculated in accordance with the following equation:

Schedule 29 Special purpose foods

Section S29—4

Infant formula product—calculation of potential renal solute load

$$PRSL = \frac{Na}{23} + \frac{Cl}{35} + \frac{K}{39} + \frac{P_{avail}}{31} + \frac{N}{28}$$

where:

Na is the amount of sodium in the infant formula product in mg/100 kJ.

Cl is the amount of chloride in the infant formula product in mg/100 kJ.

K is the amount of potassium in the infant formula product in mg/100 kJ.

P_{avail} is given by the formula set out in subsection (2).

N is the amount of nitrogen in the infant formula product in mg/100 kJ.

(2) In subsection (1), *P_{avail}* is calculated in accordance with the following equation:

$$P_{avail} = P_{mbf} + \left(\frac{2}{3} \times P_{sbf} \right)$$

where:

P_{mbf} is the amount of phosphorus in the milk-based formula.

P_{sbf} is the amount of phosphorus in the soy-based formula.

Schedule 29 Special purpose foods

Section S29—5

Infant formula products—substances permitted as nutritive substances

S29—5 Infant formula products—substances permitted as nutritive substances

For section 2.9.1—5, the table is:

Infant formula products—substances permitted for use as nutritive substances

Column 1	Column 2	Column 3	Column 4
<i>Substance</i>	<i>Permitted forms</i>	<i>Minimum amount per 100 kJ</i>	<i>Maximum amount per 100 kJ</i>
Adenosine-5'-monophosphate	Adenosine-5'-monophosphate	0.14 mg	0.38 mg
L-carnitine	L-carnitine	0.21 mg	0.8 mg
Choline	Choline chloride Choline bitartrate	1.7 mg	7.1 mg
Cytidine-5'-monophosphate	Cytidine-5'-monophosphate	0.22 mg	0.6 mg
Guanosine-5'-monophosphate	Guanosine-5'-monophosphate Guanosine-5'-monophosphate sodium salt	0.04 mg	0.12 mg
Inosine-5'-monophosphate	Inosine-5'-monophosphate Inosine-5'-monophosphate sodium salt	0.08 mg	0.24 mg
Lutein	Lutein from <i>Tagetes erecta L.</i>	1.5 µg	5 µg
Inositol	Inositol	1.0 mg	9.5 mg
Taurine	Taurine	0.8 mg	3 mg
Uridine-5'-monophosphate	Uridine-5'-monophosphate sodium salt	0.13 mg	0.42 mg

Schedule 29 Special purpose foods

Section S29—6

Infant formula products—L-amino acids that must be present in infant formula and follow-on formula

S29—6 Infant formula products—L-amino acids that must be present in infant formula and follow-on formula

For section 2.9.1—10, the table is:

L-amino acids that must be present in infant formula and follow-on formula

<i>L-Amino Acid</i>	<i>Minimum amount per 100 kJ</i>
Histidine	10 mg
Isoleucine	21 mg
Leucine	42 mg
Lysine	30 mg
Cysteine & cysteine total	6 mg
Cysteine, cystine & methionine total	19 mg
Phenylalanine	17 mg
Phenylalanine & tyrosine total	32 mg
Threonine	19 mg
Tryptophan	7 mg
Valine	25 mg

Schedule 29 Special purpose foods

Section S29—7

Permitted forms of vitamins, minerals and electrolytes in infant formula products, food for infants and food for special medical purposes

S29—7 Permitted forms of vitamins, minerals and electrolytes in infant formula products, food for infants and food for special medical purposes

For sections 2.9.1—12, 2.9.2—4, 2.9.2—5, 2.9.2—6 and 2.9.5—6, the table is:

Permitted forms of vitamins, minerals and electrolytes in infant formula products, etc

<i>Vitamin, mineral or electrolyte</i>	<i>Permitted forms</i>
Vitamin A	
<i>Retinol Forms</i>	vitamin A (retinol) vitamin A acetate (retinyl acetate) vitamin A palmitate (retinyl palmitate) retinyl propionate
<i>Provitamin A Forms</i>	beta-carotene
Vitamin C	L-ascorbic acid L-ascorbyl palmitate calcium ascorbate potassium ascorbate sodium ascorbate
Vitamin D	vitamin D ₂ (ergocalciferol) vitamin D ₃ (cholecalciferol) vitamin D (cholecalciferol-cholesterol)
Thiamin	thiamin hydrochloride thiamin mononitrate
Riboflavin	riboflavin riboflavin-5'-phosphate, sodium
Niacin	niacinamide (nicotinamide)
Vitamin B ₆	pyridoxine hydrochloride pyridoxine-5'-phosphate
Folate	folic acid
Pantothenic acid	calcium pantothenate Dexpanthenol
Vitamin B ₁₂	cyanocobalamin hydroxocobalamin
Biotin	d-biotin
Vitamin E	dl- α -tocopherol d- α -tocopherol concentrate tocopherols concentrate, mixed d- α -tocopheryl acetate dl- α -tocopheryl acetate d- α -tocopheryl acid succinate dl- α -tocopheryl succinate

Schedule 29 Special purpose foods

Section S29—7

Permitted forms of vitamins, minerals and electrolytes in infant formula products, food for infants and food for special medical purposes

Permitted forms of vitamins, minerals and electrolytes in infant formula products, etc

<i>Vitamin, mineral or electrolyte</i>	<i>Permitted forms</i>
Vitamin K	Vitamin K ₁ as phylloquinone (phytonadione) Phtylmenoquinone
Calcium	calcium carbonate calcium chloride calcium citrate calcium gluconate calcium glycerophosphate calcium hydroxide calcium lactate calcium oxide calcium phosphate, dibasic calcium phosphate, monobasic calcium phosphate, tribasic calcium sulphate
Chloride	calcium chloride magnesium chloride potassium chloride sodium chloride
Chromium	chromium sulphate
Copper	copper gluconate cupric sulphate cupric citrate
Iodine	potassium iodate potassium iodide sodium iodide
Iron	ferric ammonium citrate ferric pyrophosphate ferrous citrate ferrous fumarate ferrous gluconate ferrous lactate ferrous succinate ferrous sulphate

Schedule 29 Special purpose foods

Section S29—7

Permitted forms of vitamins, minerals and electrolytes in infant formula products, food for infants and food for special medical purposes

Permitted forms of vitamins, minerals and electrolytes in infant formula products, etc

<i>Vitamin, mineral or electrolyte</i>	<i>Permitted forms</i>
Magnesium	magnesium carbonate magnesium chloride magnesium gluconate magnesium oxide magnesium phosphate, dibasic magnesium phosphate, tribasic magnesium sulphate
Manganese	manganese chloride manganese gluconate manganese sulphate manganese carbonate manganese citrate
Molybdenum	sodium molybdate VI
Phosphorus	calcium glycerophosphate calcium phosphate, dibasic calcium phosphate, monobasic calcium phosphate, tribasic magnesium phosphate, dibasic potassium phosphate, dibasic potassium phosphate, monobasic potassium phosphate, tribasic sodium phosphate, dibasic sodium phosphate, monobasic sodium phosphate, tribasic
Potassium	potassium bicarbonate potassium carbonate potassium chloride potassium citrate potassium glycerophosphate potassium gluconate potassium hydroxide potassium phosphate, dibasic potassium phosphate, monobasic potassium phosphate, tribasic

Schedule 29 Special purpose foods

Section S29—7

Permitted forms of vitamins, minerals and electrolytes in infant formula products, food for infants and food for special medical purposes

Permitted forms of vitamins, minerals and electrolytes in infant formula products, etc

<i>Vitamin, mineral or electrolyte</i>	<i>Permitted forms</i>
Selenium	seleno methionine sodium selenate sodium selenite
Sodium	sodium bicarbonate sodium carbonate sodium chloride sodium chloride iodised sodium citrate sodium gluconate sodium hydroxide sodium iodide sodium lactate sodium phosphate, dibasic sodium phosphate, monobasic sodium phosphate, tribasic sodium sulphate sodium tartrate
Zinc	zinc acetate zinc chloride zinc gluconate zinc oxide zinc sulphate

Schedule 29 Special purpose foods

Section S29—8

Infant formula products—limits on fatty acids that may be present in infant formula and follow-on formula

S29—8 Infant formula products—limits on fatty acids that may be present in infant formula and follow-on formula

For section 2.9.1—11, the table is:

Limits on fatty acids that may be present in infant formula and follow-on formula

<i>Fatty acid</i>	<i>Limits</i>
<i>Essential fatty acids</i>	
Linoleic acid (18:2)	no less than 9% of the total fatty acids no more than 26% of the total fatty acids
α -Linolenic acid (18:3)	no less than 1.1% of the total fatty acids no more than 4% of the total fatty acids
<i>Long chain polyunsaturated fatty acids</i>	
Long chain omega 6 series fatty acids (C \geq 20)	no more than 2% of the total fatty acids
Arachidonic acid (20:4)	no more than 1% of the total fatty acids
Long chain omega 3 series fatty acids (C \geq 20)	no more than 1% of the total fatty acids
Total <i>trans</i> fatty acids	no more than 4% of the total fatty acids
Erucic acid (22:1)	no more than 1% of the total fatty acids

Schedule 29 Special purpose foods

Section S29—9

Required vitamins, minerals and electrolytes in infant formula and follow-on formula

S29—9 Required vitamins, minerals and electrolytes in infant formula and follow-on formula

For section 2.9.1—12, the table is:

Required vitamins, minerals and electrolytes in infant formula and follow-on formula

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Vitamin, mineral or electrolyte</i>	<i>Minimum amount per 100 kJ</i>	<i>Maximum amount per 100 kJ</i>
Vitamins		
Vitamin A	14 µg	43 µg
Vitamin D	0.25 µg	0.63 µg
Vitamin C	1.7 mg	
Thiamin	10 µg	
Riboflavin	14 µg	
Preformed Niacin	130 µg	
Vitamin B ₆	9 µg	36 µg
Folate	2 µg	
Pantothenic acid	70 µg	
Vitamin B ₁₂	0.025 µg	
Biotin	0.36 µg	
Vitamin E	0.11 mg	1.1 mg
Vitamin K	1 µg	
Minerals		
Calcium	12 mg	
Phosphorus	6 mg	25 mg
Magnesium	1.2 mg	4.0 mg
Iron	0.2 mg	0.5 mg
Iodine	1.2 µg	10 µg
Copper	14 µg	43 µg
Zinc	0.12 mg	0.43 mg
Manganese	0.24 µg	24.0 µg
Selenium	0.25 µg	1.19 µg
Electrolytes		
Chloride	12 mg	35 mg
Sodium	5 mg	15 mg
Potassium	20 mg	50 mg

Schedule 29 Special purpose foods

Section S29—10

Guidelines for infant formula products

S29—10 Guidelines for infant formula products

Guideline for maximum amount of vitamins and minerals in infant formula products

- (1) It is recommended that the quantities specified in the table to this section be observed as the maximum levels of vitamins and minerals in infant formula product.

Guideline for maximum amount of vitamins and minerals in infant formula products

<i>Vitamin or mineral</i>	<i>Recommended maximum amount per 100 kJ</i>
Vitamins	
Vitamin C	5.4 mg
Thiamin	48 µg
Riboflavin	86 µg
Preformed Niacin	480 µg
Folate	8.0 µg
Pantothenic acid	360 µg
Vitamin B ₁₂	0.17 µg
Vitamin K	5.0 µg
Biotin	2.7 µg
Minerals	
Calcium	33 mg
Phosphorus	22 mg
Manganese	7.2 µg, for infant formula products specifically formulated to satisfy particular metabolic, immunological, renal, hepatic or malabsorptive conditions
Chromium	2.0 µg
Molybdenum	3 µg

Guideline on advice regarding additional vitamin and mineral supplementation

- (2) Manufacturers are recommended to provide an advice in the label on a package of infant formula product to the effect that consumption of vitamin or mineral preparations is not necessary.

Schedule 29 Special purpose foods

Section S29—10

Guidelines for infant formula products

Nutrition information table

- (3) It is recommended that the nutrition information table be set out in the format specified in the table to this section.

NUTRITION INFORMATION PANEL		
	Average amount per 100 mL made up formula (See Note 1)	Average amount per 100 g of powder (or per 100 mL for liquid concentrate) (see Note 2)
Energy	kJ	kJ
Protein	G	G
Fat	G	G
Carbohydrate	G	G
Vitamin A	µg	Mg
Vitamin B ₆	µg	Mg
Vitamin B ₁₂	µg	Mg
Vitamin C	Mg	Mg
Vitamin D	µg	Mg
Vitamin E	µg	Mg
Vitamin K	µg	Mg
Biotin	µg	Mg
Niacin	Mg	Mg
Folate	µg	Mg
Pantothenic acid	µg	Mg
Riboflavin	µg	Mg
Thiamin	µg	Mg
Calcium	Mg	Mg
Copper	µg	Mg
Iodine	µg	Mg
Iron	Mg	Mg
Magnesium	Mg	Mg
Manganese	µg	Mg
Phosphorus	Mg	Mg
Selenium	µg	Mg
Zinc	Mg	Mg
Chloride	Mg	Mg
Potassium	Mg	Mg
Sodium	Mg	Mg
(insert any other substance used as a nutritive substance or inulin-type fructans and galacto-oligosaccharides to be declared)	g, Mg, µg	g, Mg, µg

Schedule 29 Special purpose foods

Section S29—10

Guidelines for infant formula products

Note 1 Delete the words ‘made up formula’ in the case of formulas sold in ‘ready to drink’ form.

Note 2 Delete this column in the case of formulas sold in ‘ready to drink’ form.

Schedule 29 Special purpose foods

Section S29—11

Food for infants—claims that can be made about vitamins and minerals added to cereal-based food for infants

S29—11 Food for infants—claims that can be made about vitamins and minerals added to cereal-based food for infants

For section 2.9.2—10, the table is:

Claims that can be made about vitamins and minerals added to cereal-based food for infants

<i>Vitamin or mineral</i>	<i>Maximum claim per serve</i>
Thiamin (mg)	15% RDI
Niacin (mg)	15% RDI
Folate (µg)	10% RDI
Vitamin B ₆ (mg)	10% RDI
Vitamin C (mg)	10% RDI
Magnesium (mg)	15% RDI

S29—12 Formulated meal replacements—vitamins and minerals that must be present in formulated meal replacements

- (1) For sections 2.9.3—3, 2.9.3—4 and 2.9.6—4, the table is set out below.
- (2) In the table, the amounts set out in columns 2 and 3 are for a 1-meal serving, and are expressed as a proportion of the RDI.

Vitamins and minerals that must be present in formulated meal replacements

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Vitamin or mineral</i>	<i>Maximum amount</i>	<i>Maximum claim</i>
Vitamin A	300 µg (40%)	300 µg (40%)
Thiamin	No amount set	0.55 mg (50%)
Riboflavin	No amount set	0.85 mg (50%)
Niacin	No amount set	5 mg (50%)
Folate	No amount set	100 µg (50%)
Vitamin B ₆	No amount set	0.8 mg (50%)
Vitamin B ₁₂	No amount set	1 µg (50%)
Vitamin C	No amount set	20 mg (50%)
Vitamin D	5.0 µg (50%)	5 µg (50%)
Vitamin E	No amount set	5 mg (50%)
Calcium	No amount set	400 mg (50%)
Iodine	75 µg (50%)	75 µg (50%)
Iron	No amount set	4.8 mg (40%)
Magnesium	No amount set	160 mg (50%)
Phosphorus	No amount set	500 mg (50%)
Zinc	No amount set	4.8 mg (40%)

Schedule 29 Special purpose foods

Section S29—13

Vitamins and minerals that may be added to formulated meal replacements

S29—13 Vitamins and minerals that may be added to formulated meal replacements

- (1) For sections 2.9.3—3, 2.9.3—4 and 2.9.6—4, the table is set out below.
- (2) In the table, the amounts set out in columns 2 and 3 are for a 1-meal serving, and are expressed as a proportion of the *ESADDI unless stated otherwise.

Vitamins and minerals that may be added to formulated meal replacements

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Vitamin or mineral</i>	<i>Maximum amount</i>	<i>Maximum claim</i>
Biotin	No amount set	5 µg (17%)
Pantothenic acid	No amount set	0.8 mg (17%)
Vitamin K	No amount set	40 µg (50%)
<i>Chromium:</i>		
inorganic	34 µg (17%)	34 µg (17%)
organic	16 µg (8%)	no claim permitted
<i>Copper:</i>		
inorganic	0.50 mg (17%)	0.50 mg (17%)
organic	0.24 mg (8%)	no claim permitted
<i>Manganese:</i>		
inorganic	0.85 mg (17%)	0.85 mg (17%)
organic	0.4 mg (8%)	no claim permitted
<i>Molybdenum:</i>		
inorganic	42.5 µg (17%)	42.5 µg (17%)
organic	20 µg (8%)	no claim permitted
<i>Selenium:</i>		
inorganic	17.5 µg (25% RDI)	17.5 µg (25% RDI)
organic	9 µg (13% RDI)	9 µg (13% RDI)

Schedule 29 Special purpose foods

Section S29—14

Vitamins and minerals that may be added to formulated supplementary foods

S29—14 Vitamins and minerals that may be added to formulated supplementary foods

- (1) For section 2.9.3—5, the table is set out below.
- (2) In the table, the amounts set out in columns 2 and 3 are for a serving, and are expressed as a proportion of the RDI.

Vitamins and minerals that may be added to formulated supplementary foods

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Vitamin or mineral</i>	<i>Maximum amount</i>	<i>Maximum claim</i>
Vitamins		
Vitamin A	340 µg (45%)	265 µg (35%)
Thiamin	No amount set	0.55 mg (50%)
Riboflavin	No amount set	0.85 mg (50%)
Niacin	No amount set	5 mg (50%)
Folate	No amount set	100 µg (50%)
Vitamin B ₆	No amount set	0.8 mg (50%)
Vitamin B ₁₂	No amount set	1 µg (50%)
Vitamin C	No amount set	20 mg (50%)
Vitamin D	5 µg (50%)	5 µg (50%)
Vitamin E	No amount set	5 mg (50%)
Minerals		
Calcium	No amount set	400 mg (50%)
Iodine	75 µg (50%)	75 µg (50%)
Iron	No amount set	6 mg (50%)
Magnesium	No amount set	130 mg (40%)
Phosphorus	No amount set	500 mg (50%)
Zinc	No amount set	3 mg (25%)

Schedule 29 Special purpose foods

Section S29—15

Vitamins and minerals that may be added to formulated supplementary food for young children

S29—15 Vitamins and minerals that may be added to formulated supplementary food for young children

- (1) For sections 2.9.3—7 and 2.9.3—8, the table is set out below.
- (2) In the table, the amounts set out in columns 2 and 3 are for a serving, and are expressed as a proportion of the RDI.

Vitamins and minerals that may be added to formulated supplementary food for young children

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Vitamin or mineral</i>	<i>Maximum amount (as percentage of RDI)</i>	<i>Maximum claim (as percentage of RDI)</i>
Vitamins		
Vitamin A	135 µg (45%)	105 µg (35%)
Thiamin	No amount set	0.25 mg (50%)
Riboflavin	No amount set	0.4 mg (50%)
Niacin	No amount set	2.5 mg (50%)
Folate	No amount set	50 µg (50%)
Vitamin B ₆	No amount set	0.35 mg (50%)
Vitamin B ₁₂	No amount set	0.5 µg (50%)
Vitamin C	No amount set	15 mg (50%)
Vitamin D	2.5 µg (50%)	2.5 µg (50%)
Vitamin E	No amount set	2.5 mg (50%)
Minerals		
Calcium	No amount set	350 mg (50%)
Iodine	70 µg (100%)	35 µg (50%)
Iron	No amount set	3.0 mg (50%)
Magnesium	No amount set	32 mg (40%)
Phosphorus	No amount set	250 mg (50%)
Zinc	No amount set	1.1 mg (25%)

Schedule 29 Special purpose foods

Section S29—16

Vitamins and minerals that may be added to formulated supplementary sports foods

S29—16 Vitamins and minerals that may be added to formulated supplementary sports foods

- (1) For section 2.9.4—3, the table is set out below.
- (2) In the table, the amounts set out in columns 2 and 3 are for a *one-day quantity.

Vitamins and minerals that may be added to formulated supplementary sports foods

Column 1	Column 2	Column 3
<i>Vitamin or mineral</i>	<i>Maximum amount</i>	<i>Maximum claim</i>
Vitamins		
Vitamin A	375 µg	375 µg
Thiamin		2.2 mg
Riboflavin		3.4 mg
Niacin		20 mg
Folate		400 µg
Vitamin B ₆		3.2 mg
Vitamin B ₁₂		4 µg
Vitamin C		80 mg
Vitamin D	2.5 µg	2.5 µg
Vitamin E		20 mg
Biotin		50 µg
Pantothenic acid		3.5 mg
Minerals		
Calcium		1 600 mg
Chromium		
<i>inorganic forms</i>	100 µg	100 µg
<i>organic forms</i>	50 µg	50 µg
Copper		
<i>inorganic forms</i>	1.5 mg	1.5 mg
<i>organic forms</i>	750 µg	750 µg
Iodine 75 µg		75 µg
Iron		12 mg
Magnesium		640 mg
Manganese		
<i>inorganic forms</i>		2.5 mg
<i>organic forms</i>		1.25 mg
Molybdenum		
<i>inorganic forms</i>		125 µg
<i>organic forms</i>		62.5 µg
Phosphorus		1 000 mg
Selenium		
<i>inorganic forms</i>	52 µg	52 µg
<i>organic forms</i>	26 µg	26 µg
Zinc		12 mg

Schedule 29 Special purpose foods

Section S29—17

Additional permitted forms for vitamins and minerals in formulated supplementary sports foods and in formulated meal replacements

S29—17 Additional permitted forms for vitamins and minerals in formulated supplementary sports foods and in formulated meal replacements

For sections 2.9.3—3 and 2.9.4—3, the table is:

Additional permitted forms and intake amounts

<i>Column 1</i>	<i>Column 2</i>
<i>Vitamin or mineral</i>	<i>Permitted forms</i>
Biotin	d-biotin
Pantothenic acid	d-sodium pantothenate
Calcium	Calcium hydroxide
Chromium	
<i>Inorganic forms:</i>	Chromic chloride
<i>Organic forms:</i>	High chromium yeast
	Chromium picolinate
	Chromium nicotinate
	Chromium aspartate
Copper	
<i>Inorganic forms:</i>	Cupric carbonate
	Cupric sulphate
<i>Organic forms:</i>	Copper gluconate
	Copper-lysine complex
	Cupric citrate
Magnesium	Magnesium citrate
	Magnesium hydroxide
Manganese	
<i>Inorganic forms:</i>	Manganese carbonate
	Manganese chloride
	Manganese sulphate
<i>Organic forms:</i>	Manganese citrate
Molybdenum	
<i>Inorganic forms:</i>	Sodium molybdate
<i>Organic forms:</i>	High molybdenum yeast
Phosphorus	Magnesium phosphate, monobasic
	Potassium phosphate, tribasic
	Sodium phosphate, monobasic
	Sodium phosphate, tribasic
	Phosphoric acid

Schedule 29 Special purpose foods

Section S29—18

Amino acids that may be added to formulated supplementary sports food

S29—18 Amino acids that may be added to formulated supplementary sports food

For paragraph 2.9.4—3(1)(b), the table is.

Amino acids that may be added to formulated supplementary sports food

Column 1	Column 2
<i>Amino acid</i>	<i>Maximum amount that may be added to a one-day quantity</i>
L-Alanine	1 200 mg
L-Arginine	1 100 mg
L-Aspartic acid	600 mg
L-Cysteine	440 mg
L-Glutamine	1 900 mg
L-Glutamic acid	1 600 mg
Glycine	1 500 mg
L-Histidine	420 mg
L-Isoleucine	350 mg
L-Leucine	490 mg
L-Lysine	420 mg
L-Methionine	180 mg
L-Ornithine	360 mg
L-Phenylalanine	490 mg
L-Proline	1 100 mg
L-Serine	1 400 mg
L-Taurine	60 mg
L-Threonine	245 mg
L-Tyrosine	400 mg
L-Tryptophan	100 mg
L-Valine	350 mg

Schedule 29 Special purpose foods

Section S29—19

Substances that may be used as nutritive substances in formulated supplementary sports food

S29—19 Substances that may be used as nutritive substances in formulated supplementary sports food

For paragraph 2.9.4—3(1)(c), the table is:

Substances that may be used as nutritive substances in formulated supplementary sports food

<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Maximum amount that may be added to a one-day quantity</i>
L-carnitine	100 mg
Choline	10 mg
Inosine	10 mg
Ubiquinones	15 mg
Creatine	3 g
Gamma-oryzinol	25 mg

Schedule 29 Special purpose foods

Section S29—20

Substances that may be added to food for special medical purposes

S29—20 Substances that may be added to food for special medical purposes

For section 2.9.5—6, the table is.

Substances that may be added to food for special medical purposes

<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Permitted Forms</i>
Vitamins	
Niacin	Nicotinic acid
Vitamin B ₆	Pyridoxine dipalmitate
Folate	Calcium L-methylfolate
Vitamin E	D-alpha-tocopherol D-alpha-tocopheryl polyethylene glycol-1000 succinate (TPGS)
Pantothenic acid	Sodium pantothenate D-panthenol DL-panthenol
Minerals and Electrolytes	
Boron	Sodium borate Boric acid
Calcium	Calcium bisglycinate Calcium citrate malate Calcium malate Calcium L-pidolate
Chloride	Choline chloride Sodium chloride, iodised Hydrochloric acid
Chromium	Chromium chloride Chromium picolinate Chromium potassium sulphate
Copper	Copper-lysine complex Cupric carbonate
Fluoride	Potassium fluoride Sodium fluoride
Iodine	Sodium iodate

Schedule 29 Special purpose foods

Section S29—20

Substances that may be added to food for special medical purposes

**Substances that may be added to food
for special medical purposes**

<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Permitted Forms</i>
Iron	Carbonyl iron Electrolytic iron Ferric citrate Ferric gluconate Ferric orthophosphate Ferric pyrophosphate, sodium Ferric saccharate Ferric sodium diphosphate Ferrous bisglycinate Ferrous carbonate Ferrous carbonate, stabilised Ferrous L-pidolate Iron, reduced (ferrum reductum)
Magnesium	Magnesium acetate Magnesium L-aspartate Magnesium bisglycinate Magnesium citrate Magnesium glycerophosphate Magnesium hydroxide Magnesium hydroxide carbonate Magnesium lactate Magnesium phosphate, monobasic Magnesium L-pidolate Magnesium potassium citrate
Manganese	Manganese glycerophosphate
Molybdenum	Ammonium molybdate
Potassium	Potassium glycerophosphate Potassium lactate Potassium L-pidolate
Selenium	Selenium enriched yeast Sodium hydrogen selenite Sodium selenate
Zinc	Zinc bisglycinate Zinc carbonate Zinc citrate Zinc lactate

Schedule 29 Special purpose foods

Section S29—20

Substances that may be added to food for special medical purposes

Substances that may be added to food for special medical purposes

<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Permitted Forms</i>
Other substances	
Amino acids	Sodium, potassium, calcium, Magnesium salts of single amino acids listed in this section Hydrochlorides of single amino acids listed in this section L-alanine L-arginine L-asparagine L-aspartic acid L-citrulline L-cysteine L-cystine L-glutamic acid L-glutamine Glycine L-histidine L-isoleucine L-leucine L-lysine L-lysine acetate L-methionine L-ornithine L-phenylalanine L-proline L-serine L-threonine L-tyrosine L-tryptophan L-valine L-arginine-L-aspartate L-lysine-L-aspartate L-lysine-L-glutamate N-acetyl-L-methionine

Schedule 29 Special purpose foods

Section S29—20

Substances that may be added to food for special medical purposes

Substances that may be added to food for special medical purposes

<i>Column 1</i>	<i>Column 2</i>
<i>Substance</i>	<i>Permitted Forms</i>
Carnitine	L-carnitine L-carnitine hydrochloride L-carnitine L-tartrate
Choline	Choline Choline bitartrate Choline chloride Choline citrate Choline hydrogen tartrate
Inositol	Inositol
Nucleotides	Adenosine-5'-monophosphate Adenosine-5'-monophosphate sodium salt Cytidine-5'-monophosphate Cytidine-5'-monophosphate sodium salt Guanosine-5'-monophosphate Guanosine-5'-monophosphate sodium salt Inosine-5'-monophosphate Inosine-5'-monophosphate sodium salt Uridine-5'-monophosphate Uridine-5'-monophosphate sodium salt
Taurine	Taurine

Schedule 29 Special purpose foods

Section S29—21

Amounts of nutrients for food for special medical purposes represented as a sole source of nutrition

S29—21 Amounts of nutrients for food for special medical purposes represented as a sole source of nutrition

For section, 2.9.5—7, the table is:

Amounts of nutrients for food for special medical purposes represented as a sole source of nutrition

<i>Column 1</i>	<i>Column 2</i>	<i>Column 3</i>
<i>Nutrient</i>	<i>Minimum amount per MJ</i>	<i>Maximum amount per MJ</i>
Vitamins		
Vitamin A	84 µg retinol equivalents ¹	430 µg retinol equivalents ¹
Thiamin	0.15 mg	No maximum set
Riboflavin	0.2 mg	No maximum set
Niacin	2.2 mg niacin equivalents ²	No maximum set
Vitamin B ₆	0.2 mg	1.2 mg
Folate	25 µg	No maximum set
Vitamin B ₁₂	0.17 µg	No maximum set
Vitamin C	5.4 mg	No maximum set
Vitamin D		
(a) for products intended for children aged 1-10 years—	1.2 µg	7.5 µg
(b) otherwise—	1.2 µg	6.5 µg
Vitamin E equivalents	1 mg alpha-tocopherol ³	No maximum set
Biotin	1.8 µg	No maximum set
Pantothenic Acid	0.35 mg	No maximum set
Vitamin K	8.5 µg	No maximum set
Minerals		
Calcium		
(a) for products intended for children aged 1-10 years—	120 mg	600 mg
(b) otherwise—	84 mg	420 mg
Magnesium	18 mg	No maximum set
Iron	1.2 mg	No maximum set
Phosphorus	72 mg	No maximum set
Zinc	1.2 mg	3.6 mg
Manganese	0.12 mg	1.2 mg

Schedule 29 Special purpose foods

Section S29—21

Amounts of nutrients for food for special medical purposes represented as a sole source of nutrition

Amounts of nutrients for food for special medical purposes represented as a sole source of nutrition

Column 1	Column 2	Column 3
<i>Nutrient</i>	<i>Minimum amount per MJ</i>	<i>Maximum amount per MJ</i>
Minerals		
Copper	0.15 mg	1.25 mg
Iodine	15.5 µg	84 µg
Chromium	3 µg	No maximum set
Molybdenum	7 µg	No maximum set
Selenium	6 µg	25 µg
Electrolytes		
Sodium	72 mg	No maximum set
Potassium	190 mg	No maximum set
Chloride	72 mg	No maximum set

Note 1 See paragraph 1.1.2—14(3)(a)

Note 2 For niacin, add niacin and any niacin provided from the conversion of the amino acid tryptophan, using the conversion factor 1:60.

Note 3 See paragraph 1.1.2—14(3)(d)
