Subject: Submission re Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products
Follow Up Flag: Follow up
Flag Status: Blue

I would like to contribute my opinion on this topic.

Personally I would be extremely pleased if the sale and production of raw milk products was legalised and regulated in Australia.

I have consumed raw milk products in my lifetime (from farm gates, etc overseas and goat products here in Australia) and I think the taste is absolutely divine and far superior to pasteurised products. I would personally prefer to buy raw products if it were possible as I very much prefer foods in their natural states where possible as I feel they taste better, they are better for our health and for the environment (minimal processing, etc).

I know that not everyone shares my opinion, but I would love to have the right to choose raw products, even if they came with a warning.

I feel it is my right to make decisions about my own health and I should be allowed that choice.

In addition, I personally would not drink raw milk without some sort of regulation and testing to make sure the bottles are sterile and animals are healthy, etc. So it would be wonderful to see those kinds of regulations in place so I could choose to consume raw milk or products with some degree of safety.

Thank you so much for your time!
