

**SUBMISSION OF Christine Grace Laird RELATING TO: Proposal P1007-  
Primary  
Production & Processing Requirements For Raw Milk Products.**

**In 2003 I had a bone densitometry and found my bone density was in the low range and I had a very high risk of Osteoporosis.**

**I started using fresh milk bought from a farm and recently had another bone densitometry to check on my progress.**

**I am thrilled to tell you my bone density has increased and I have not taken any calcium supplements, only drinking the milk, which tastes divine.**

**My Granddaughters love this milk and will drink it in preference to processed milk.**

**I do not like and will not use processed milk as I and my siblings were brought up on unprocessed milk.**

**I strongly urge you to allow those who wish to be able to purchase milk untreated from farms.**

**Sincerely**

**Christine Laird**
