Subject: submission - raw milk and cheese made from raw milk

Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

I would like to submit that raw milk from free-ranging pasture-fed cows should be available to the public.

I would also like cheese, yogurt and other products made from this raw milk to be available.

The basis for my submission is that raw milk from cows ranging and feeding on grass is a nutritious food, and an important source of nutrient dense food in today's food climate.
