
Hi [REDACTED]

Just want to confirm with you that we have a slot for you to speak before lunch – about 20 minutes followed by an hour's discussions after lunch. Is that long enough for you? Are you to OK present something on the lines of the following:

How the definitions of the Act would be used to determine what NBTs are regulated or not – examples perhaps?

Is there a chance to harmonise with other regulatory authorities?

Is there a chance to critically review whether the new techniques pose real or unique concerns for risk/safety assessment, and if not should the techniques be regulated or at least require less data to be submitted?

If you have other ideas of what we should cover during the workshop please let me know. Just to let you know we have also invited [REDACTED].

I attach a program draft FYI.

Best Regards
