FSANZ: Applications and Submissions - Submission

Friday, 2 January, 2015

1. Assessment Report Number: A1097

2. Assessment Report Title: Food derived from Herbicide-tolerant and Insect-protected Corn Line MON87411

3. Organisation Name: Tania Condren

4. Organisation Type: Individual

5. Representing: myself

6. Street Address: [REDACTED]

7. Postal Address: [REDACTED]

8. Contact Person: Tania Condren

9. Phone: [REDACTED]

10. Fax: [REDACTED]

11. Email Address: [REDACTED]

12. Submission Text: I reject the introduction of more GMO foods into our country due to the obvious health risks such products provide and the lack of choice it provides due to poor labelling for GMO foods currently in our country. Roundup is toxic to humans and studies show that it does contribute to many major health problems and GM foods are created specifically to be resistant to the toxic roundup, thus the toxins are applied directly onto this food that we then eat. The GMO foods may be resistant to roundup but human's are not, and we are expected to eat this? We should at least have the choice to know if any processed food is GMO so we can make an educated decision. I don't trust that there has been enough substantial studies on the safety of GMO's and many countries are banning GMO's, specifically in Europe. Please keep these products off our shelves until at least more substantial study has been done to prove that our health and the planet's health is not negatively affected, or that better labelling is provided.
