Re: Food Derived from Insect-Protected Soybean Line MON87751

FTA Australia has reviewed this [Application](#) and endorses the following comments of the Technical Sub Committee:

The Committee agreed with this Application and agreed with Option 1 – to prepare a variation to Schedule 26, with the following comments:

- The Committee were concerned that although the Application mentions this variety will be used for conventional breeding for new varieties, it is assumed that products from the second generation varieties would not require GM labelling as they are not directly made from the GM soybean. How would traceability apply in this scenario if someone wanted to avoid any GM or GM sourced products?

If there are any queries regarding this submission, please contact the Technical Secretary of the Technical Committee, [REDACTED]

We would appreciate being maintained on the circulation list for any changes in this matter and to receiving notification of the next step concerning this [Application](#).

Yours sincerely,

Del Teesdale
PRESIDENT – FTA AUSTRALIA
