**Subject:** A1128 - Food derived from reduced Acrylamide Potential & Browning Potato Line E12

I wish to express my concern about changing the above Code to allow GM Potatoes into Australia. I do not believe that GM potatoes are necessary in Australia. We have some of the best food on the planet and do not need GM food to destroy our farmer's incomes as they will have to compete with cheap, frozen, imported GM chips. I do not believe the science is solid enough to suggest that it will not harm us in any way. It is imperative that we keep our agriculture clean from GM foods. Yours, Annie
