'Submission on A1193Irradiation of all fresh fruit and vegetables

Categories:

[REDACTED]

TO WHOM IT MY CONCERN

Queensland Government's application A1193 to
Irradiate ALL 'fresh' fruits and vegetables to kill fruit fly.

I request that you do not allow the radiation of any and all fruit and vegetables as requested by the Queensland Government.

Irradiation kills more than the targeted bacteria or pests and the results of this are currently unknown.

Whilst irradiation aims to extend the shelf life of a product it is impossible to tell how stale the product becomes and therefore it's nutritional value.

All irradiated food should be clearly labelled thereby giving purchaser full information and a real choice.

If producers in Queensland are allowed to irradiate any and all products without notification, I and many others would refrain from purchasing produce from Queensland.
