Subject: Submission on A1193 Irradiation of all fresh fruit and vegetables

To whom it may concern,

It is with great concern that I have become aware of the intentions to irradiate our fresh fruit and veg. It saddens me greatly to see the disconnect of people responsible for the wellbeing of Australians to even suggest compromising our food. This is done in America and they're cancer is through the roof, just because it doesn't show straight away does not mean it is not harmful.

Do you really want your Grandchildren eating irradiated food, If we do not start using sustainable farming practices that work with nature instead of quick fixes then bandaid solutions of toxic practices we have no hope of fighting any viruses. It is this complete disconnection with nature that has us in our current bind, Please give the children a fighting chance, Please do not destroy their chances of living a healthy life.
