Food irradiation in Qld

**Categories:**

[REDACTED]

Hi FSANZ,

I wish to object in the strongest possible terms to the Qld Government application to irradiated all fresh fruit and vegetables. This is outrageous, unnecessary and a health risk to us all. There can be no meaningful justification for such vandalism on our food supply.

Irradiating food represents a threat to health due to the use of the technology and has serious impacts on the nutritional quality of food and the justifications for its use are flimsy and not based on genuine scientific evidence.

I appeal to you to reject this maniacal application of radiation.

Yours sincerely,

[REDACTED]
