Subject: Please don't irradiate my food

To whom it may concern,

Please don't irradiate fruit and vegetables. Why? I prefer Zero radiation in my food!

I have been eating fruit and vegetables for 56 years now and for one reason or another, Depleted soils from Chemical sprays for example, the food we now get is losing its nutritional value bit by bit. In a report I read the nutritional loss is negligible-but negligible to who! When combined with other negligible things such as using Antibiotics on plants, maybe bit by bit we are losing food nutrition.

So for me, my family and the general public please do not irradiate our food.

Yours sincerely
