Subject: Submission on A1193 Irradiation of all fresh fruit and vegetables

To Whom it may Concern,

I strongly disagree with the proposal of irradiation on all levels.

I have spent the last 15 years working with food as a chef, I have a genuine care for humans and what they consume and think this idea is a disgusting option.

Australia and globally we should rethink the trade of fruit and vegetables and be only sourcing from within a local environment and eating what is in season within that environment. Farmers should be focusing on restructuring and working together towards small economies.

This would be much closer to a model that cared for our environments and fellow humans.
Making Irradiation discussions irrelevant.

Warm Regards,
