To whom it may concern,

Please DO NOT pass this. Irradiating fresh fruit and vegetables is something I feel will harm fruit and vegetables and then in turn, consumers. God gave us an abundance of fresh fruit and vegetables just how they are - do not play "God" and irradiate these before we consume.

Or is this your plan - to cause harm to consumers - where are your long term studies on this, say 20 or 30 years?

I will also be following this up with my local MP - this can not be approved, it can not be proven safe - especially long term.

Regards,
