Subject:

A1193: Irradiation as a phytosanitary measure for all fresh fruit and vegetables

Categories:

To whom it may concern,

I DO NOT consent to all fresh fruit and vegetables being irradiated, for several reasons. We as the people, do not consent, and I am disappointed that the deadline for public comment has been shortened.

I am shocked to read that FSANZ has changed the date of public consultation on this important matter without properly informing the public. I ask you to extend the public consultation period.

This suggestion is not in the best interest of public health and nutrition. We as the public MUST have choice over our health, and the food that is readily available for purchase. I am strongly against this suggested move.

Regards,
