Subject: Submissions on A1193 irradiation of fruit and vegetables.

This preposterous Bill to be passed without the general public awareness is totally ridiculous. Hippocrates said "Let food be the medicine, and let medicine be the food" Where does irradiation come into that equation?

Furthermore, Food irradiation breaks chemical bonds, and new molecules can form.

The goal of food irradiation is to remove toxic and dangerous components from our food items. When we apply this technology to certain foods, then hazardous outcomes can result because exposure to ionizing radiation breaks chemical bonds, allowing new molecules to form.

Pushing this law in the back door just before Christmas is an injustice to humanity.
