Food Standards Australia New Zealand

## Irradiation of Food

I am constantly astonished, disappointed and angered by the disrespect our government shows us. You allow (encourage?) the use of pesticides, (some known to be carcinogenic) in/on our food that fuels our bodies.

Now you want to irradiate our food as well!

Having experienced radiotherapy twice in the last 10 years I know what effect it has on living cells.

Yes radiation can kill some bad cells but it also kills good, necessary, living cells. As a living being I have the potential to rebuild those good cells. The produce, once harvested cannot. Why on earth would anyone do this to our food?

Who does this benefit? I suspect only multi national corporations. I am confident the farmers will not be eating irradiated food.

Apparently our health is less important than the \$\$\$ these global corporations generate.

Homo sapiens seem to be the only species to believe it's ok to poison our food chain.

This is NOT ok!

Regards
