Submission on A1193 Irradiation of all fresh fruit and vegetables

**Categories:**

[REDACTED]

I'd like to OPPOSE irradiation of fresh fruits and vegetables. I've read the doc and it states that the irradiation process decreases nutrients. Any decrease in nutrients is bad! Australia should not be made to eat fresh fruits and vegetables that do not contain all of there nutrients. This is a grossly overreaching attempted mandate by the QLD government.

Please confirm you have received and recorded my opposing submission.
