Dear Sir / Madam

**Submission – Proposal M1015 – Maximum Residue Limits (2017)**

Thank you for the opportunity to provide a submission on the Call for Submissions paper for Proposal M1015.

This submission provides comment on the proposed changes to the *Australia New Zealand Food Standards Code* (the Code). It was prepared with the advice of officers from the Queensland Department of Agriculture and Forestry (DAF) and Safe Food Production Queensland (SFPQ). The submission does not represent a Queensland Government position, which will be a matter for the Queensland Government should notification be made by the FSANZ Board to the Australia and New Zealand Ministerial Forum on Food Regulation.

Proposal M1015 has been prepared to consider varying certain agvet maximum residue limits (MRLs) in Schedule 20 of the Code.

There is a typographical error for methomyl in clause 1.4 (inserting for each of the following chemicals, the foods and associated MRLs in alphabetical order) in Attachment A – Draft variation to the *Australia New Zealand Food Standards Code*. Methomyl is listed as methomy.

Should you require further information in relation to this matter, please contact Food Safety Standards and Regulation, Health Protection Branch, Department of Health on
