

Response to: Proposal P1037 Amendments associated with Nutrition Content & Health Claims

FSANZ consultation closing 6th July 2015

Dairy Australia is the dairy industry owned service organisation, whose members are farmers and industry bodies, including the Australian Dairy Farmers, and the Australian Dairy Products Federation.

Dairy Australia welcomes the opportunity to comment on the Consultation: Proposal P1037 Amendments associated with Nutrition Content & Health Claims and provides the following general comment.

When considering P1037, Dairy Australia recognises the proposed amendments are generally consistent with the objective of achieving the following outcomes:

- addressing the identified inconsistencies with existing requirements in the Code and the intent of Proposal P293 as is currently generally understood;
- addressing the lack of clarity resulting from the gazettal of Standard 1.2.7 and associated amendments to the Code.

From an overarching perspective Dairy Australia supports the update of standards to ensure clarity and consistency of interpretation, as well as easy navigation to access the most up to date information on specific criteria for all users.
